Executive Summary

An Archaeological Impact Assessment (AIA) was undertaken for the proposed development at Nga Tsin Wai. Archaeological Assessments Limited (AAL) was commissioned in 2016 by the Urban Renewal Authority (URA) to conduct the AIA with scope and methodology agreed with the Antiquities and Monuments Office (AMO). The preliminary results of the archaeological investigation are fully documented in the AIA Report, which was first submitted to AMO after completion of the archaeological works during the 1st stage in 2016. The preliminary results indicated Further Investigation was required to adequately assess the potential impacts and significance of the findings. Upon granting of the new license by Antiquities Authority, the Further Investigation field works were conducted between 15 March and 15 October 2018. During the same period, excavation and field investigation at the moat (T2) location was also carried out to meet AMO's requirement from 1st stage AIA; the results were included in the updated AIA report.

According to new license granted by Antiquities Authority, 5 of the 11 excavated trenches from the AIA were enlarged for Further Investigation. The remains of the enclosing wall, watch towers, moat and village layout (houses and lanes) were found in the archaeological record. A summary of the objectives and results are as follows:

T1: The objective was to uncover the entire watch tower room and area, which was achieved. Excavations uncovered stone wall remains of tower and walled construction with evidence of remodelling of walls and destruction. Settlement activity evidence included stone floor, stone and brick drain, post/stake holes, and material findings;

T3: The objective was to find evidence of the watch tower and enclosure wall. The excavation recorded the layout of the tower and enclosure wall and found that the original Trench 3 was positioned immediately outside the tower remains. Structural remains were identified but were found to be heavily disturbed. Settlement activity included stone floor, stone drain, post/stake holes, and material findings;

T5: The objective was to establish the presence of a pre-walled settlement at Nga Tsin Wai. The excavation did not reveal pre-walled settlement but included a Coastal Evacuation abandonment layer, evidence of construction method for enclosure wall as well as stone and brick drain and settlement activity from Qing dynasty to recent;

T7: The objective at T7 was two-fold: to confirm abandonment and subsequent resettlement periods in early Qing dynasty and establish the layout of the tower and enclosure wall. The watch tower room and village walls were excavated, and maintenance or repair phases were recorded. Based on construction method part of the western village wall is interpreted as original. Abandonment during Coastal Evacuation was not noted but evidence for settlement phases ranging from possibly Ming dynasty to modern times were excavated as floors and walls, post and stake holes, stone floor, trenches and a ditch;

T9: The objective was to uncover the entire layout of watch tower area. Modern disturbances were noted overlaying a small lime stove (likely dating to the 18th century), but the overall area

showed shallow cultural strata with some postholes. Trench 9 contained the best-preserved watch tower structural remains.

The layout of the unearthed village walls, watch towers and remains of defences reflects the 1902 map of Nga Tsin Wai and are components of a typical walled village. Five broad events were noted in the archaeological stratigraphy of the village: possible pre-Coastal Evacuation (unconfirmed settlement) presence in 1570-74 (T9 and possibly T7), abandonment of area during Coastal Evacuation in 1662-1668 (T5, possibly T1/T7), 18th century post-Coastal Evacuation construction of village (all trenches), 19th century repair phase (all trenches), WWII and modern modifications to walled village (all trenches).

The archaeological remains show authentic elements of the walled village including original interior layout, construction of enclosure wall and towers and its many modifications, and shape and infill of the moat. The significance of Nga Tsin Wai Village lies in its historical associations and its share in the group value of the cultural landscape of historic sites and monuments in Kowloon Bay. The recognizable and prominent structural archaeological remains as unearthed at the four corners during the Further Investigation, however, are part of the last walled village in Kowloon, evoke strong public sentiment and are a unique opportunity to present archaeology within an urban setting to the wider public. The remains illustrate characteristics of the walled village and are part of the narrative of the historical significance of Nga Tsin Wai and the history of Kowloon Bay.

The proposed development includes, in addition to the Conservation Park, preservation *in situ* of the four watch tower corners remains. Prior to final archaeological impact assessment of proposed development on Nga Tsin Wai, however, further excavation of north and south village wall sections within the development footprint are needed (Stage 1 works).

行政摘要

就衙前圍擬議發展已完成一項考古影響評估。考古通有限公司（AAL）於 2016 年受市區重建局（市建局）委託，進行是項考古影響評估，其評估範圍與方法皆由古物古蹟辦事處（古蹟辦）核准。考古影響評估報告已載錄是次考古調查的初步研究結果，並於 2016 年第一階段考古工作完畢後呈交予古蹟辦。初步研究結果指出進一步調查的必要性，以便充分評估對考古發現以及衙前圍村的潛在影響及其重要性。獲古物事務監督簽發新牌照後，進一步的實地調查工作於 2018 年 3 月 15 日至 10 月 15 日期間進行。在同一時間段內，為回應古蹟辦在考古影響評估第一階段時提出的要求，考古發掘與實地調查亦於護城河位置的探方 T2 內進行；發掘結果已被納入最新的考古影響評估報告。

根據古物事務監督新簽發的牌照，考古影響評估階段所發掘的 11 個探方中的 5 個，於進一步調查階段拓大發掘範圍。考古發現包括圍牆、圍斗、護城河以及村內佈局（房屋和巷道）等的遺存。下述各探方之發掘目的和結果之概要：

T1:發掘旨在揭露整個圍斗（瞭望台）及圍斗附近區域，目標已達至。考古發掘揭露了圍斗、圍牆的牆基遺跡，並有牆基經改造和破壞的證據。發掘亦出土與居住相關的活動證據，包括石舖地面、石製和磚製的排水道、柱洞/樁孔，以及遺物；

T3:發掘目標是確認是否有東南圍斗和圍牆的存在及相關證據。錄得圍斗和圍牆的佈局，並發現原來的探方 T3 剛好設在圍斗遺存以外的位置。建築遺存的確存在，但已受到嚴重的破壞。居住相關的活動證據包括石舖地面、石製排水道、柱洞/樁孔，以及遺物；

T5:發掘旨在確認衙前圍村圍牆建立以前的居住遺存是否存在。發掘並未揭示圍牆建立以前的居住遺存，但卻含有一層遷海令期間的廢棄地層，以及圍牆的建造方法、石製和磚製的排水道和清代至今的居住活動等的證據。

T7:探坑 T7 的發掘目標可分為兩方面：進一步確認遷海令期間的廢棄期和隨後的清初居住期，以及確定是否有西北圍斗和圍牆的存在及相關證據。發掘出土了圍斗和圍牆，錄得其經多期維修的證據。基於村西圍牆部分的建造方法，可將村西圍牆詮釋為原有的圍牆。遷海令期間的廢棄期未有發現，但與居住相關的證據，例如地面、牆基、柱洞和樁孔、石舖地面、坑槽和一道溝渠卻有發現，其年代分期從疑似明代到現代。

T9:發掘旨在揭露圍斗附近區域的完整佈局。發現了被現代擾亂地層所覆蓋的一個小型石灰窯（疑似為 18 世紀），但總體而言該區域只有若干柱洞和淺薄的文化層。此外，探方 T9 擁有保存最為完好的圍斗建築遺存。

發掘到的圍牆、圍斗和建築遺跡的佈局呼應了 1902 年的衙前圍村地圖，同時也是一座典型圍村的組成部分。該村考古地層反映了五個大事件：公元 1570-74 年間疑似「遷海令以前」之遺存（未確認的居住遺跡，存在於 T9，T7 也可能存在），公元 1662-68 年遷海令期間形成的區域棄置（見 T5，也可能存在於 T1 和 T7），18 世紀遷海令結束後的村子建造時期（見於所有探方），19 世紀修復階段（見於所有探方），第二次世界大戰和現代時期對圍村建築的改造（見於所有探方）。

考古遺存顯示了圍村的原裝元素，包括村子內部的原來佈局、圍牆和圍斗的建造和多次改造，以及護城河的形制和堆填。衙前圍村的重要意義在於其與九龍灣具歷史意義的遺址和古蹟之間

的歷史關聯，以及它在此文化景觀中貢獻出的一份群體價值。至於在進一步調查過程中，在圍村四角出土的易於辨識且突出的建築考古遺存，則是九龍地區最後的圍村的一部分，不但喚起強烈的公眾關注，而且提供了一個在市區環境中向廣大市民展示考古的獨特機會。這些遺存展示了圍村的特徵，是衙前圍歷史意義和九龍灣歷史敘述的一部分。

除保育公園外，該擬議發展項目還包括原址保留四座圍斗遺存。然而，在對衙前圍進行屬於擬議開發的最終考古影響評估之前，需要進一步發掘開發範圍內的南北村圍牆部分（第一階段工作）。

1. INTRODUCTION

1.1 Project Background

Nga Tsin Wai is the last surviving walled village in Kowloon. Its condition however, has been steadily deteriorating since the beginning of the 20th century, especially after 1912 when the overland trade route via Kowloon Bay changed to road and railway, leading to job losses and people moving out of the village and into the surrounding areas. Thus, in 1998, it was included as one of the Phase 2 urban renewal redevelopment projects announced by the former Lands Develpopment Corporation (LDC). The LDC was established in 1988 to address the increasing problem of deteriorating conditions within the older urban districts in Hong Kong. LDC was replaced by the Urban Renewal Authority (URA) in 2001 which is currently managing the project in association with a private joint development partner. The site of Nga Tsin Wai was zoned as Resiential R(A) site under the outline zoning plan which allows for high density residential development under the current planning system. The proposed redevelopment for Nga Tsin Wai, will include the construction of two high rise residential blocks and the development of a Conservation Park (including preservation in situ of some elements of the historic village). The planning intention and related requirements of the Conservation Park had also been included in the latest outline zoning plan.

During the early stages of public consultation it was made clear by the local community that partial preservation of the old village should be incorporated into the proposed design with the Tin Hau Temple, Entrance Gate and "Hing Yau Yu" inscription tablet being specifically highlighted for preservation. In response, the URA commissioned a study to recommend approaches to incorporate heritage conservation strategies into the redevelopment plans. The resulting report recommended a "conservation by design" approach that would preserve the historic central axis of the village and eight village houses along this axis as well as the Tin Hau Temple and the Entrance Gate including the "Hing Yau Yu" inscription tablet. In addition, the findings of the *Conservation Study for Nga Tsin Wai Village* commissioned by URA in 2006 (LCM & Associates and Loh 2009) included an indepth investigation of the historical background of the village (LCM & Associates 2007) and a GPR survey (LCM & Associates 2007a) as a non-invasive method for the identification of subsurface archaeological features.

Prior to the construction of the residential development, the Antiquities and Monuments Office (AMO) requested that URA conduct an Archaeological Impact Assessment (AIA) for the proposed development. As recommended in the conservation study report, this would include verifcation of the anomolies detected during the GPR survey through archaeological investigation to collect field data to ascertain the archaeological potential of Nga Tsin Wai Village for impact assessment and recommendation of appropriate mitigation measures.

Archaeological Assessments Limited (AAL) was commissioned to conduct the AIA which included the archaeological investigation with eleven trenches (agreed with AMO) conducted between 7 March to 7 October and 15 October to 7 November 2018 for T2. The AIA Report was prepared after the first stage and it concluded further excavation works were required to adequately assess the moat in T2 and the potential impacts and significance of the findings in further 5 areas. The scope and methodology of the Further Investigation Works was agreed with AMO and field works were conducted between 15 March and 15 October 2018.

The Further Investigation Report includes the results of the further archaeological investigation and evaluation of development on Nga Tsin Wai Village based on a holistic approach and including all new and previously obtained information.

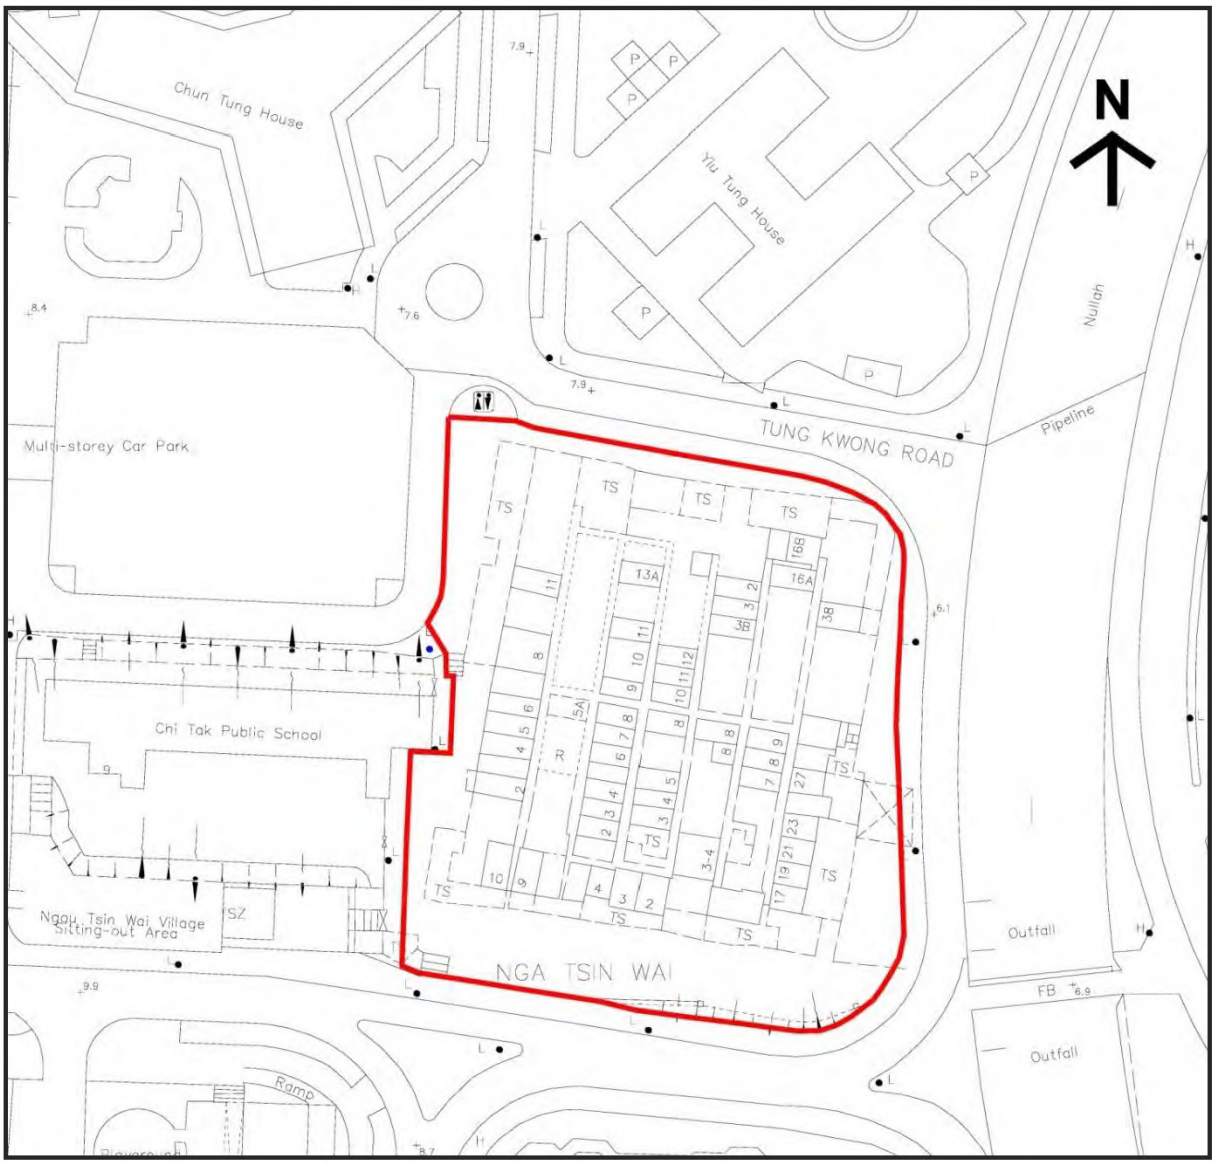

Figure 1 Licence Area marked with red line.

1.2 Terminology

The project concerns Nga Tsin Wai walled village and the following terms are part of the study:

Enclosure wall: Enclosure wall includes both the stone village wall, the brick walls and the watch towers. Enclosure wall refers to the complete defensive wall around the village.

Watch tower: Watch towers are part of the defenses of the village and are part of the enclosure wall.

Village wall: Village wall concerns all or part of the stone part of the enclosure wall and any brick wall remains on top. Village wall refers to the partial remaining enclosure wall and wall foundation remains.

Watch tower wall: Watch tower wall are similar to village wall and concerns all or part of the stone part of the watch tower, including watch tower foundation remains, and

any brick wall remains on top.

Moat (in-)fill: Moat fill or moat infill refers to event(s) after the use of the (open) moat in defense of the village. In this case mainly filling of moat during WWII.

Moat deposit: Moat deposit are soils within the moat formed during the use of the moat.

2. METHODOLOGY

2.1 Aims and Objectives

The objective of Further Investigation (FI) is to evaluate the potential for the proposed development site to contain additional archaeological information and to assess the direct and indirect impacts on such archaeological materials and deposits that will result from the project in both the construction and operational phases.

The FI Report will present the results of further field investigation and together with the AIA gleaned information aims to provide a holistic assessment of impacts on archaeology and significance of Nga Tsin Wai. Mitigation measures, such as preservation *in situ*, further investigation, archaeological watching brief and/or rescue excavation will then be proposed where appropriate.

2.2 Further Investigation Process

The FI is undertaken in accordance with the *Guidelines for Archaeological Impact Assessment* issued by AMO and focuses on further field works; this includes the following steps:

— *Submission of Licence Application*

A licence application along with the agreed scope and methodology is submitted by a professional archaeologist to the Antiquities Authority for approval. The granting of the licence takes up to 8 weeks.

— *Implementation of the Archaeological Investigation*

The methodology includes the extension of five trench excavations previously part of the 2016 AIA which is carried out to verify the archaeological significance of previous findings and obtain further information on structural remains related to the defences of Nga Tsin Wai within the licence area (Figure 1).

Hand digging of trenches was carried out to determine the presence/absence of archaeological deposits and their stratigraphy. The size and location of the trenches to be extended was influenced by the results of the 2016 AIA. Excavation continued until decomposing rock or sterile soil was reached and no potential for further cultural layers existed/ or when the maximum safe working depth was reached or despite the use of dewatering measures or shoring, the trench walls became unstable.

During excavation, contexts, finds and features were recorded, soils were described, and relevant depths measured. Artefacts were collected, bagged and labelled by context. Sections were photographed, video recorded and drawn and, when required, ground plans were also photographed, video recorded and/or drawn. The position of each trench, its top and bottom levels and associated temporary benchmark (TBM) were recorded by a qualified land surveyor and plotted on 1:1000 scale mapping. On completion of all recording and site inspection by the AMO, trenches were backfilled. A more detailed topographical picture of the elevation of the lanes within the village was gained through survey and mapping.

— *Processing and analysing of the excavated material and findings*

Archaeological materials were washed, photographed and described. In addition to artefacts the excavations yielded some eco-material such as, bone, shell and other organic material. They were identified and analysed, as far as possible.

— *Identification of Impacts and Mitigation Recommendation*

Nga Tsin Wai Village is a known site with archaeological potential which will be partially preserved in the Conservation Park. If the desk-based review and archaeological investigation fail to provide a good understanding of the site, further works such as additional investigation may be recommended, while complete or partial preservation *in situ*, rescue excavation or watching brief are possible mitigation actions.

— *Draft and Final Report Preparation*

This report has been compiled following the requirements as outlined in the AMO's *Guidelines for Archaeological Reports*. The report will be submitted to AMO for approval, and once the report has been approved, five hardcopies of the Final Further Investigation Report (with soft copies in both Microsoft Word format and Acrobat PDF format) will be submitted. The Final Further Investigation Report will be kept in the Reference Library of the Hong Kong Heritage Discovery Centre and uploaded to the project proponent's website and linked to the AMO's website for public viewing.

— *Preparation and Submission of Archive to AMO*

The processing of recovered archaeological material and preparation of the project archive has followed the AMO's *Guidelines for Handling of Archaeological Finds and Archives*. The archive will be submitted once the Final Further Investigation Report has been accepted by AMO.

3. CULTURAL HERITAGE LEGISLATION AND STANDARDS

Local legislation, Standards, Guidelines and Criteria relevant to the consideration of archaeological impacts assessment under this study include the following:

- Antiquities and Monuments Ordinance (Cap.53);
- Environmental Impact Assessment Ordinance (Cap.499); including Technical Memorandum on Environmental Impact Assessment Process and the Guidelines for Cultural Heritage Impact Assessment.
- Hong Kong Planning Standards and Guidelines.

A description of the legislation and guidelines mentioned is outlined in the AIA Report.

Internationally, conservation principles which may be applied include the Burra Charter (2013), Hoi An Protocols (2009), English Heritage (2008), Australian Heritage Council on conservation and management of ruins (2013), and ICOMOS guidelines on HIA for Cultural World Heritage Properties (2011). The conservation principles are particularly relevant for preservation, and interpretation of heritage sites, but may be used to guide development constraints in this case. The relevant paragraphs are described in the AIA Report.

4. BASELINE REVIEW AND 2016 AIA RESULTS

4.1 Baseline Review

Nga Tsin Wai is in Kowloon Bay to the east-northeast of Kowloon. Kowloon Bay is a large, well sheltered bay backed by an expansive alluvial flat hinterland intersected by few low-lying hills and fringed by sand along the coastline. The original coastline, however, has been modified by reclamations going back to as early as 1924 (Hong Kong Geological Survey 1986).

The village of Nga Tsin Wai is located on alluvial soils and there was formerly a large perennial stream to its north. A wet moat existed around the village. During World War II the Japanese had a nullah excavated to the east of the village (which still exists), it is reported that at the same time the moat around the village was filled in.

A detailed historical background was compiled with assistance of historian Patrick Hase and the late archaeologist Au Ka Fat for the 2005/2006 commissioned study, *Conservation Study for Nga Tsin Wai Village* (LCM & Associates and Laurence Loh 2007 (revised in 2009) and Hase 1999). The document is comprehensive, and the highlights of the settlement's history and the main points are summarised in the AIA Report.

An oral history project[1] was undertaken in Nga Tsin Wai circa 2013 which collected the villagers 'stories. The stories focus on more recent history and highlight how the village dynamics further changed after or around WWII, as many indigenous inhabitants fell into poverty during the Japanese occupation of 1941 to 1945, sold their ancestral homes and either moved away or moved in with family. The environment surrounding the village also changed drastically during this time. Most significantly, the open moat was closed, and housing constructed on top. Villagers' interviews and targeted desk-based historical review were also conducted as part of the Further Investigation.

4.2 Summary of 2016 AIA Results

The results of AIA field investigation in 2016 (and 2018 at T2) provide preliminary information on the development of the village during the Ming/Qing dynasty, possibly pre- and post-Coastal Evacuation era. Based on results of ground penetrating radar survey (GPRS) and desk-based review, eleven trenches had been agreed with AMO. The excavation provided information on interior village layout, watch tower and village wall remains and moat deposits. Brief description is as follows:

(1) The results within the village (T4, T6, T8, T10, and T11) indicated that artefacts from the original settlement and older historic phases were removed from the central parts of the village and only single-phase structural remains belonging to the Ming/Qing dynasty phase remain.

(2) Trenches (T1, T3 and T9) were positioned to test watch tower remains. The results revealed the stone foundations of the village wall and watch towers are present in various degrees of preservation along the northeast corner of the village (T1) and within the southwest corner of the village (T9), while the results of T3 provided no information on extent or condition of watch tower remains.

The results of trenches (T5 and T7) which were slightly inside the village indicated that an older potentially un-walled settlement (T5) and evidence for pre/post Coastal Evacuation (T7) may be present.

[1]HK memory project (HKM) is Hong Kong's response to UNESCO's Memory of the World Programme implemented by HKU in collaboration with Leisure and Services Department and funded by Hong Kong Jockey Club Charities Trust.

(3) The results (T2, T1, T9) confirmed the presence, depth, shape, deposits and location of the moat, it also indicated that the absence of cannons could not be confirmed in GPR survey due to the depth of the moat deposit.

The preliminary assessment of the 2016 AIA found that archaeological deposits of some significance could be affected by the project and therefore further investigation was necessary.

5. RESULTS OF THE FURTHER INVESTIGATION

5.1 Layout of the Trenches

The trench locations were chosen to gain further information and gather data on the archaeology of structural remains belonging to the village defences, the earliest settlement phase of Nga Tsin Wai and activities surrounding the Coastal Evacuation. The trench locations choices were based on results of the 2016 AIA excavations. Figure 5.1 shows the locations of the trenches.

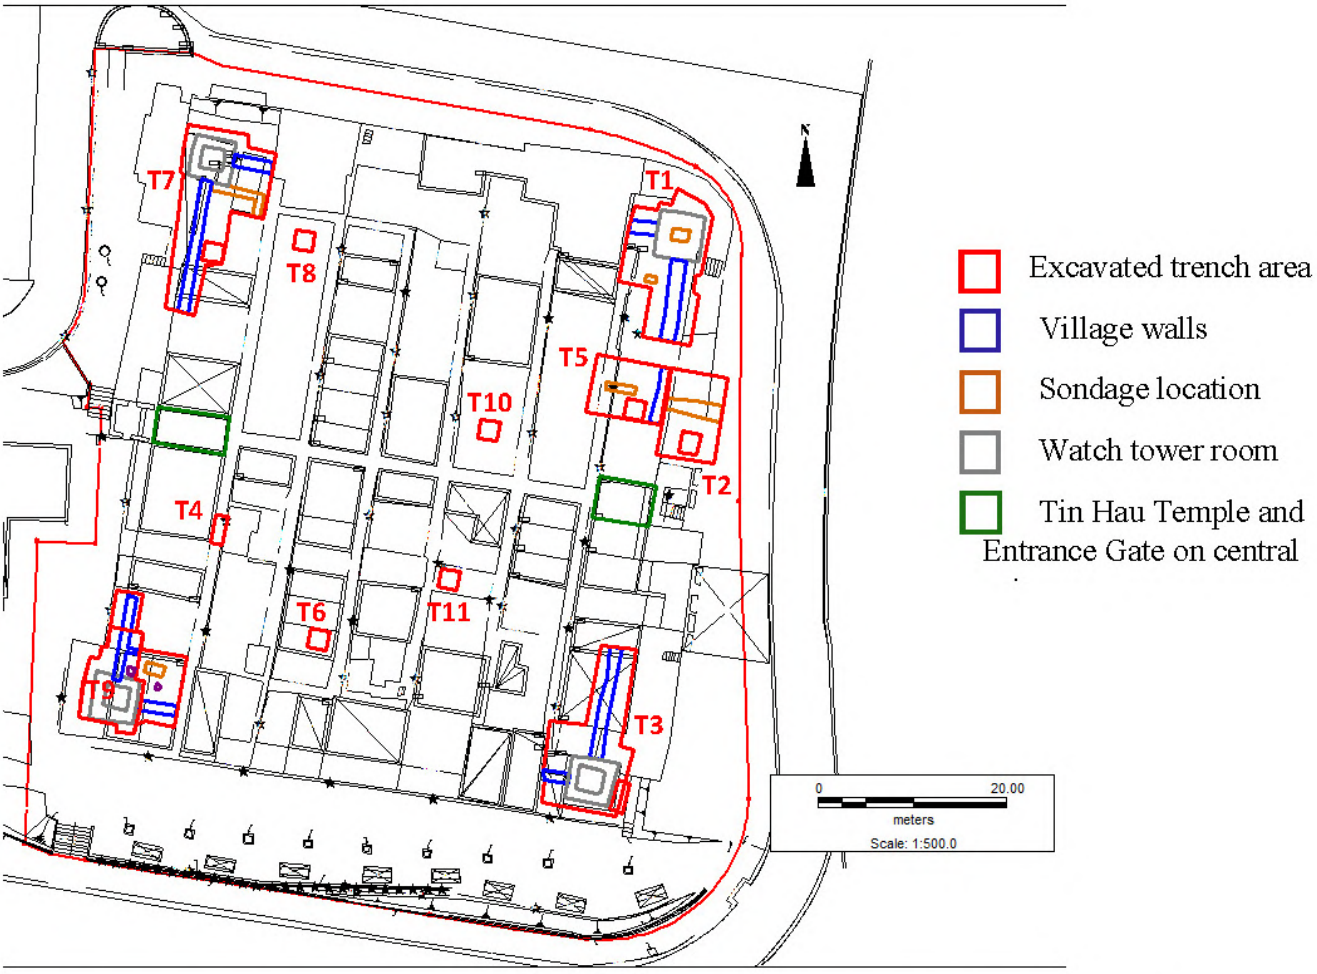

Figure 5.1 Map showing the locations of the 2016 (and 2018 for extended T2) AIA and 2018 Further Investigation trenches within the Licence Area (boundary marked in red around site).

Plate 5.0 Aerial view of Nga Tsin Wai Village and shelters covering archaeological excavated remains.

Trenches		
Trench #	*Proposed trench extension in sq. m*	*Objective*
T1	74	The excavations will uncover the layout of the watch tower room and watch tower area inside the village and the eastern village foundation wall.
T3	88	The excavations will confirm the presence or absence of SE watch tower remains and the extent of the disturbance.
T5	32	The further excavation will focus on the cultural layer excavated in the original T5 between 135 and 150cm below the surface and potential deposits of interest below. The aim is to identify possible pre-walled settlement or oldest settlement.
T7	103	Additional information is needed to further assess cultural layers excavated in the original T7 below 50cm from the surface which include the removed wall fragment and ditch with cloth-imprint tiles and establish the possible connection to pre/post Coastal Evacuation activities within Nga Tsin Wai. The area extended north to include the potential remains of the northwest watch tower
T9	53	The excavations at the southwestern watch tower will aim to uncovering the remaining watch tower area to include the entire watch tower layout.

The depth of the excavation depends on the findings but in general each trench was excavated to the end of the cultural deposits or as far as safety allowed, to depths of 1.5 to 1.8m below surface for the hand excavated areas.

Description of main findings for each trench follows. Further information and data are presented in Annex A: Overview of find types; Annex B: note on artefacts found at Nga Tsin Wai; Annex C: data of each trench; and Annex D: faunal information.

5.2 Trench 1

The excavations at T1 and its extensions were conducted intermittently between 19 March and 13 September 2018. The excavation trench at T1 was divided into four sub-areas/grids, namely Watch tower room (WTR) which includes moat areas around the room; Watch tower area (WTA) which includes the lane; Interior of village wall (VWI); and East moat (VWX). (Figure 5.2). WTR included the watch tower room which measured 4.7 by 5m and the moat area which measured about 8.7m long (east/west) and widest 2.5 (north/south). WTA measured 5.5m along north to south axis in length, around 3m in width in north and 5m in south. VWI measured around 5.3m north to south in length, 1.3m west to east at its widest in south. VWX measured 22.5m in length along north to south axis, 3.9m west to east at its widest in south. The excavation of the Eastern village wall (EVW) was covered in VWX.

Full description of contexts, finds, finds Plates, excavation Plates and drawings are presented in *Annex C.*

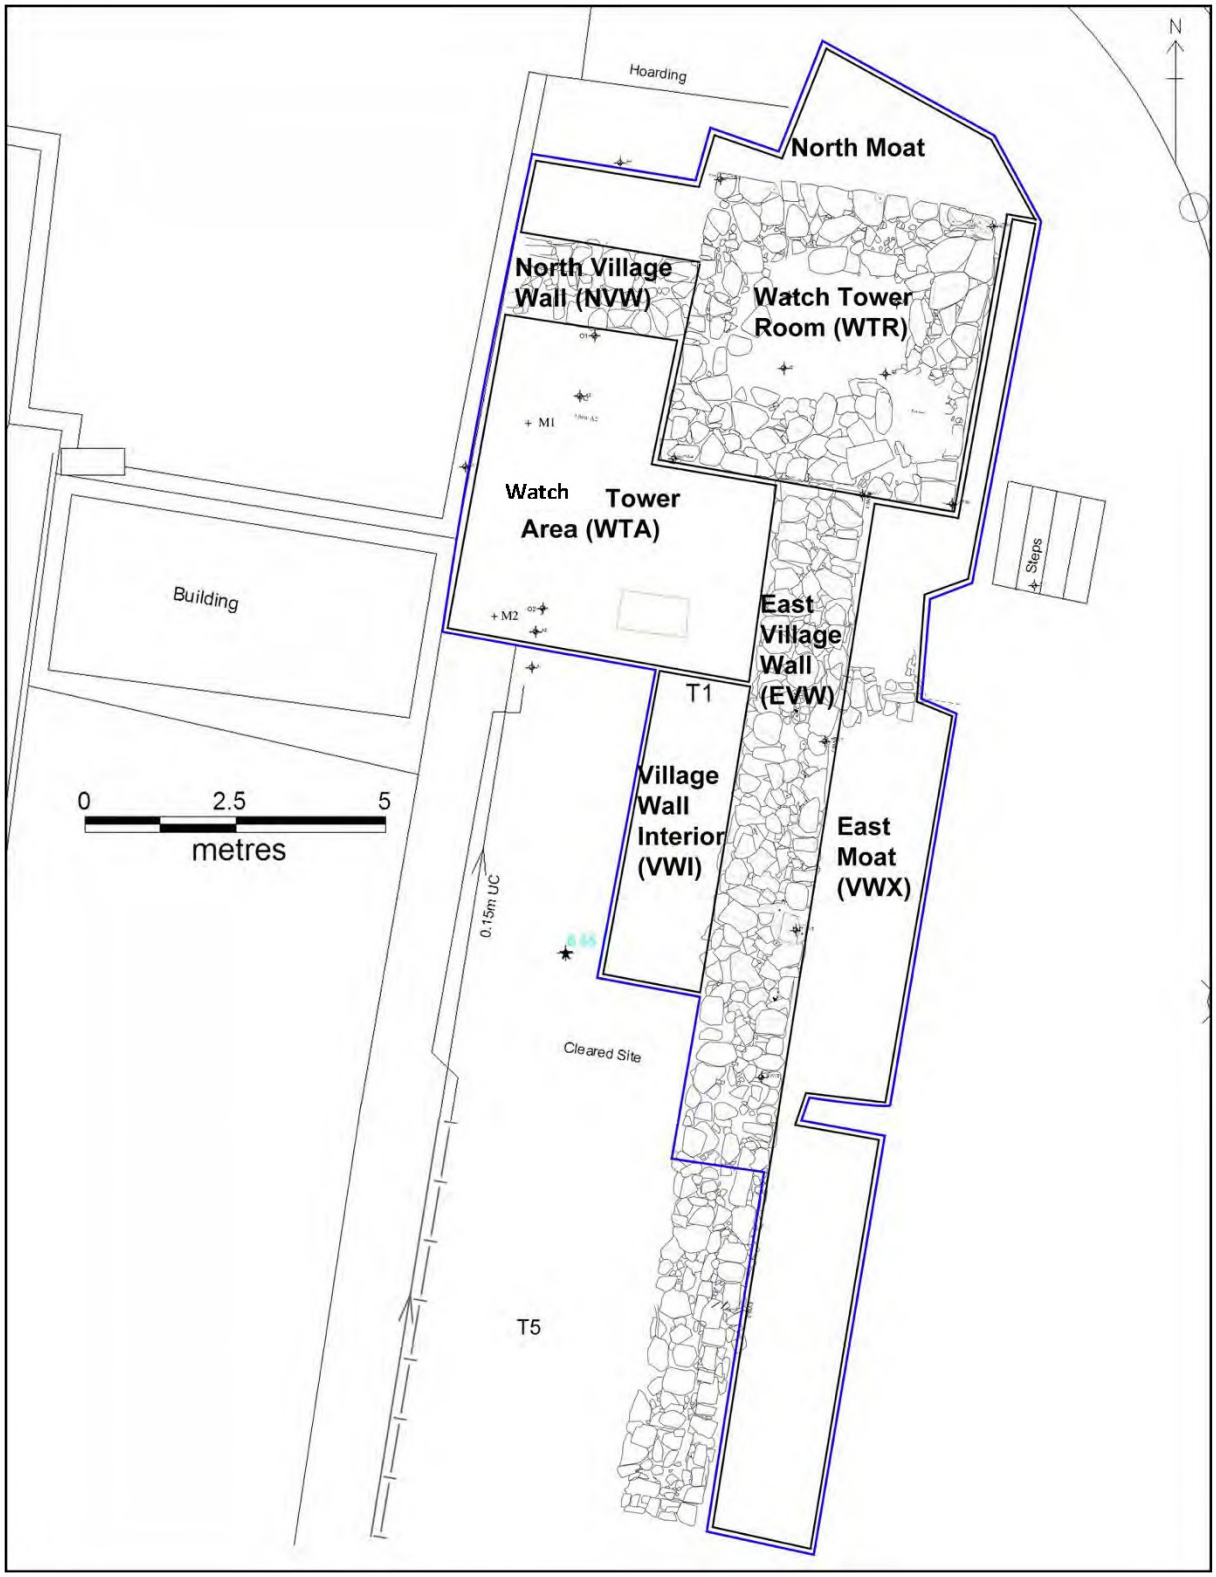

Figure 5.2 Map showing sections including Watch tower room (WTR) which includes moat areas around the room; Watch tower area (WTA) which includes the lane; Eastern village wall (EVW); East moat (VWX); and Interior of village wall (VWI) of Trench 1

Watch Tower Room (WTR)

The northeast watch tower room was partially covered by a loose dark brown layer [**co.1001**] under concrete pavement. A dog burial of modern date [**co.1003/1004**] was found below and cut into a reddish yellow sandy silt layer [**co.1002**], which covered the northern and central parts of the watch tower.

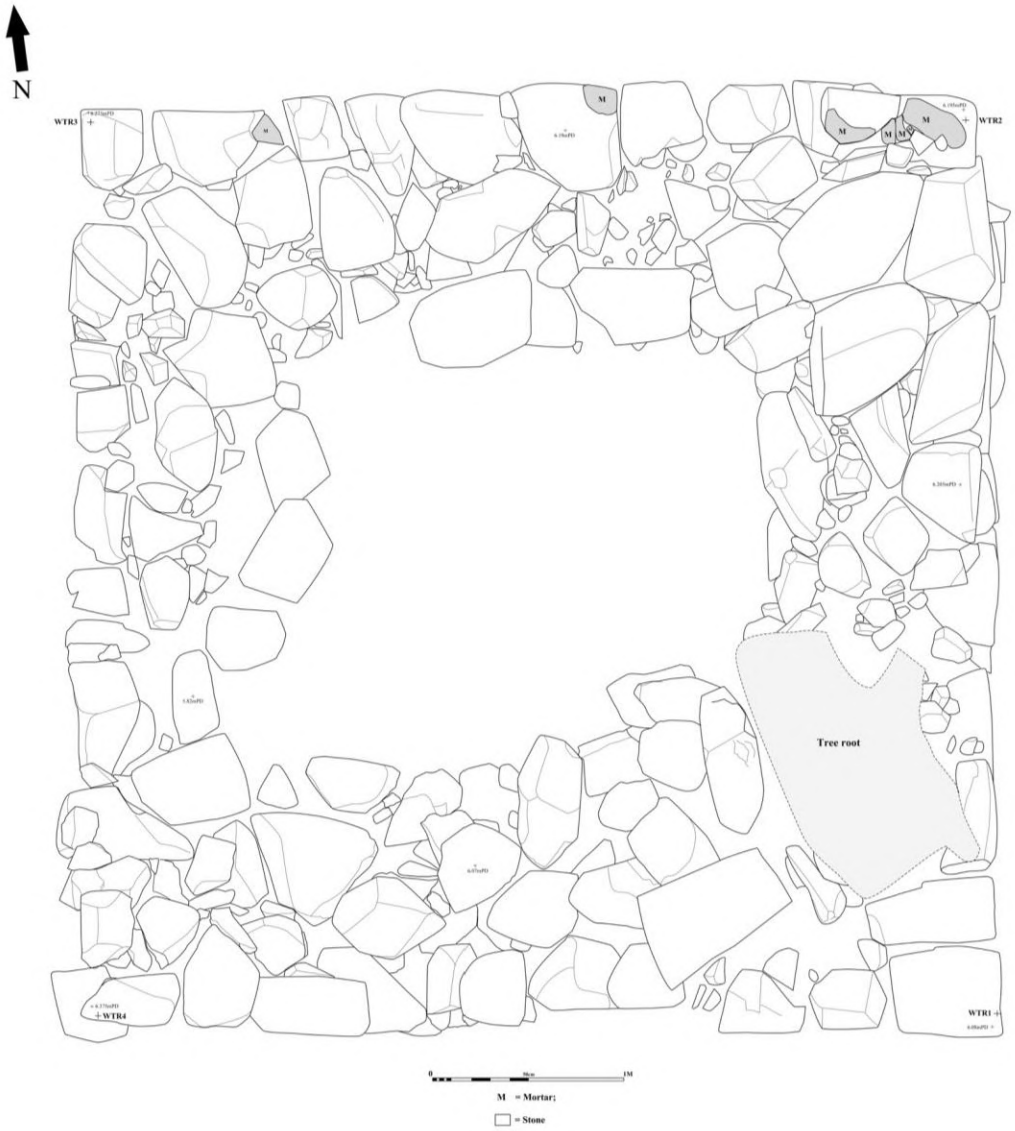

Figure 5.3 T1 watch tower room [**co.1252**] ground plan; roughly 5m by 5m.

The full layout of the stone walls of the watch tower [**co.1252**] were recorded however, the interior of the walls had been badly damaged on three sides, only the eastern wall appeared in full height (Figure 5.3). The walls were constructed with irregularly shaped pieces of granite. No bonding material was used, and gaps were filled with smaller rocks. The top of the northeast corner of the watch tower remains which are interpreted as the top of the wall was topped with a whitish mortar, suggesting a levelled base for a brick wall on top (no longer present) (Plate T1.1). The outside of the protruding walls was also covered with a whitish mortar likely to prevent water from the moat seeping into the village (Plate T1.2).

A number of displaced stones were encountered at the base of the southeast corner of the watch tower room and are considered most likely to be the result of a wall collapse in the past as the foundation wall appears disturbed (Plate T1.3 and Plate T1.4).

Plate T1.1 View of the watch tower room from the top; from south to north view.

Plate T1.2 View of the northeast corner of foundation wall of the watch tower room; looking southwest.

Plate T1.3 View of southeast corner of the watch tower room within the moat; looking north

Plate T1.4 View of southeast corner of the watch tower room within the moat with stones in corner at depth of 1.5m; looking northeast.

The exteriors of the watch tower room stones walls were exposed until water table. The exterior walls, i.e. part of western and southern walls, and the full of northern and eastern walls, continue below the ground water level. Whereas the walls on the interior of the village were much shallower (Plate T1.5). The difference of wall depth was designed to defend possible attacks from outside.

The stratigraphy inside the watch tower's inner room contained thick modern fills [**co.1093/ 1095**] which covered a layer of grey silty/clayey sand alluvial deposit [**co.1096**]. The alluvial layer contained some thick cloth-imprint tile fragments of Ming/Qing dynasty date and pottery dated Qing dynasty to early 20th century (Plate T1.6). One of the tile fragments found in 2016 AIA phase returned a TL-date of approximately 275 years ago, making it around the time of the major renovation/rebuilding phase post-Coastal Evacuation of village.

Plate T1.5 West facing section (Left) and south facing section (Right) of watch tower room western and southern interior walls.

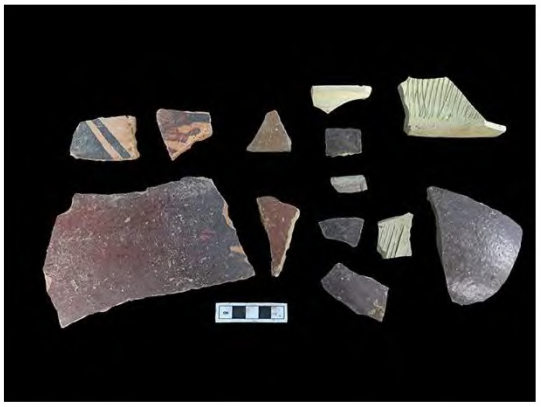

Plate T1.6 Pottery and thick tile with cloth-imprint from [**co.1096**].

Plate T1.7 eroded tile fragment from [**co.1107**].

Below [**co.1096**] a series of shallow ditch features [**co.1107/1108, 1224A/1224B, 1109/1110, 1228A/1228B**] (Plates T1.8 and T1.9; Figure 5.4) were recorded to cut into an alluvial deposit [**co.1105**]. The ditches align parallel along northwest-southeast direction and are similar in width (c.30cm), depth (c.6 to 9cm) and shape of cross-section (round bases and gradual sides). A single small, eroded tile fragment of unidentified period was retrieved in [**co.1107**] (Plate T1.7), the rest ditch fill yielded no artefacts. An interpretation of agricultural ditches is suggested by authors for these features which pre-date watch tower construction (possible furrow and ridge agriculture evidence).

Possible postholes [**co.1117A/B, 1121A/B, 1122A/B, 1124A/B, 1132A/B, 1133A/B, 1134A/B, 1149A/B**] (Figure 5.4) were identified on the level of [**co.1119**]; however, the hole features very likely cut through the ditches judging from the colour and composition of the fills. The hole features have various sizes in plan ranging in diameters from 7 to 15cm. Most holes are shallow, with the deepest [**co.1121B**] not exceeding 16cm. Their spatial distribution appears to be random and some overlap, such as [**co.1134B**] which truncated [**co.1124A**], and [**co.1117B**] cut [**co.1149A**], suggesting repetitive placing of stakes or posts.

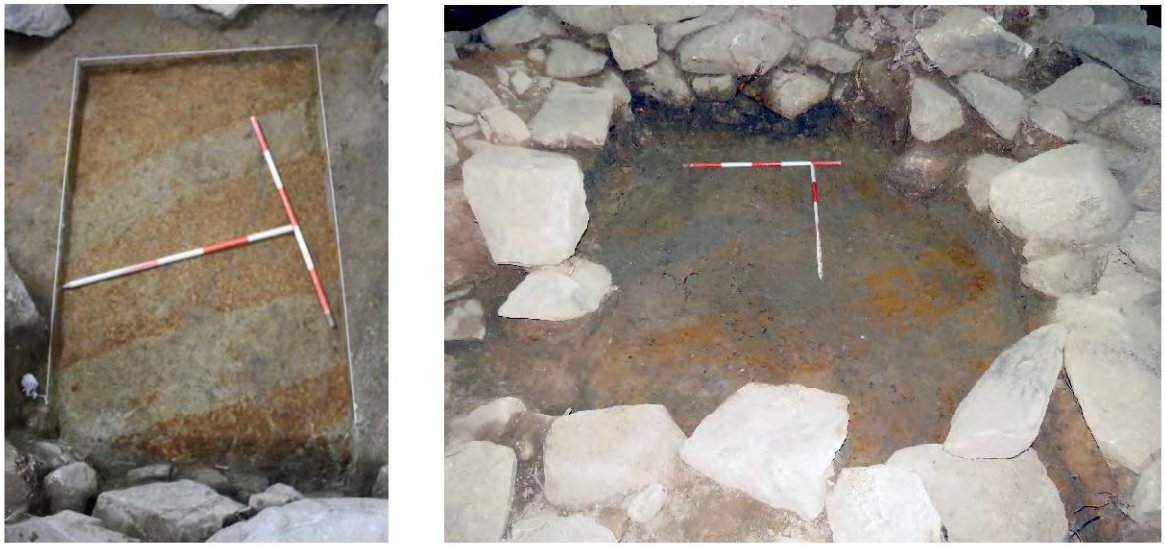

Plate T1.8 Left: view of ditches in the watch tower room sondage and beyond; looking west; Right: view of ditches before setting out sondage; note dark fill [co.1097] along the inside of northern and eastern walls; looking east.

A narrow band of very dark greyish brown sandy fill [**co.1097**] was observed along the inside of the north and east watch tower room walls from top level of the east wall down to top of [**co.1105**] (Plate T1.8, Right). Right below was a clean, light yellowish-brown sandy fill [**co.1120**]. These fills are probably formed after water seeping through gaps of watch tower room stones considering their locations right next to moat outside the walls.

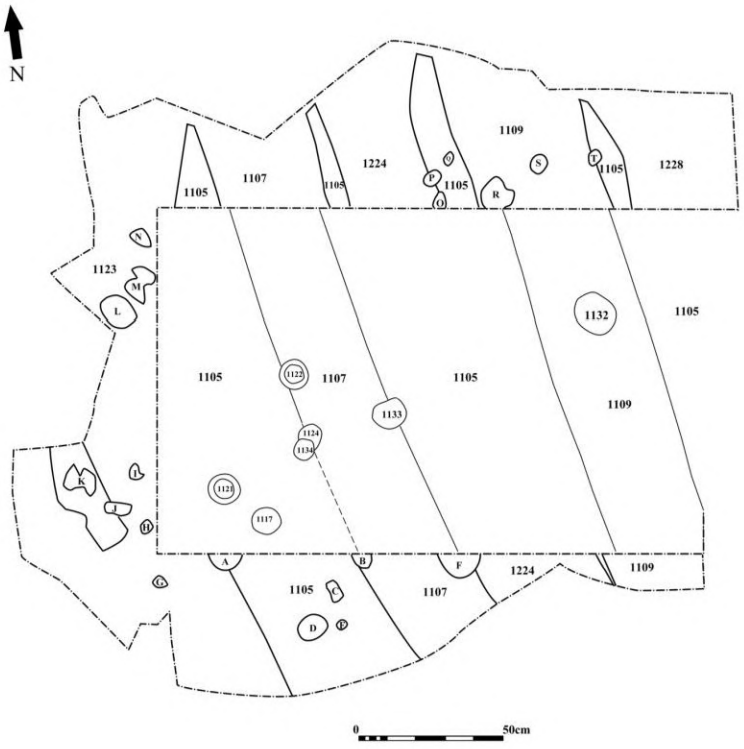

Figure 5.4 Postholes and ditches below [**co.1096**]; features in- and outside of Sondage in the watch tower room were drawn.

Plate T1.9 Some of the postholes excavated; note discolouration of fill in ditches beyond the Sondage; looking southwest.

Watch Tower Area (WTA)

Stratigraphy in WTA covers the lane and residential house (Figure 5.2). Within the lane, modern concrete floor levels and accompanied drainage [**co.1011/1012/1013/1018, 1030/1023, 1082/1083/1084**] covered a N-S aligned stone-lined ditch [**co.1090**] (Plate T1.10) similar to the stone drain in lane recorded in 2016 AIA Trench 4. The ditch consisted of roughly shaped stones which appeared dislocated in south yet largely intact in north. The north end of the drain had three rows of stone lining which was supported by smaller rocks from outside. Large stone slabs [**co.1187**] covered its top and joined a stone platform [**co.1186**] sitting on top of the destroyed northern village wall (Plate T1.11 to T1.13). The drain [**co.1090**] was built into the northern village wall, so that the drain contents would have been emptied into the village moat. This was also recorded at T3. The drain fill [**co.1086/1089/1089B/C**] contained modern material including plastic.

Plate T1.10 View of stone drain [**co.1090**] in lane; looking north and the northern village wall.

Very dark grey sandy fills [**co.1088/1197A**] were recorded beneath the stone ditch. [**co.1088**] containing Qing to early 20th century finds were noted below the southern portion. [**co.1197A**] under the northern ditch portion was possibly fill of a trench cut [**co.1197B**] related to the construction or repair of the stone ditch. The fact that [**co.1197A**] contained modern finds might be a result of drain repair in modern days, or some recent drain contents travel through the stone gaps. The drain trench was covered by stone pavement [**co.1186**] (Plate T1.11) and truncated levelling fills [**co.1188, 1191/1192** and **1195**] likely dated 19th-20th century and another stone pavement [**co.1190**] sealed within.

Plate T1.11 View of stone pavement [**co.1186**] on left and stone drain cover stones [**co.1187**] on right. Looking south.

Plate T1.12 Top view of the stone drain **[co.1090]** continuing into the village wall foundation; looking east.

Plate T1.13 View of the destruction of the village wall foundation for the construction of the stone drain; looking east.

Located at the end of lane, the stone pavement (recorded during the 2016 AIA) **[co.1186]** at entrance to watch tower room (Plate T1.11) covered fill layer **[co.1188]** which contained plastic. Dark modern sediments **[co.1193A]** were recorded below the stone pavement along the inner wall of the north village wall (Plate T1.14). The deposit was possibly caused by water seeping through the wall. Similar disturbances were recorded on the inside of village walls in Trenches 3, 5, 7, and 9.

Plate T1.14 Left: view of modern deposit **[co.1193]** along the inner foundation wall. Right: view of **[co.1193]** after excavation; both looking east.

The house part of the watch tower area was also covered by modern concrete floor levels **[co.1014/1019]** enclosed by modern stone walls **[co.1007/1008/1009]** and red brick threshold

[**co.1010**]. The floors were supported by a layer of modern levelling fill [**co.1005/1033]**, which contains frequent rubbles and some plastic. Directly below was an earlier phase of western and northern house walls with stone threshold [**co.1067/1104**]. The accompanied floor [**co.1034**] (Plate T1.15) was supported by a levelling fill [**co.1101/1106**] that consisted of frequent tile fragments. The stone threshold most likely represents modern reuse of old building material. A very dark grey clayey silt [**co. 1102/1103**] underneath was interpreted as relevant to the mounting of the threshold.

Below [**co.1101/1106**] is a thin layer [**co.1113**] truncated by a series of recent features related to residential activities. A shallow rectangular pit [**co.1111/1112**] with lime-lined base at northwest corner (Plate T1.16) was noted closely associated with two sub-rectangular pits [**co.1126A/B, 1127A/B**] at north-centre and a village ware vessel [**co.1185**] buried at northeast corner (Plate T1.17). A bluish grey, possibly baked, substance covered an area around/in between [**co.1112**] and [**co.1126A/B, 1127A/B**]. Signs of burning or exposure to heat was observed around and under the rectangular pit: charcoal patch [**co.1128**] located to its south; soil [**co.1113**] directly below baked into a pinkish tone; surface of stone walls around turned slightly fragile. It is possible that the rectangular pit was part of a hearth structure.

Plate T1.15 View of western house wall [**co.1067]**, northern house wall [**co.1104**], southern house wall [**co.1008**] and stone drain [**co.1090]** in lane (lower part of Plate); inside the house is the remaining floor level of [**co.1034**]; Note two corner stones standing at the juncture of walls; looking east.

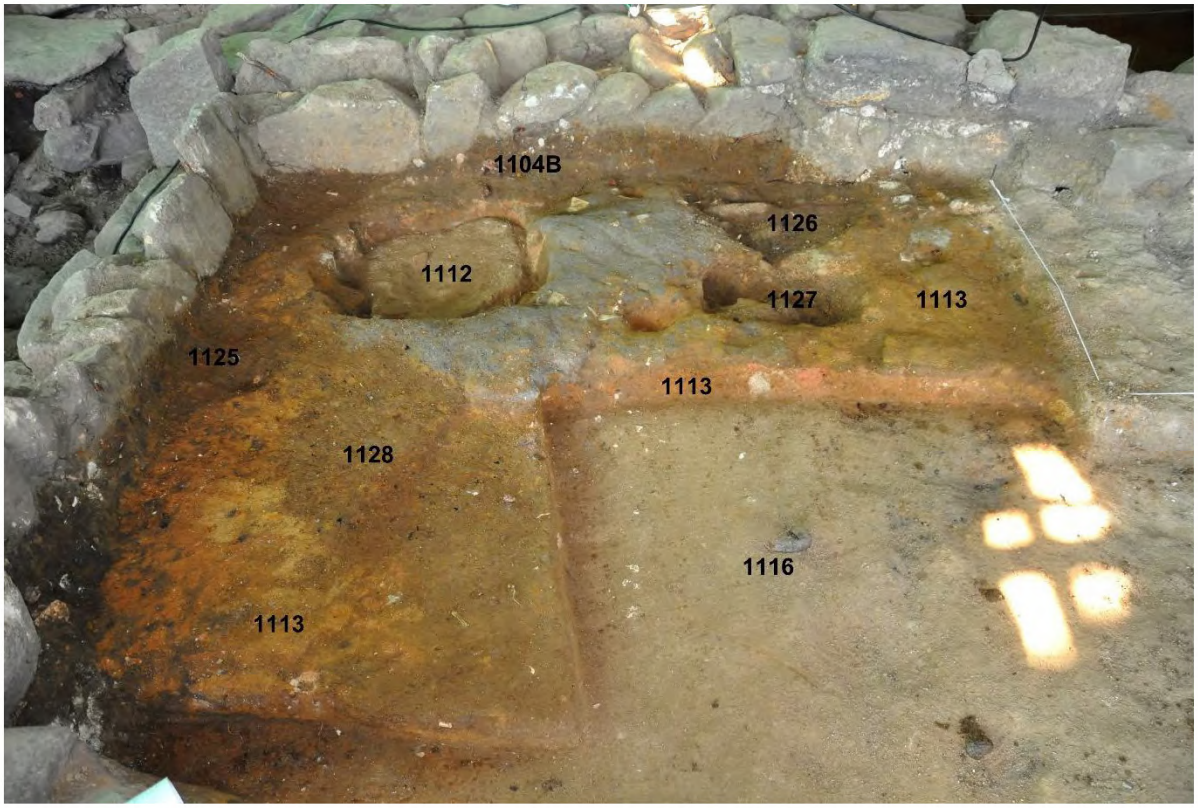

Plate T1.16 Northwest of house area on level of **[co.1113]**, showing recent features; looking north.

Plate T1.17 Northeast of house area on level of **[co.1113]**, showing recent features; looking north.

A pit feature with large village ware [**co.1185**] ceramic vessel, was first recorded during the 2016 AIA, and excavated during the FI phase (Plate T1.18). The shape of the pot suggests that it was used for pickling food, while placing it within the floor would have kept the contents cool. Modern glass fragments were found within the pit fill under the pot [**co.1151A**]. The pit cut [**co.1151B**] truncated and associated with soil patches [**co.1152/1155/1154**] around it. [**co.1152**] contained a modern tessera. Along the northern and western house walls [**co.1104** and **1067**] was a dark-coloured deposit [**co.1104B**]. The deposit truncated the edge of this occupation layer as well as a possible posthole [**co.1125**A/B] close to western wall. Below [**co.1113**] was a cement floor [**co.1116**] likely dated 19th-20th century

Plate T1.18 View of east facing section in watch tower area; looking west.

Below [**co.1116**] in house and [**co.1088/1197A**] in lane, a floor surface [**co.1157A/1167A/1177A**] was recorded (Figure 5.5). The floor level reflects an earlier phase of dense residential activities although the date remains Qing/early 20th century.

A north-south aligned stone wall foundation [**co.1094**] separated the lane and house areas (Figure 5.5 and Plate T1.19). The foundation consisted of large stone boulders; one stone with a groove on top suggests recycled material. [**co. 1008 Lower**] was the east-west aligned counterpart of [**co.1094**]; it also consisted of irregularly shaped boulders. A cut stone block was vertically set, possibly as corner stone, at the west end of [**co.1008 Lower**] (Figure 5.7). Another corner stone was located at the north end of [**co.1094**], where it joined the upper row of northern house wall [**co.1104**] (Figure 5.5). It was noticed that only two small boulders at the same level of [**co.1094**] presented under [**co.1104**]. Also, a gap with no stone was noticed between [**co.1094**] and [**co.1008 Lower**]. This is interpreted as a disturbance of the original wall foundations, due to a later modification to the house wall.

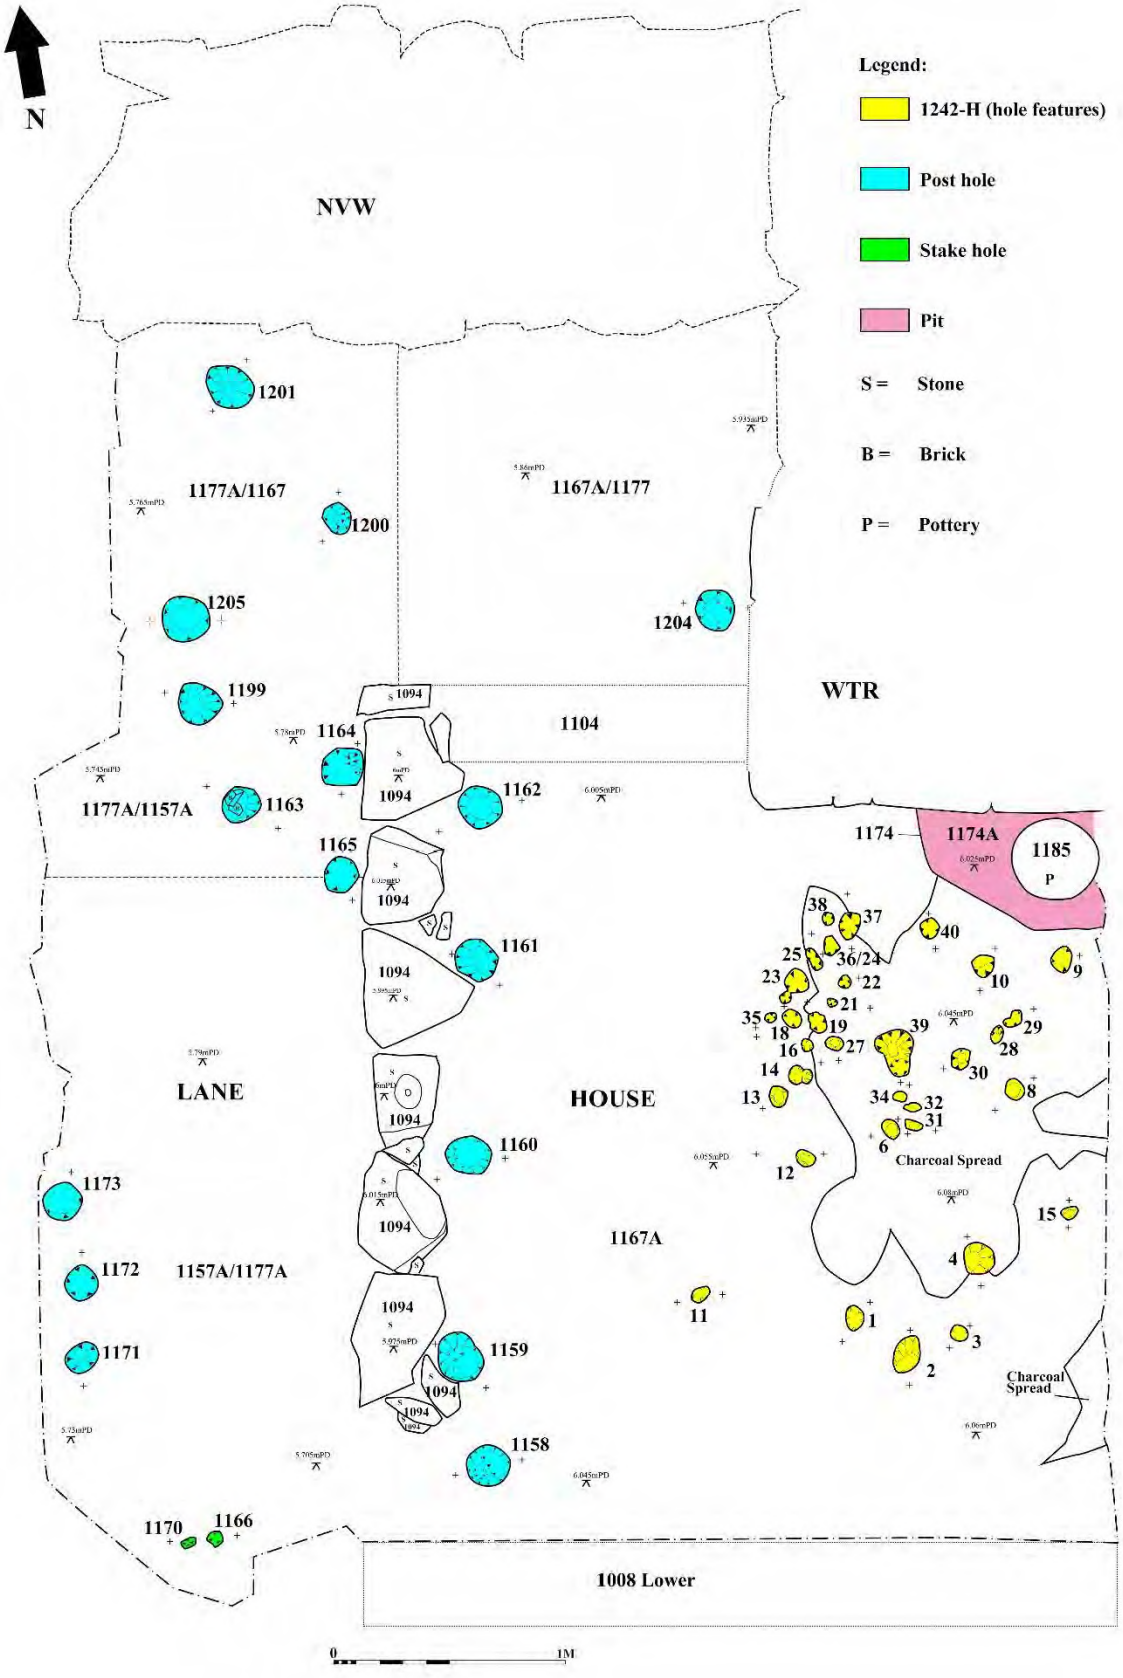

Figure 5.5 Features within same floor surface [co. 1157A/1177A/1167A] in watch tower area.

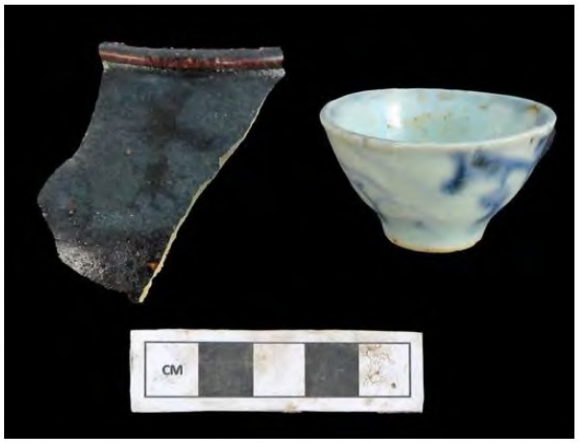
The interior side of the wall foundation **[co.1094]** appeared zig-zagged this was designed to give room to five postholes **[co.1158A/B, 1159A/B, 1160A/B, 1161A/B, 1162A/B]**. The postholes were spaced at similar intervals, with an average diameter of 40cm, but depths varied from 7cm to 18cm. All postholes had hardened sides and bottom; the bottoms were uneven. It is interpreted that the postholes and the stone wall foundation are constructed at the same phase. Tile fragments and a grinding basin sherd dated Qing to early 20th century was found inside these postholes. Below the stone wall foundations and above the floor surface **[co.1167A]**, a thin fill of a dark grey sandy silt **[co.1094B/1008C]** contained few pottery and blue and white porcelain dated Qing to early 20th century. (Plate T1.20)

Plate T1.19 View of stone wall foundation **[co.1094]** and postholes **[co.1158A/B, 1159A/B, 1160A/B, 1161A/B, 1162A/B]** along the inside of the house; looking north.

(a)



(b)

Plate T1.20a-b Finds from **[co.1094B/1008C]**, dated Qing to early 20th century.

The east side of the house floor **[co.1167A]** was truncated by numerous shallow (most less than 10cm in depth) posthole (or stake holes) features **[co.1242-H1 to H40]** associated with burnt patches (Plate T1.21). The layout shows that the postholes are more densely clustered in northeast side. Their openings are round or elongated. Some even have an "8" shape opening, suggesting a later posthole truncated an existing one. The postholes were mostly distributed

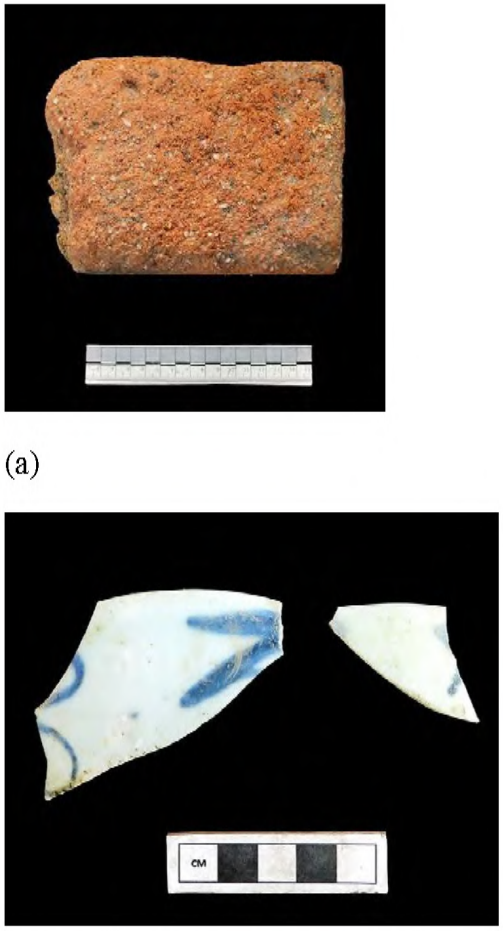
inside, or at a proximity to, the extent of the larger burnt spread. It is interpreted the postholes were a result of repetitive use of the area, possibly related to cooking or other burning activities, by using a legged stand or stakes. Inside fragments of charcoal, iron or slag, tile and shell were recorded. A 19th-20th century mortar or concrete fragment found inside could be a breakage drop-in from cement floor [**co.1116**] above.

Plate T1.21 View of layer [**co.1167**] with numerous holes [**co. 1242-H1 to H40**] and burnt patches; also showing a larger pit [**co.1174A/B**] around village ware vessel [**co.1185**]; looking east.

The northeast corner of house showed an earlier phase of pit feature [**co.1174A, 1216/1222, 1174B**] below the cement floor [**co.1116**]. The pit [**co. 1174B**] deeply cut, about 70cm, into the floor level [**co.1167A**] (Figure 5.5). Its top fill [**co.1174A**] comprised of yellowish-brown silty sand, and the second fill [**co. 1216/1222**] of strong brown with grey lens of clayey sand. Both fills produced finds dated to Qing to early 20th century. The two recorded phases of pit feature at the northeast corner of the house suggests that the location was repetitively used as a vat/larger vessel burying spot.

In the lane, after removal of the stone drain [**co. 1090**], a possible brick drain [**co.1156**] was uncovered (Plate T1.22**Error! Reference source not found.**). The brick drain does not present neatly as brick-lined drain but more as bricks forming an alignment with additional bricks in proximity. The interpretation of brick drain preceding a stone drain was based on similar findings in T5 lane. Both the stone and brick drain's construction did not use any bonding materials. A thin very dark sandy silt fill [**co.1156B**] was recorded below the bricks, which contained two pieces of Qing Blue and White bowl rims. (Plate T1.23b)

Plate T1.22 View of 'brick' drain and postholes in T1 lane area; looking south.



(a)

(b)

Plate T1.23 Top: brick sample from [**co.1156**]; bottom: porcelain sherds from [**co.1156B**].

Below the bricks, eleven postholes [**co. 1163-1165, 1171-1173, 1199-1201, 1204-1205**] and two stake holes [**co.1166/1170**] cut into the general floor surface [**co.1157A/1177A/1167A**] (Figure 5.5). Postholes [**co.1164**] and [**co.1165**] appeared closely aligned with the stone wall foundation, while postholes [**co.1171-1173, 1237-1238**] (latter two were identified on east and north facing sections, Figure 5.5 and Figure 5.6) formed another alignment, likely related to residential feature outside of west limit of excavation. The remainder of the postholes in lane, including one recorded on east facing section [**co.1240A/B**], appeared random. The finds included in the fills are dated Qing to early 20th century.

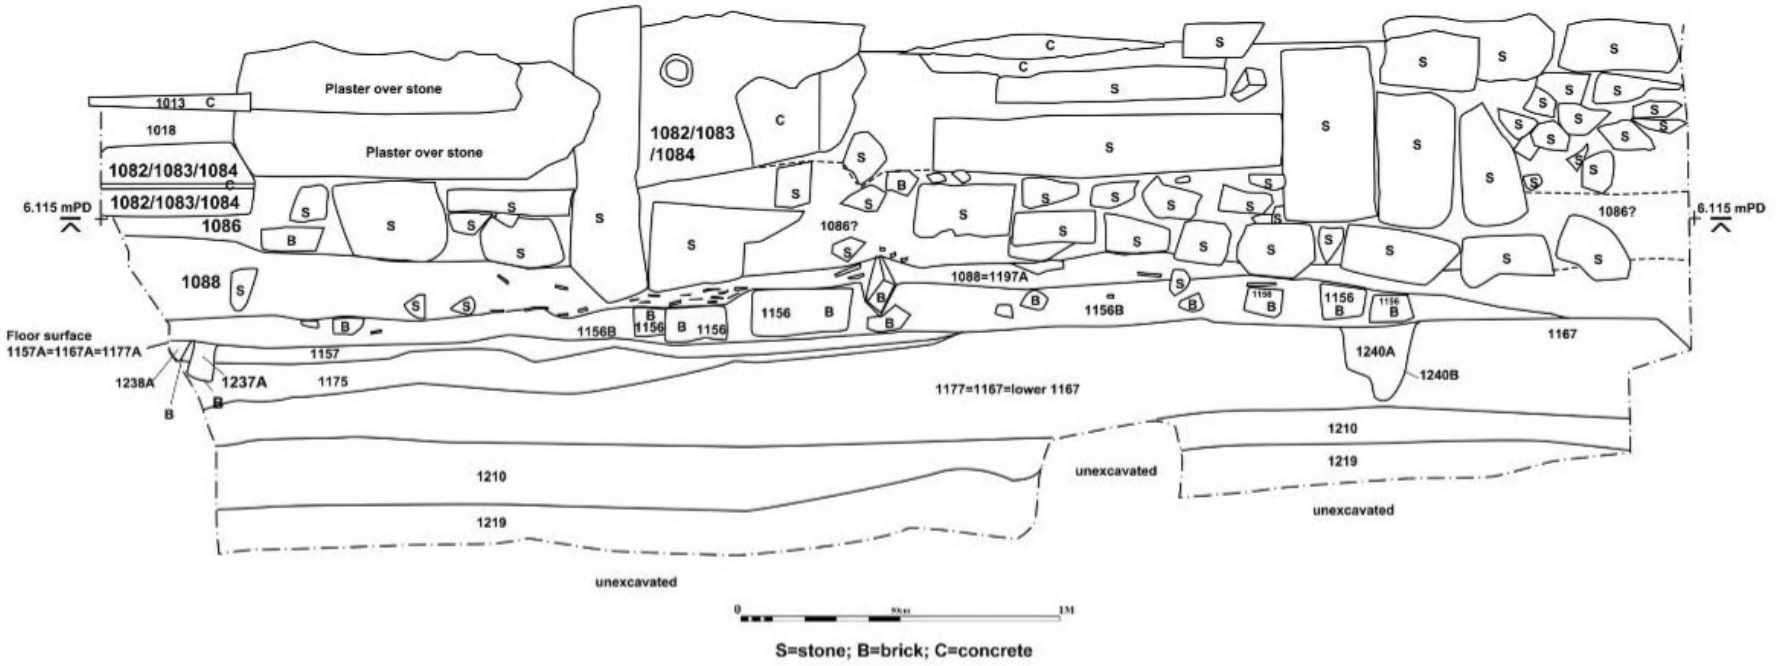


Figure 5.6 East facing section of T1 watch tower area

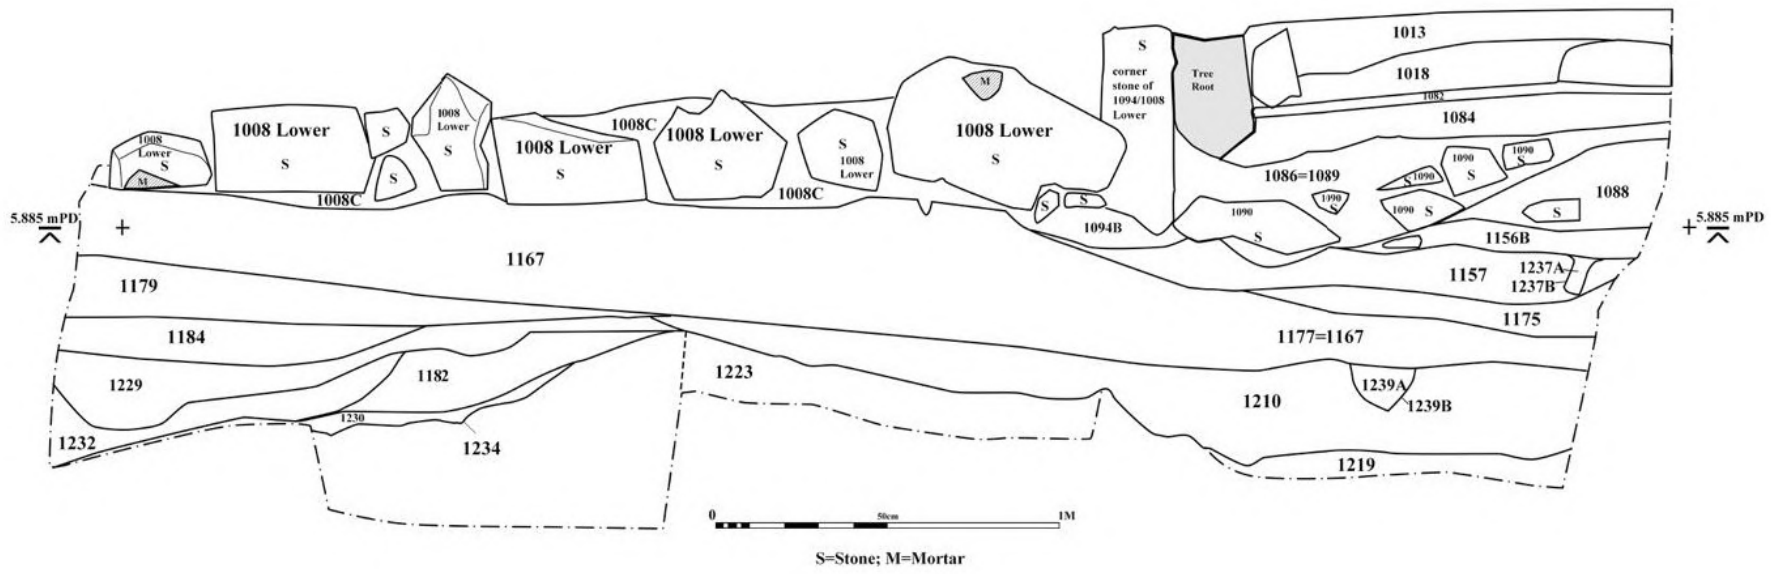

Figure 5.7 North facing section of T1 watch tower area

Plate T1.24 Ceramic finds from [**co.1167**]. Top: porcelain base sherds dated to Mid-Late Qing; Bottom: potsherd dated to 12-17th century, from Oishi.

[**co.1157**] identified in lane was a thin layer of light olive brown compact, slightly silty sand (Figure 5.6 and Figure 5.7). Occasional thin plain tile fragments and brown-glazed village ware sherd dated to Qing to early 20th century was retrieved. Below it was a levelling fill which consisted of greyish-brown with lens of black sand [**co.1175**] which produced small amount of tile fragments and pottery dated Qing dynasty. After removal of this sandy fill revealed the top surface of [**co.1177/1167**/lower **1167/1209**]. One stake hole [**co.1176A/B**] and one posthole [**co.1178A/B**] were recorded cutting into [**co.1177**] in the middle of the lane. One of the fills [**co.1178A**] produced tile fragments of likely Qing dynasty.

[**co.1177/1167/lower 1167/1209**] was a thick sandy silt layer in the colour of brownish yellow to strong brown with occasional grey patches that covered the entire watch tower area (Figure 5.6 and Figure 5.7). Porcelain finds in this layer can be dated to Mid-Late Qing. One brown glazed potsherd was even dated to 12th -17th century. (Plate T1.24)

Below the thick general layer, a silty sand fill [**co.1179**] of greyish brown mixed with dark yellowish-brown was located mainly in the east side and thinned out towards the west. Small amount of cloth-imprint and plain tile fragments and Qing dynasty ceramics were found. A possibly posthole [**co.1180A/-C**] located near the watch tower room's northwest corner cut into [**co.1179**]. The post hole had a yellowish-brown loose sand fill [**co.1180A**] and a friable red sandy silt crust [**co.1180C**] (Plate T1.25). A small thin tile fragment, of a general Qing dynasty date, was retrieved inside the crust.

Plate T1.25. Posthole [**co.1180A-C**] excavation in progress, showing the red sandy silt crust [**co.1180C**] below

The recorded strata below **[co.1179]** were formed prior to the construction of the watch tower (Plate T1.26). On the western side of the trench was a mottled greyish and brownish sand deposit **[co.1210]**. Two postholes **[co.1212/ 1239]** cut into this deposit at the southwest corner (Plate T1.26 and Figure 5.8). Posthole **[co.1212]** contained two tile fragments likely dated to Qing dynasty.

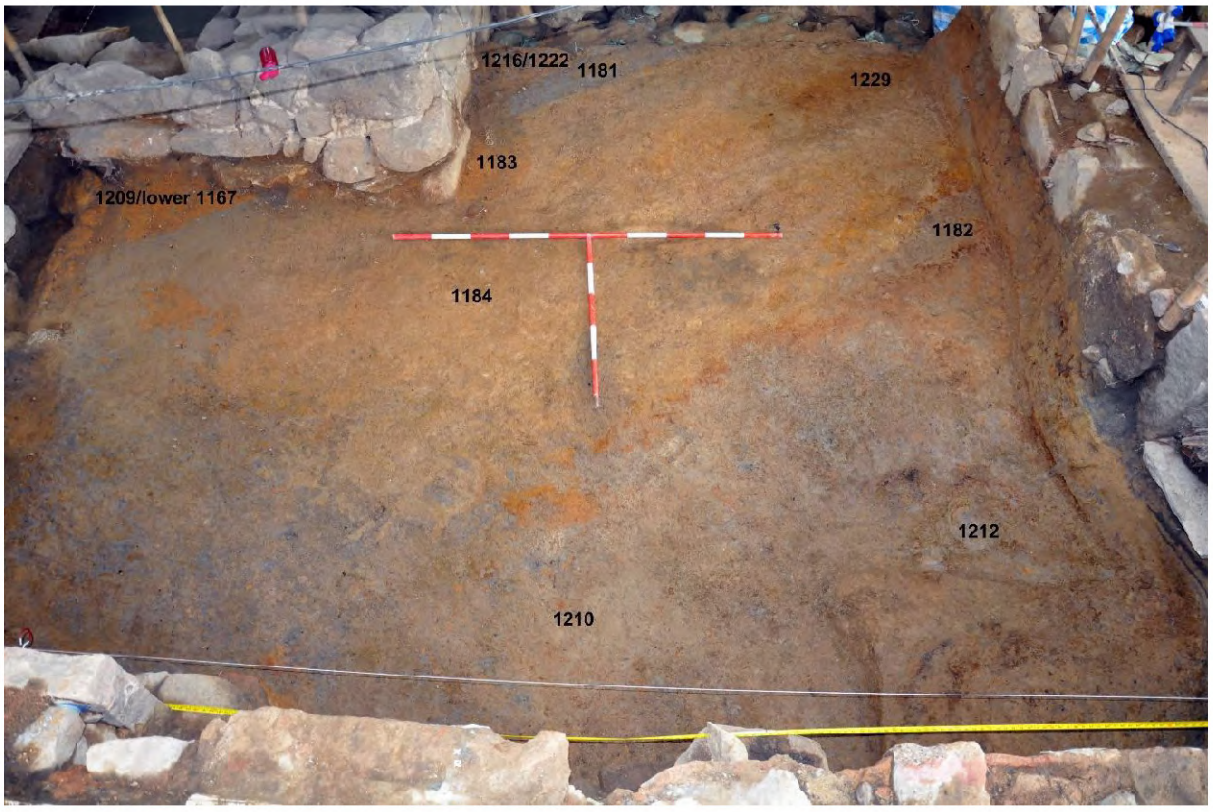

Plate T1.26 View of strata within watch tower area below **[co. 1179]** including posthole **[co.1212]**; looking east.

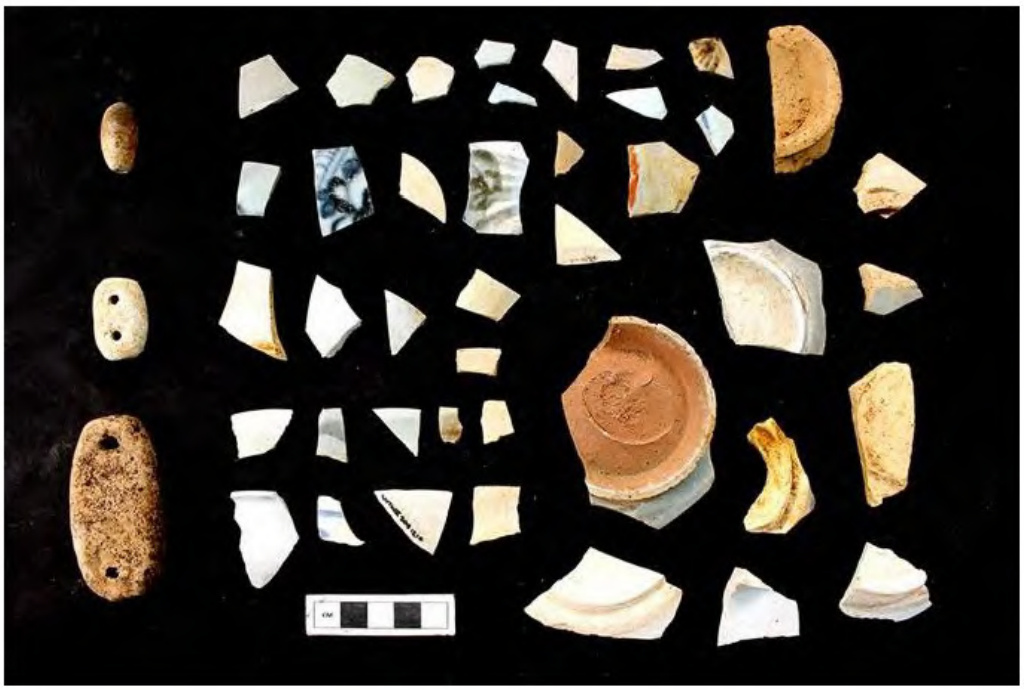
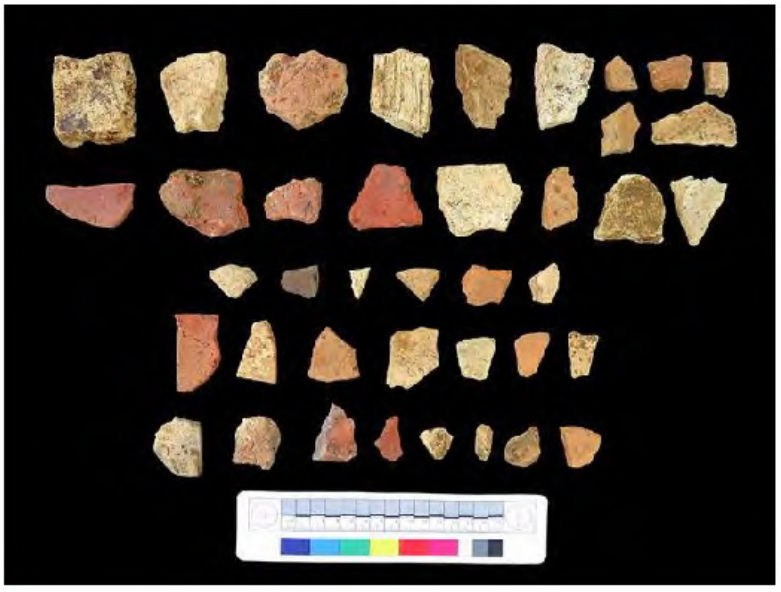
[co.1210] contained frequent artefacts including a large portion of cloth-imprint tiles of Ming/Qing dynasty date, and ceramics likely of Qing dynasty (Plate T1.27). The deposit thinned out toward the east side and thickened towards the west. It covered a line of north-south aligned stake holes **[co.1243**-SA1 to 25] similar to those excavated in T5 within the southwest corner of watch tower area (Plate T1.29 and Figure 5.8). The stake holes cut into a hard, orange deposit **[co.1223]**. All the stake holes had hardened sides and their central axis tilted towards the stepped orange deposit **[co.1223]**, i.e. tilted generally towards the east-northeast. The fills contained small undiagnostic pottery sherds, including a grinding basin sherd and one cloth-imprint tile fragment (Plate T1.30). On top of **[co.1223]** further randomly spread stake holes **[co.1244**-SH26 to 37, **1235/1236]** were recorded. Stake hole, **[co.1235]** truncated the ditch fills **[co.1221/1227** and **1233]** and ditch cut **[co.1234]** (Plate T1.28) and thus post-dates the infilling of the ditch.



a.



b.

Plate T1.27 Ceramics (a.) and tiles with cloth-imprint (b.) from **[co.1210]**.

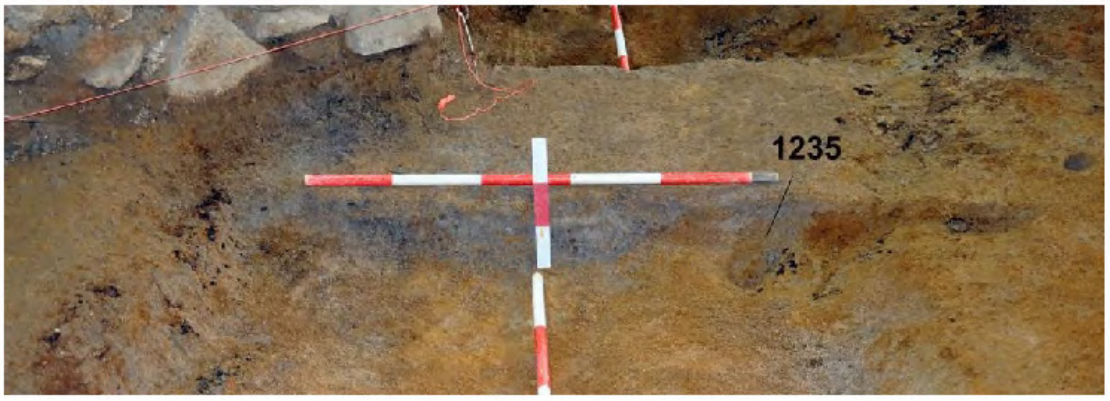


Plate T1.28 Cross-section of ditch fills **[co.1221/1227, 1233]** near the southwest corner of the watch tower room; Stake hole **[co.1235]** cuts into the ditch fills; looking east-southeast.

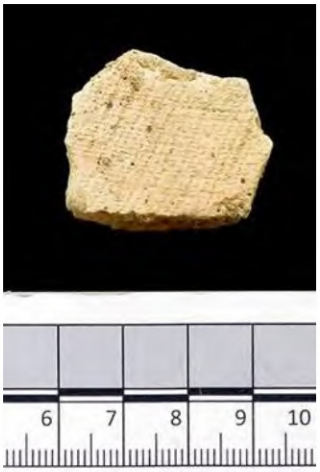
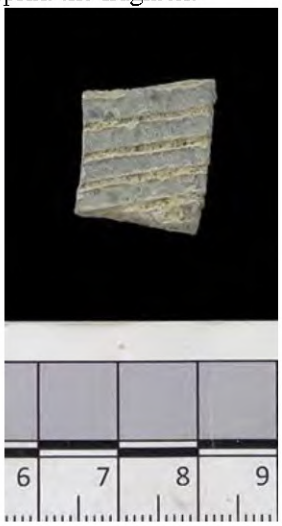
Plate T1.29 View of stake holes along west and within orange hard layer similar to stake holes of T5; looking south.



(a) [**co.1243**-SA9], thin cloth-imprint tile fragment



(b) [**co.1243**-SA14], grinding basin sherd

Plate T1.30 Finds from fills of the stake hole alignment [**co.1243**].

Directly below [**co.1210**] was another light grey sand layer [**co.1219**] with frequent finds of Qing dynasty date. The sandy layer was excavated to water level. To the east and next to the watch tower room's southern wall, a pit feature [**co.1194, 1183A/B**] cut agricultural ditch feature [**co.1181A/B**] (similar to the ditches recorded inside the watch tower room) (Plate T1.31). Pit [**co.1194, 1183A/B**] was in its turn later cut by Qing to early 20th century pit [**co.1174B**]. The fills of the pit [**co.1194/1183A**] contained ceramics likely dated to Qing dynasty. The proximity of the pit to the watch tower and its stratigraphical position suggests that the pit was associated with the construction of the watch tower room.

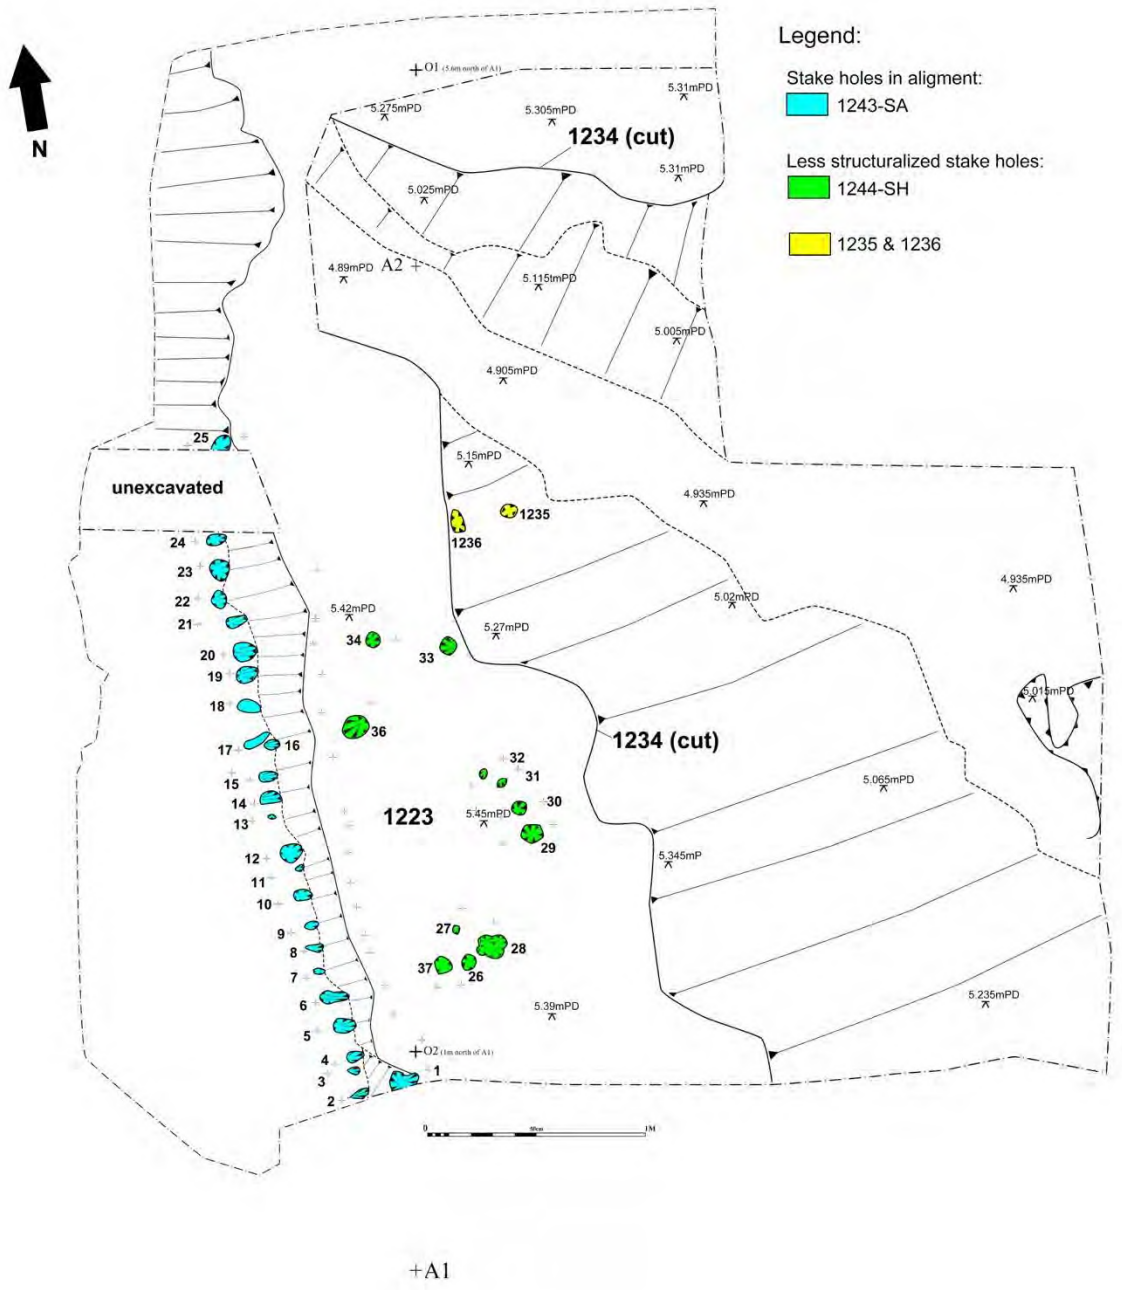


Figure 5.8 Showing stake holes [**co.1243**-SA1 to 25, **1244**-SH 26 to 37, **1235/1236**], recorded hard orange layer [**co.1223**] and water channel cut [**co.1234**].

The southeast/northwest oriented ditch[**co.1181A**] contained a grey, sandy deposit. Features with similar alignment, shape and fill were recorded inside the watch tower room [**co.1107/1108, 1224A/1224B, 1109/1110, 1228A/1228B**] and [**co.1214A/B**] Plate T1.32. Among these ditch fills only [**co.1214A** and **1107**] produced an undiagnostic, small and eroded potsherd and two possibly Qing dynasty tile fragments. The ditches were truncated by the watch tower room and thus existed prior to the construction of the watch tower room.

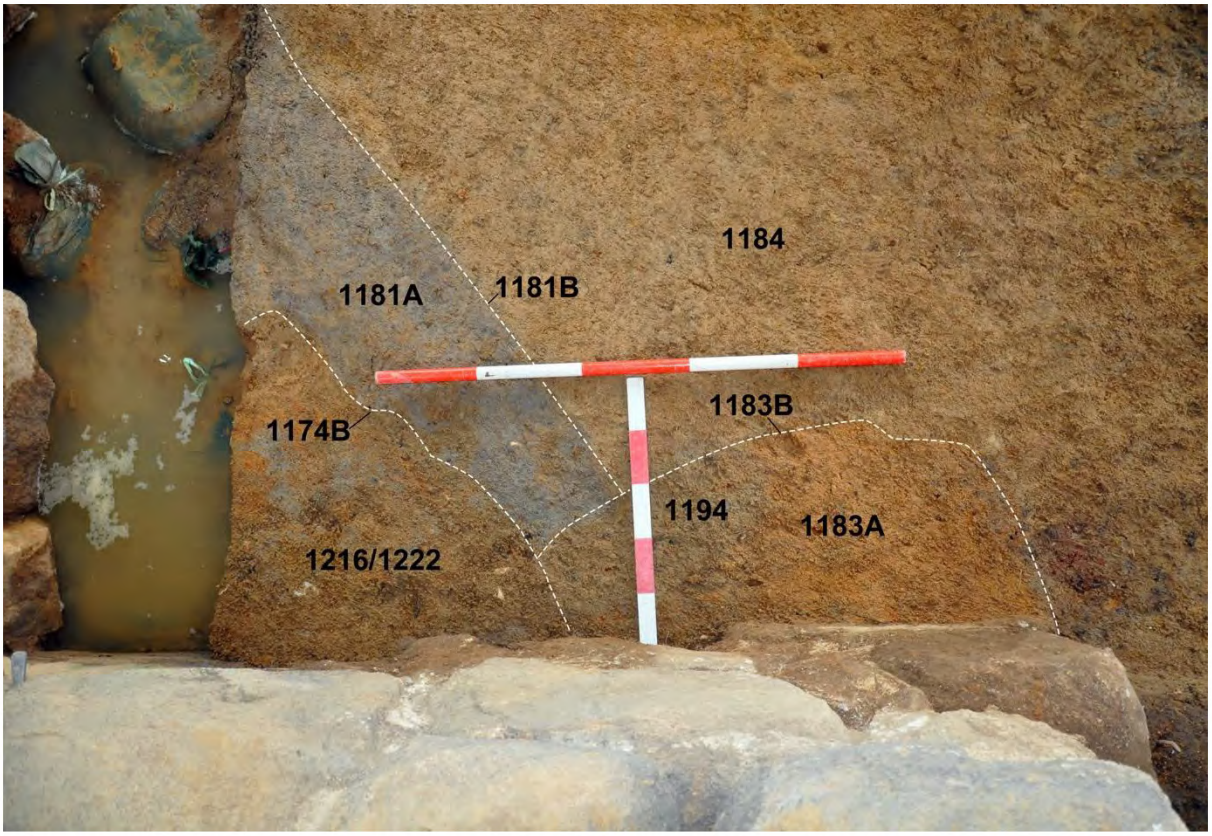

Plate T1.31 View of features **[co.1194, 1183A/B, 1181A/B]** on level of **[co.1184]**; looking south; note stone wall in front is the watch tower room's southern wall.

Plate T1.32 View of ditch-like feature **[co.1214A/B]** with grey fill extending out of the western wall of the watch tower room; looking east.

Truncated by the pit and ditch cuts **[co.1183B/ 1181B]** on the east and overlain by mottled sandy deposit **[co.1210]** on the west, a yellowish-brown clayey silt deposit **[co.**

1184/1211/1215/1217] was identified (Plate T1.31) covering a ditch/water channel. The deposit contained very few tile fragments and occasional possibly Qing dynasty ceramics, and a piece of Yuan/Ming period celadon sherd with incised lines and pale green glaze (Plate T1.33).

Plate T1.33 Yuan/Ming celadon from [**co.1184**].

A northwest/southeast running ditch/water channel **[co.1221/1227/1233/1241/1245]** measured about 1.2m wide and 40cm deep (Plate T1.36), and cut into a brown-coloured, coarse iron-pan fill layer [**co.1229**]. The ditch is truncated by the southwest corner of the watch tower room and thus stratigraphically pre-dates it. The ditch fills [**co.1221/1227**] contained very few artefacts: a fragment of prehistoric pointed stone tool (Plate T1.34- on left), a shattered thick tile fragment and a historic stoneware sherd (Plate T1.34 – on right).

Plate T1.34 Finds from [**co.1221/1227**].

The excavated water channel cut into **[co.1229/1218/1232/1182/1230/1234]** (Plate T1.37). Two adjoining pieces of historic stoneware sherds, likely Qing dynasty or earlier period, were retrieved from the iron pan layer [**co.1229**] (Plate T1.35). The ditch cut [**co.1234**] appeared to seamlessly join with the hard-orange layer [**co.1223**]; however, the surface within the channel appeared to be influenced by water and had formed a very hard iron pan surface. The two infill phases of water channel contained alluvial deposits with very few artefacts which does not suggest proximity to human settlements.

Plate T1.35 Historic stone ware sherds from [**co.1229**].

Plate T1.36 View of ditch/water channel [**co.1221/1227/1233/1245**] within the hard-orange deposit [**co.1218/1223**] and stake hole alignment [**co.1243**-SA1 to 25] visible along bottom of plate; looking east.

Plate T1.37 View of excavated ditch/water channel showing the cut [**co.1234**]; looking northeast.

A sondage was excavated through the hard-orange sterile deposit **[co.1218/1223]** along the north facing section to a depth of 5.015mPD, after which an auger test was conducted to further verify sterile soils down to 4mPD.

Interior Village Wall (VWI)

The residential area within the village wall recorded no less than two phases of wall foundations **[co.1015/1016/1250]** (Figure 5.9). Residential features of recent period, including pipe trench **[co.1054A/B]**, floors levels [three concrete floors, and **co. 1017**], stone house foundations **[co.1015/1016]**, and hard floors and leveller **[co.1046/1048/1049/1050/1051/1052/1055]**, house construction related feature **[co.1250]** and disturbance **[co.1056/1053]** were recorded.

Plate T1.38 View of modern houses foundations **[co.1015/1016]** within the eastern village wall interior area; looking north.

Plate T1.39 Jar rim from **[co.1055]**, dated 16th-18th century.

Plate T1.40 Finds from **[co.1074]**, including 5 joiners of a same vessel.

Below the recent layers two fills **[co.1052/1055]** are recorded at similar level but within two different houses. They consisted of strong brown clayey gravels and produced Qing dynasty ceramics (Plate T1.39). It is possible that they are the same fill disrupted by later house constructions. They form the top of **[co.1057/1058/1060/1078]** which is a relatively sterile deposit stratigraphically below the house foundations. It consisted of a yellowish brown very clayey sandy gravel with few Qing dynasty artefacts. Under this layer and only at northeast side is an iron pan deposit **[co.1074]**. It contained a small number of finds (Plate T1.40). Below all the previous strata, a thick orange sterile deposit **[co.1073/1079]** was recorded.

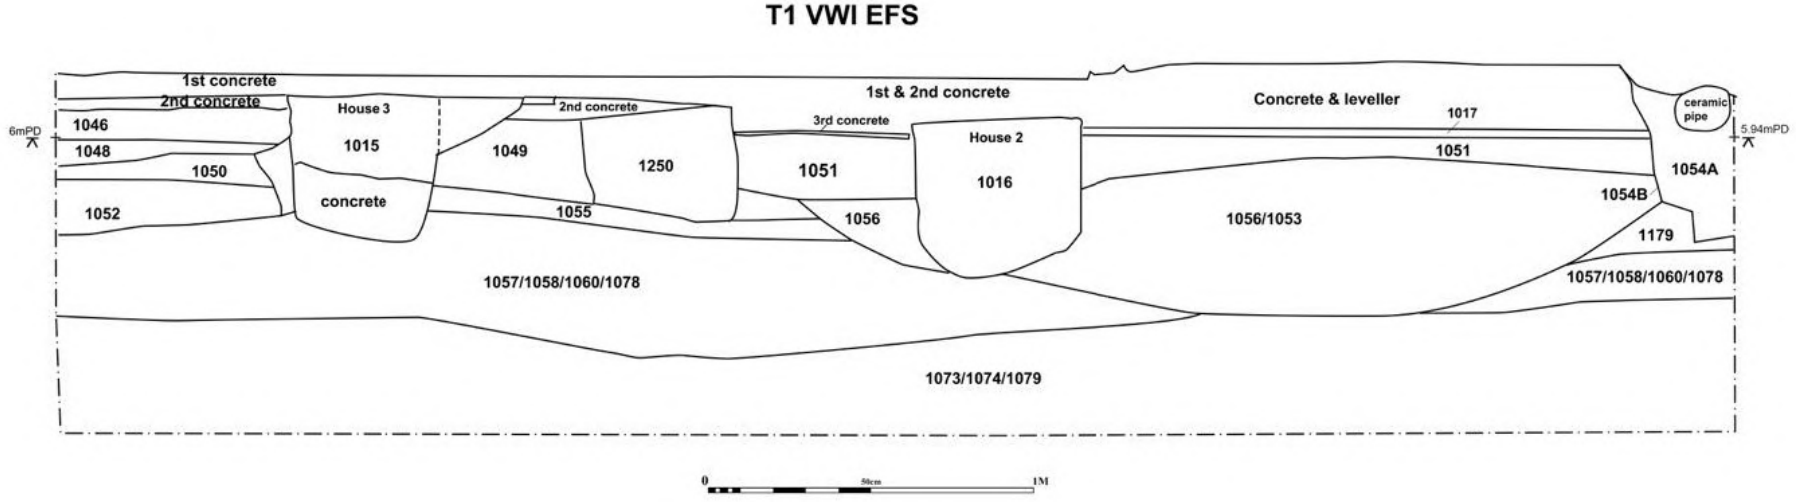

Figure 5.9 East facing section of village wall interior showing two recent house phases in **[co.1015/1016]** and **[co.1250]**.

Along the inside of the east village wall [**co.1252/1141**], three superimposed fills were noted. The upper fill was a dark yellowish-brown clayey sandy gravel [**co.1114**]. Below it was a yellowish-brown clayey sand [**co.1115**], containing Qing dynasty ceramics, and finally at the bottom was a brown clayey, slightly gravelly sand [**co.1118**] with no artefacts. The three fills appeared to have formed below a modern pit and [**co.1046**] and stopped at [**co.1048**]. It is possibly the fills (not large enough to be interpreted as wall trenches) were formed by water and sediment seeping through stone gaps and dissolving the soil on the inside. Similar small fill deposits were noted elsewhere along the inside of the village walls and the watch tower walls.

The interior of the eastern village wall presents with an irregular façade and some stones collapsed after removing the orange deposit [**co.1073/1079/1074**], suggesting the wall was designed to be supported by soils from inside the village.

Moat

The excavation of the moat around the watch tower was excavated down to water table which is situated around 4.99mPD. In addition, a black clay layer [**co.1081**] which is interpreted as the top of the original moat deposit was encountered at the same level. The infill of the moat [**co.1036/1038, 1037/1047, 1039/1040/1042/1045/1085, 1043, 1044/1077, 1068/1001, 1080**] down to the black clay is similar to moat infill recorded during the 2016 AIA investigations and is generally dated to mid-20th century (Plate T1.41). Above the moat, modern fills and features such as [**co.1006, 1041A/B, 1246, 1247, 1248, 1249**, modern pits 1 and 2] dating to the mid to late-20th centuries were excavated.

Plate T1.41 View of fill layers in the moat; looking northwest.

Along the eastern village wall [**co.1252**] additional modern features [**co.1021, 1022 1035, 1061/1062/1063/1064/1065, 1066, 1076A/B, 1131A/B**] above moat infill were recorded. It is worth mentioning that [**co.1065**] and [**co.1008**] recorded in WTA extends across the eastern village wall. Below these modern features was a single infill [**co.1024/1130**], a yellowish-brown sand, down to water level (Plate T1.42). A thick concrete platform [**co.1136**] supported by twenty-seven wooden foundation posts [**co.1137**] were recorded within the moat area (Plate T1.43); the concrete was part of three houses [**co.1008/1009, 1015, 1016**] noted within the village wall interior. An auger hole was conducted in the bottom of the moat along the east and the black organic soil [**co.1081**], identified as likely top of original moat deposit, was encountered at 22cm below.

Plate T1.42 West facing section (part) showing single fill deposit in moat along the east of Trench 1; looking east.

Plate T1.43 Completed exterior village wall area (southern part) and wooden posts [**co.1137**]; looking north.

On top of the east village wall, a compact but friable fill [**co.1075**] was noted containing Qing to early 20th century finds.
A sondage was conducted within the east moat (T1 sondage) which is reported on in AIA report under T2s.

Summary of the findings at T1

2016 AIA results

- Layout of watch tower and wall foundations were found severely disturbed by recent house construction;
- No brick walls remained only stone village and watch tower walls;
- Mainly late Qing dynasty to recent village ware pottery was excavated.

Watch tower room and village wall

- The damaged stone foundation of the watch tower room is the only surviving structural element of tower (no brick elements were noted). Three sides of the interior walls were found disturbed; the layout appeared original;
- Fill layers inside the watch tower room were mostly modern and overlay ditch-like features and postholes which cut into sterile natural deposits; the ditch and postholes could not be dated but stratigraphically the series of ditch pre-dates the construction of the watch tower (Mid-Qing period);
- The foundation depth of interior watch tower walls is much shallower than the exterior of the watch tower, which could be seen in the construction of each watch tower;
- Northern and Eastern village walls are present; the walls have been disturbed to varying heights by house construction activities mainly in recent years;
- Evidence for a stone drain exit in northern village wall was excavated;

Watch tower area

- Excavation inside the lane indicated a stone drain and possible remnants of a brick drain below. The stone drain was probably constructed during the 19th century and the brick drain earlier;
- An earlier residential floor level below the brick drain was recorded.
- Below the floor level, strata no longer related to house and lane construction.
- A large natural ditch and series of ditch features in the watch tower room and partially outside **[co.1181A]** were recorded which stratigraphically predates the watch tower. The ditch features are interpreted as agricultural evidence (possible furrow and ridge agriculture) not settlement.
- A stake hole alignment, possibly a continuation of the one found in T5, and some less structuralized stake holes were found cutting into sterile layers.

Interior village wall

- Recent house construction largely removed older, historic features, which supports the 2016 AIA findings.
- The village wall's internal façade was designed to be backed by soil.

Moat

- The further excavation uncovered the moat areas around the northeast watch tower and eastern village wall with similar findings to that of the 2016 AIA, i.e. mid-20th century infill deposit;
- The top of the moat deposit consisted of a black clay, similar to the 2016 AIA findings encountered around 5mPD;

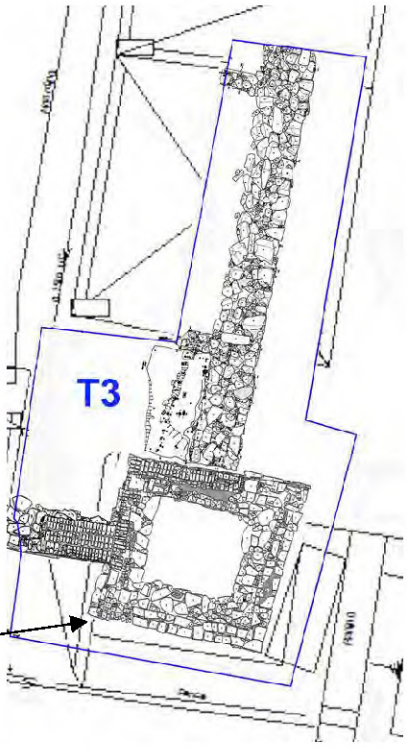
Cultural Remains

- Most of the pottery is dated to Qing and Qing to early 20th century, but some have Ming dynasty and early Qing dynasty dates;
- A single prehistoric stone tool was found;
- There are no defined Ming or early, mid-Qing dynasty layers.

5.3 Trench 3

The excavations at T3 were conducted intermittently between 19 June and 8 October 2018. The excavation trench at T3 was divided into three sub-areas/grids, namely watch tower room (WTR) (including a small portion of east moat and south moat), watch tower area (WTA), and eastern village wall (EVW) (including village interior and most of east moat). The WTR area includes the watch tower area which measured about 5.1 by 4.8m and the south moat area which measured around 5.6m north to south and 8.3m east to west; WTA measured 4.4m by 5m; and EVW measured around 12m north to south in length and 3.5m west to east at its widest.

Full description of contexts, finds, finds plates, excavation plates, drawings, and TL-dating results are presented in *Annex C*.



The findings from T3 at the southeastern corner of the village are presented divided into watch tower room, watch tower area, interior village and moat around those three as marked on Figure 5.:

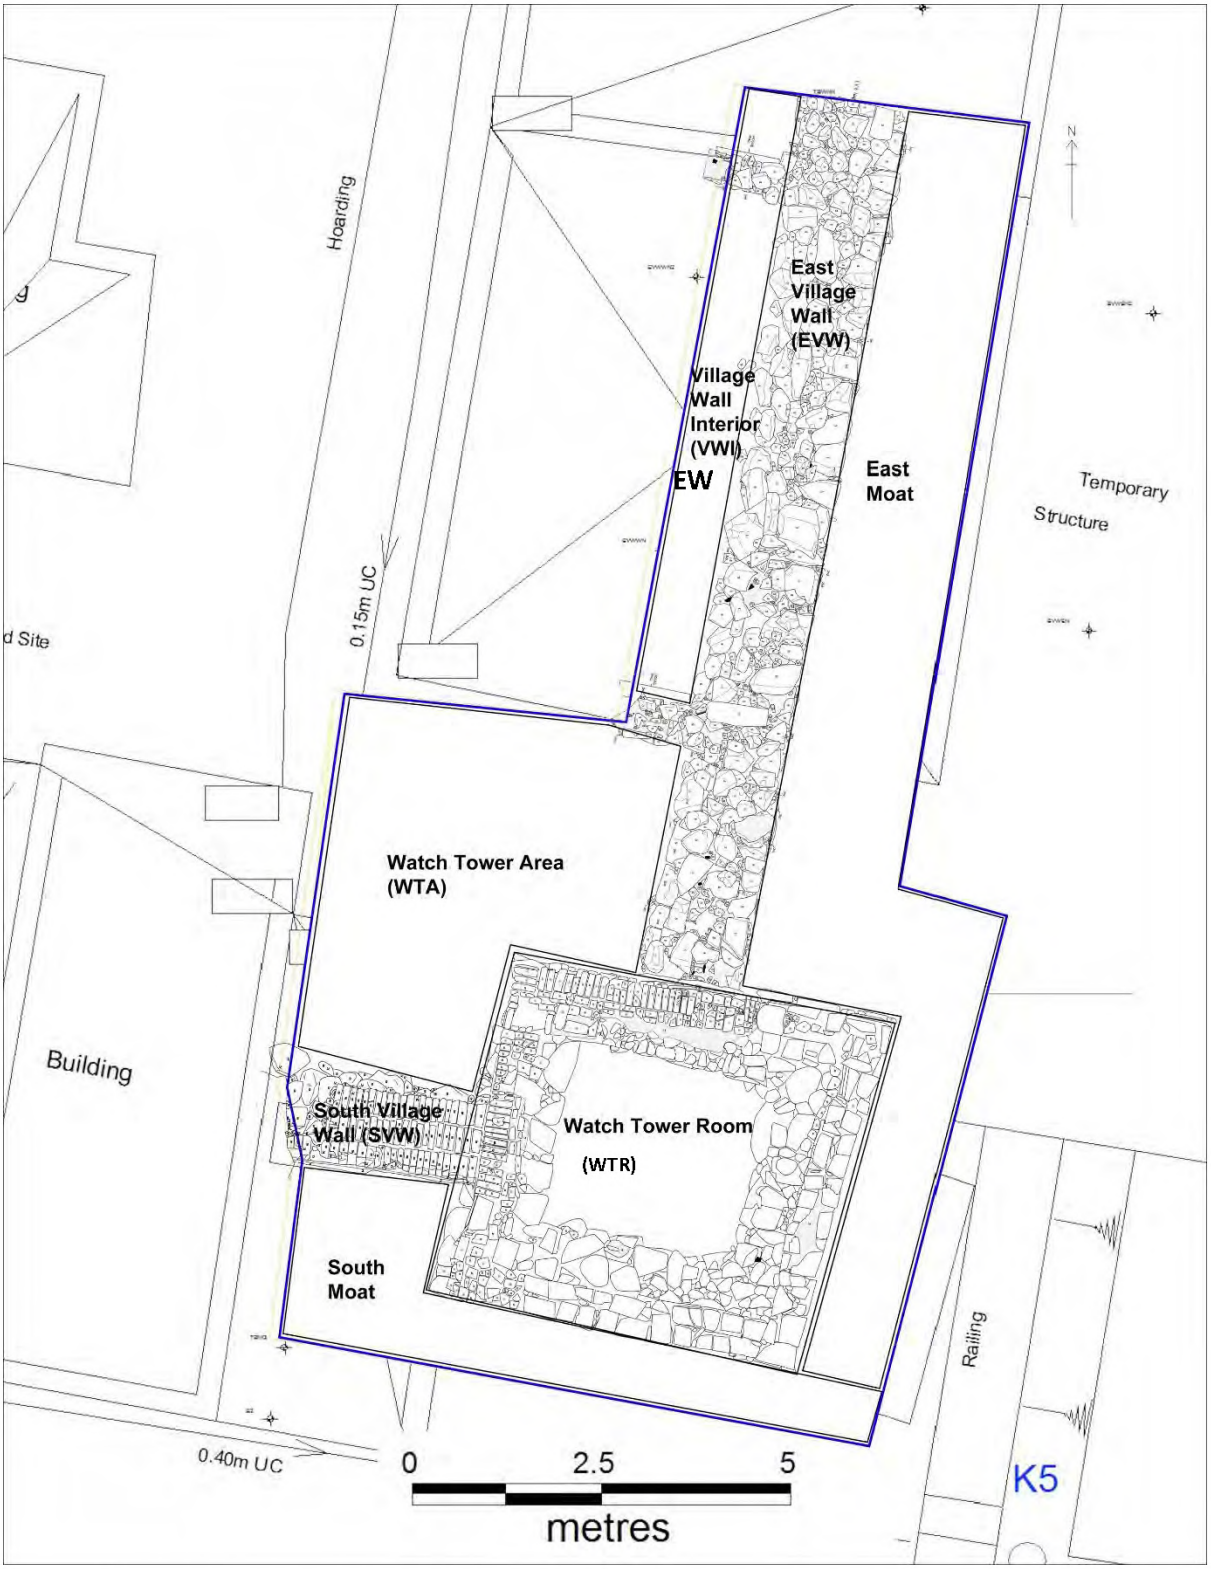


Figure 5.10 Map showing the areas of Further Investigation 1) Watch tower room area (WTR) which includes moat area around the room; 2) Watch tower area (WTA) which includes the lane; and 3) Eastern Village Wall area with moat area (EVW). Due to actual location of remains as discovered, the Further Investigation areas are slightly shifted towards west compared with the original proposed location (see Figure 5.11)

A survey and on-site measurement of the layout of the excavated southeast watch tower confirmed that the watch tower remains are adjacent to the original T3 excavation (Figure 5.).

This means T3 results of the 2016 AIA, a severe disturbed stratigraphy pertains to the moat in-fill.

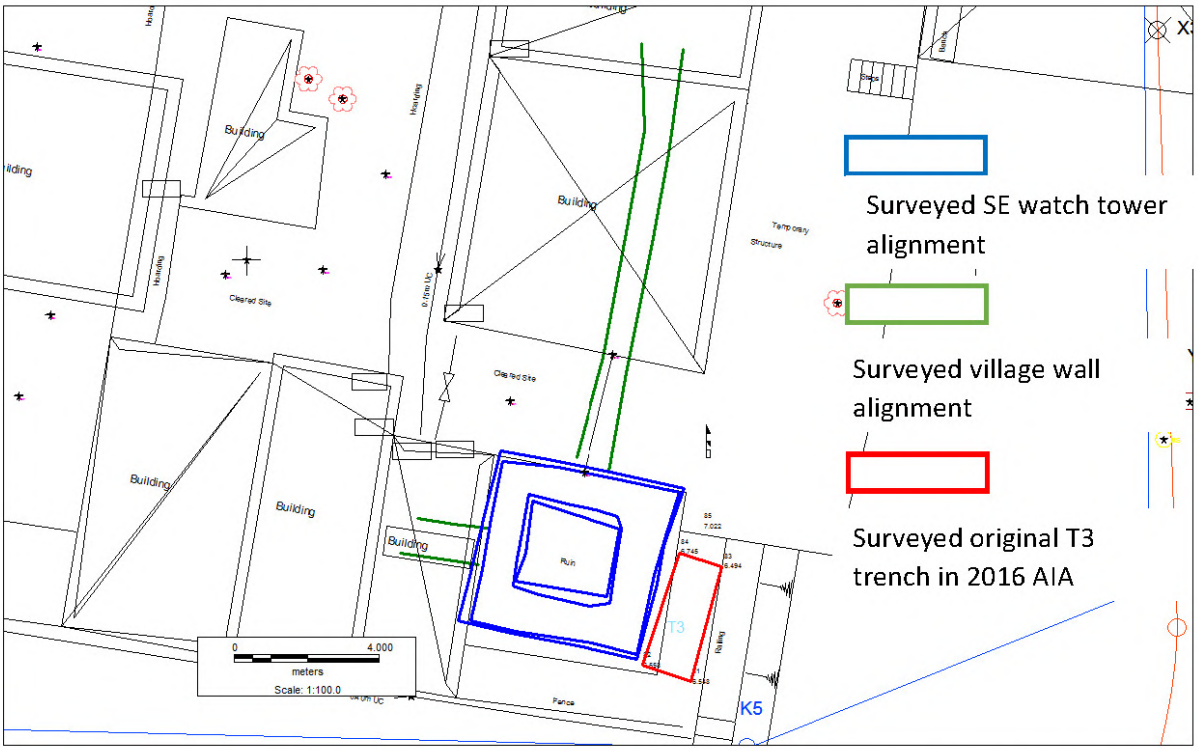

Figure 5.11 Surveyed layout of southeast watch tower (in blue), village walls (in green) and its relationship to the 2016 AIA T3 trench (in red).

Watch Tower Room (WTR)

Brick [**co.3005**] (Plate T3.2) and stone walls [**co.3001/3006**] in the expected layout of the watch tower room, and part of southern stone village wall [**co.3021**], mortar [**co.3024**] below brick [**co.3004**] were noted early on during clearance, in an area which was obscured by fencing and debris in the 2016 AIA phase. The upper parts of the watch tower room are heavily damaged due to removal of the inner part of the wall and are thus fragile. The stones on the upper part of the remains consist of rectangular cut granite blocks [**co.3001**] (Plate T3.3) and do not appear original. Granite blocks are, however, visible on an early 20th century photograph, part of the last walled village phase and were likely reused in rebuilding of the corner as residential unit in more recent times. On the inside of [**co.3001**], a collapse of bricks [**co.3020**] and loose stones [**co.3042**] on top of the watch tower wall [**co.3006**] was noted (Plate T3.4). The bricks seemed to be either a collapse or used as fill mainly along the interior east and south.

The area in and around the watch tower room had been used in recent times and was found covered with a plaster [**co.3002**], stone [**co.3003** and **co.3019**] and concrete floors [**co.3017**] (Plate T3.2); the latter under thin soil layer [**co.3016**] which would have formed after the area was abandoned. [**co.3025**] is the fill between the stone floor [**co.3003**] inside the watch tower room; it included pottery dated to 19th-early 20th century.

Immediately below the floors and levellers [**co.3007/3008/3009/3010/3029**], two large village ware pots [**co.3012/3014**] were recorded (Plate T3.5). The pot [**co.3012**] is set within pit with fill [**co.3033**] which truncates [**co.3010/3027/3026**] and is covered by [**co.3034**]. The other pot [**co.3014**] is likely similar to [**co.3012**] but a recent adjacent borehole mixed the surrounding stratigraphy [**co.3014A/3013/3027/3026**]. Along the east of the watch tower a dark fill [**co.3011**] was excavated under levellers. It included a lot of building debris and tree roots.

Plate T3.1 Tile fragments from [**co.3044**], most with cloth-imprint.

The fill layer [**co.3036**] is the first one to cover most of the interior of the watch tower room. Within the north west of the room however, [**co.3036**] is truncated by [**co.3037/3040**] which appears as an undefined pit with few artefacts dating to 19th-20th century. Along the room walls fill layers [**co.3030/3038**] contained modern debris, including plastic. Below these, dark fills [**co. 3041/3096**] continued along the walls down almost to end of excavation (Plate T3.6). [**co.3039** and **co.3040**] are soils located below [**co.3036**]. [**co.3039**] manifests as a hard-compacted gravel in the east and northeast of the room and [**co.3040/3043**] consists of sterile gravel patches. [**co.3044**] was a thin greyish brown fill recorded below [**co.3039**] and appeared to slope slightly to the west; it contained a few cloth-imprint tiles of Ming/Qing date (Plate T3.1) and ceramic sherds dated Qing to early 20th century. Excavations continued until a sterile orange clayey and gravelly soil [**co.3045/3095**] and was recorded. The inside of the watch tower room was excavated down to water level at of 5.35mPD after which an auger test was conducted to verify sterile soils down to 4mPD.

Plate T3.2 View of brick wall remains [**co. 3004**] on top of watch tower room, brick wall remains [**co.3005**] on top of southern village wall; looking south.

Plate T3.3 View of above-ground cut granite blocks **[co.3001]** on top of northern, eastern and southern walls of watch tower, looking south.

Plate T3.4 View of interior eastern watch tower room wall showing granite cut blocks **[co.3001]** propped by bricks **[co.3020]**, followed by small stones and large stones **[co.3006]** with large gaps filled by bricks; looking east.

Plate T3.5 View of pots [left: **co.3014**; right: **co.3012**] inside the watch tower room; looking west.

Plate T3.6 View of 'disturbance' [**co.3096**] along the interior north wall of watch tower room; looking east.

Watch Tower Area (WTA)

At the entrance to the watch tower room (and at the level of the interior concrete floor), a stone floor [**co. 3019**] (Plate T3.7) was recorded; similar stone floors were recorded at the entrance to the watch tower rooms in T1 and T7. The floor consists of flat-ish roughly shaped granite stones. Below the floor and within the soil leveller fill [**co. 3022**], plastic items were recovered (Plate T3.8), a late Qing dynasty date for the stone floor is proposed which corresponds with the findings in T1 and T7. The stone floor also covered the top of a stone drain [**co.3023/3047/3060/3066**] a situation similar as recorded in T1.

Two phases of stone drain construction were distinguished (Plate T3.9 and Plate T3.10). The upper drain [**co.3023/3060/3047**] has a narrower channel and was loosely lined with bricks while the base was paved with mortar (Plate T3.9); a dark fill [co.3046] was associated with this drain. The lower drain [co.3066] appears to be wider, has a stone lining and a hard floor base (Plate T3.10). Both the upper and lower drain shared a same channel at the southern end, covered by large flat stones. The fact that the mortared base of the upper drain stopped before the covered area suggests that this later, recent drain adopted the older drain exit. The stone drain [**co.3066**] empties, like T1, through the village wall into the moat. The outlet of the drain was shown on a late 19th to early 20th century photo showing the exterior of the village wall and southwest watch tower room. It is thus considered the lower drain very likely already existed in the late 19th century and had been in use for a long period into the modern days, as the fills [**co.3067A/B**] inside the drain contained modern finds including glass and plastic.

A very dark grey fill [**co.3068**] containing Qing dynasty to early 20th century finds was identified along the east exterior of stone drain [**co.3066**] (Plate T3.9, on left). The fill is possibly related to a drain trench dug to replace the stone sides of the ditch.

Plate T3.7 View of stone floor [**co.3019**] at entrance of watch tower room and adjacent to southern village wall (SVW); looking east.

Plate T3.8 View of plastic below stone infill [**co.3022**] within watch tower area; looking south.

Plate T3.9 Upper phase of drain [**co.3023/3060/3047**] with brick-lined side and mortar base; built on top/inside of the stone-lined drain [**co.3066**]; mortar base stopped before extending into covered south end.

Plate T3.10 Left and Right: Lower drain [**co.3066**] with stone lining and a hard floor base; both looking north.

Plate T3.11 View of hardened floor level [**co.3055/3058**] with tile fragments [**co. 3064**] pressed into surface within watch tower area; looking east.

Modern fill and floor levels [**co.3048, 3050, 3056**] and fill [**co.3057**] were removed within the watch tower area (WTA). A hardened floor level [**co.3055/3058**] partially covered by levellers consist of grey sand [**co.3063**] and tile fragments [**co.3064**] pressed into surface was noted (Plate T3.11). The tiles are tiny fragments mainly of Qing to early 20th century period; ceramics retrieved in this fill also dated to 19th-20th century. Cut into this floor [**co.3058**] was a pit [**co.3065A/D**] containing a large village ware pot [**co.3065**] which contained fills [**co.3065B/C**] with modern material including mortar and concrete fragments (Plate T3.12). Two shallow pit features [**co.3074B, 3075B**] located closely to the north of the pot pit were also noted cutting into [**co.3058**]. The fills [**co.3074A/B, 3075A**] contained tile fragments.

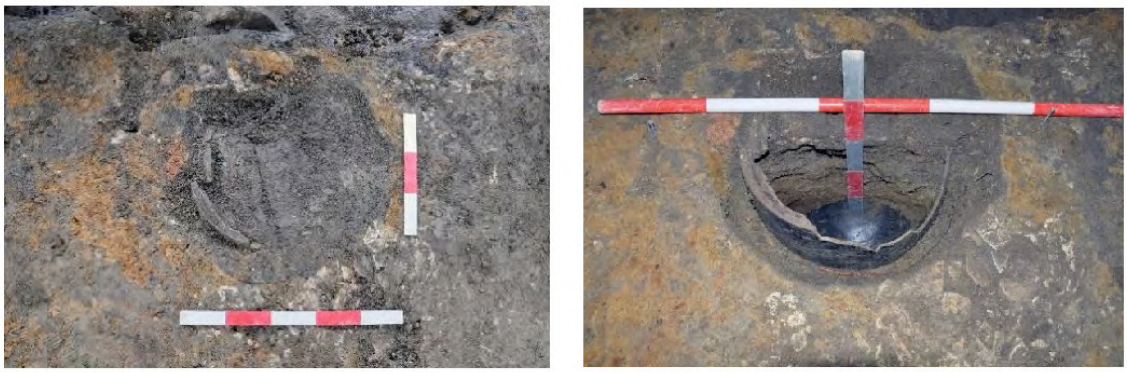

Plate T3. 12 Left: Pit [**co.3065D**] cut into floor level [**co.3055/3058**]; Right: pot [**co.3065**] within pit fill [**co.3065A**] and contents [**co.3065B/C**] halved; both looking west.

Below the hard floor was a levelling fill [**co.3070**] which contained tile fragments. A cluster of randomly laid bricks with shattered edges [**co.3071/3072**] was found on the east side of trench near the east village wall. The bricks sit on top of a very thin clayey sand layer [**co.3078/3079**]

of greyish-brown colour, which fully covered the watch tower area. It is possibly a deposit related to organic-rich human occupation. Few Qing to early 20th century pottery and tile fragment was retrieved from the levelling fills.

Underneath, a second compact hard soil floor [**co.3077/3080/3083/3085/3087**] was excavated which included three stake hole alignments [**co.3082-**SH1 to 20, 56 to 58] (alignment 1) [**co.3082-**SH25 to 28, 47 to 48] (alignment 2) and [**co.3082-**SH29 to 33, 44 to 45] (alignment 3) (Plate T3.) and nine potential postholes [**co.3082-**PH24, 46, 49, 51, 52, 53, 59, 60, and 61]. The latter hard floor and postholes arrangements correspond to the base of the stone house walls [**co. 3059**S and W] and are likely associated. Yet the stake hole alignment 1 extends underneath the western stone wall [**co.3059**W] into unexcavated area, and thus stratigraphically earlier than the house walls. [**co.3082-**SH57, 58] located at the west end of the stake hole alignment 1 truncated posthole [**co.3082-**PH52] and thus was considered stratigraphically latter then the formation of the postholes. Given the full layout of the stake hole alignment was not complete, their purpose of construction is not fully comprehended. Nonetheless, the 3 alignments appear to form an enclosed area.

Stake hole alignments 1 (east/west oriented and consisted of twenty-four stake holes) and 2 (north/south oriented and consisted of seven stake holes) have a perpendicular spatial relation and are therefore assumed to be part of the same structure. Stake hole alignment 3 (northwest-southeast oriented and consisted of six stake holes) is located within the alignments 1 and 2 mentioned above. The dwellings along the wall would typically have been used for livestock (Ip 1995:49) and it is possible that the two perpendicular stake hole alignments (1 and 2 on Plate T3.13) are part of an animal pen construction.

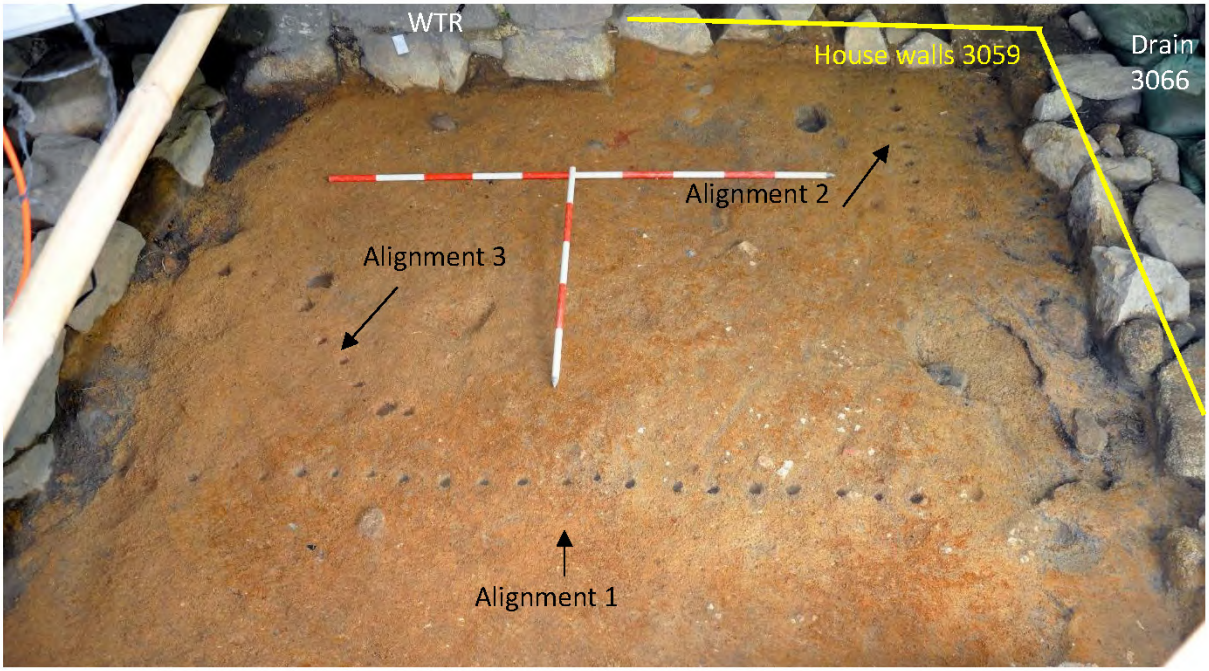

Plate T3.13 View of three stake hole alignments [**co. 3082**]; looking south.

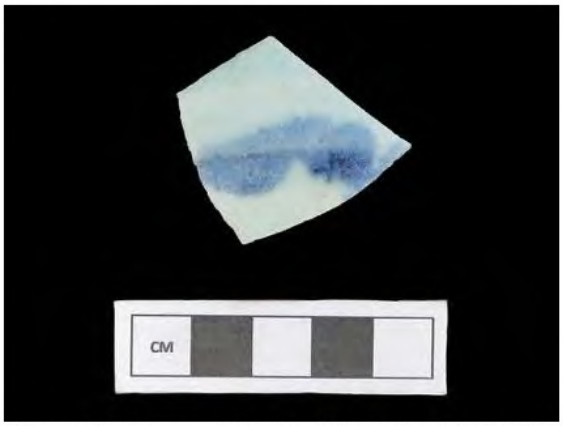
Fills of the [**co.3082**] stake holes and posthole contained few Qing to early 20th century pottery and ceramic building material including bricks and tiles (Plate T3.14a-d). The hard floor [**co.3077/3080/3083/3085/3087**] cut by these hole features contained finds of a similar dating but the tile fragments retrieved show a mixture of cloth-imprint and plain surfaces (Plate T3.14f).

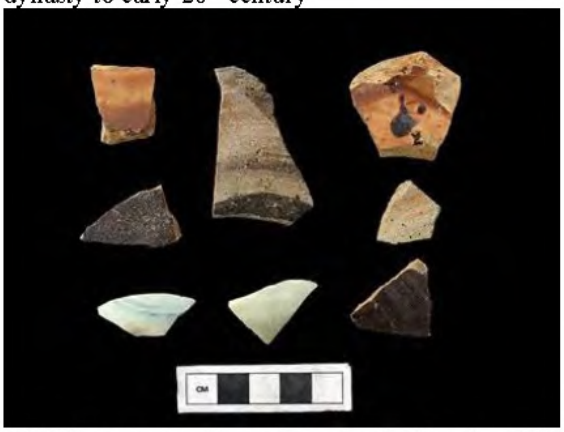
(a) village ware sherd from [**co.3082**-PH46], Qing dynasty to early 20th century

(b) plain tiles from [**co.3082**-PH51]

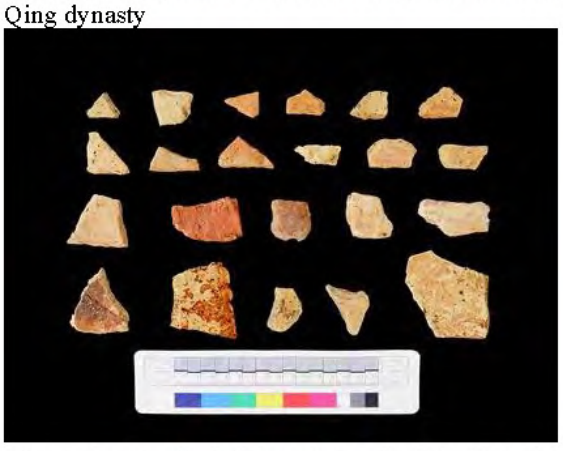
(c) village ware sherd from [**co.3082**-SH20], Qing dynasty to early 20th century



(d) provincial porcelain sherd from [**co.3082**-PH52], Qing dynasty



(e) village ware and porcelain sherds from [**co.3077**], Qing dynasty to early 20th century



(f) a mixture of cloth-imprint and plain tiles from [**co.3083**]

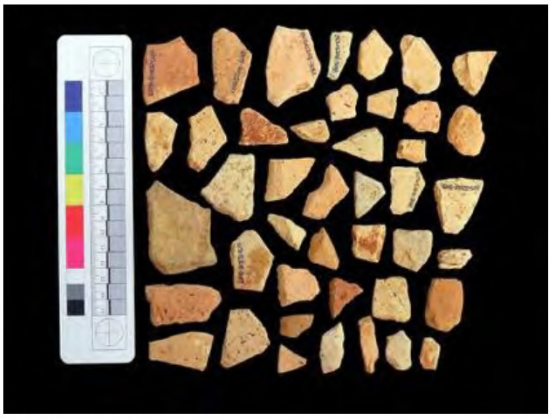
Plate T3.14 Finds from hole features [**co.3082**] and first hard floor [**co.3077/3080/3083/3085/3087**].

The small 'room' between the southern village wall and the house wall [**co.3059S**] to the north, contained a concentration of brick [**co.3081**] at the floor level associated with house wall (Plate T3.15 and T3.16). The bricks are similar to mudbrick floor within T9 (recorded in 2016 AIA phase) and brick drain in T5 (below stone drain).

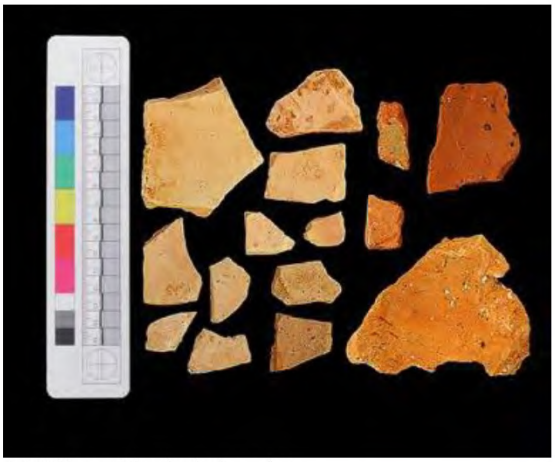
Plate T3.15 View of brick concentration [**co.3081**] recorded within WTA along the southern village wall and below the stone drain; looking south.

Plate T3.16 Bricks from [**co.3081**]

(a) Ceramics, likely Qing dynasty



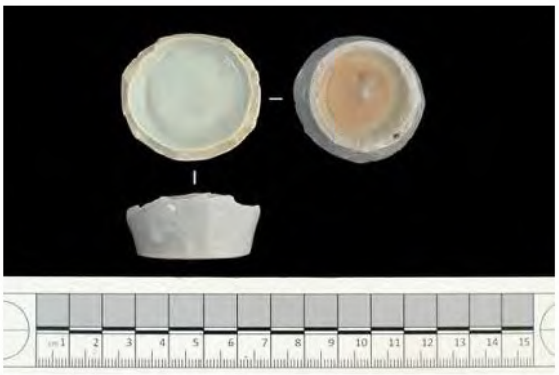
(b) Plain tiles



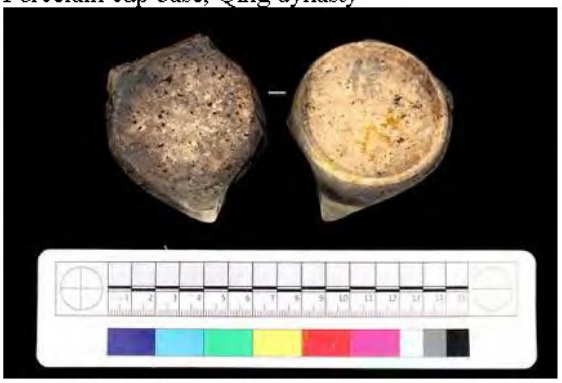
(c) Tiles with cloth-imprint

Plate T3.17 Finds from [**co.3088**].

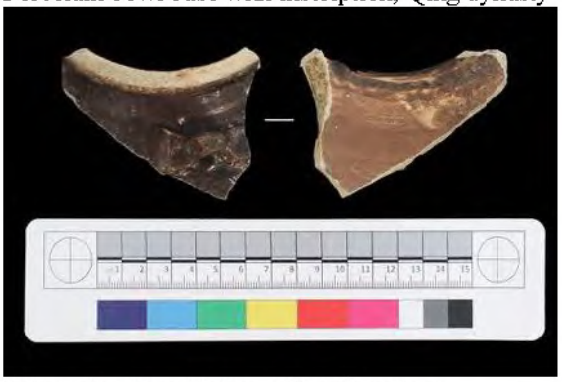
Below the second hard floor was another thin occupation layer [**co.3084/3086/3088**] of greyish brown sand, which produced Qing dynasty finds (Plate T3.17a-c). Buried underneath it was a levelling layer consist of compact yellowish brown, slightly clayey sand layer [**co.3089**]. Moderate amount of tile fragments and few ceramics were found. On the eastern side of [**co.3089**] near the inside of the east village wall was a semi-circular shaped, slightly clayey sand patch of strong brown and dotted with grey spots [**co.3090**]. The patch was possible a disturbance which truncated [**co.3089**].



Porcelain cup base, Qing dynasty



Porcelain bowl base with inscription, Qing dynasty



Pottery jar rim with lug, 16th-18th century.
Plate T3.18 Finds from [**co.3092**].

A single posthole [**co.3091A/B**] was found sealed by [**co.3084/3086/3088**] and cut into [**co.3089**]. The fill [**co.3091A**] was excavated to water table and did not produced artefacts.
After removal of [**co.3089** and **3090**], a grey sandy deposit [**co.3092**] was found mainly accumulate on the west side and thinned out toward the east. The deposit contained frequent Qing dynasty finds (Plate T3.18). It covered an earlier phase of post and stake holes [**co.3093**-PH38, **3093**-SHs] which cut into a sterile orange deposit [**co.3094**] (like T5) (Plate T3.19).

Spaced at similar interval, a stake hole alignment [**co.3093**-SH1, 10, 14, 20, 21, 25, 29, 32, 33, 34, 36, 37, 41] set into a shallow and linear north/south aligned groove along the east village wall. Five less structualized stake holes [**co.3093-SH**9, 23, 24, 39, 40] and one possible posthole [**co.3093**-PH38] were identified on the east side outside the shallow groove. The fills contained one potsherd likely dated to Qing and one plain tile fragment (Plate T3.20). The linear groove was not found associated with stake hole alignment in other trenches however, the aligmment on a sloping or even stepped topography is consistent to the findings at T5 and T1. In addition, all stake hole alignments (T1, T3 and T5) were covered by thin grey sand, rich with finds which appeared thicker towards the west.

Dense shallow hole features (unlike stake holes) were recorded near the watch tower room. These are interpreted as possible traces of earth ramming activity. Water level was encountered at about 5.45mPD and excavations were halted.

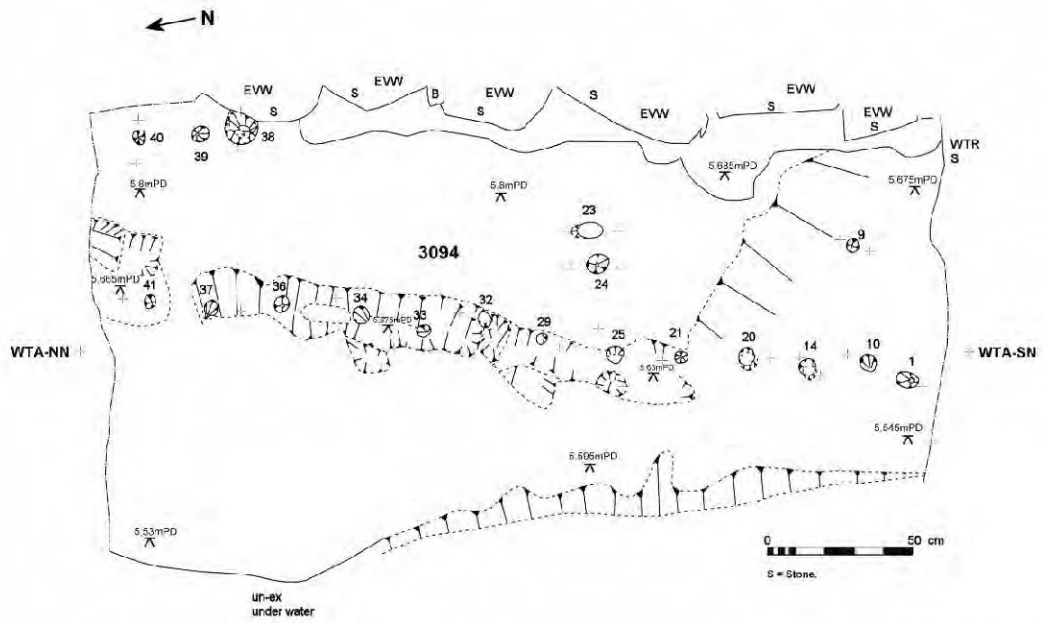


Plate T3.19 Photo and drawing of stake holes [**co.3093**-SHs] within orange deposit and grey sandy soils to the west; looking north.

(a) [**co.3093**-SH20], potsherd, likely dated Qing.

(b) [**co.3093**-SH39], plain tile fragment

Plate T3.20 Finds from fills of [**co.3093**] stake holes.

Interior Village Wall Area (VWI)

The top of the eastern village wall [**co.3100**] and around 50cm down on the interior of the village was excavated. Upper modern strata [**co.3053/3054**] on the interior of the village wall revealed stone floors [**co.3097/3098/3099**] (Plate T3.21 and T3.22). Stone floors had only been noted near watch tower room entrances within other trenches.

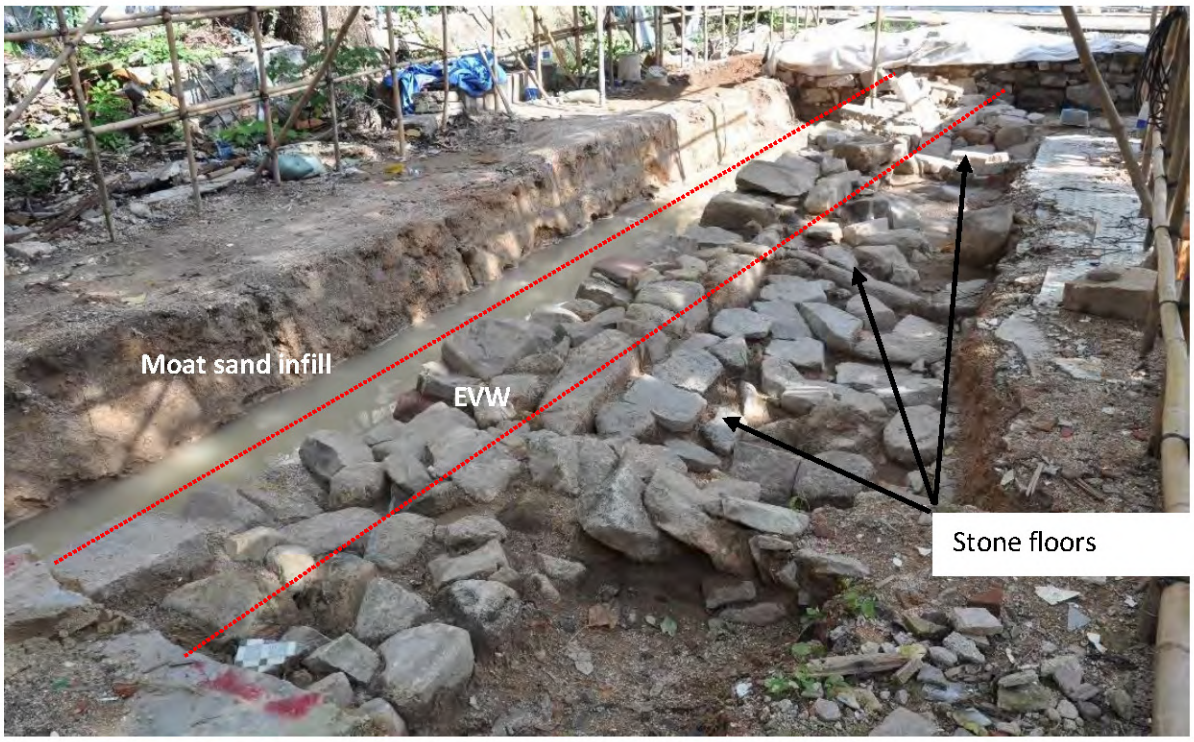

Plate T3.21 View of west facing section showing sand infill of moat similar to T1. On interior of eastern village wall (EVW) the stone pavements [**co.3097/3098/3099**] are visible; looking southeast.

Plate T3.22 View of the interior of the eastern village wall with stone floors [**co.3097/3098/3099**] recorded and removed.

[**co.3073**]

[**co.3076**]

Plate T3.23 Coins from fills [**co.3073/3076**] under the stone floors.

Below the stone floors, fills [**co.3073/3076**] were producing 19th-20th century ceramics and coins dated to 1636 to c.1867, 1889-1907 and 1904 were recovered from fills (Plate T3.23). [**co.3076**] was a dark-coloured fill along the inside of the eastern village wall [**co.3100**]; similar fills were noted along village walls in T1, T7 and T9.

Moat

The infill of the moat along the eastern village wall [**co.3100**] was like T1 and consisted of a gravel/sand [**co. 3049/3051/3052/3102**] with minimal inclusions. Around the watch tower room, on the surface several modern toilets were noted which would have belonged to recent [**co.3018**] (post-WWII) houses. The moat infill along the east and south [**co.3015**] of the watch tower room appeared far more disturbed during recent times (see results of original T3 during 2016 AIA) and contain multiple concrete floors [**co.3018/3035**] with filler [**co.3101**], modern materials and construction debris [**co.3031/3032/3028, 3103**].

The area around the stone drain outlet included concrete benches and floor suggesting the moat area was incorporated in house structures to the south of southeast watch tower (Plate T3.24). The original drain outlet in the village wall was extended in recent times to empty out further south into an open culvert. The excavations were conducted down to water level, the top of the original moat deposits was not noticed anywhere.

Plate T3.24 View of stone drain outlet **[co.3066]**; looking north

Summary of the findings at T3

2016 AIA findings

- No evidence of Southeast watch tower, only modern stone/brick wall (20th century);
- Evidence for severely disturbed stratigraphy and mix of materials dated Qing dynasty to modern times.

Watch tower room and village walls

- The layout of the southeast watch tower and village walls are present; while the layout appear original, the walls have been repaired and damaged by later modifications;
- Some brick walls remain on top of stone walls and are part of the latest phase of village use (20th century)
- Village walls show evidence of rebuilt with red sandstone square stones, medium and small irregular stones; date of this repair is not known;
- Extensive damage of walls and evidence for severe disturbance in and outside watch tower room likely part of the last use of the watch tower; post-WWII.

Watch tower area

- Series of postholes, stake holes and hard floors are recorded below the oldest stone house phase and are likely to date between 18th and 19th century;

Interior village wall area

- Stone floors covering fills dating to early 20th century;

Moat

- Eastern moat fill deposit mirrors the fill recorded at T1 and dates to the WWII infill of the moat;
- Stone drain previously recorded T5 and T1 is also present in T3 and exits into the south moat through the village wall; the drain was used into modern times but likely was constructed in the 19th century;
- Evidence for severe disturbance in moat around watch tower which occurred in modern times (post-WWII).

Cultural remains

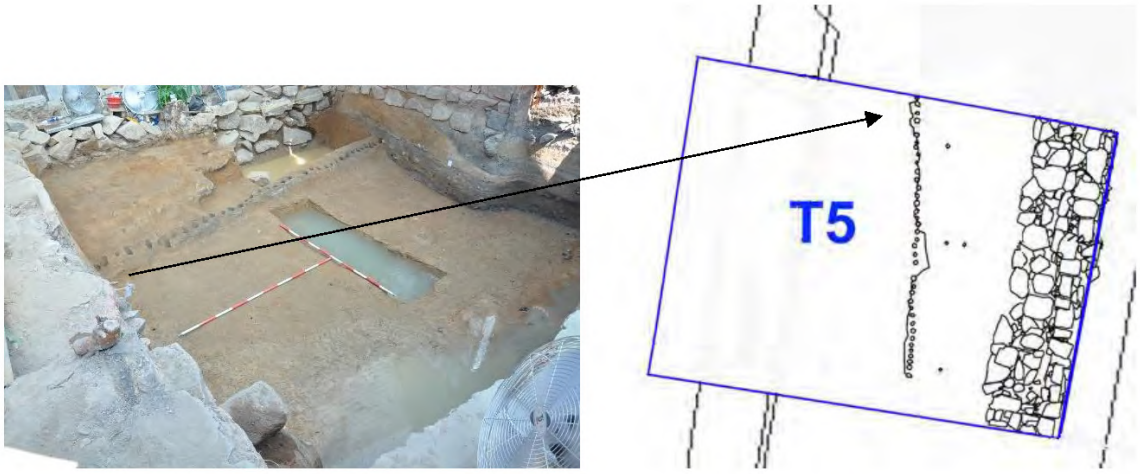
- Most of the finds recovered have a date belonging to Qing dynasty, 19th century and Qing dynasty to 20th century;
- Coins dated 1636 to circa 1867, 1904 and 1889-1907 were recovered from fills below stone floors along the eastern village wall;

5.4 Trench 5

Trench 5 was excavated between 26 March and 31 May 2018. The trench measured around 6 by 6m square of excavation and extended slightly to the east to include the top of the eastern village wall. On the surface, several house areas (North, South and West houses) and a lane divide Trench 5. The trench abuts the eastern village wall (Figure 5.11).

The divisions as mentioned above are relevant to the upper levels of the trench only and mimic the 1902 village layout of houses and lane location (Figure 6.1). The description will start with the divisions and conclude with the overall trench results. A total of 154 contexts were recorded within Trench 5.

The excavation was conducted by hand and excavated down to c.4.8mPD after which a sondage was conducted down to 4.3mPD and an auger hole test to a further 1.2m (3.1mPD). Water level was reached and some attempt to excavate whilst using ongoing pumping was attempted in the sondage. Sterile soils were found within the entire extend of the trench and confirmed for a depth of 1.8m.



Full description of contexts, finds, finds plates, excavation plates and drawings, and TL-dating result are presented in *Annex C.*

Figure 5.11 Trench 5 includes the following sections; Eastern village wall (EVW); Lane (L); South house (SH); North house (NH) and West houses (WH). A sondage excavated to confirm sterile soils is marked in green.

North/South Houses (N/S H)

Both houses were covered by a concrete surface. Within the north house, the upper strata were disturbed and yielded truly little other than modern floor levels, tile and hard floor with levellers [**co.5001/5002/5003/5008/5013/5016**]. While within the south house below the modern floors and fills [**co.5001/5002/5003/5010**], a brick (drain?) feature [**co.5011**] and four stone slabs [**co.5012**] with dark greyish brown fill below [**co.5023**] (Plate T5.1) were recorded within the northwest corner of the house. The material in the fill dates to Qing-19th/20th centuries. The brick feature sat on pink mortar and both features appear recent in date. In the east of the south house [**co.5026**] a brown slightly gravelly, silty and clayey sand floor without finds was recorded.

Plate T5.1 Brick feature [**co.5011**] (Right) and four stones [**co.5012**] (Left) in northwest corner of south house. Left looking east and pink mortar under brick feature looking north.

Two fills, [**co. 5017**], a brownish yellow gravelly, clayey sand fill and a similar [**co.5022**] below were recorded below the features in south house. Both represent a levelling fill dated similarly to Qing to 20th century.

On a similar level as the features inside the south house, but at interior of the north house threshold, a large village ware vessel was excavated [**co.5020**] (Plate T5.2). The fill in and around the vessel pit [**co.5021**] contained material dated to late Qing dynasty. The ceramic village ware vessel had been set into the ground at the base of the stone threshold and its pit [**co.5021**] (Plate T5.3) truncated, a mainly Qing dynasty, fill layer fill [**co.5018**]. The threshold/house walls are on a level/within a strong brown very gravelly clay layer [**co.5014**] which is generally dated to the 19/20th century.

Plate T5.2 View of pot, [**co.5020**] with pot fill/pit [**co.5021**] set within fill [**co.5018**] and along house walls with threshold, [**co. 5007**]; looking west.

Plate T5.3 East facing view of north and south house walls; looking west.

Another large pot (previously recorded in 2016 AIA as [**co.512**]), [**co.5027**] was fully excavated and removed from south house under the Further Investigation. Stratigraphically, it belongs to a modern phase of the house.

The façade walls of N/S house [**co.5006/5007**] were constructed with shaped granite blocks and included two thresholds and four door pivots (Plate T5.3). The threshold in the south house has been modified and includes disturbed stratigraphy and concrete. The north façade wall appeared less disturbed and stratigraphically sits within a 19th-20th century context. The layout of the N/S houses extended over the eastern village wall, which suggests modifications to original houses. The results indicate that the lower parts of the original walls were re-purposed as foundation walls in the later house constructions. [**co.5015**] is a trench cut (with fill) for a metal water pipe running along the southern modern granite walls of south house; the feature belongs to the latest use of the house.

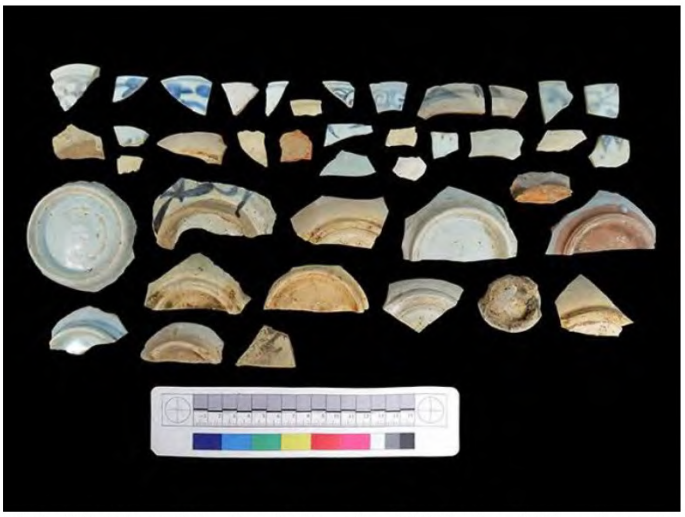


Plate T5.4 Porcelain sherds from [**co.5025**], dated Qing dynasty.

Below the N/S house walls, a series of layers [**co.5018/5025**] slant towards the east and are separated from -what is interpreted as - a Coastal Evacuation deposit of brown clayey, sandy gravel fill, by an orange sterile deposit [**co.5019**] (Plate T5.3). The assemblage of materials in [**co.5018/5025**] and the black deposit within the lane area at the base of the slanting deposits [**co.5058**] can be generally dated to Qing dynasty based on the material findings (Plate T5.4), stratigraphically however, it is more likely to date to 18th-19th centuries of Qing dynasty.

Within the south house, the layers [**co.5018/5025**] were covered by a hard floor and filler [**co.5024**]. This floor level sits at the base of the stone house walls and may be the floor associated with the original construction phase of the houses (Qing dynasty/19th century). (Plate T5.3)

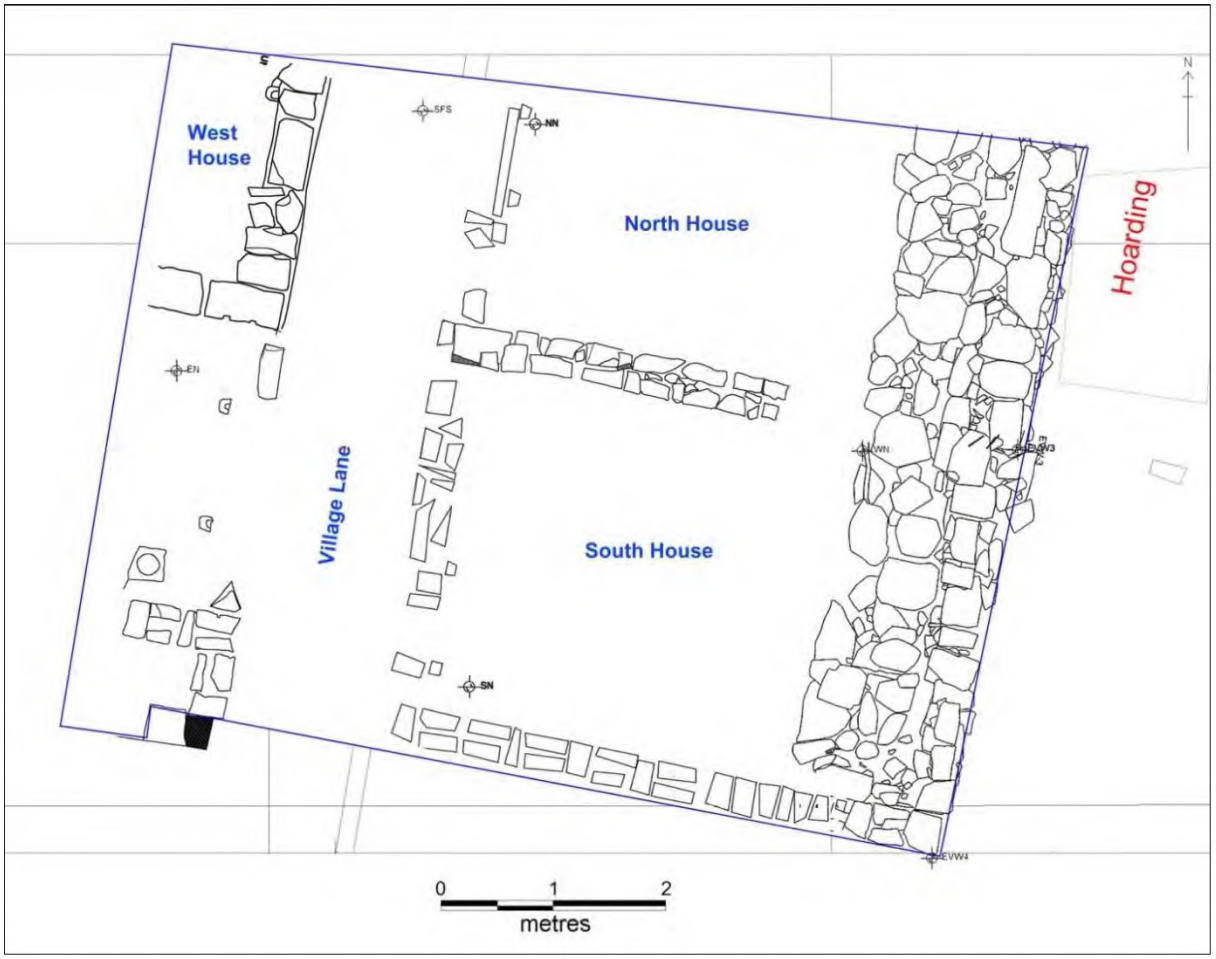

Figure 5.12 Surveyed record of north, south and west houses stone wall alignments (modern house foundations) and Eastern village wall.

West Houses (WH)

A small interior area of the west houses (first row of houses within the village as opposed to N/S houses which were attached to the enclosure wall) was excavated (Figure 5.12). The top which consisted of concrete and levellers covered what can be divided into three separate houses [**co.5030**]. Below this concrete, a hard floor [**co.5029**] and fills were recorded in north and centre houses; the fills include [**co.5084/5087**] a gravel layer on top of clay/sand fills [**co.5033/5034**]. The floor and associated fills are generally dated to Qing dynasty. These layers are truncated by recent pit features such as [**co.5085**] and [**co.5089**] (and possibly associated are gravel floor and fill [**co.5046/5088**]).

a. Ceramics dated Qing dynasty to early 20th century.

b. A mixture of cloth-imprint and plain tiles.
Plate T5.5 finds from [**co.5061**].

A compact fill [**co.5035/5036**] which separate levels described above from lower strata, likely dates stratigraphically to 19th century. A residual layer or support for this compact fill was recorded as [**co.5060/5063/5040**] below. A sandy fill with ceramics and numerous tile fragments [**co.5061/5064**] was excavated below. (Plate T5.5 shows finds from [**co.5061**]).

The stone façade walls of most northern west house showed two alignments. The alignment change is minor, but it clearly shows two phases. The bottom of the lower stone wall alignment [**co.5055**] corresponds to a sterile layer on the interior of the houses.

The lower stratigraphical layers could not be connected to structural remains and [**co.5055**] is interpreted as the oldest surviving walled village house phase similar to house walls recorded in T6 in 2016 AIA. Both are recorded at relative shallow depths: base of wall in T5 sits around 6mPD and in T6 around 6.40mPD.

Lane (L)

The upper strata of the lane consisted of [**co.5009**], a fill below the concrete surface [**co.5004**]. It was followed by a dark brown sandy and gravelly silt fill [**co.5028**] with angular stone and concrete debris, which sat on a hardened level, [**co.5031**]. Within the south of the lane a light yellowish-brown clayey gravel [**co.5041**] was recorded between [**co.5009**] and [**co.5028**]; it appears unconnected to any features and included few materials datable to Qing dynasty and 19th century.

Within the lane, gravel fill [**co.5032**] was first noted along the east of the lane in what looked like a drain. In fact below, two drain features are excavated, a stone drain [**co.5043**] on top of

a brick drain [**co.5044**]. The stone drain was likely connected to a stone pavement in the lane (similar to T4 stone pavement and drain recorded in 2016 AIA), but the stone slabs were no longer present within T5. It is possible that the [**co.5031**] was a leveller for the stone lane pavement as it was situated below and around brick drain. The stone drain (Plate T5.6) which consisted of stone lining but had a soil base, was sitting within a very dark fill with finds [**co.5045**] generally dated to Qing dynasty. Stratigraphically the stone drain connects to the stone house walls which suggests a 19th century date.

The below recorded brick-lined drain [**co.5044**] (Plate T5.7) was poorly preserved but occupied generally the same location and alignment as the stone drain. The artefacts within the drain consisted mainly of tile fragments (Plate T5.8). Stratigraphically the brick drain is below the stone drain and is thus older. The bricks used to line the drain are similar to the brick floor dated to 18th century in Trench 9 (2016 AIA).

Plate T5.6 Stone drain along modern house alignment [**co.5006/5007**]; looking north.

Plate T5.7 Possible brick lined drain within lane area; looking north. The stone wall to the left represents the oldest residential house wall recorded within T5 [**co.5055**].

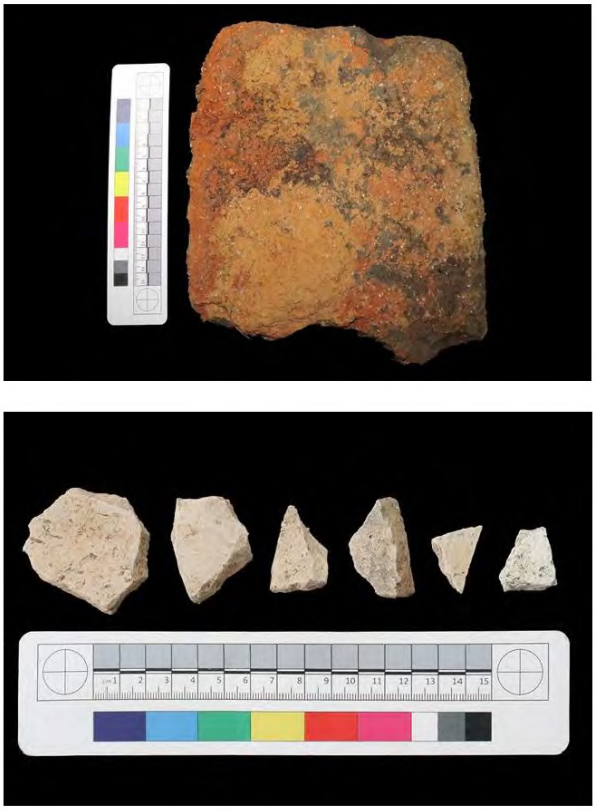

Plate T5.8 Brick from brick drain [**co.5044**] and tile fragments found within.

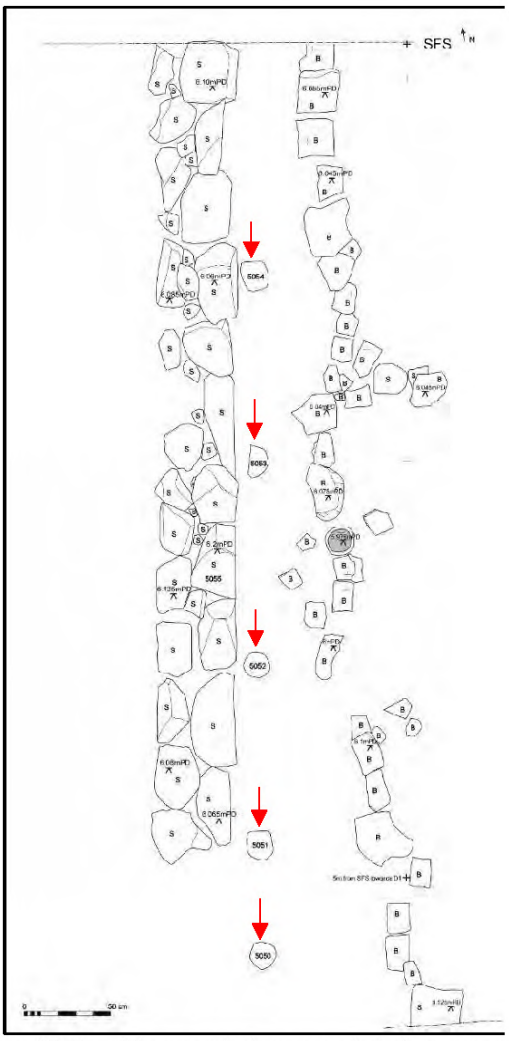

Plate T5.9 Five postholes recorded along stone wall, [**co.5055**] and brick drain [**co.5044**] to the east.

Plate T5.10 Finds from [**co.5056**] dated broadly to Qing dynasty.

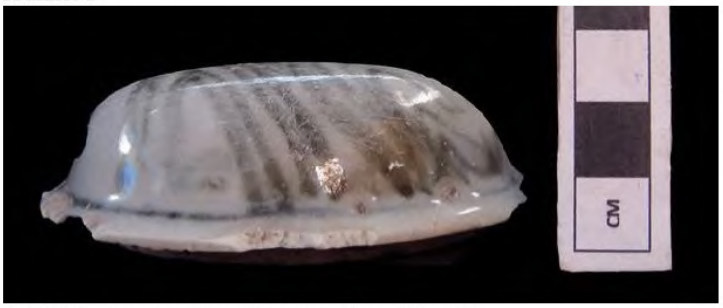
The base of the brick drain consisted of [**co.5047**], a light yellowish-brown clayey gravel, and another dark yellowish brown very clayey gravel fill [**co.5056**], both soils included finds dated broadly to Qing dynasty (Plate T5.10). A black gravelly silt fill [**co.5048**] was situated under brick drain level.

Below or possible at the same level as the base of the brick drain, a series of five postholes [**co.5050-5054**] (Plate T5.9) were noted within a hard yellow floor [**co.5057**] and dark fill

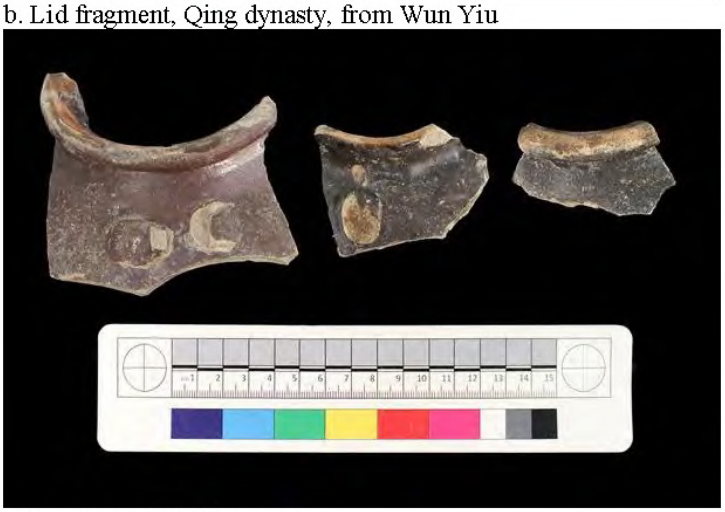
deposits [**co.5045/5048**] along the west house wall [**co.5055**]. The interpretation for these postholes is elusive and possible they are part of the front roof or platform timber support of the houses.

Overall Trench

a. Celadon bowl fragment, Ming dynasty/16th century, from Huizhou



b. Lid fragment, Qing dynasty, from Wun Yiu

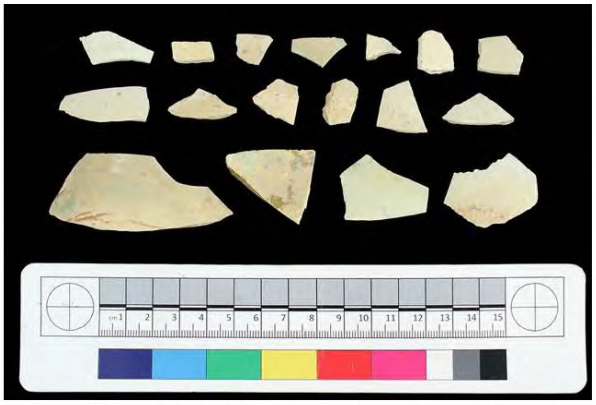


c. Jar rims, 16th-18th century.
Plate T5.11 Ceramic finds from [**co.5066**]

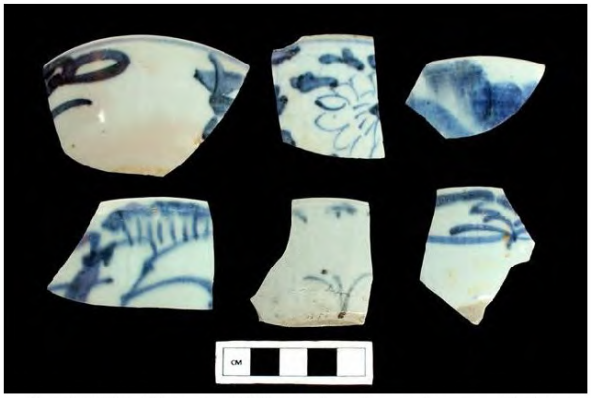
Hardpan [**co.5058**] is stratigraphically located below the oldest stone house wall and its material generally dates to Ming-Qing Period. It formed the upper layer of a thick deposit which included [**co.5018/ 5061/5062/5064/5065**] with dark grey clay [**co.5049** and possibly **co.5059**] recorded at the bottom. [**co.5068**] was recorded in southwest corner of the trench only and sits on top of [**co.5067**] and below [**co.5066**]. Within **co.5049**, a prehistoric stone tool (Annex B-Plate 17) was retrieved. The assemblage within the very dark layer with roots, included some earlier materials, but mainly 19th century finds.

The layers just mentioned are separated by sterile orange hard fill layer, [**co.5019**] from the layers below. [**co.5019**] does not extent entirely to the west of the trench, but partially covers [**co.5066**] which appears similarly to separate the upper layers from layers below within the west of the trench. Along the east, a grey soil intermixes with the hard orange and was recorded as [**co.5038**]. The material within [**co.5038/5066**] appears as a mix of Qing and Ming dynasty finds (Plate T5.11a-c) and within [**co.5019**] as Qing dynasty, likely 19th century but those finds are mainly from the top.

a. [**co.5070**], Celadon sherds, Yuan/Ming dynasties.



b. [**co.5070**], Glazed bowl sherds, mid to late Qing dynasty.



c. [**co.5092**], Blue and White sherds, early to mid Qing dynasty.

d. [**co.5095**], Bowl rim, late Ming dynasty to early 17th century.

Plate T5.12a-d Ming/Qing dynasty porcelain finds from sandy layers [**co.5092** and **co.5095**] below [**co.5066/5019**].

Below [**co.5066/5019**], a series of sand layers of which [**co.5070**] is the main layer, cover sterile hard orange deposit, [**co.5100/5069**]. Thin gravel deposits, [**co.5071/5094/5072/5073**] were recorded on top of [**co.5070**] (near the row of stake holes [**co.5042**]). The thin deposits included water worn finds dated to Ming/Qing dynasties. The finds from series of sandy layers [**co.5070/5039/5081/5091/5092/5093/5095**] are overall dated to Ming/Qing dynasty and includes significant amount of wood, tiles, village ware and porcelain pottery fragments (Plate T5.12a-d), a stone tool (Annex B-Plate 17) and some seeds.

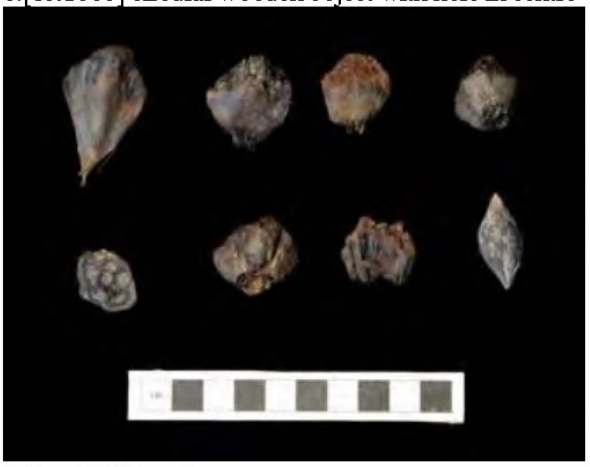
The wood includes cut plank and stake fragments, bamboo, twigs, charcoal as well as fragments of wooden objects (Plate T5.13). The deposit is mainly sandy and wet and is/was likely submerged during rainy season. The deposit is interpreted as abandonment of the village (area) during Coastal Evacuation.

a.[**co.5070**] worked wood with holes for nails (?)

b.[**co.5049**] possible wooden stake end

c.[**co.5066**] circular wooden object with hole in centre

d.[**co.5049**] curved part of wooden object



e.[**co.5081**] seeds

f.[**co.5066**] unworked wood, twigs and branches

g.[**co.5062**] fragment of worked wood, haft of tool or pommel (?)

h. [**co.5094**] worked wood with knotched edge

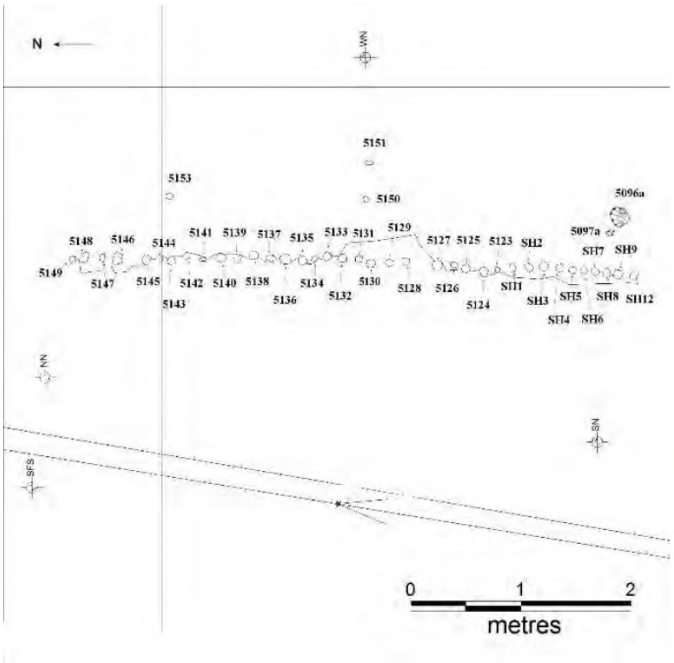
Plate T5.13a-d, f-h Selection of wooden finds and (e.) seeds.

Two main features, a ditch (Plate 5.14) and a row of stake holes (Plate 5.15) were recorded below the sandy abandonment deposits. The 'ditch' was noted at the end of excavation below water table along the east facing section of the trench; it was filled by [**co.5075**] and had a thin clay layer, [**co.5082**] at its base. It is not clear whether this is a shallow ditch or undefined feature as only a small section was excavated. It truncates the sterile deposit [**co.5100**] and included a single prehistoric stone tool (Annex B-Plate 17).

Within the sterile orange deposit [**co.5100/5069**], a roughly north-south alignment of stake holes, [**co.5123-5149; SH1-9, SH12**] was first noted in the 2016 AIA phase and further excavated in this phase. A total of thirty-seven stake holes were recorded forming a line within [**co.5100**] (Figure 5.13). The holes have a diameter range around 4-8cm and depths between 6 and 33cm; no material was recovered from inside the stake holes. The stake holes may be interpreted as part of a fence which would have been constructed to contain a hard fill 'wall' along the eastern stone foundation wall [**co. 5005**], either to create a working platform or to support the wall from the inside. This interpretation is deemed most plausible explanation by authors based on the to-date findings.

Plate T5.14 View of 'ditch' [**co. 5075** on top and **co.5082** below] along the western end of the trench, looking south.

Similar stake holes were recorded within Trench 1 (and Trench 3) and are likely related to those within Trench 5. Five additional stake or postholes, [**co.5150, 5151, 5153, 5096, 5097**] to the east of the row within hard orange deposit [**co.5069**] (Plate T5.15) are also interpreted as related to the construction of the eastern village wall (platforms, support) or other temporary structures.



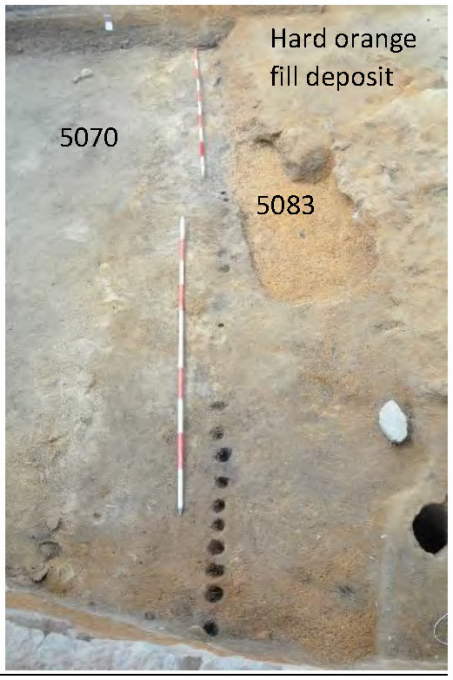


Figure 5.13 Trench 5: surveyed record of row of north/south stake holes and five additional stake or postholes within [**co.5069**] and Plate T5.15 looking north with stake hole alignment in centre and [**co.5069**] to right.

Alternate interpretations for the stake hole alignment **[co.5123-5149; SH1-9, SH12]** may include fencing to contain livestock, delineating agricultural fields, etc. These alternative interpretations do not have supporting evidence within T5.

Within hard orange deposit **[co.5069]**, a gravel patch **[co.5083]** was excavated which included pebble stones including a pounder stone (Plate T5.15 and Annex B-Plate 17). The orange deposit along the wall is artificial and it is the interpretation of the authors that it is placed to support the village wall. The stones and pounder are thus within a secondary deposit. Already noted during the 2016 AIA phase was a modern borehole, some additional patches with fills were recorded around the hole, **[co.5076-5078]** within **[co.5069]**. They are not archaeologically relevant.

The hard-orange fill **[co.5100]** consists of a natural sterile soil deposit which was recorded largely unchanged for a depth of no less than 1.8m within sondage and auger test. To the west of the stake hole alignment and within the deposit **[co.5100]**, further a large number of suspected post and stake holes were recorded **[co.5099, 5101-5105, 5107-5111, 5113-5117, 5119-5122]**. The function of these stake and postholes is unknown. Although they are recorded within **[co.5100]** stratigraphically they may belong to a higher stratum. Overall, the depth of the post and stake hole is relatively shallow and measured for the majority less than 10cm. The spatial distribution of the holes appears random (Plate 5.16).

Plate 5.16 View of T5 with random stake and posthole marked with red arrow, looking South.

Summary of the findings at T5

2016 AIA findings

- Evidence for earliest settlement, possibly pre-walled settlement and stake holes likely dated Ming dynasty or earlier;
- Pottery and tile fragments dated 19th-20th century.

Overall trench

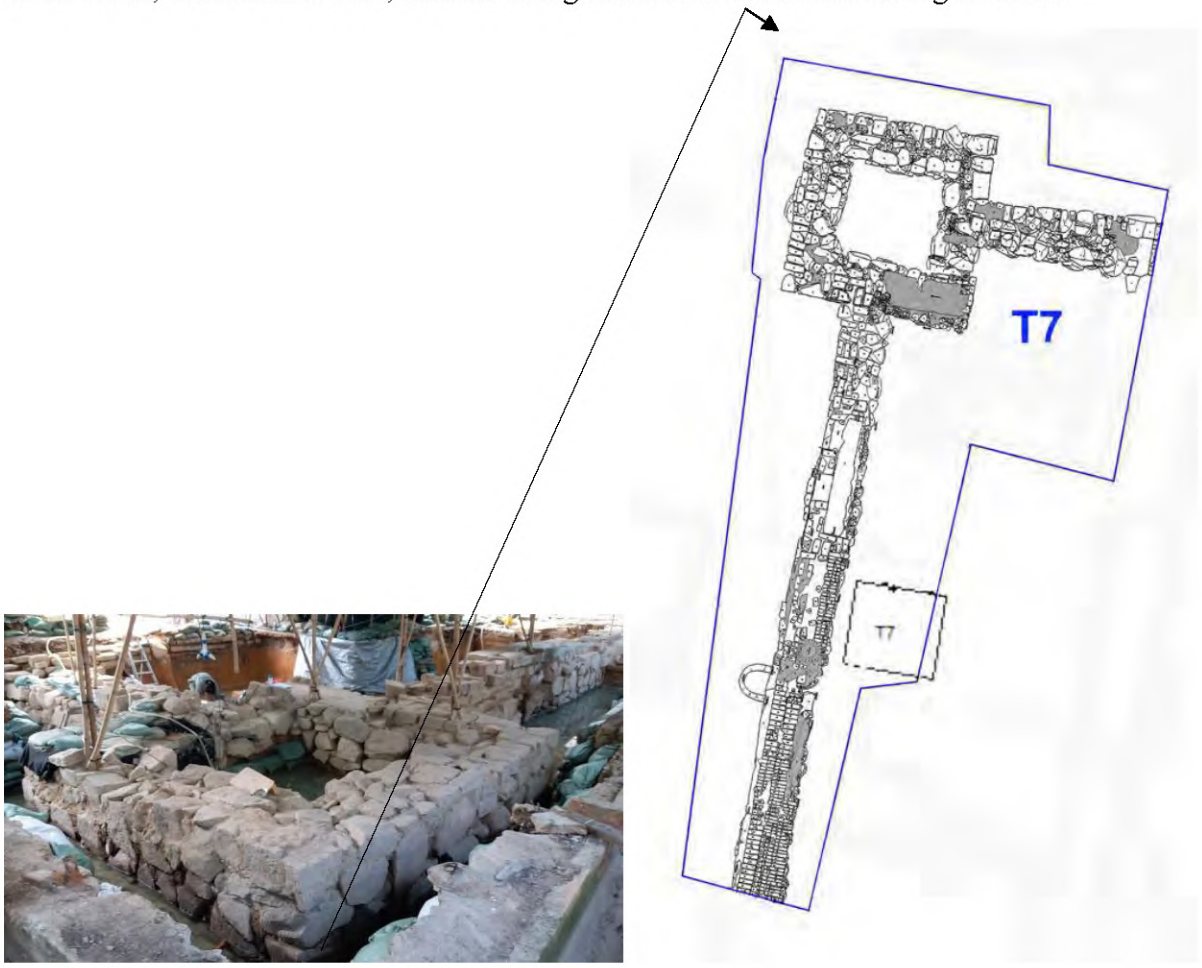
- There is no evidence for pre-walled village settlement;
- There is no strong evidence for Ming dynasty settlement, although the material findings do suggest a significant presence at this location;
- Further excavations recorded a sequence of layers and fill deposits above the sterile and natural soils, ranging from Coastal Evacuation to modern times;
- Stake holes alignment first discovered in 2016 AIA extended further north (in T5 and T1) and runs more or less parallel to village wall. The stake hole fence is interpreted as a supporting feature in construction of village wall;
- Deposit with wood remains (of which some charred, worked and unworked pieces) and an abundance of tiles and pottery mainly dated to Ming and early Qing dynasty interpreted as abandonment of village/area during Coastal Evacuation;
- Single house wall phase, but two drains within lane of which brick drain likely to date to 18th century and stone drain to 19th century.

Cultural remains

- Main assemblage dating Qing to 20th century;
- Wider range of cultural remains from Ming to Qing dynasty; material of older periods more prevalent than at other trenches;
- Few prehistoric stone tools and one fragment of polished adze excavated from historic contexts;
- Few Yuan/Ming dynasty celadon pieces from lowest stratigraphy.

5.5 Trench 7

The excavations at T7 were intermitted conducted between 18 June and 15 October 2018. The findings from T7 at the north western corner of the village are presented divided into watch tower room, watch tower area, interior village and moat as marked on Figure 5.14.



Full description of contexts, finds, finds Plates, excavation Plates and drawings, and TL-dating result are presented in *Annex C*.

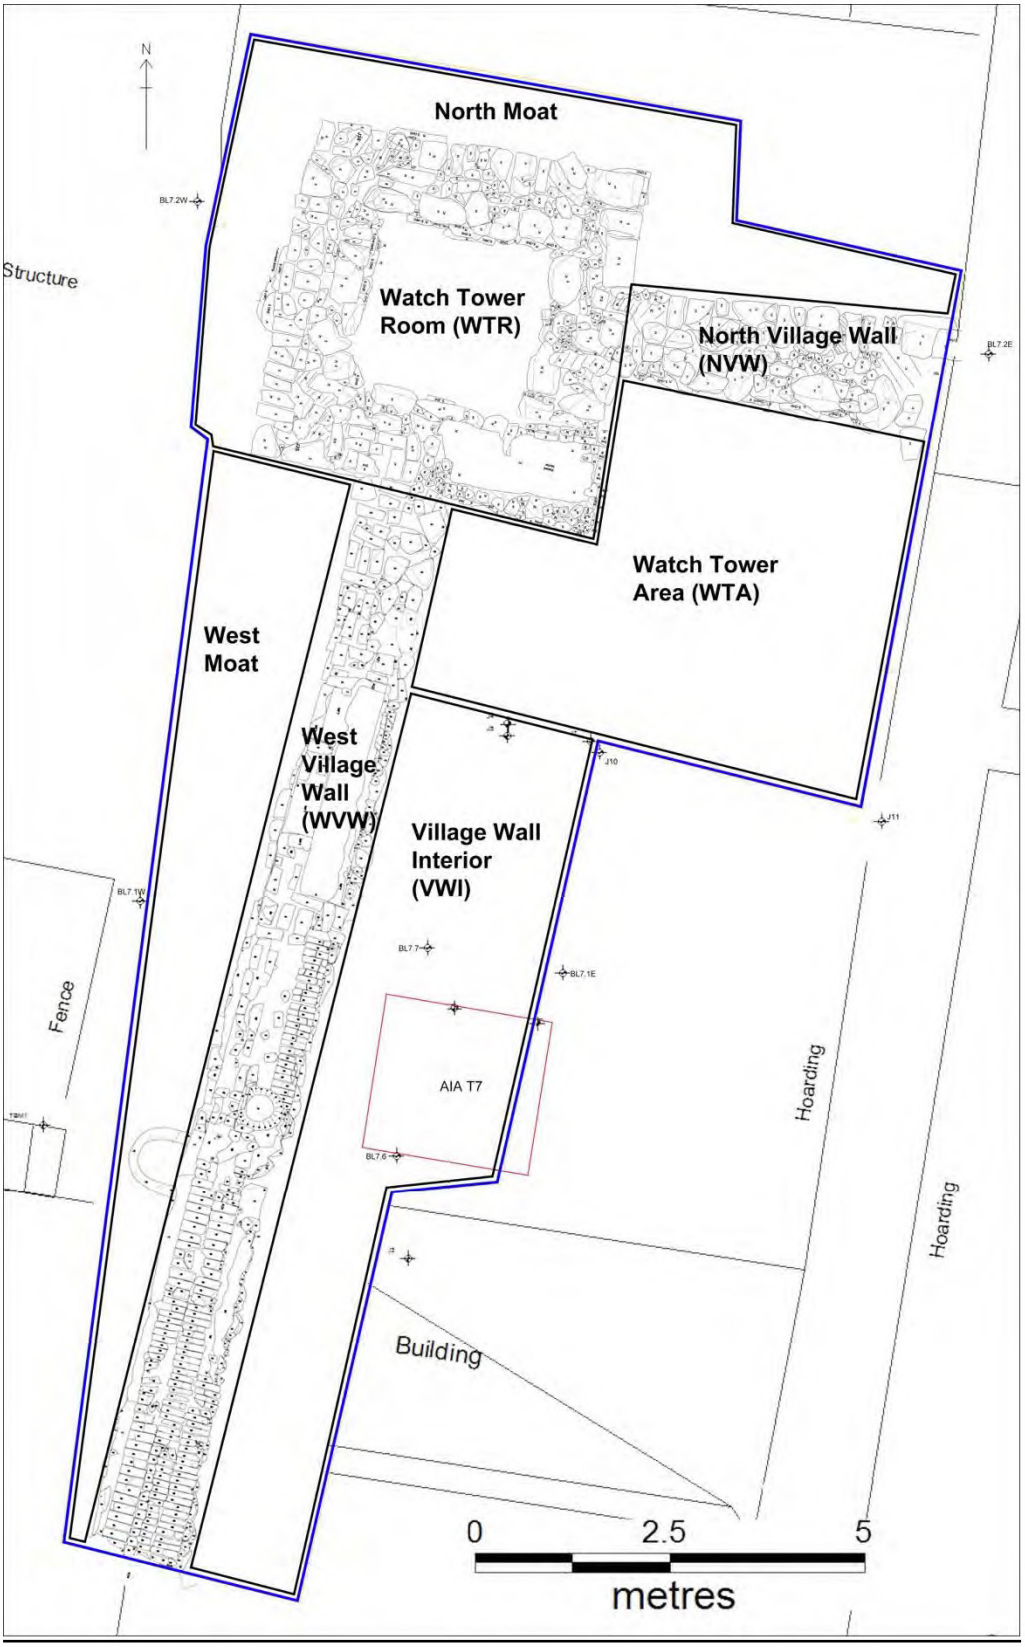


Figure 5.14 Map showing area of Further Investigation of Trench 7 including watch tower room (WTR) including north and west moat areas outside the room; watch tower area with 2016 AIA trench extended along western village wall (VWI) and area around the interior of the watch tower room (WTA).

Watch Tower Room (WTR)

After clearance of modern fill [**co.7024/7028**] and debris on top of the watch tower room, the outline of the watch tower room appeared. The room had been divided into three spaces with stone walls (Figure 5.15), of which one was topped with mortar base for a brick wall [**co.7274**] (Plate T7.1). A partial stone floor [**co.7037**] was noted within the northern room (2) and a soil and stone floor fill [**co.7037**] within southern rooms (1 and 3 on Figure 5.15). The upper modern stones [**co.7029**] were drawn and removed. Below the partial stone floor, further stones with bricks and soil [**co.7033/7035/7036**] infill was excavated as [**co.7038/7061**] (Plate T7.1). It is thought that [**co.7038**] was used to support stone floor [**co.7037**], the fill surrounding both are as recent as middle of 20th century. A grey mottled orange layer [**co.7064**] was recorded below the leveller for the stone floor; it contained materials mainly dated to the late Qing dynasty (Plate T7.2). It must be noted that water level during the rainy season reached this height and while the water level intermitted lowered depending on the volume of daily rain and pumping was ongoing, the stratigraphy from hereon was not easy to distinguish. A cut, [**co.7158**] or natural level difference of [**co.7067**] filled in was recorded in the northeast corner of the room. The (cut) fill [**co.7158**] included yellowish brown very clayey sand and dark greyish brown clay bands. Below, a hard-orange layer [**co.7067**] was recorded. Two further contexts truncated [**co.7067**], they are[**co.7081**], a grey light sand recorded along the north of the interior watch tower room and a modern fill [**co.7080**] in the southwest corner of the trench.

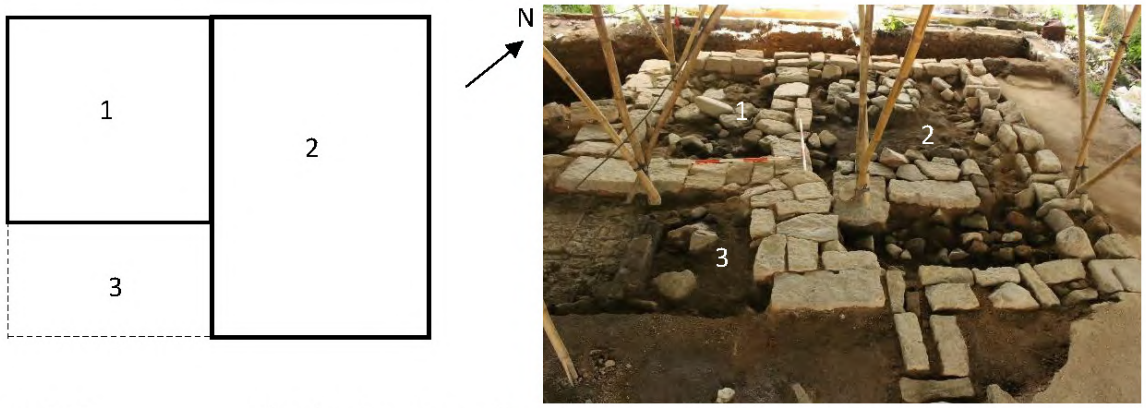

Figure 5.15 Sketch and corresponding view of the division within the watch tower room and partial stone floors within room 2; looking west.

Plate T7.1 View of second stone pavement (to north) and stone infill within watch tower. Mortar base for brick wall appears in southeast corner; looking west.

Plate T7.2 View of watch tower room after stones and fill layer were removed; looking east.

Plate T7.3 Pottery dated Qing dynasty -19th century and thick tiles with cloth-imprint from [**co.7082**].

The grey fills [**co.7081/7191**] along the north and west interior of the watch tower room walls included materials dated to Qing and late Qing period. The hard-orange layer (remainder of [**co.7067**]) separated the upper fills from what appeared as alluvial sandy/gravel layers [**co.7082**] below. The layer is substantial and included finds such as thick tile fragments and pottery. The find assemblage is dated to the Qing dynasty-19th century (Plate T7.3). Below the alluvial stratigraphy, a yellowish-brown deposit [**co.7237**], is located within the southeast of the room and is possibly a continuation from [**co.7074**] in the watch tower area. Within this deposit stake holes [**co.7227 to 7236**] are recorded in the southeast corner. The stake holes appear random and are difficult to interpret. The alluvial deposit drops off to the west and northwest within the watch tower room (Plate T7.5) where a number of contexts [**co.7238/7239/7240/7241/7242**] are recorded above [**co.7237**] and sterile soil [**co.7243**].

Plate T7.4 Pottery from [**co.7240**], dated Qing (left two porcelain sherds), Qing to 20th century (middle lugged sherd) and 19th-20th century (right).

The series of recorded sandy deposits over a thin clay layer to the west and northwest within the watch tower room are as follows; [**co.7238**] was first noted along the northwest of the room and include few finds. It covered a sterile pale-yellow sand layer [**co.7239**]. [**co.7240**] a light grey sand in contrast included frequent finds dated Qing and 19th century (Plate T7.4) and included some unworked wood fragments. [**co.7241**] was a sandy layer and was situated above a dark grey clay deposit [**co.7242**].

Excavation was halted around 4.8mPD (Plate T7.6) when finally, sterile soils were noted, and an auger test confirmed ongoing natural sterile soils down.

Plate T7.5 View of stake holes within southeast corner of watch tower and grey sand deposit; looking south.

Plate T7.6 View of end of excavation in watch tower showing sterile soils; looking south.

Watch Tower Area (WTA) and Interior Village Wall Area (VWI)

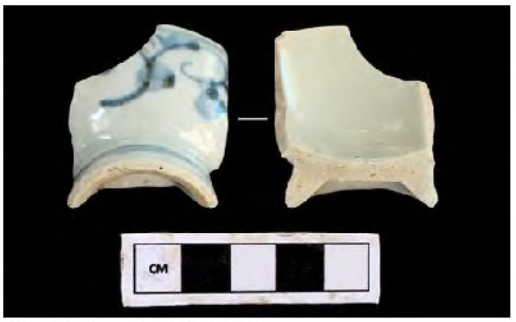
Below the modern fills, floors and levellers **[co.7011/7015/7016/7019/7030/7063/7069]** along the interior of the western village wall and within a thick orange deposit **[co.7072]**, a number of features were excavated. The main features are (A) a stone floor **[co.7116]** and (B) a hard floor **[co.7167]** at the entrance to the watch tower room, and (C) a wall trench **[co.7195]** along the northern village wall; to the south of the northern village wall: (D) a hard floor **[co.7109]**, and (E)a ditch **[co.7123/7162S/N]**, (F) shallow trench feature **[co.7079]** and **[co.7042]** ; along and near the western village wall: (G) a wall trench **[co.7017]** along the western village wall, (H) a ditch **[co.7058]** (which connects to ditch **[co.7123/7162S/N]**) and (I) pit **[co.7105/7222]**. Alongside these features several stake and post holes were excavated.

(A) Along the northern village wall within the watch tower area, under the modern fill, a stone floor **[co.7116]** similar to T1 and T3 appeared at shallow depth at entrance to watch tower room. Plastic was recovered from fills **[co.7120/7121]** above and under the stone floor pit while part of the northern village wall **[co.7119]** was found truncated and levelled with the floor (Plate T7.7). The leveller **[co.7122]** for the stone pavement included stones which formed a rough second floor level below.

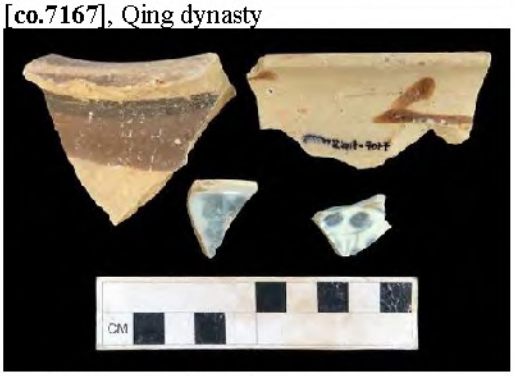
Plate T7.7 View of stone floor [**co.7116**] at entrance to watch tower room and along the northern village wall; note how part of the village wall was integrated into floor; looking west.

(B) Below the stone floor, its leveller and three generic fill deposits [**co.7155/7157/7159**], a hard floor [**co.7167**] was recorded which had finds pressed onto its top. The finds assemblage has an overall date range of Qing dynasty to 19th-20th century (Plate T7.8) but stratigraphically, it is likely this floor dates to 18th-19th century.

The hard floor connects stratigraphically both to the brick wall [**co.7275**] attached to the exterior eastern watch tower room wall and possible entrance into the watch tower room (Plate T7.10). Similar bricks (as [**co.7275**] wall) collapsed along the southern exterior watch tower room wall into a shallow ditch and wall trench [**co.7079**] along the western village wall (Plate T7.14). The fills, [**co.7077**] and [**co.7078**] within the trench parallel to the western village wall included 19th century pottery (Plate T7.8). The hard floor [**co.7167**] was truncated by two postholes [**co.7168/7169**] and some modern pits [**co.7170**] along the northern village wall (Plate T7.9).



[**co.7167**], Qing dynasty



[**co.7077**], Qing/19-20th century.

Plate T7.8 Porcelain and pottery

Plate T7.9 View of hard floor [**co.7167**] (left) along the northern village wall and same view after removal of floor and wall trench [**co.7079**] fills (right); looking west.

Plate T7.10 View of brick wall [**co.7275**] along the east of the southeast corner of the watch tower and possible -filled in- entrance to watch tower room (white broken line); looking west.

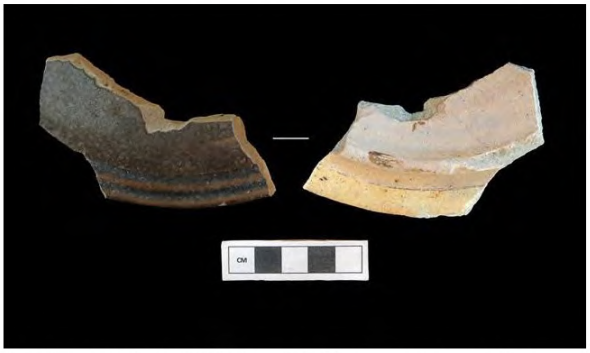
Plate T7.11 View of wall trench [**co.7017**] along the western village wall. (L) unexcavated, looking south; (Right) post-ex, looking north.

(C) Below the hard floor [**co.7167**], a sterile orange deposit [**co.7074**] and a wall trench [**co.7079**] with dark fill [**co.7195**] along the northern village wall were recorded (Plate T7.9). The trench suggests a rebuilding or maintenance of the northern village wall. At the base of the trench along the northern and western village [**co.7017**] walls and in the corner with the watch tower room, a grey sandy layer was noted [**co.7198/7220/7221**] which may connect to fills inside the watch tower room, such as [**co.7081/7191**].

(D) To the south of stone floor [**co.7116**], modern (late Qing/20th century) levels [**co.7073/7108**] and a hard floor [**co.7109**] (Plate T7.12) were recorded. The latter hard floor dated to late Qing and was truncated by (modern) pits, [**co.7114**], [**co.7121**] (with shell and pottery), [**co.7126**], [**co. 7127**], [**co.7113**] (with stones) and postholes, [**co.7110, 7111,** and **7112**]. A (modern) borehole, similar to boreholes in T3 and T5, was first noted at this floor level (no context number was given).

Plate T7.12 View of hard floor [**co.7109**] truncated by pits and postholes; looking west.

Several stake and postholes [**co.7110-7113/7127-7129/7124**] were found truncating [**co.7109**]. It is understood that these are contemporary to hard floor or more recent in date. After removing the hard floor [**co.7109**], various gravel and sand fills [**co.7114/7115**] were found to overlay the orange deposits [**co.7072/7074**]. The fill deposits contained tile fragments and pottery dated to Qing dynasty, mainly 19th century (Plate T7.13).



(a) Brown glazed lid sherd, 18th century or earlier Plate T7.13 Pottery from [**co.7114**].

(b) Olive glazed lid sherd, 19th-20th century.

Further stake and postholes [**co.7125, 7135-7154/7160-7161**] were recorded below the floor and within [**co.7072**] in the main watch tower area. They do not appear in any meaningful arrangement.

(E) The main feature within the WTA which extends into the VWI, however, consisted of a southwest-northeast trending ditch [**co.7123/7162S/N**] (Plate T7.16 and T7.17). The sharp edge of the ditch cut suggests a man-made feature which filled overtime with grey [**co.7134/7162**] and orange [**co.7166**] fills; covering the ditch was a brownish fill [**co.7132**] of undetermined date. Post/stake holes [**co.7164/7165**] truncated the ditch fills and further excavation of the main orange deposit [**co.7074**] around the ditch, revealed more stake and postholes [**co.7130, 7148, 7171-7190/7193-7194**] in undetermined pattern. The lowest series of post or stake holes recorded in [**co.7074**] are [**co.7201 to 7217**]. They contained no material and are undated.

(F) to the west of hard floor **[co.7109]**, a roughly north-south oriented, shallow trench feature **[co.7079]** and **[co.7042]** was recorded parallel to the western village wall and it connects to the watch tower room (Plate T7.14).

It appears to be the further extent of the removed 'wall trench' **[co.725]** first recorded in 2016 AIA phase. Two postholes **[co.7096]** and **[co.7107]** are recorded adjacent and truncating trench **[co.7079]**. The interpretation of the shallow trench is uncertain, associated find generally are dated to the 19th century suggesting the feature may have played a role in the repair, maintenance, or reconstruction of the defences in 19th century. (Plate T7.15)

Plate T7.14 View of trench **[co. 7079]** with brick fragments; looking south

Plate T7.15 View of the extent of the (unexcavated) wall trench **[co.7042]** first noted in 2016 AIA phase; looking west.

(G) The orange deposit was further truncated by a wall trench [**co.7017**] situated immediately adjacent to the western village wall with three infill soils [**co.7044**, **co.7075**, and **co.7097**] (Plate T7.11). The wall trench outline corresponds to at least two remodelling of the village wall phases (Plate T7.25) (1) rebuilt with small granite ashlars, red mortar and some concrete (left on plate), and (2) rebuilt with medium sized stones and white mortar bonding material (centre of plate). Fill [**co.7044**] is the most modern (late Qing dynasty), while fills [**co.7075/7097**] were similar with materials dated mainly to the 19th century.

Plate T7.16 View of large southwest/northeast trending ditch and surrounding postholes in WTA; looking south.

Plate T7.17 Ditch fills and postholes, both in and around the ditch, post excavation; looking southwest.

(H) The ditch continues towards the western village wall where it was recorded as [**co.7058**] and similarly cut into hard orange deposit [**co.7043/7093**] (Plate T7.16). The ditch was covered by sand lens [**co.7056**] and filled with lighter clayey sand fills [**co.7056c-f**] truncated by posthole [**co.7057**]. Within the surrounding orange deposit [**co.7043/7093**] and mainly to the north of the ditch a number of post and stake holes were recorded. Postholes [**co.7050-7053** and **co.5055**] were first recorded with posthole [**co.7092**], similar to [**co.7164/7165**], recorded truncating the ditch fill. Below these stake holes [**co. 7083, 7245-7272**] to north of ditch, and stake holes [**co.7086-7089**] within the ditch feature were excavated. Some of the lower stake holes (Figure 5.16) appeared as rows alongside the north of the ditch.

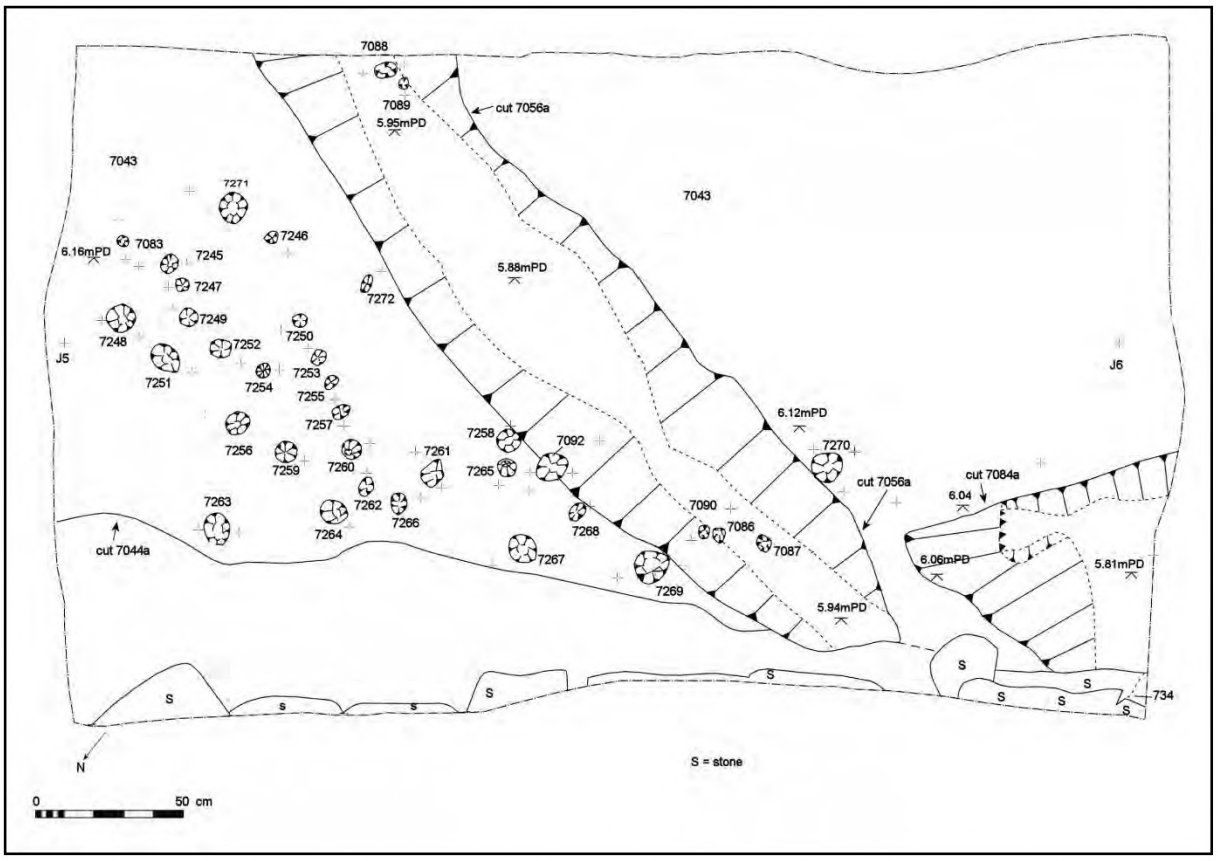


Figure 5.16 Continuation of ditch [**co.7058**] towards the western village wall (in VWI section); some of the stake hole to the east of the ditch form rough alignments.

The ditch [**co.7058**] is truncated by the western village wall trench [**co.7017**], suggesting stratigraphically it predates the 19th century. The material within the ditch fills can be generally dated to Qing dynasty (Plate T7.18) with the lower levels dating to 19th century.

It is possible that the ditch predates Coastal Evacuation, but there is no firm evidence to confirm this.

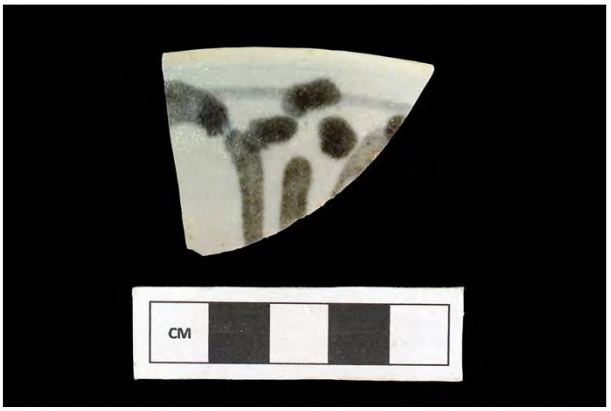

Plate T7.18 Blue and White rim from [**co.7058**], dated Qing dynasty.

Several postholes within the sterile hard orange deposit [**co.7074**] have stones at the bottom and are packed at the edges with thick cloth-imprint tile fragments (Plate T7.19). There is no discernible pattern to the post/stake holes and there are believed to have been created over time and as needed for limited activities. Posthole uses could include framework for roof support, support of small structures, cooking frames, etc. A L-shaped sondage was conducted to verify if any alignment of stake holes or further features could be found within the main sterile hard orange deposit [**co.7074**]. An auger test was conducted within the bottom of the sondage (started at 4.85mPD) and confirmed sterile soils to a depth around 3.60mPD.

Plate T7.19 Posthole with stones at bottom and thick tiles at edges

(I) The last main feature consisted of a large filled-in pit (or depression) [**co.7105/7222**] (Plate 7.21) which was recorded at the southern end of the excavation (in VWI). Part of it had been previously recorded in 2016 AIA phase [**co.736**] and findings showed, slanting to the south, fill layers. The southern edge was outside the limit of excavation.

Within the pit, thick cloth-imprint tile fragments, including some large almost intact pieces were excavated (Plate T7.20). The pit has a clay layer along the bottom [**co.7222**]. A row of stake holes [**co.7223**] truncates (likely) [**co.7222**] (difficult to establish due to ground water in trench, but stake holes were filled with clay) and the below sterile soils [**co.7093**] and separates the pit feature and its fill deposits from the western village wall (Plate T7.22). The grey sandy deposit with numerous cloth-imprint tile fragments (recorded in the 2016 AIA phase [**co.727**]) does not continue towards the north along the village wall and it appears contained along the boundaries of the depression/pit (*Section drawing 7.C.1 of the AIA report Appendix 7)*. The excavations were slow because these features are below the water table and continuous and creative pumping was needed to reach sterile soils. The hole which was excavated blind for the waterpump was found to have affected a minimum of two stake holes, in addition two auger tests conducted in 2016 AIA phase disturbed the row of stake holes. The alignment however, could still be clearly establish by the stakeholes alongside the disturbance (see Plate 7.22).

Plate T7.20 Large thick tiles with cloth imprint from [**co.7222**].

Plate T7.21 View of pit or depression feature [**co.7105/736a/7222**] in VWI and 2016 AIA trench in section; looking east.

The proposed date for the pit/depression feature based on the tile finds within [**co.7222**] is a general Ming/Qing dynasties date but likely the row of stake holes coincides with the earliest construction of the enclosure wall. [**co.736**] excavated during the 2016 AIA phase and part of the pit feature included one tile with textile imprint, one Ming to 18th century glazed body sherd (*Plate 5.47 of the AIA report)*, and two small undiagnostic sherds, further suggesting Ming/Qing date. The fill between pit and western village wall, recorded in 2016 AIA phase as [**co.727**] returned a TL- date on a tile fragment linked to of the suggested original construction of village wall (1570-1574; Hase 1999). Few other materials from the same context dated to 19th/20th century (few), and a single 18/19th century sherd; they may be considered, based on the limited number and difficulty in excavating (ground water), intrusions.

Plate T7.22 View of row of (left: unexcavated, and right: excavated) stake holes **[co.7223]** below pit feature in VWI; looking north.

Moat

The western village wall was excavated, in part with some brick wall remnants **[co.7004]** (mainly in the south) (Plate T7.24) still on top and partly thick concrete or rectangular granite ashlars with fill **[co.7076]** in between on top in the section towards the watch tower (Plate T7.25). The fill between the granites kept together with red mortar contained a complete Chinese coin dated 1736-1795 (Plate T7.23). Excavations of the 20th century in-fill were conducted in moat areas along western and northern village wall and around the watch tower room.

Plate T7.23 **[co.7076]**, Qinglong Tongbao coin, dated Qing/1736-1795.

The moat was excavated down to water table around 1.3m from the surface (Plate T7.26). The stratigraphy of the moat shows very recent use of the upper part of the moat (stone walls **[co.7014]** and brick drain feature with ceramic pots **[co.7012/7026/7200]** (Plate T7.24 and T7.27), which suggest the moat was not completely filled in during WWII. Large ceramic pot(s) were placed within the brick constructed drain feature. The pots and drain features were found below drain holes within the brick house walls. The drain holes within the brick house walls were constructed by omitting a brick and covering the lining of the hole with mortar (such

was also observed in T9 on the western village wall). The original top of the moat deposit was not reached, but post-WWII fill contexts **[co.7009/7010/7027/7031/7047/7049]** were removed along the west and **[co.7032/7034]** from the watch tower west moat; all covering WWII moat fills **[co. 7039/7059/7060]**.

Plate T7.24 Brick wall on top of western village wall; looking east. Drain feature **[co.7012/7026/7200]** is visible in the left bottom corner of the photo with drain within red circle.

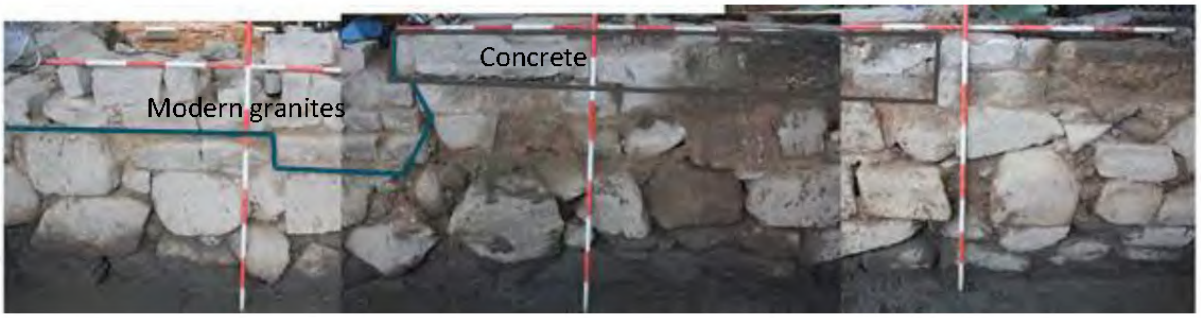

Plate T7.25 View of the western village wall near the watch tower with modifications of the upper part of the wall; looking east.

Along the north moat and watch tower, moat in-fills **[co.7045/7046/7048/7085]** were recorded and removed. **[co.7085]** is a black fill which corresponds to **[co.7059/7060]** and which possibly signals the proximity of the top of original moat deposit.

Plate T7.26 Views of the excavated moat (Left) western moat; (Centre) northern moat.

Plate T7.27 Stone walls and drain pots in the western moat; looking south.

Summary of the findings at T7

2016 AIA findings

- Possible evidence from tile fragments with cloth-imprint (Late Ming/ Early Qing dynasty) for abandonment of village/area during Coastal Evacuation;
- Evidence of undated damaged wall trench;
- Porcelain, pottery and tiles dated to Ming/Qing periods.

Watch tower room and village wall

- No structural evidence of abandonment of village/area during Coastal Evacuation within T7;
- Expected layout of watch tower and village walls are present;
- Brick wall is present on top of one section of the village wall;
- Upper part of the stone walls consists of modern alterations while some of the lower parts and western village wall appears original;
- As part of modern use of watch tower, stone floor was (similar to T1, T3) recorded at its entrance and along the northern village wall;
- Inside the room, modern floors were recorded above alluvial deposits dating from Late Qing to Qing/19th century material down to sterile soils which are well below water levels;
- Some stake holes, of unknown use, truncate sterile alluvial deposit within southeast corner of watch tower.

Watch tower area and village wall interior

- After removing modern floors, the feature recorded as 'removed wall trench' during the 2016 AIA investigation is found to extend northwards and is likely part of the renovations in 19th century of defences/village;
- A number of stake and postholes (of unknown dates) and a large northeast/southwest oriented ditch (likely dated to Ming/early Qing) are recorded within sterile orange deposit;
- Row of stake holes [**co.7223**] possibly associated with the original construction of the village wall (1570-1574 or 1724);
- Wall trenches (including as recorded in 2016) excavated along the interior northern and western village walls indicating repairs in 19th century.

Moat

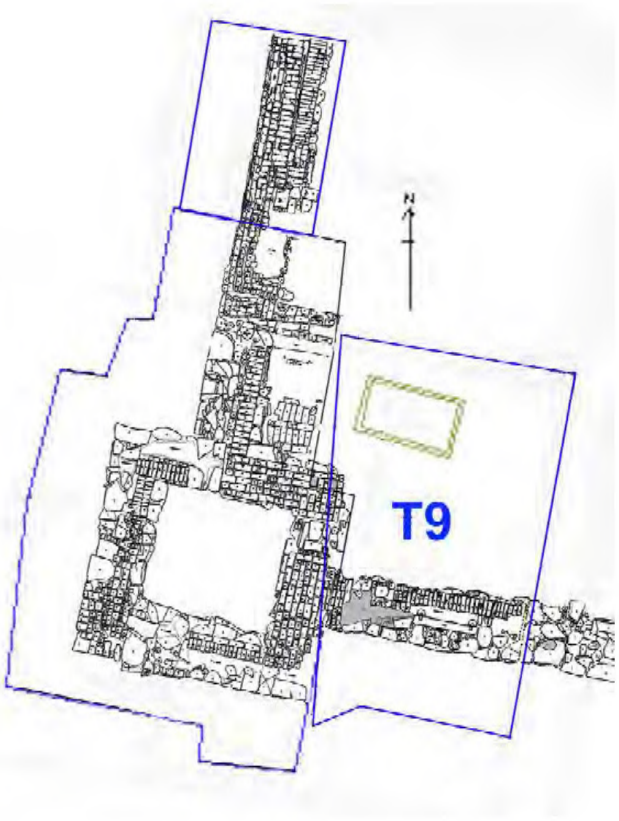
- Moats around the northwest tower and northwest of the village not completely filled during WWII, but instead have evidence for stone structures and drain features.

Cultural remains

- Overall Early to Late Qing dynasty materials were excavated;
- A complete Chinese coin dated 1736-1795 was found on western village wall;
- Ditch material suggest use in Ming dynasty.

5.6 Trench 9

The further excavations at T9 were conducted intermittently between 19 March and 20 June 2018. This T9 further excavation can be divided into three major areas, namely the watch tower area and the southern and western moat areas (Figure 5.17). Summaries of features and deposits of each area will be provided below.



Full description of contexts, finds, finds Plates, excavation Plates and drawings, and TL-dating result are presented in *Annex C*.

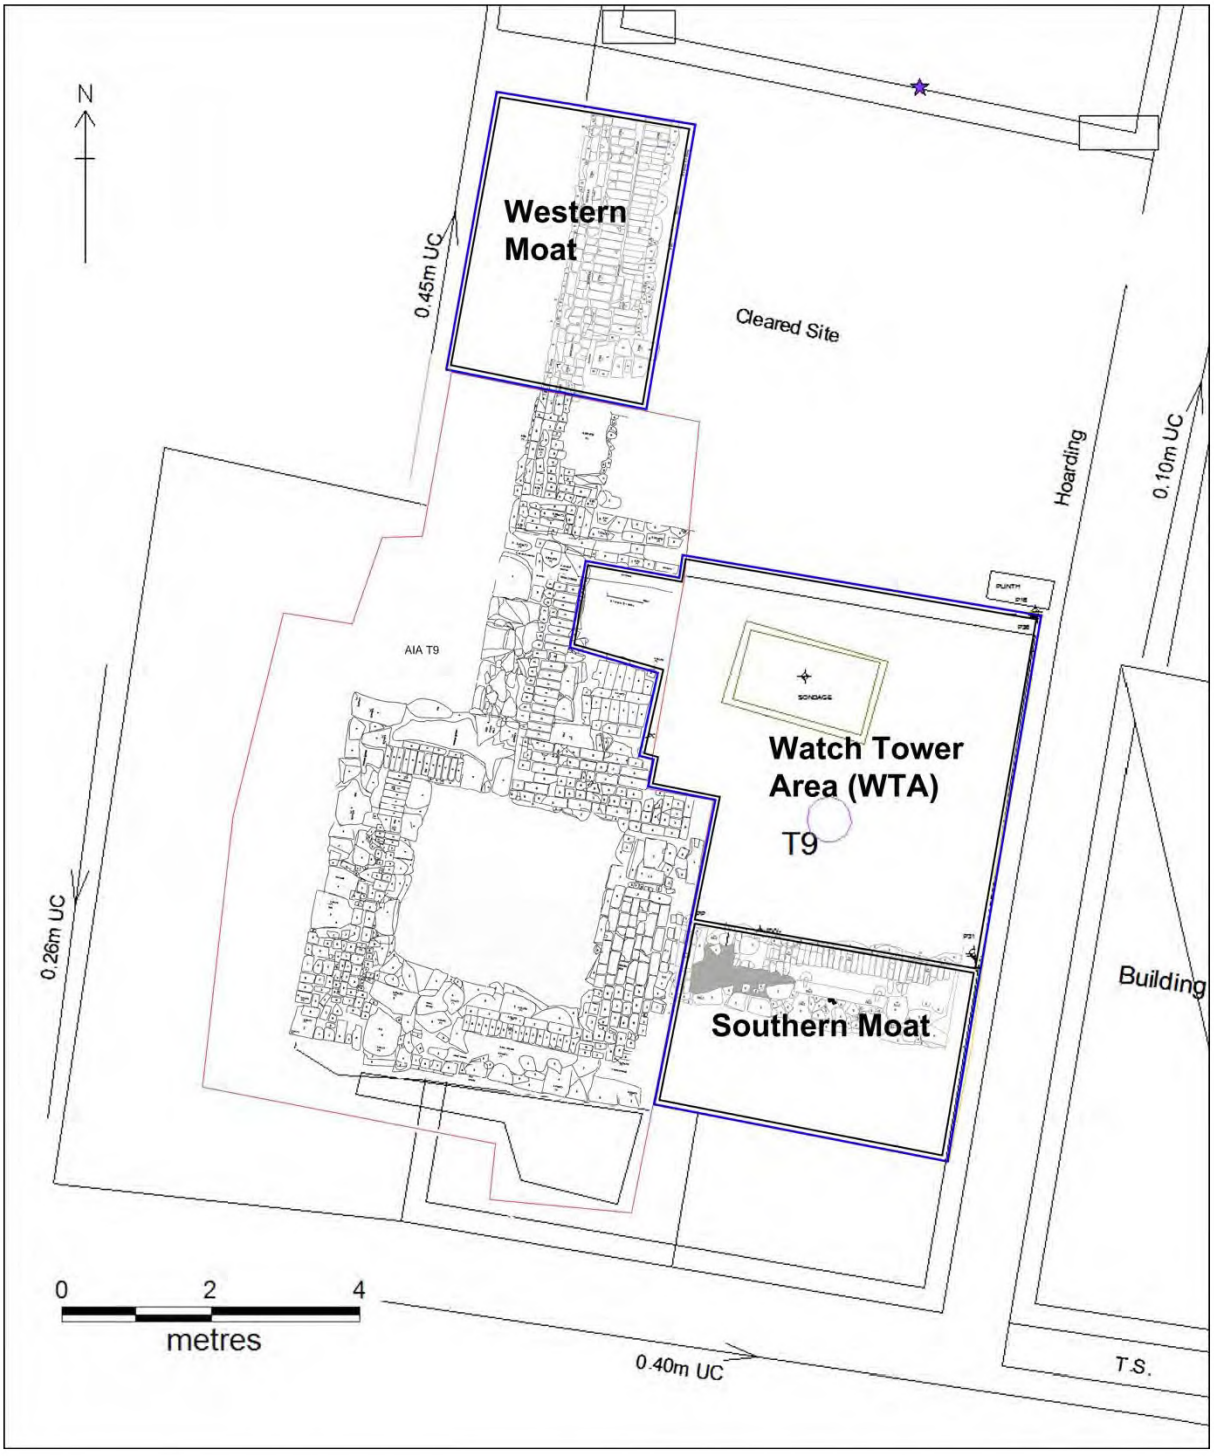


Figure 5.17 The Further Investigation works at Trench 9 were divided into three excavation sections: watch tower area (WTA), western and southern moat areas. Figure shows sondage within WTA area while the stove location is marked within the WTA area with purple circle.

Watch Tower Area (WTA)

Substantial modern disturbance associated with residential houses, such as modern house foundations [**co.9004/9052/9047/9048/9022/9043/9013/9044/9190/9190a/9192**], associated levellers [**co.9006/9008/9007**] and fill [**co.9024/9027/9074/9078/9102/9104**], was recorded

within the watch tower area. A modern posthole [**co.9051a**] with plastic inclusions was identified against the eastern end of the modern wall [**co.9022**].

Apart from the concrete cover [**co.9001**] and modern tiled floor surface [**co.9002**], another five more recent (19th-early 20th century) floor layers, which included maintenance and repairs, were identified in the trench. All of these layers were further truncated by either modern house foundations [**co.9004/9052/9047/9048/9022**], pits or trenches [**co.9076/9075/9041/9077/9030/9032/9089/9129**] and they were positioned stratigraphically above an L-shaped single brick alignment [**co.9049/9050**] (Plate T9.5). The recent floors can be broadly grouped into 4-major phases based on the stratigrapical relationship.

1-Floor [**co.9068/9069/9023**] was identified below the modern leveller [**co.9008/9026**] as a thin and patchy layer without finds. Underneath it was another floor layer [**co.9029/9036**] again without finds. Contemporary levellers [**co.9035**] and [**co.9028**] were found between the two floors, which indicates maintenance and repairs.

2-A possible burnt clay floor comprising a mixture of strong brown very slightly gravelly and silty sand, yellowish red very slightly sandy silt, very pale yellow, very slightly sandy and gravelly silt, decayed bricks, burnt clay patches, patches of mortar and occasional bits of charcoal [**co.9039/9040/9034/9083/9045/9133**] was found underneath leveller [**co.9033**], which was overlain by floor [**co.9029/9036**] (Plates T9.2 and T9.3). This compacted layer, which included some plain and cloth-imprinted tile fragments, was mainly found in the southern corner of the watch tower area and showed signs of heating. It was lying over a yellowish-brown to strong brown leveller [**co.9058/9084/9046/9119**] that produced four thin plain creamy tiles, one grinding basin base fragment, a shallow bowl body sherd, a cooking pot base and four body sherds dated to early 20th century. This burnt clay floor is also contemporary with the orange/black floor/ leveller [**co.9017/955/958/956**] first identified in T9NN of the 2016 AIA excavation and leveller [**co.9031/9037**]. Floor [**co.9017**] was overlain by a yellowish-brown fill [**co.9018/951**].

3- Underneath leveller [**co.9037**] in the north-east was a very patchy floor [**co.9070**] and leveller [**co.9071**].

4-The earliest recorded floors [**co.9085/9087/9053**] were identified below leveller [**co.9058/9084/9046**] and lying immediately on top of the brick alignments [**co.9049/9050**]. The floors [**co.9053**], which can be further divided into an upper floor [**co.9085**] and a lower floor [**co.9087**] and a leveller [**co.9086**] in some areas, appeared patchy and partially sunken, especially towards the eastern end of the trench. Occasional bits of charcoal and moderate amount of tiles (both plain and with cloth-imprint) and a small number of pottery including provincial porcelain and village ware dated to early 20th century, was found in floor [**co.9053**] (Plate T9.4). A strong brown levelling layer [**co.9086**] producing one 19th-20th century village ware body sherd and some cloth-imprint and plain tile fragments was identified between the two floors, which indicates maintenance and repairs. These earliest floor surfaces identified were contemporary with floor [**co.9120**], dating from the period immediately following the insertion of a doorway [**co.9182a**] in the watch tower wall at the ground-floor level, and presumably of the same broad occupation phase.

Village ware and porcelain dated to Mid-Late Qing

Tiles with cloth imprint

Plain tiles

Plate T9.1 Finds from [**co.9038**].

A pit feature [**co.9125a**] was recorded after the removal of leveller [**co.9071**] and it cut into both possible levelling layer [**co.9038**] and a wall foundation trench [**co.9130**]. Some tile fragments, a village ware body sherd and a provincial porcelain body sherd dated to 19th-early 20th century were recovered from the pit fill [**co.9125**]. The wall foundation trench [**co.9130**] runs along the entire south facing section below the stone wall foundation at the northern edge of the trench. Some tile fragments with and without cloth-imprints were recovered from this layer. A small patch of thin triangular-shaped mortar [**co.9122**] was identified after the removal of [**co.9058**] between the brick feature [**co.9105**] and modern wall [**co.9022**]. It was overlying leveller [**co.9056**], which was truncated by the brick feature [**co.9049**]. Above the sterile deposit [**co.9054**] was a possible levelling layer [**co.9038**], which produced five mid-late Qing dynasty provincial porcelain, five village ware sherds and frequent tiles with or without cloth-imprint (Plate T9.1).

Plate T9.2 Burnt clay floor [**co. 9039/9040/9034/9083/9045/9133**], looking west.

Plate T9.3 Burnt clay floor [**co. 9039/9040/9034/9083/9045/9133**] overlying brick alignment [**co.9105**], looking west.

Plate T9.4 Pottery and tile fragments found in floor [**co.9053**]; looking south

A possible wall trench **[co.9103a]** and elongated pit **[co.9123a]** were recorded along the east facing section after the removal of floor **[co.9036]** (see Annex C T9- T9.D.7). Two village ware sherds of early 20th century in date were recovered from **[co.9103]**. Both elongated pit **[9123a]**

and a posthole [**9131a**] were truncated by the wall trench [**co.9103a**]. Posthole [**9131a**] and posthole [**9132a**] were situated adjacent to each other and both cut through all fill layers of [**9123a**] (see Annex C T9- T9.D.8). The elongated pit [**co.9123a**] had an irregular shape and measured about 3.47 by 0.27 to 0.55m. It was filled on top by fill [**co.9123/9128**] and below by fill [**co.9139/9140**]. The latter produced a provincial porcelain sherd dated to 20th century and some tile fragments. A posthole without finds [**co.9223a**] was identified after the removal of the upper fill [**co.9123/9128**]. The elongated pit [**co.9123a**] is possibly also associated with the modern wall foundation and dated to 20th century based on its stratigraphical relationship to wall trench [**co.9103a**].

A roughly north-south aligned brick feature [**co.9105**] was identified after the removal of the compacted burnt clay floor [**co. 9039/9040/9034/9083/9045/9133**]. The alignment consisted of five rectangular reddish coloured bricks, each measured 23 by 38 by 8cm and two bricks were broken when discovered (Plate T9.5). Some of these bricks were lying over a thin leveller [**co.9124**], which produced a few 19th-20th century provincial porcelain, village ware and tile fragments.

The brick alignment was truncated by a modern stone foundation wall [**co.9022**] connecting the west of the trench to the watch tower northeast corner. The slightly tilted, southern end brick covered a modern pit feature [**co.9032**], which produced modern materials such as plastic and glass marble. The modern pit (or wall trench?) also truncated part of an L-shaped brick feature [**co.9049/9050**] below (Plate T9.5). The function of the linear brick alignment [**co.9022**] is not clear, but it appears stratigraphically in the 20th century.

Plate T9.5 Brick feature [**co.9049**] was partially truncated by a linear brick alignment [**co.9105**], which also covered the top of a modern pit feature [**co.9032**], looking west.

Adjoining L-shaped [**co.9049/9050**] and T-shaped brick alignments [**co.9134**] were found abutting the southern village wall and stratigraphically below the [**co.9105**] brick feature and recent floors [**co.9053/9085/9087/9120**] mentioned above. The alignments comprised a series of red bricks forming a small square enclosure and a rectangular enclose, which extends beyond the trench towards east and the alignment stopped c.40cm short from the eastern watch tower room wall. Some of the bricks were in poor condition when recovered, especially in the western and eastern end where the feature was partially truncated by later features (modern wall foundation [**co.9013**] and brick alignment [**co.9105**]) (Plates T9.5 and T9.6). Although the function or purpose of this brick alignment feature is unknown, stratigraphically it was situated below the possible patchy floor surface [**co.9120**], which dating from the period immediately following the insertion of a doorway [**co.9182a**] in the watch tower wall at the ground-floor level, and presumably of the same broad occupation phase. It was also broadly contemporary with the lowest [**co.9121**] dated to early 20th century within the watch tower room entrance.

Below the brick alignments [**co.9049/9050** and **co. 9134]**, a 5-20cm thick strong brown leveller comprising very slightly sandy and gravelly silt [**co.9100/9063/9088**] was situated. The wall trench sloped inward towards the southern village wall and truncated the southern end of a mortar spread [**co.9081/9095/9113**]. It also truncated the leveller fill above the mortar [**co.9065**] and cut all the way into a firm orange clay deposit [**co.9054**] (Plates T9.7, 9.8, Annex C, Figure T9.C.22). This wall trench consisted of a c.25 to 35cm deep upper fill of multi-coloured mixed clay [**co.9101/9208**] and a mixed lower fill [**co.9215/9211/9212/9214/9213**], which produced some provincial porcelain fragments, tiles and village ware dated to the early 20th century.

Only 30cm of this lower fill was excavated and it continues beyond the limit of excavation (excavations were halted to ensure structural integrity of the village wall). The west end of this feature was truncated by what appeared as stone foundation trench [**co.9216a**] for the inserted doorway of the watch tower room (Plate T9.7, Annex C, Figure T9.C.22). The wall trench must have been excavated for the recent repairs to the southern village wall, the few finds place the event during early 20th century.

Plate T9.6 Brick alignment [**co.9049/9050**] (middle part) sitting on top of mortar spread [**co.9081**], looking south.

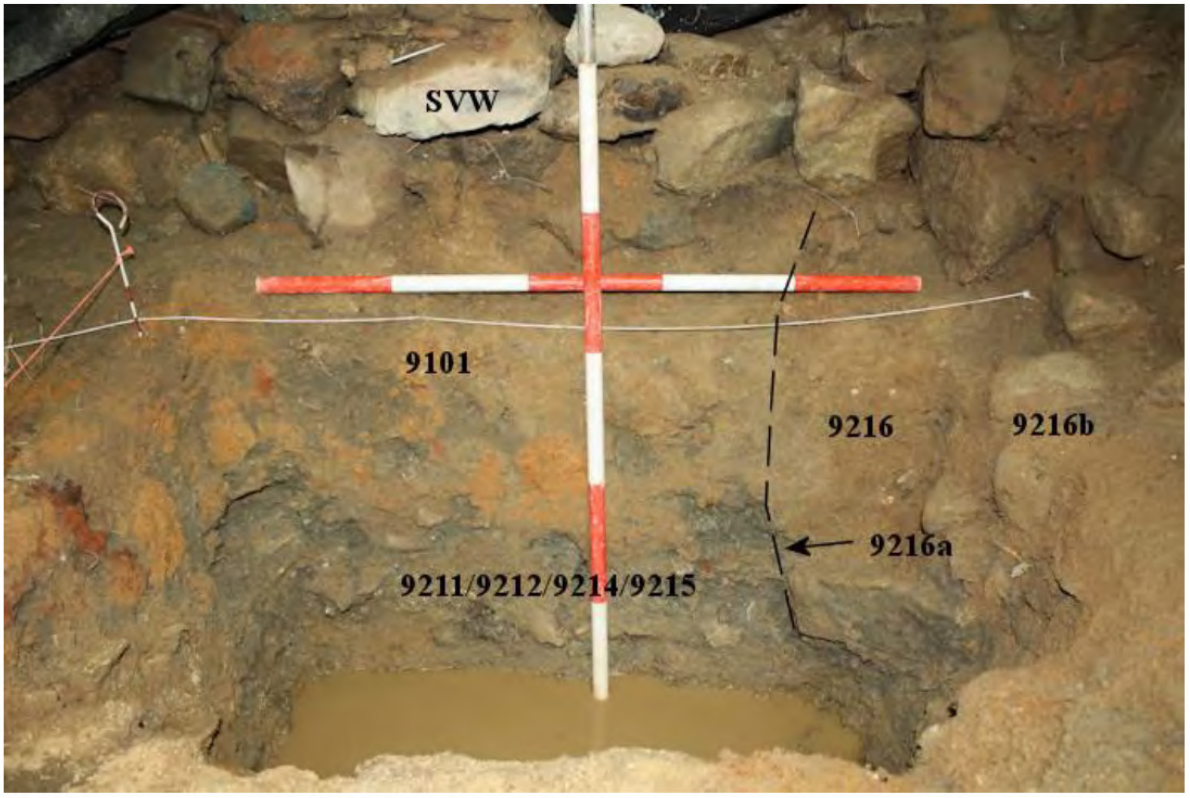

Plate T9.7 Foundation trench [**co.9216**] cut into wall trench [**co.9101a**] and its fill; looking south.

Along the northern edge of trench [**co.9101a**] near the gap between bricks [**co.9049**] and [**co.9050**], a series of nine tightly packed stake holes [**co.9199 to 9207**] (Plate T9.9) were

identified after the removal of leveller [**co. 9100/9063/9088**] and an isolated burnt patch [**co.9096**] (Annex C, Figure 9.C.14). The stake holes measured 6 to 13cm in diameter with a depth between 4 and 13cm. A thin spread of dark greyish brown fill was found covering and filling these stake holes, indicating that these stake holes were filled prior to brick feature [**co.9049/9050**]. These shallow stake holes were tightly packed together and some of them were found intercutting with each other, suggesting that the same location was reused within a short period. (Plate T9.9)

Below red and black floor levellers [**co.9017**] and fill layer [**co.9019**], a grouping of six irregular stones and two brick fragments arranged in a general L-shape was found adjacent to the brick floor [**co.9186/970**] excavated during the 2016 AIA phase and the watch tower room inner stone foundation [**co.9182/934**]. Fill layer [**co. 9019**], which included frequent tile fragments dominated by thin plan creamy type, a Qing dynasty provincial porcelain bowl base and four village ware sherds dated to Qing dynasty (Plate T9.11), covered both brick floor [**co.9186/970**] and stone foundation [**co.9182/934**]. The arrangement of the stones and bricks is ambiguous, they may well have been randomly positioned below [**co.9019**] as no apparent cut was found associated with this alignment (Plate T9.9).

Plate T9.8 Mortar spread **[co.9081]** truncated by foundation trench **[co.9101]** for southern village wall; looking east.

Plate T9.9 Stake holes SH9199 to SH9207 cutting into **[co.9101]**, looking south

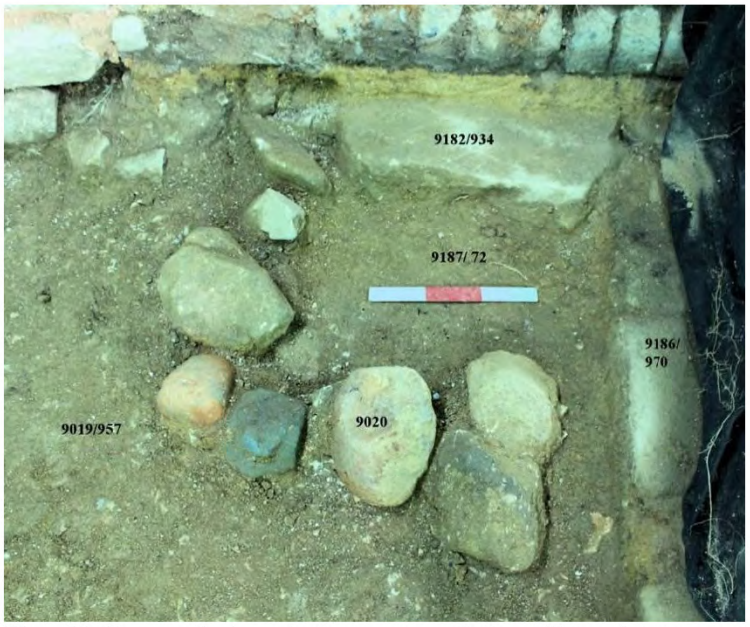

Plate T9.10 L-shaped alignment consisting of irregular stones and bricks below fill **[co.9019]**, looking south.

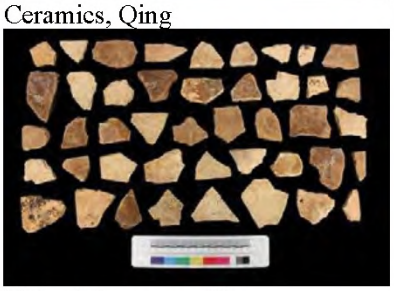
Ceramics, Qing



Thin plain creamy tiles

Plate T9.11 Finds from **[co.9019]**.

The brick floor **[co.9186/970]** was recorded on plan within the 2016 AIA excavation and was TL-dated of a brick to 18th century. During this phase, a further c.25-40cm was excavated around the brick feature down to hard orange clay deposit **[co.9054]**. A small area along the northern village wall and adjacent to the north-western corner of northern village wall was excavated deeper to establish the sequence of deposits and profile of an elongated feature (cut **[co.9195a]** with fill **[co.9195]** and **[co.9194]**) and pit **[co.9168a/9168]** (Plate T9.12). The current excavation findings confirmed that the brick floor and the stone foundation of the northern watch tower room wall **[co.9182/934]**, were sitting on top of a compacted strong brown clayey/sandy gravel deposit **[co.9187/9179/972]** (Plates T9.12 and T9.13). This suggests that both features are contemporary.

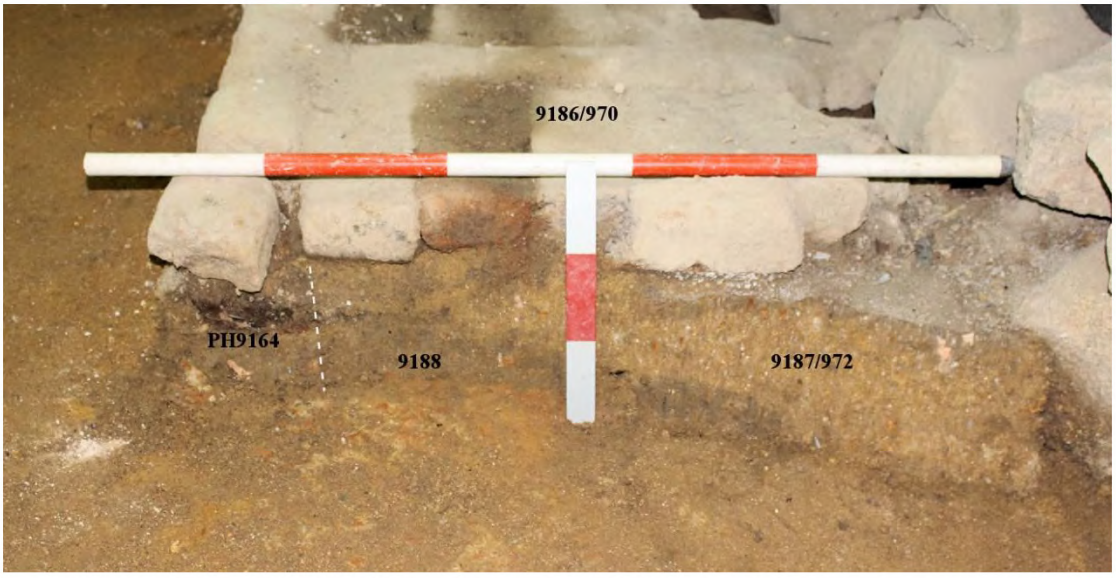


Plate T9.12 Brick floor [**co.9186/970**] sitting on top of a compacted strong brown leveller [**co. 9187/9179/972**], looking south.

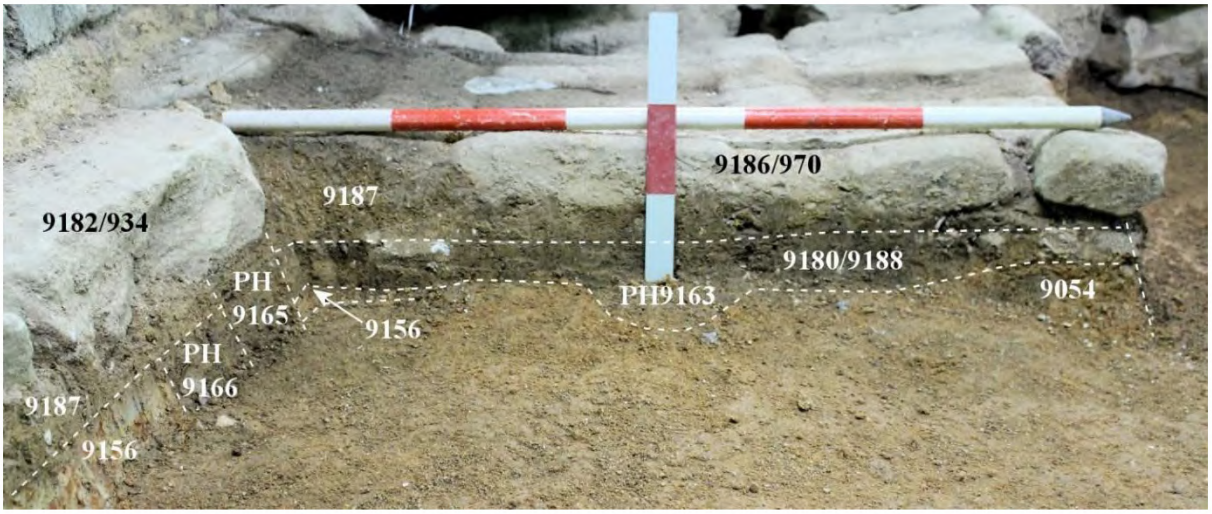

Plate T9.13 Brick floor [**co.9186/970**] and watch tower room stone foundation [**co.9182/934**] sitting on a compacted strong brown leveller [**co.9187**], looking west.

On a similar stratigrapical level as [**co.9186/970**] and below modern stone foundation wall [**co.9022**] and surrounding fill, a circular brick and mortar feature 'stove' [**co.9060**] covered in mortar spread [**co.9081**] was identified adjacent but stratigraphically lower than brick alignment [**co.9049/9050**] (Plate T9.14). The less well-preserved northern part of this feature was excavated down to sterile hard orange deposit [**co.9054**] to reveal the feature cut [**co.9108a**] and part of the stone floor [**co.9196**] while the main structure was left intact for possible preservation *in situ*.

Plate T9.14 Mortar spread **[co.9108]** covering circular 'stove' feature with radial brick supports **[co.9060]**, looking south.

Excavation results indicate that the structure was first constructed by cutting a circular stepped feature (cut **[co. 9108a]**) (Figure 5.18). into soils **[co. 9162/9184/9189** and **9054]**. It seems that layer **[co.9082]**, which was restricted to the area around the feature, was used as a leveller prior to the construction of the stove. A stone floor **[co.9196]**, not fully unexcavated due to the constraints, was recorded at the base of the stove within the narrowest part of the feature cut (Plate T9.15).

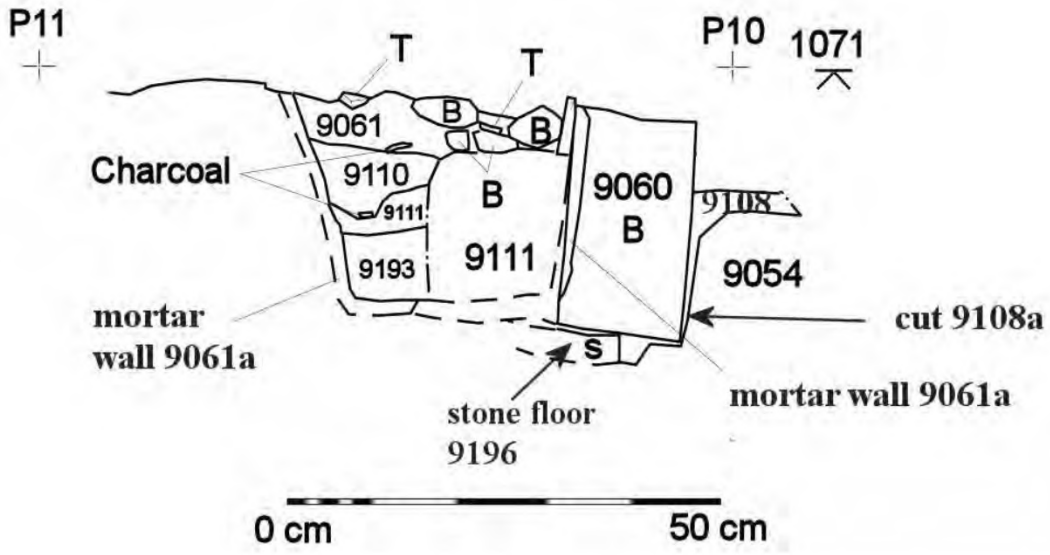

Figure 5.18 East facing section of 'stove' **[co.9060]**

A set of eleven red bricks [**co.9060**] were radially mounted inside the feature on top of the step and the stone floor [**co.9196**] (Plate T9.14). Each brick measured between 8 by 13 by 20cm to 9 by 15 by 25cm and was arranged to stand vertically. It currently protrudes slightly (less than 5cm) over the opening of the preserved height of the trench (Figure 5.18). The gap between each brick, and possibly the very narrow gap between the stone floor and the step, was filled with yellowish brown clay [**co.9108**] to stabilize the structure. A single undiagnostic village ware body sherd and a few tile fragments were recovered from this fill. A 2cm mortar wall with a flat base lines the inside of the radial brick supports. The thin uneven mortar wall [**co.9061a**] has a preserved diameter of 32cm with a maximum recorded depth of 24cm (Plate T9.16).

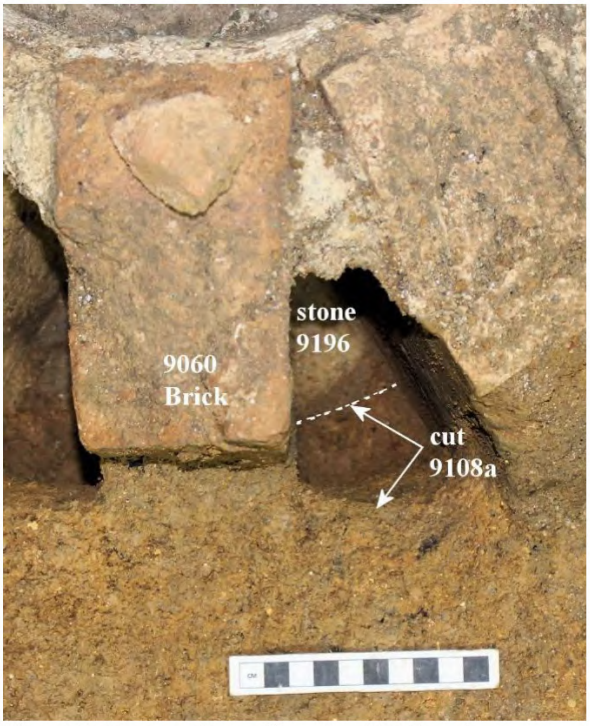

Plate T9.15 Stone floor [**co.9196**] and cut [**co.9108a**] after removal of fill [**co.9108**], looking west.

Plate T9.16 Mortar wall [**co.9061a**], looking south.

A spread of mortar [**co.9081**] was found covering the bricks and surrounding surface of the stove. It tipped downwards towards the southern village wall (Plate T9.6). This spread of mortar was severely disturbed in places especially along the footprints of the modern wall [**co.9022**] and associated cut trench. The mortar spread was also truncated by another wall foundation trench [**co.9101a**] along the southern village wall (Plate T9.8).

a. [**co.9080**], Village ware sherds, 19th century.

b. [**co.9106**], Tiles without cloth-imprint

Contemporary to the mortar [**co.9081**] was an isolated patch of greyish brown layer with shell fragments [**co.9157**], which could be degraded mortar associated with [**co.9081**]. Covering the mortar spread [**co.9081**] was a yellowish brown to dark yellowish-brown leveller [**co.9080/9158/9106/9065**].

Moderate number of tiles with or without cloth-imprint, as well as one mid-late Qing dynasty Wun Yiu base and some Qing dynasty/19th century village ware were recovered from this layer (Plate T9.16a-d).

A posthole [**co.9107a**] without finds was recorded cutting into this layer and all the way into [**co.9054**]. Leveller [**co.9106**] was also truncated by posthole [**co.9220**] situated against the north-eastern corner of watch tower room stone foundation [**co.9182**]. The function of the postholes is not clear.

c. [**co.9065**], Tiles with cloth-imprint

d. [**co.9080**], Porcelain bowl, Mid-Late Qing, from Wun Yiu

Plate T9.16 a-d Finds from [**co.9080/9106/9065**].

6.41mPD

A total of four layers of infill were recorded inside the stove's mortar wall **[co.9061a]** (Figure 5.18):

- The uppermost fill was a 3-10cm thick firm dark yellowish brown very slightly gravelly clay **[co.9061]**. Four village ware body sherds dated to Qing dynasty (19th century) and some small fragments of plain tiles, bricks, occasional charcoal and shell fragments were recovered in this layer (Plate T9.18 and T9.19).

Plate T9.18 Finds from **[co.9061]**, potsherds (right column) dated to 19th century.

- Underneath **[co.9061]** was a 4-8cm thick firm dark yellowish brown slightly sandy gravelly clay with occasional shell fragments **[co.9110]**. It appeared ashier and a tone darker in the north-western part due to the presence of some charcoal inclusions.

- Below **[co.9110]** was a 4-11cm thick of **[co.9111]**. It appeared quite high up in the north-eastern corner and sloping down towards the south-west. Fill **[co.9111** and **co.9193]** was then half sectioned to reveal the bottom of the mortar wall (Plate T9.20).

- The lowest fill **[co.9193]** was a 5-9cm thick very loose dark yellowish brown very gravelly and sandy clay with occasional charcoal and frequent shell fragments. No finds were recovered from this lower fill.

Plate T9.19 Cluster of bricks in fill **[co.9110]** inside mortar wall **[co.9061a]** and fill **[co.9061]**; looking north.

The purpose of the stove is unknown. Based on comparative analysis, one may suggest that this feature was used as basic open-air 'stove' to produce quicklime by burning shells. The small size of this feature suggests that the production needs were limited, perhaps intermitted, but regular enough to construct the stove. The only dated materials excavated from the upper fill of the mortar suggest 19th century, stratigraphically however, it is contemporary or earlier than the 18th century-dated brick floor feature [**co.9186/970**].

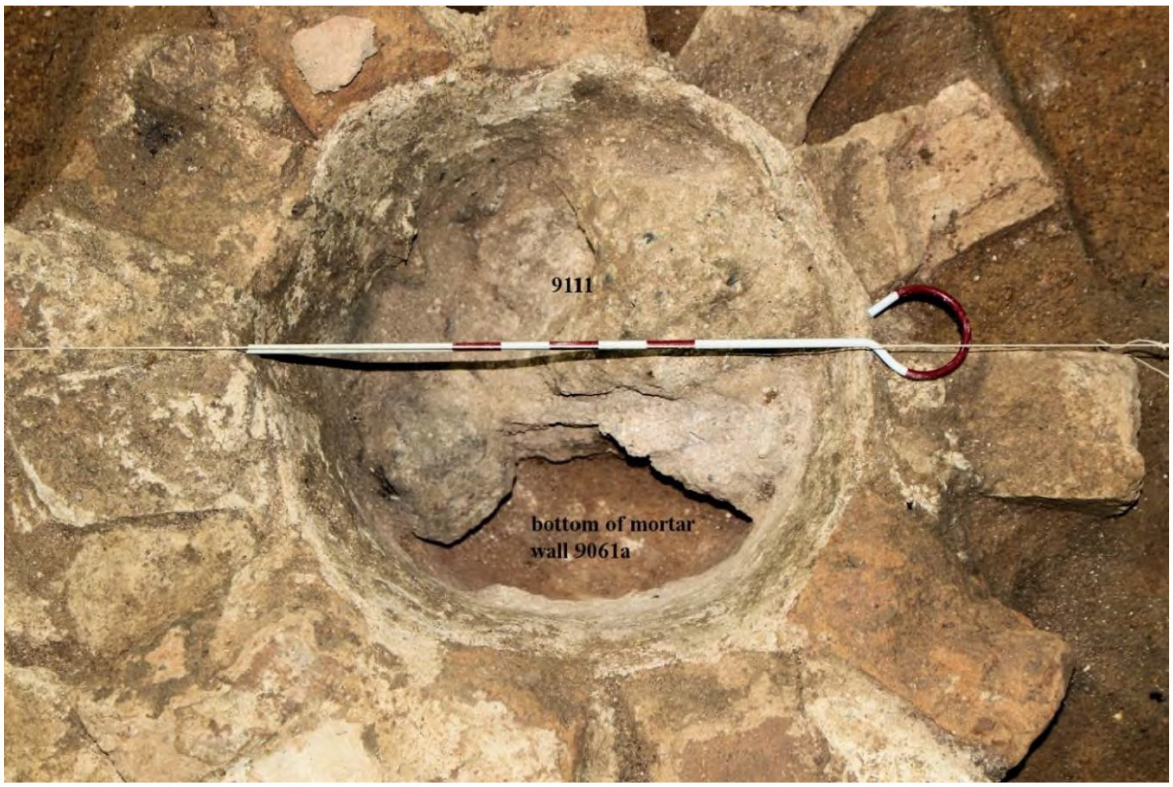

Plate T9.20 Fill [**co.9111**] and bottom of mortar wall [**co.9061a**] of the 'stove' feature [**co.9060**], looking north.

A further three contexts, of which two cultural soils pre-date the construction of the 'stove' structure [**co.9060**]. They are [**co.9082**], [**co.9162/9184/9189**] and [**co.9054**]. [**co.9082**], is associated with the construction of the stove and covers a yellowish-brown clay [**co.9162/9184/9189**] with occasional chunks of quartz. Finds included moderate number of tiles with and without cloth-imprint and one undiagnostic village body sherd. The lowest stratum excavated in the further excavation phase was a yellowish red sterile layer [**co.9054**].

A sondage measuring 1.2 by 2m was excavated from 6.27mPD within [**co.9054**] in the watch tower area reaching a maximum depth of 57cm at 5.68mPD. It was then followed by an auger test reaching a maximum depth at 4.49mPD. Decomposed rocks began to appear at 25cm. Further sterile deposit comprising strong brown mottled and clayey sand/gravel [**co.9219**] was recorded at 95cm in the auger test.

Of particular interest, and possible evidence for a repair phase of the village wall and watch tower was reflected in a pit feature [**co.9187a**] identified on south facing section in western end of the trench (Plate 9.21). It was overlain by fill layer [**co.9019**] and cut into [**co.9054**] at about 6.45mPD. The distribution of various layers of fill within [**co.9187a**] suggests that this feature

runs diagonally from towards south-east (Plate T9.21). A total of four layers of fill were recorded within; they are **[co.9187]**, **[co.9188]**, **[co.9156]**, and **[co.9162/9189/9184]**:

- The uppermost fill was a compacted strong brown leveller mentioned earlier **[co.9187]**, which was overlain by both floor **[co.9186/970]** and watch tower wall stone foundation **[co.9182/934]**. Two postholes were identified cutting into leveller **[9187]**. One was located at the north-eastern corner of floor **[co.970]** **[co.9164a/9164]** (Plate T9.13) and the other one was identified on north facing section along the watch tower room stone foundation **[co.9182]** **[co.9221a/9221**, not excavated] (Plate T9.22).

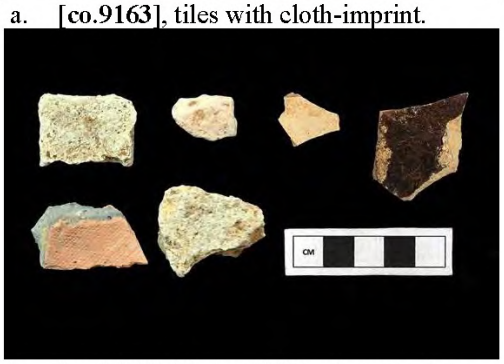
Plate T9.21
Close up of cut **[co.9187a]** and posthole **[co.9222a/9222]** on south facing section, looking north

Plate T9.22
PH **[co.9221a/9221]** identified on north facing section along the watch tower room stone foundation **[co.9182]**

Plate 9.23 Pre-ex plan of postholes **[co.9165a/9165]** and **[co.9166a/9166]** next to WTR stone foundation **[co.9182]**, looking south

- Underneath **[co.9187]** was a firm dark yellowish brown very slightly gravelly and slightly sandy clay fill **[co.9188/9180]**. A posthole **[co.9222a]** was recorded on south facing section cutting from **[co.9188/9180]** all the way into **[co.9054]** (Plate 9.21).
- A band of very firm mix-coloured clay **[co.9156]** was found in western end of the pit and near the north-eastern corner of the watch tower below **[co.9188]**. Two postholes, one **[co.9165a]** situated at the edge of northern watch tower room foundation **[co.9182]** (Plate 9.23) and the other one situated near the eastern watch tower room wall **[co.9155a]**, were found cutting into this clay layer all the way into **[co.9054]**. Ten fragments of tiles with or without cloth-imprint were recovered from posthole fill **[co.9165]**.
- Below **[co.9156]** was a c.5-10cm thick firm yellowish brown gravelly and slightly sandy clay **[co.9162/9189/9184]** with occasional chunks of quartz inclusions. Finds included moderate number of tiles with and without cloth-imprint and one undiagnostic village body sherd. The clay **[co.9162/9189/9184]** was cut by the circular 'stove' feature **[co.9060]**. Adjacent to posthole **[co.9165a]** along the watch tower room stone foundation **[co.9182]** was another posthole **[co.9166a/9166]**, which was identified cutting into **[co.9189]** and **[co.9054]** (Plate T9.23). Four thin plain creamy-coloured tile fragments were recovered from this posthole.

a. [co.9163], tiles with cloth-imprint.



b. [co.9148], likely of Qing dynasty date.

Plate T9.24 Examples of finds from postholes.

The proximity of the pit feature [**co.9187a**] to the village wall, watch tower and the 18th century brick floor [**co.970**] suggests that it could be a trench cut associated with the construction/major restoration of the village wall and/or the brick floor [**co.970**] around the 18th century. Despite the stratigrapical higher position of the watch tower stone foundation [**co.9182/934**] and brick floor [**co.9186/970**], they are contemporary with the 'stove' feature [**co.9060**], and all are interpreted as associated with the construction or repair phase of the village wall and watch tower.

A number of postholes, with unknown function, similar to the other trenches were recorded in T9. Except for postholes [**co.9166/9169/9177/9153**], which cut into [**co.9162**], a series of postholes were identified on top of [**co.9054**]. Most of these features were rather shallow, which suggest that they were cut higher up disturbed in later phases.

Most of the postholes identified on top of [**co.9054**] appeared to be randomly positioned either near the watch tower room and the village wall [**co. 9163, 9171, 9172, 9173 and 9174**] or in the north-eastern part of the trench [**co.9135, 9072, 9073, 9055, 9141, 9148, 9149, 9160, 9161,** and **9159**]. Except for two tile fragments with cloth-imprint recovered from [**co.9163**] (Plate T9.24-a), no finds were recovered from the postholes near the watch tower room. Most postholes in the north-eastern part of the trench, on the contrary, were recorded with finds dominated by tiles and a few pottery sherds dated to Qing dynasty (Plate T9.24-b). Perhaps those located near the watch tower room were related to the repair phase of the watch tower and/or village wall, while those located in the north-east were probably associated with later events. The latter postholes were largely truncated by later features along the eastern edge of the trench.

Southern Moat Area

A small section of the southern moat, near watch tower room and the southern village wall was excavated during the Further Investigation phase (Figure 5.17). The excavated section of the southern moat measured 4m by 1.4m and was excavated down to water table. The excavation results of the southern moat showed residential use of the area outside the village wall after the filling of the moat into modern times.

Modern disturbance associated with residential buildings were recorded at shallow depth as the following: tiled floor [**co.9005**], concrete surface [**co.9001**] and levellers [**co.9010, co.9007**], corner fragment of a plastered brick wall [**co.9093**] and associated concrete span [**co.9094**] and fill [**co.9090**]. Foundation stones of modern house ruin [**co.9004**] and associated fill layer [**co.9092/9091/9067**] was also recorded along the eastern edge of the trench. Another house

ruin foundation stones [**co.9013/9043**] and associated concrete platform [**co.9044/ 9048**] was recorded at the western end of the trench (Plate T9.25).

Plate T9.25 House ruin foundation stones [**co.9013/9043**] and associated concrete platform [**co.9044/ 9048**] was recorded at the western end of the trench (looking west)

Plate T9.26 Pottery jar rim from [**co.9012**] dated 19th-20th century.

Below the modern house ruin foundations, two fill layers [**co.9011**] and [**co.9012**] (Plate T9.27) were distinguished. Upper fill [**co.9011**] was a c.50cm thick firm yellowish brown slightly sandy and very slightly gravelly clay. While the lower fill [**co.9012**] an olive brown slightly sandy and very slightly gravelly clay with increasing organic content, which gets more clayey and darker in depth. [**co.9012**] was excavated down to 120cm below the surface (l.o.e.). Both fill layers contained abundance of artefacts, including brick and tile fragments (only samples kept) alongside with numerous village ware and porcelain pottery, and some plastic, tin, rusted metal and glass (not collected). Occasional shells were also recorded in both layers. In general, the upper fill [**co.9011**] contained less pottery and more building materials compared to the lower fill [**co.9012**]. Similar to previous 2016 AIA findings in T9, both contexts are part of the moat infill duped during WWII with materials dated to the 19th-20th century (Plate T9.26).

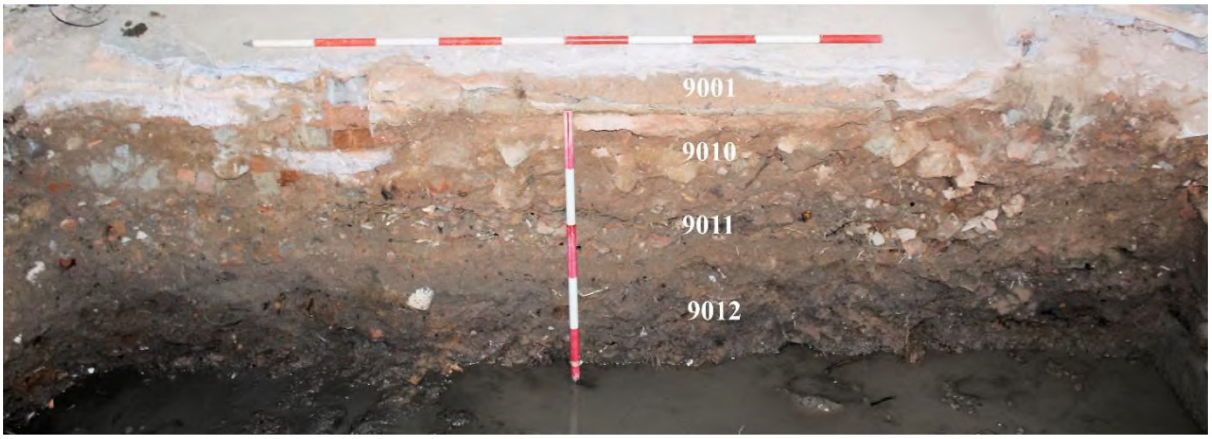


Plate T9.27 North facing section of southern moat showing moat fill [**co.9011/9012**].

A section of the southern village wall (410cm in length and 130cm in width) was uncovered in this further excavation. It connects, as noted in the AIA report, to the eastern watch

tower wall (Plate T9.28). The wall includes an upper brick wall [**co.9009/9021**] and a lower stone wall foundation [**co.9015**].

The brick wall [**co.9009**] was preserved to one course only and two rows of poorly preserved green bricks, which were lying immediately underneath the recent tiled floor [**co.9002**]. The brick wall was partially truncated by the western stone wall foundation [**co.9013/9043**] and re-use granite threshold and attached pivots [**co.9003**] of a modern house (Plate T9.28).

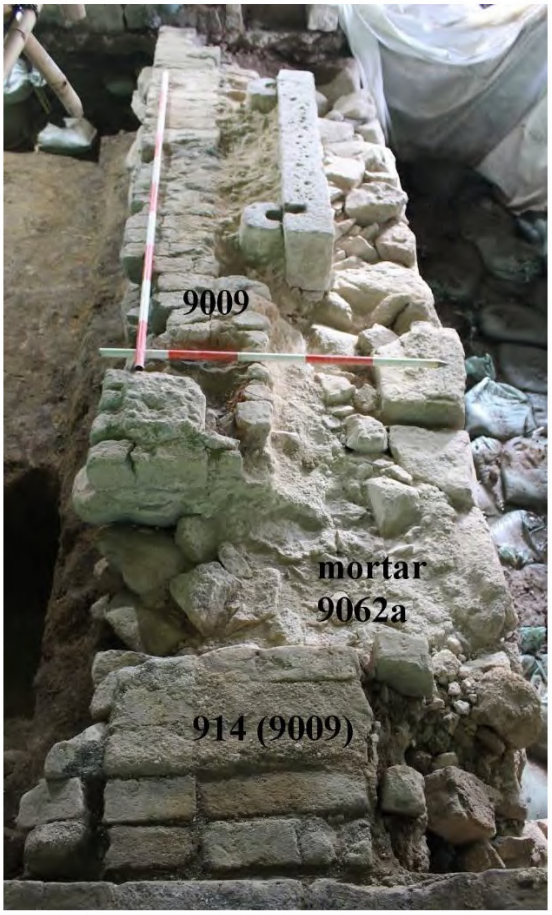

Plate T9.28 Brick wall [**co.9009**] of the southern village wall, looking east.

Between the brick wall [**co.9009/9021**] and the stone wall foundation [**co.9015**] a thin layer of leveller [**co.9062**] comprising brown slightly clayey and gravelly silt and a spread of mortar [**co.9062a**] in the western corner (Plate T9.28) was noted. Several tile fragments and some pottery sherds were recorded in this layer, likely dating to 19th century.

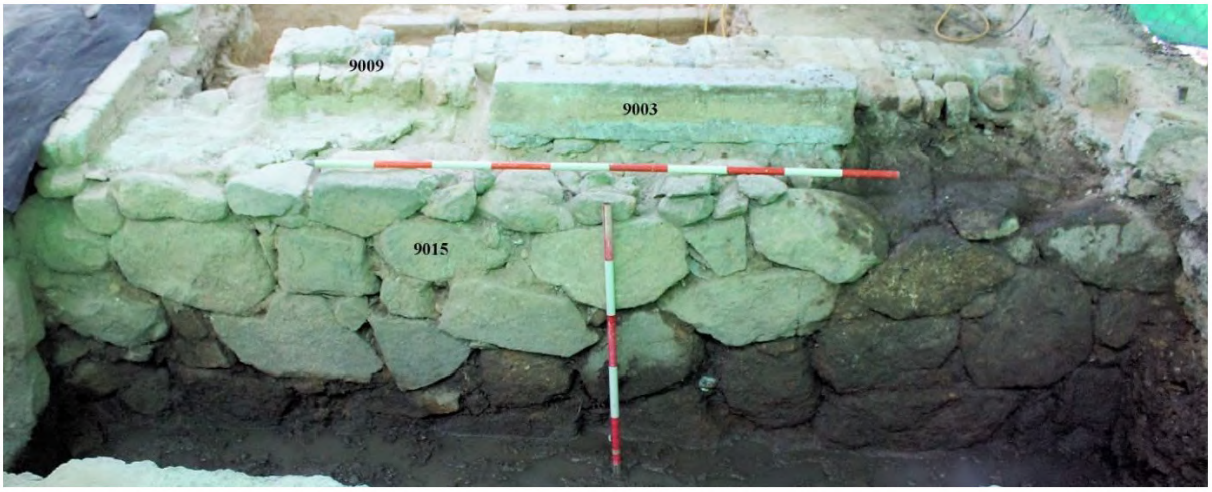

Plate T9.29 South facing section of southern village wall showing the brick wall [**co. 9009**], stone foundation [**co.9015**] and the overlying modern threshold [**co.9003**]; looking north.

After the excavation of contexts [**co.9011 and 9012**], five courses of granite stones (c.110cm in height) of the exterior southern village wall were recorded; the wall, however, continues

beyond the water table and limit of excavation (Plate T9.29). It is noticed that the uppermost stones are smaller in size, which probably corresponds to later (early 20th century) repair of the wall. Furthermore, a vertical joint between the southern village wall and the watch tower room, also noted at other watch towers, suggests separate construction (Plate T9.30).

Plate T9.30 Vertical joint between eastern watch tower room wall and southern village wall, looking north-west.

Like the other three watch tower rooms excavated, there is a difference in the external and internal portions of the wall in terms of design, use of stones and depth. The outward facing portion of the eastern watch tower room wall consists of an upper part brick wall [**co.9014**] and a lower part granite stone foundation wall [**co.9016**]. The 3-course upper green brick wall [**co.9014**] is equivalent to the brick wall feature [**co.906/931**] excavated in the 2016 AIA excavation, which dated to early 19th century. Mortar lining between each course of bricks are noticed. Four courses of large granite stones of the lower stone foundation [**co.9016/919**] were recorded and it continues beyond the limit of excavation within the southern moat area. No mortar was noticed on the surface (Plate T9.31). On the interior, between the brick wall and the lower stone foundations was a c.10cm thick yellow leveller [**co.9016a**], which was not seen on the external east facing section. The bottom stone foundation comprised one to two courses of stones of irregular shapes and sizes as recorded in the 2016 AIA excavation (Plate T9.32).

Plate T9.31 East facing section of eastern watch tower wall within southern moat area; looking west.

Plate T9.32 East facing section of eastern watch tower room wall; looking west.

The difference in design, use of stones and depth of the external and internal walls can be explained by their different roles. The outward facing external wall would have been designed to withstand an external attack with a solid and deep foundation and a flat external surface to possibly prevent climbing etc. unlike the shallow and uneven inner wall.

A gap **[co.9218]** in the brick wall **[co.9014]** was filled by an orange leveller **[co.9121]** under a dark floor **[co.9120]**. On top of the floor, an orange leveller **[co.9118]** was situated, from which a few creamy plain tiles, a village ware body sherd and a basin rim dated to 19-20th-century were recovered (Plate T9.33).

Plate T9.33 Finds from **[co.9118]**, potsherds and tiles dated 19th-20th century.

Eventually the stone threshold **[co.915]** part of the entrance to the watch tower room, was sitting on top of another leveller **[co.9114/9115/9116/9117]** above **[co.9118]**. A small number of thin plain creamy tiles and some village ware including a jar base and three body sherds dated to 19th-20th century were recorded in **[co.9114/9115/9116/9117]** (Plate T9.34).

Plate T9.34 Close up of cut **[co.9218]** and threshold into watch tower room in eastern watch tower room wall; looking west.

A pile of loose stones **[co.9216b]**, associated trench cut **[co.9216a]** and fill **[co.9216]** recorded in the adjacent excavation suggested foundation support for this newly created entrance (Plate T9.35). Cut **[co.9216a]** was observed on plan to continue beyond the excavation limits which suggests that this possible foundation trench was likely restricted to the entrance area (Plate T9.36). The lowest leveller **[co.9121]** was restricted to the foundation trench **[co.9216a]**, limiting its presence to the entrance and inside the watch tower room.

Plate T9.35 East facing section of sondage showing stone foundation **[co.9216b]**; looking west.

The floor [**co.9120**], which was contemporary with floors [**co.9053/9085/9087**] and extended into the watch tower room area, was associated with an early 20th century use of the watch tower room while the stone threshold [**co.915**] would have been built in mid, or later, 20th century to suit the contemporary raised level of the southwest corner of the village (Plate T9.34).

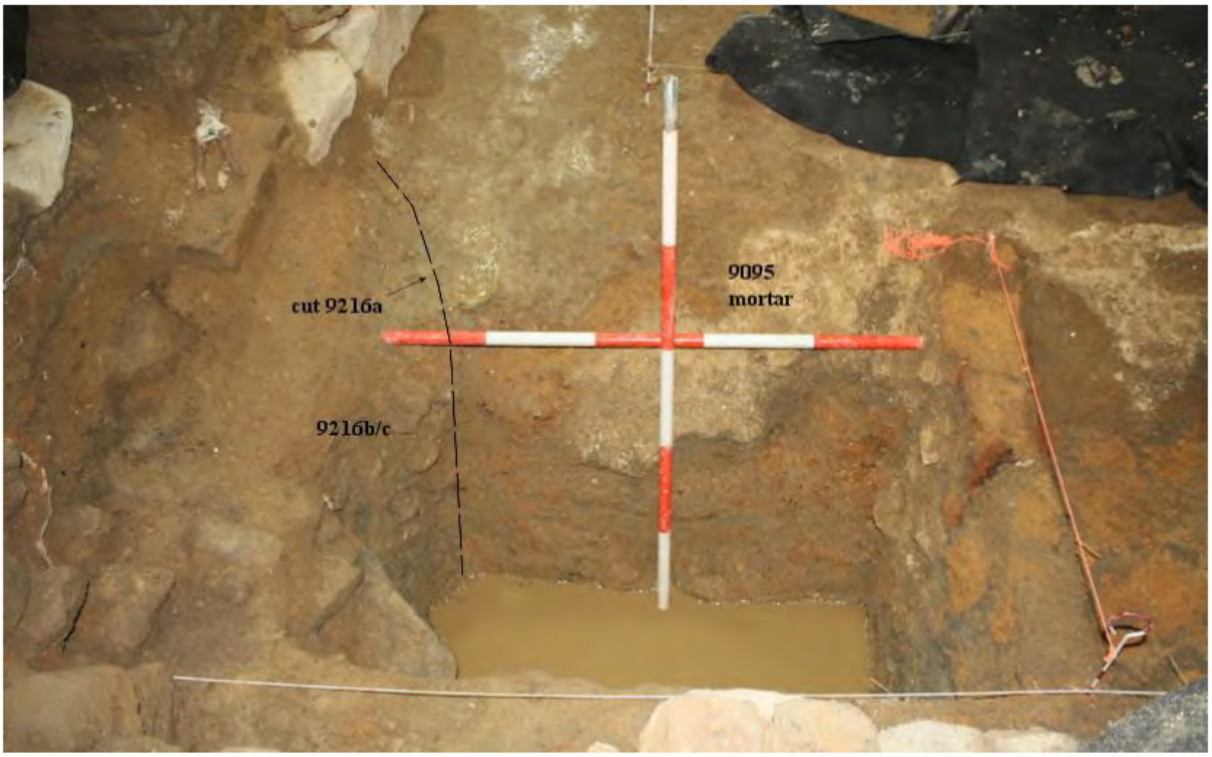

Plate T9.36 South facing section of sondage showing foundation trench cut [**co.9216a**] cutting into mortar [**co.9095**]; looking north.

Western Moat Area

The western village wall was further excavated to the north. The outwards appearance of the western village wall is one of large granite irregular stones, well place and with few small stone inclusions. It appears little modified and is a continuation of the western village wall first excavated in 2016 AIA phase. To the west part of the moat, infill [**co.9142/9143/9151**] was excavated and the results were same as recorded before with mid-20th century infill well until water table and end of excavation was reached.

The stone village wall supported remnants of green brick wall. The wall had been truncated mainly on the interior of the village by modern residential activities, such as enlarging of house spaces and construction of new house dividers. Below a modern concrete surface on the interior of the village wall, the contexts [**co.9144**] represents the leveller below the concrete and was underlain by a fill layer with over 80% tile fragments [**co.9145**]. [**co.9146**] represents the modern floor disturbance below which truncates the village wall. The excavation was conducted to expose the village wall and stopped around 0.6m below the surface.

Summary of the findings at T9

2016 AIA findings

- Confirmed presence of watch tower and village wall remains with evidence of maintenance or repair phases;
- Structural remains include stone foundation of village likely dated to Ming dynasty and stone wall of watch tower and brick floor, dated to mid Qing period (18th c.); brick walls of watch tower dated to late Qing dynasty.
- Cultural remains include red sandstone grinder (late Ming/early Qing), pottery and tile fragments (Ming/Qing);

Watch tower and village walls

- Layout and condition of the stone and brick walls of Southwest watch tower and associated village walls are considered the best preserved amongst the four watch towers. Overall, the walls appear least modified and part of the western village wall presents as original, possibly 16th century, construction.

Watch tower area

- Modern activity above, singular finding of a circular 'stove' feature; stratigraphically linked to the brick floor dated to 18th century and pit feature **[co.9187a]** representing enclosure wall construction phase (Post-Coastal Evacuation);
- Little cultural activity below, which suggests clearance at topographically higher situated area;
- No evidence of Ming or early Qing dynasty activity other than a single TL-dated tile fragment (2016 AIA phase) in well-constructed western village wall;

Southern and western moat areas

- The moat area along the southern and western village walls show WWII infill deposit.

Cultural material

- No Ming dynasty evidence other than tile fragment dated in 2016 AIA;
- Finds are dated Qing, 19th-20th and 20th centuries mainly.

6. EVALUATION OF ARCHAEOLOGICAL RESULTS AND SIGNIFICANCE

6.1 Background

The archaeological evaluation presented in this section is based on the results of the AIA (2016) and FI (2018) archaeological excavations. The archaeological findings have been used as part of a holistic approach to understand the historical and cultural setting of the village. The findings have been able to in some cases confirm information from historical records and the stories associated with the village, while in other cases the findings question the accuracy of such information. It is noted that some of the archaeological interpretations, in particular for the moat, have been supplemented through information provided by local informants. In order to ensure that a holistic understanding of Nga Tsin Wai Village is provided, this evaluation has also taken information from historical accounts, available graphics, local stories, and intangible heritage, such as festivals and traditions. A brief summary of main dates, impacts and walled village characteristics gleaned from above mentioned sources follows;

6.1.1 The historical records

According to historical records, the original village may have been settled by the middle of the 12th century as a single clan village by the Chan clan. The date of the founding of the Tin Hau Temple is known as 1354.

By the mid-14th century, the Chan clan was then reported to have been joined by the Ng and Li clans. Nga Tsin Wai became a walled village according to the historical records and accounts in 1570-1574.

In middle of Qing dynasty after the Coastal Evacuation, additional defences including towers and a moat were constructed according to Hase (1999, LCM & Associates 2007).

Hase reports that the enclosure wall would have measured 3.5m in height while the towers would have reached 7m in height. There is no information on thickness, but the walls were reported as being made of brick with rubble infill (Hase 1999). The moat is reported between 6 and 10m in width.

Ongoing use of defences until Japanese Occupation when walls were demolished, and moat filled in.

6.1.2 Description of typical Walled Village

The components of a Punti walled village are described in Ip (1995:47) as consisting of seven components: gate house and temple (or village shrine); central lane and parallel rows of houses which form a grid pattern within the interior of the village; and enclosure wall, corner towers and moat. These elements are present in Nga Tsin Wai both in the archaeological record or still standing.

The construction of each walled village would have included Feng Shui considerations. The basic consideration according to Ip (1995:101). The ideal conditions consist of: a village site embraced by mountains on three sides, while the front remains unblocked; the mountain to the left higher than to the right; vegetation on the mountain behind; a gentle bend or confluence of streams in front of the village; and village orientation to the south.

While Nga Tsin Wai lacks the proximity of mountains or hills, the rear abuts a gentle slope and a stream was in front of the village which would have had an unblocked access to sea in the past. The environment of the village, however, has changed significantly.

6.2 Evaluation of archaeological results

The defences

The remains of the enclosing wall, watch towers and moat were found in the archaeological record. The layout of the defences reflects the 1902 map of Nga Tsin Wai (Figure 6.1) and are components of a typical walled village (as mentioned above in 6.1.2).

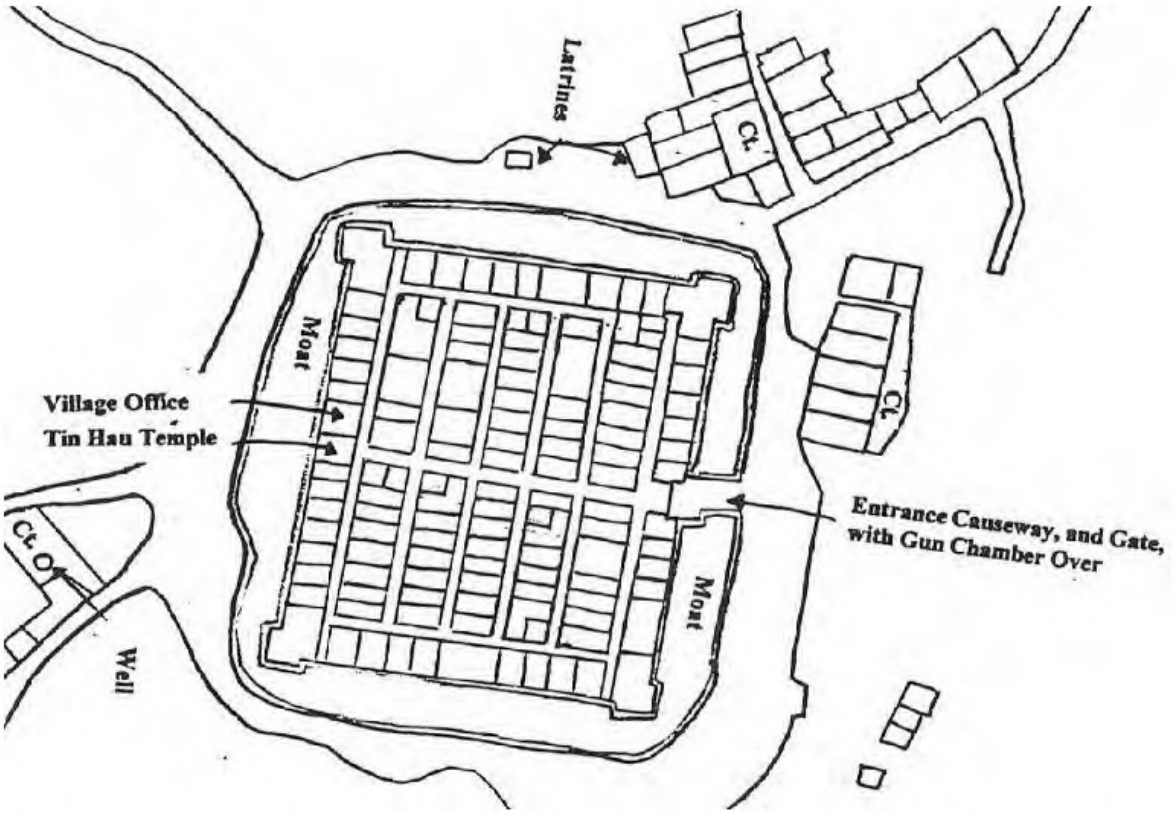

Figure 6.1 Map dated 1902 showing the protruding watch towers, moat and layout of the houses and lanes. It also shows the well outside of the village.

The enclosure walls, in contrast to what was suggested by Hase from historical records, were generally constructed as solid wall with granite stones and placed first without, and later with mortar as a bond. Since stone walls are difficult to date by themselves an appraisal on building techniques, materials used, finished appearance and context or stratigraphy was used to distinguish possible defence phases, including the oldest.

The most original in appearance and what have been interpreted as the oldest stone walls are situated at the rear of the village (Figure 6.2). The wall parts consist of large roughly shaped granite stones with minimal small stone infill, no mortar bonding and with a smooth exterior finish (Plates 6.1-2). The walls have not been fully excavated but the evidence suggest that on the interior the wall was supported by a soil wall with the stones protruding into the soil.

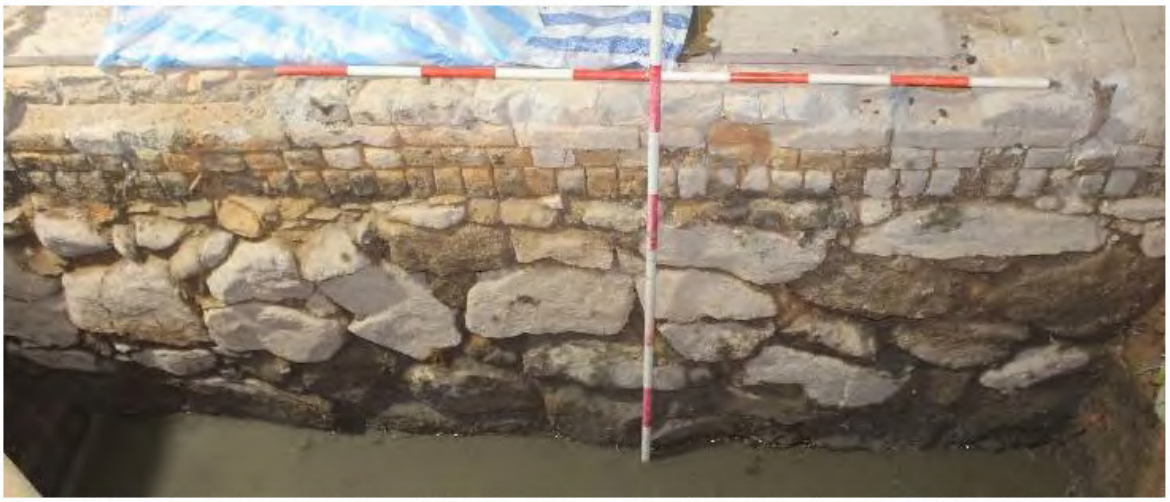

Plate 6.1 Part of exterior wall section (T9) along western moat showing the large stones forming a regular smooth exterior.

Plate 6.2 Exterior section of western village wall (T9)

Plate 6.3 Exterior wall section (T7) along western moat, although concrete mortar partly obscures the view, large stones can still be seen forming a regular smooth exterior.

The stone wall areas considered to be the earliest in date had a thickness of around 1.25m and a maximum recorded depth around 1.2m. Although the section recorded within T7 had been covered with concrete mortar the large stones and smooth exterior suggests it too belongs to the oldest phase (Plate 6.3).

Figure 6.2 Orange areas mark extent of most original wall parts at rear of village.

The top of the presumed oldest wall was levelled using small stones, thick cloth-imprint tile fragments and a yellow sandy mortar (Plate 6.4). TL-dating[2] of a tile fragment in T9 (2016 AIA stage) on top of the oldest stone wall area, returned a date of 565 years ago (1451 with standard deviation of 20% (1338 – 1564) to 30% (1282 – 1620). This roughly suggests a 14th to 16th century date for the oldest wall fragment based on a single sample. The smaller stones, thick cloth-imprint tiles and mortar on top of the large stone construction as part of the leveller were only noted on the top of the village walls in T7 (Plate 6.5) and parts of T9.

Plate 6.4 View of thick patterned tiles on top of the stone village walls (T9).

Plate 6.5 View of small stone, tiles and yellow mortar as leveller (T7).

The base of stone enclosure wall was only excavated (2018 AIA) in one area at front of village (T2s) where the wall stood a height of around 1.8m tall. The wall sections at the front of the village did not present similar characteristics as described above for the original wall sections. The wall stones were overall smaller with increased use of smaller stones to fill gaps (T1/T2s) (Plate 6.6). The wall exterior was smoothed but not to same standard as oldest parts. The exterior of the eastern village wall at T3 showed re-use of stones with for instance square red sandstone blocks (Plate 6.7) and general increased use of smaller stones. These wall sections at the front of the village would have been remodelled or repaired before falling into disrepair

[2] Discussion on difficulty and accuracy of dating is included in the AIA report.

and incorporated into second half of 20th century use. There are no areas with brick walls remaining at the front village wall. The date of the front village wall is difficult to estimate and is unlikely to have been constructed or modified in one unified phase. The back of the wall (within T1 and T5) was constructed against a single orange deposit (see Trench 5 results).

Plate 6.6 Exterior of eastern village wall (T1/T2s).

Plate 6.7 Exterior of eastern village wall (T3), note the red sandstone blocks.

The village wall sections connecting to the watch tower in T7 and T9 have been remodelled possibly more than once. Wall trenches with fills containing 19th centuries materials were recorded on the interior of the T7 walls (Plate 6.8), suggesting a major remodelling or upgrade of defences in the 19th century. The trenches do not continue to the bottom of the stone wall (and are not recorded along the interior of the watch tower room).

The upper parts of the village wall sections in all trenches have been modified/destroyed in more recent times and show evidence of partial removal (Plate 6.9), use of newer building materials (Plate 6.8) and use of concrete or red mortar as a bonding material (Plate 6.8). The destruction of the enclosure wall would have affected the Feng Shui of the village according to Ip (1995:104), who states that "*the enclosure of a walled village is the epitome of this [wall as part of the overall landscape configuration] type of feng shui wall, in addition to its function as a defensive structure*".

Plate 6.8 View of exterior western village wall showing concrete (within grey rectangle), new rectangular granite blocks with red mortar on top of the wall (above blue line)

Plate 6.9 View of southwest watch tower (T9) with damage of village and watch tower room walls by modern construction marked in blue outline

The four watch tower rooms were found to be constructed as individual structures separated from the enclosure wall (for instance see Plate T9.30). This separation between village brick wall and watch tower walls can also be seen at walled villages in the New Territories such at Kat Hing Wai. At Kat Hing Wai, the watch towers are constructed with different type of brick (suggest rebuilt). On the interior of the village, the walls of the watch tower rooms were constructed to a depth around 6mPD, while the base of the exterior walls (within the moat) continued beyond the excavation limits (below 5mPD). Evidence of repair and reconstruction was also noted in the watch tower room walls. An example being, a white mortar bonding material was used at T1 (Plate T1.5, Plate 6.13) indicating repairs during an early period, as similar material was noted at T7 which also had a later red mortar.

Possible entrances/doorways (some closed off) were noted at the interior of the watch tower rooms (Plates 6.10-13). The shape and sizes of the rooms differed slightly.

Plate 6.10 Entrance of southeast watch tower (T3)

Plate 6.11 Entrance of northwest watch tower (T7)

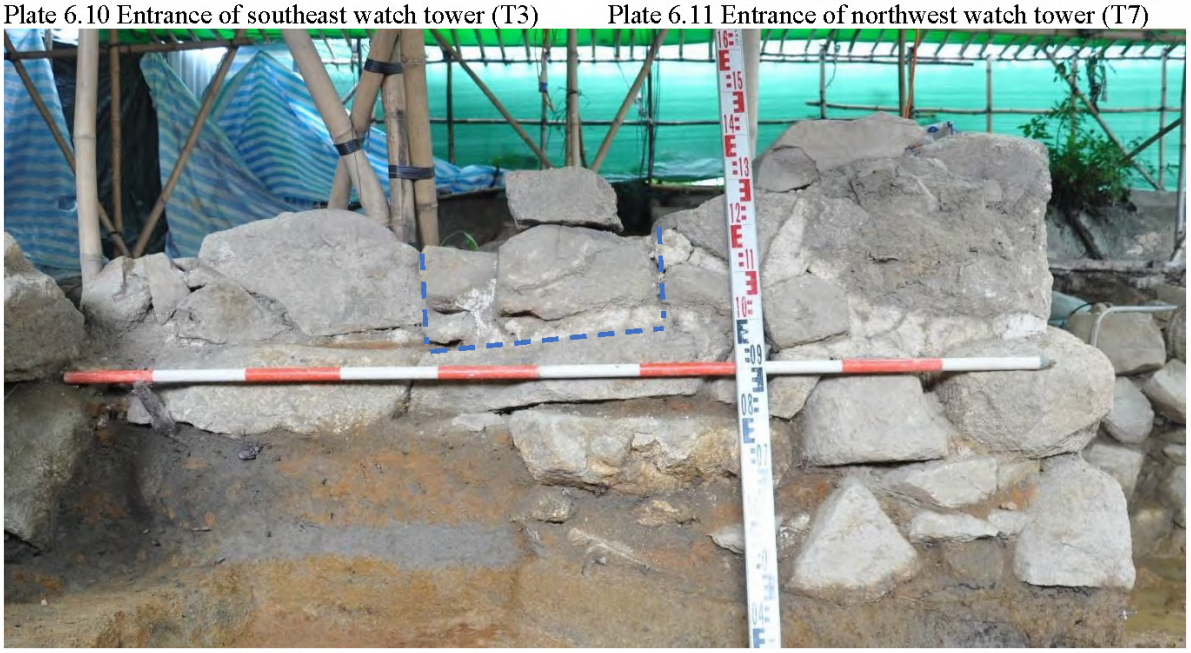

Plate 6.12 Entrance of northeast watch tower (T1)

Plate 6.13 Entrance of southwest watch tower (T9)

The watch tower rooms according to Hase (1999) were added in the middle of Qing dynasty, post-Coastal Evacuation. The oldest material recovered inside the watch tower rooms generally dates to Qing dynasty and as such does not contradict historical records.

Archaeological evidence for adding corner towers (18th c.) to an existing enclosure wall (16th c.) remains elusive. If the enclosure wall was located at the same alignment as currently excavated some evidence for removed wall parts would likely exist within watch tower rooms. There is, however, no evidence for the removal of previous enclosure wall within the watch tower rooms, while older cultural (such as agricultural ditches in T1), natural and sterile deposits were reached within. It is on the other hand possible that with the addition of the moat (reportedly at same time as construction of towers) the entire wall would have been replaced with added watch towers and a (deeper) foundation which would have removed all traces of 16th c. walls. The historical record does not shed any light on the construction extent after the Coastal Evacuation.

Evidence on the construction method of the bottom of the wall and connection of the village wall to the moat was reported on in the 2016 and 2018 AIA report. It indicated that the base of the stone wall sits at 4.59mPD directly on natural, sterile alluvial deposits. A soil platform runs along the exterior base of the stone wall. The platform may have been used in the maintenance of the moat and wall.

The exterior of the village walls may have had a regular coating of mortar applied to prevent water seepage. Evidence of mortar applied to walls was noted in various places (Plate 6.14).

Plate 6.14 Traces of mortar on exterior of village wall at T1 (left) and T9 Right)

There was no evidence of specific Feng Shui elements associated with the construction of walls and towers. The feng shui of the enclosure wall included the entrance to the village to the east where streams confluence in accordance with geomancy rules.

Settlement phases

Six broad events were noted in the archaeological stratigraphy of the village, some which can be connected to the historical record. The description will start on top of the sterile natural soils and end at the modern surface.

1- Pre-walled village

The natural sterile stratigraphy of the site consisted of alluvial orange clays overlaying grey sands and gravels. Inside T1 watch tower room and extending into the watch tower area, a series of agricultural ditches were recorded. The ditches did not include any archaeological diagnostic material but stratigraphically were located below the watch tower and watch tower and village walls and moat truncates the ditches.

2- Walled village

The first structural remains evidence consist of post and stake holes cut into the sterile orange alluvial clay. Most postholes appeared random, but a few stake holes alignments were excavated. While other explanations for the stake hole alignments are plausible, the authors offer their interpretation here. The location of the stake hole alignments suggests they may form part of the construction of the village wall and functioned as (temporary) retaining walls (Figure 6.3). Archaeologically, it is not possible to tie this evidence unequivocal to the historical account of walled settlement construction in 16th or 18th century. The stake fence would have marked boundary for constructing the inner soil wall support or lined edge of natural streams such as can be seen in northeast and west of the village. The stake holes are recorded around 5mPD (which coincides with top of moat deposit). Alternatively, they serve to delineate or retain streams or other flood areas or plain fencing.

Figure 6.3 Drawing showing stake hole alignment in T1 and T5 interior village near northeast watch tower.

The stake holes could not be dated, but it is likely that they, together with the orange soil wall on the interior of the stone village wall and village wall sections along the west belong to the earliest construction phase of walled village in the 16th century or 18th century. An argument for a 16th century date is the fact that the Coastal Evacuation abandonment layer (see below) was recorded on top of stake holes.

Most (if not all) of the post- and stake holes however, (of all periods) should be seen as part of daily or small village activities such as cooking, creating shade, small support or fence structures, etc, not major structural evidence.

3- Coastal Evacuation abandonment

The third event is interpreted as a time of abandonment of the village or area as part of the Coastal Evacuation Edict (1662-1668). On top and alongside the above-mentioned stake holes, several layers and deposits of sand, gravel and some thin clay layers with thick and thin cloth-imprint tile fragments, pottery and wood finds were recorded. The combined thickness of these layers measured as much as 0.5m in the area just north of the Entrance Gate. The wooden finds consisted mainly of twigs and branches, but some identifiable objects were noticed. These included wooden nails, stakes, bamboo items, unidentified wooden objects with finished edges, etc.

Some seeds were also noted and together with the branches and twigs, they suggest an open environment. This alluvial layer with numerous finds overlays an apparently sterile orange fill deposit (although some post and stake hole were recorded) but the extent of the layer and if it covers structural remains is not clear. The archaeological materials can be dated mainly to the Ming/(early) Qing dynasties.

4- Settlement within the village

All this is covered by fill layers (dated Qing dynasty/19th century) which supports the oldest stone residential house walls likely dating to the 19th century and in some places possibly 18th centuries. While house walls were recorded on the surface in general layout as seen on the 1902 map (Figure 6.1), only few house walls can be considered original (i.e. without concrete base or modern mortar). The original stone house walls were constructed with irregular medium to small sized granite stones placed on top of each other without a bonding material (Plate 6.15). The base of these stone walls was recorded around 6mPD. The excavation results show that layout of the village houses within the villages remained unchanged. The circular 'stove' feature recorded in T9 at 6.4mPD fits into this phase. The house walls would not have been load bearing nor would they have had foundations and the walls would have been built directly on the surface (Knapp 2000:72).

Trench 3

Trench 5

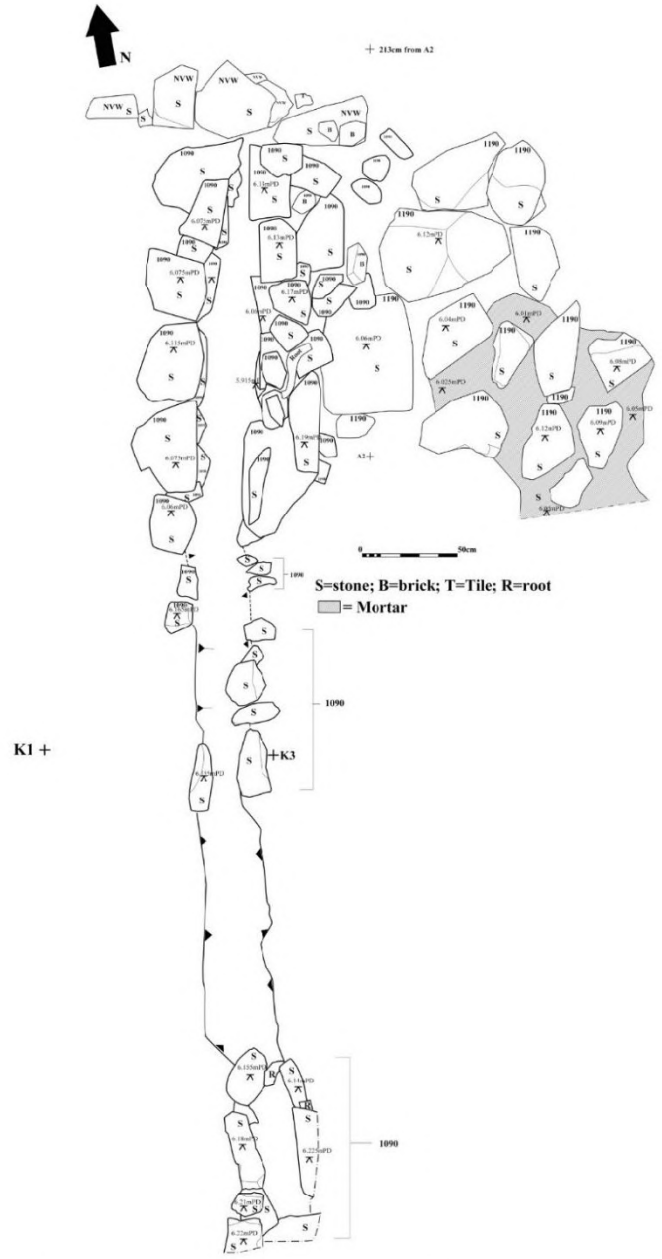
Trench 5

Trench 1

Plate 6.15 Examples of oldest house walls excavated in Further Investigation

5- Late Qing dynasty

A stone drain with stone pavement was excavated during the 2016 AIA excavations within the lane and was interpreted as dated to 19th -20th centuries. The 2016 AIA findings suggested the lane had been constructed in a single phase however, further findings in two locations (T1 and T5) indicate that the stone drain and pavement were preceded by hard floor, and hard floor and brick drain. (Plate 6.16a-e)



a. Drawing of stone-lined drain in T1

b. Stone-lined drain T3; looking north.

c. Stone-lined drain T5; looking north.

d. Brick drain in T1; looking northwest.

e. Brick drain in T5; looking south.

Plate 6.16a-e Stone pavement with stone-lined drain and predecessor brick drain

6- 20th century

The final event encompasses the infill of the moat during the Japanese Occupation and all modern modifications to the village. This was most notably evidenced in the moat infill around the village.

Dating evidence

Some of the artefacts excavated during the Further Investigation could be dated to Song and Ming dynasties. Only few pottery sherds, however, could be attributed to the Song dynasty and these may be heirloom pieces, but they are not indicative of settlement.

The assemblage of Ming dynasty pottery although also relatively small and mainly recovered from T5, combined with common type vessels dated to Qing or 16th to 18th century does suggest some Ming dynasty occupation of Nga Tsin Wai village or area. These finds however, cannot conclusively be connected to structural remains and there is no distinct Ming dynasty layer only a Ming/early Qing deposit interpreted as abandonment during Coastal Evacuation (in T5 and possibly T1).

Most of the finds are dated to the Qing dynasty which spans between 1644 and 1911. With the assistance of pottery experts Mr. Peter Lam and Dr Sharon Wong, some more specific dates were put forward. Overall, however, the finds assemblages consisted of mainly common village wares which were produced for an exceedingly long time with little change, which does not aid in distinguishing settlement phases in Nga Tsin Wai. The six events (see above) were proposed based on interpretation of material findings, stratigraphy and taking in account historical records.

C-14/AMS dating was considered for the wood within T5/T7, but not thought useful as the wood is derived from layers without structural associations. Further TL-dating, such as conducted in 2016 AIA phase, was also considered but as it provides overly broad dates it, ultimately, cannot be used to refine dating results obtained previously.

6.3 Significance of Nga Tsin Wai

A framework for the categories of significance is presented in the 2016 and 2018 AIA Report and continues to be relevant here. The updated statement of significance presented here is based on a holistic view of Nga Tsin Wai village and includes the results of desk-based review, including review of environment, historical accounts, stories and legends, maps, plates, local informant accounts, evidence for existing impacts, intangible heritage, GPR survey and both archaeological excavations.

The significance of a heritage place is "embedded in the *place* itself, its *fabric*, *setting*, *use*, *associations*, *meanings*, records, *related places* and *related objects*." (Burra Charter 2013) Significance contributes to our historical understanding of a place, its architectural value, social and spiritual relevance to different communities and the degree to which it merits scientific study. Evaluation of the significance of a heritage place allows us to identify the attributes of that must be preserved and interpreted by all conservation and management actions. The overall cultural significance of Nga Tsin Wai is found in the following values and their attributes:

Historical Interest

Architectural Merit

Group Value

Social Value & Local Interest

Authenticity

Rarity Value

These values have been adopted from appraisals conducted by Antiquities Authority Board (AAB). The proposed associated attributes relate specifically to Nga Tsin Wai. This table also appears in the AIA report but has been updated.

VALUES	DESCRIPTION
Historical Interest	Historical Interest refers to *the relationship between the building and important historical incidents, periods or events; the relationship between the building and important historical characters; the importance of the building to Hong Kong's historical development and the age of the building(s).* Nga Tsin Wai (衙前圍) literally means "a walled village in front of a yamen [office of a local bureaucrat]". This place name suggests that the village must have been in the vicinity of a yamen. Indeed, the Kowloon area has other place names referring to a yamen, for example, Nga Tsin Long (衙前塱, literally, "fields in front of a yamen") immediately south of Kowloon City, and Nga Yau Tau (衙右頭, literally, "The right-hand side of a yamen") in the upper end of Ma Tau Wai. Both places are very close to Nga Tsin Wai. There is a saying that the village of Nga Tsin Wai was founded by three men who came to the area with the exiled Song Dynasty boy emperor Bing (宋帝昺) (1271-1279). One, Ng Shing-tat (吳成達) was a civil official, another, Chan Chiu-in (陳朝賢) was a military official, and the third, Li Shing-kwai (李成規) was also attached to the Song court in some capacity. When the boy emperor fell in 1279, the three men jointly established the village. (AAB 2014) Nga Tsin Wai is thus recorded as one of the earliest civilian settlements founded in Kowloon Bay (alongside Po Kong and possibly Ma Tau Wai) constructed as a walled village between 1570-1574 according to Hase (1999, LCM & Associates 2007) or rebuilt as a walled village in 1724 after the Coastal Evacuation (AAB 2014). It is believed to be one of the more prosperous villages within Kowloon Bay in the Ming and Qing dynasties due to its temple and location along the trade route from Kowloon to Sha Tin. Nga Tsin Wai was the head village of an inter-village alliance known as the Alliance of Seven in Kowloon (九龍七約) which was formed with the villages nearby for mutual defence against outside attack. This alliance in fact comprised nine villages, not seven. The reason for this is that originally the alliance was not of seven villages, but of seven baojia (保甲, a system

of collective neighbourhood defence). Several of the villages included in the alliance are very tiny and would certainly have been combined for baojia purposes with other, larger villages nearby. Nowadays, all the alliance member villages except Nga Tsin Wai had been cleared. (AAB 2014)

The walled village of Nga Tsin Wai is recorded to have been to provide necessary protection from pirates or bandits. It clearly reflects the system of village defence which was an important part of the Hong Kong history story and development during the Ming and Qing dynasties. Archaeological evidence of historical interest has been found in the shape of archaeological remains of enclosure wall and watch towers.

The remaining structures of Nga Tsin Wai which maintain original features (the temple, entrance gate, some houses, the archaeological remains of fortifications) have historical interest. In addition, archaeological testing revealed evidence of a possible occupation prior to walled defences of the village in the form of material (cloth-imprint tile) of historical interest (T7) and stake hole alignments (T1, T5 and T7).

Attributes of Historical Interest are:

- Entrance Gate structure and the inscription (Grade 3);
- Tin Hau Temple (Grade 3) structure, contents and usage;
- Genealogy records housed in the Temple;
- Historical accounts pertaining to village and its activities;
- Old photographs and maps in local possession which illustrate the village and its activities;
- Hong Kong Memories and oral histories;
- Archaeological evidence and documentation of previous forms of the village and their historic associations.

Archaeological evidence supporting Historical Interest:

- No evidence for pre-walled village except for a few potsherds;
- Evidence for oldest walled defence phase in section of original stone wall foundations (T9, T7) and watch tower layouts in all four corners of the village (T1, T3, T7 and T9);
- Evidence for activity prior to Coastal Evacuation (T1, T5) and (re-) settlement after Coastal Evacuation (T5, T1) in the form of sandy gravel alluvial layer and subsequent fill deposits;
- Some evidence for prosperity of village through presence of red sandstone blocks (T3 front village wall) and red sandstone grinder (found in 2016 AIA phase in T9), but all were found in a reuse context indicating decline of fortunes at later date. Small finds evidence for Chinese exams, opium, agriculture indicated relative wealth but nothing extreme;

- Evidence for Qing dynasty renovation and ultimate destruction of structural defences (T1, T3, T5, T7, and T9).

Architectural Merit

Architectural Merit refers to *whether the building is an important example of a certain architectural style or type; whether the architectural style, grid, decoration, artwork, technology and materials of the building have great value to the location concerned and whether the appearance of the building enhances the beauty of the neighbourhood.*

The construction of Nga Tsin Wai follows the traditional Chinese walled village layout. It consisted of a rectangular, almost square, walled enclosure with two-storied watch towers at the four corners and an entrance facing the east. The walls, which stood around 3.6m high, were of bricks with stone foundations. The Entrance Gate and the Tin Hau Temple are located at the western and eastern end of the central axis of the village. (AAB 2014)

Nga Tsin Wai was bordered by a wide moat (between 9 and 10.6m wide) spanned by a bridge leading to the single gate, but the adjacent Kai Tak Nullah (啟德明渠) built in 1942 led to the infill of the moat. (AAB 2014)

The architecture of the Temple (originally built in 1354 (LCM & Associates 2007) or before 1732 (AAB 2014)) and Entrance Gate (built in 1724 (AAB 2014)) have been modified while the village houses are generic but representative examples of single unit terraced village houses.

The built structures have been heavily modified, particularly since WWII and little remains of the historic 16th to 18th century architecture, walls, towers and moat structures beyond layout of the village. The standing and archaeological fabric of the village contributes to understanding the building methods, materials, use and layout changes which have occurred as a result of residential and defence activities in different periods.

The architecture of the village, as a whole and its individual components, provide an element of authenticity to a neighbourhood which currently consist of 1960s public housing estates.

Attributes of Architectural Merit are:

- The Tin Hau Temple and Entrance Gate structure and decoration;
- The layout of the village lanes and structures;
- Fabric of buildings, pavements and other village features.

Archaeological evidence supporting Architectural Merit:

- Confirmation of the layout, materials and construction of the elements of the village including the watch towers (T1, T3, T7, T9), moat (T2), paths (T4, T5, T1 and T3) and houses (T1, T5, T6);

- Evidence for fabric and building materials (T1, T3, T4, T5, T6, T7, T8, T9);
- Evidence of structural features including paving, ditches, pits, postholes etc. (T1, T3, T4. T5, T6, T7, T8, T9, T10).

Group Value

Group Value refers to *importance of the heritage in a building cluster of harmonious architectural design and style of Hong Kong or as an integral component of an historical complex, or its importance in a building cluster showing common cultural value(s) or historical development of Hong Kong.*

Nga Tsin Wai has important Group Value as part of a cluster of historic sites in Kowloon Bay. These sites date from the Song to late Qing periods and include Lung Tsun Stone Bridge and Pavilion for Greeting Officials, Kowloon Walled City and market, Sacred Hill, the Former Yamen Building (Declared Monument) and Remnants of the South Gate of Kowloon Walled City (Declared Monument), Sung Wong Toi Inscription Rock (Government Historic Site Identified by Antiquities and Monuments Office), Hau Wong Temple (Kowloon City) (Declared Monument) and Nga Tsin Wai Village, Ng Ancestral Hall, Kowloon (Grade 3), and the League of Seven walled villages of which Nga Tsin Wai is the only surviving member. Kowloon Bay also includes two 20th century heritage sites, namely the WW II Old Pillbox (Grade 2) and Royal Air Force Hangar (Grade 3). Together they reflect important periods of historical change and development of Hong Kong, providing evidence of dynastic change, the relationship between China and the British colonial government and defence of Hong Kong. Nga Tsin Wai is part of this cultural landscape and shares in the Group's potential for preservation and interpretation for visitors.

Attributes of Group Value are:

- Tin Hau Temple (Grade 3), Entrance Gate (Grade 3), Ng Ancestral Hall (Grade 3) and extant layout of the village;
- Designation of the original location and extent of Nga Tsin Wai walled village;
- Location and spatial relationships of the group of sites illustrated by historic maps and photographs;
- Representative of the historical League of Seven; and
- Recorded heritage sites in Kowloon Bay.

Archaeological evidence supporting Group Value:

- Watch tower and enclosure wall layout, moat (T1, T2, T3, T5, T7, T9)

Social Value & Local Interest

Social Value refers to *whether a building is an important landmark which has commonly recognised symbolic or visual significance; whether it has significance in terms of exhibiting "cultural identity" and / or in terms of extending the "collective memory" of the community.*

Nga Tsin Wai led a coalition of villages against piracy called the Tsat Yeuk (七約), or Tsat Po (七保), the Kowloon League of Seven. While the formation of such leagues was common amongst rural villages, Nga Tsin Wai is significant as the venue every ten years for the Ta Tsiu ritual of the League of Seven at least since 1726 (Hase 1999:16).

Social value for local communities is reflected in the fact that Nga Tsin Wai continues to be the focal point for clan members of now non-existent member villages. The village's Tin Hau Temple, first constructed in 1354, plays a part in these festivals and celebrations, including the yearly Tin Hau festival and the ten yearly Ta Tsui festival. At the same time, it serves as an ongoing day to day focal point for villagers, past and present and contributes to the cultural identity of the local community.

As the last formerly walled and moated village in Kowloon, Nga Tsin Wai is an important local landmark which has commonly recognised significance for people of Hong Kong.

Attributes of Social Value and Local Interest are:

- Tin Hau Temple structure, contents and usage
- Ta Tsiu and Tin Hau Festival continued celebration and documentation
- Visual contrast of the last walled village in Kowloon now dwarfed by surrounding urban development

Archaeological evidence supporting Social Value:

- Archaeological materials showing the relative wealth and social ongoings (with evidence for Chinese exams, opium, agriculture) in the village

Authenticity

Authenticity is defined as *the quality of being authentic, truthful or genuine. It is assessed by whether the building has undergone any alternations, and the impact of the alterations on the historical significance and architectural integrity of the building; on whether any alterations to the building have modified the cultural setting and the associated cultural landscapes.*

The authentic value of Nga Tsin Wai lies in the retention of its typical lay-out as a walled village which can be seen on 1902 map of Nga Tsin Wai. It shows the outline of the village wall, watch towers, residential houses and structures and moat. Today the original elements of the layout, typical of

such walled villages, remain largely recognizable (central axis, temple, entrance gate, lanes).

The physical fabric of the village however, drastically changed during WWII when the moat was filled in and the village population further changed due to the influx of refugees which resulted in demolition of village walls and watch towers to make way for additional housing, including squatter structures. The major impact on the authenticity of the village resulted from the destruction of the upper remains of walls and towers by the middle of 20th century. The 1963 aerial photograph shows gaps within the wall and there are no longer obvious watch towers on the corners. The 1975 aerial photograph shows a two-storey structure on the northwest corner, but it is not believed to represent the original tower. Despite all these changes, the Tin Hau Temple and Entrance Gate remain notably authentic in terms of continuing traditional usage, if not in their materials, form and construction.

The cultural setting of Nga Tsin Wai changed in the 20th century when Kowloon Bay grew from agricultural area into urban sprawl. The agricultural lands and natural streams around the village disappeared or were modified by the mid- 20th century and Nga Tsin Wai is now surrounded by a modern urban landscape of high rise residential and commercial building. A number of heritage sites such as the Former Yamen Building (Declared Monument), Remnants of the South Gate of Kowloon Walled City (Declared Monument), Hau Wong Temple (Declared Monument) and Lung Tsun Stone Bridge (Site of Archaeological Interest) form part of the cultural setting but the elements which led to the walled village (threat of piracy) and prosperity of its villagers (agriculture and overland trade routes) are no longer present.

Nga Tsin Wai has been compromised by the many major alterations made to the village buildings and structures, in particular during and after WWII. These changes, especially the demolition of the village wall and watch towers and filling in of the moat, have resulted in a loss of integrity of the heritage place. Nevertheless, the continuing existence of the original village layout and wall foundation remains in Nga Tsin Wai Village support the authenticity and built heritage value of Nga Tsin Wai.

Finally, the impact of the alterations on the historical significance of Nga Tsin Wai should be considered minimal. For instance, the function and use of the Temple and Entrance Gate remains unchanged.

Attributes of Authenticity are:

- Tin Hau Temple structure, contents and usage
- Entrance Gate and inscription and usage
- Outline of the original village layout including village wall, watch towers and moat

Archaeological evidence supporting Authenticity:

- Evidence for the layout of the village houses, fortifications and moat (T1, T2, T3, T4, T5, T6, T7, T9);
- Evidence for 20th c. infill of moat (T1, T2, T3, T7, T9);
- Evidence for the major destruction or abandonment of defence of the village (T1, T3, T7, T9);
- Evidence for the major alterations made to the interior of the village which resulted in the loss of much of the authenticity of the site (T6, T8, T10, T11).

Rarity Value

Rarity Value refers to *whether the building is rare due to its historical interest, architectural merit, group value, social value and local interest, and/or authenticity*

In terms of architectural merit in Hong Kong, the walled and moated village of Nga Tsin Wai is one of many and as such does not have Rarity Value. Nga Tsin Wai was a typical Chinese walled village (AAB 2014) established in an agricultural setting and thriving because its surroundings (agriculture, market and trade routes).

If, however, Nga Tsin Wai is considered as walled village within Kowloon Bay, even in Kowloon, it is the only such village remaining and the only walled village example in the group of heritage sites in Kowloon Bay. These arguments contribute to its authenticity within the geographical area.

In terms of historical interest and social value/local interest, however, Nga Tsin Wai is important as the only remaining member village of the Tsat Yeuk (七約), or Tsat Po (七保), the Kowloon League of Seven. The Ta Tsui and Tin Hau Festivals remain well attended by the clans and locals and are an important expression of intangible heritage.

It is furthermore, the only walled village from this League still contributing to the cultural landscape of Kowloon Bay and representing the Group Value of this historical League of Seven.

Attributes of Rarity are:

- Contribution of Nga Tsin Wai to the cultural landscape of Qing period Kowloon Bay;
- Only surviving member of the historical League of Seven.

Archaeological evidence supporting Rarity Value:

- Layout of watch tower and enclosure wall (T1, T9);
- Only archaeological evidence for walled village in Kowloon Bay (and Hong Kong).

Statement of Significance

In summary, the significance of Nga Tsin Wai lies in the remains of the defences, the original layout, its associated intangible heritage, historical associations and as part of a group of nearby heritage sites. The physical integrity and authenticity of Nga Tsin Wai has been affected by the loss of its agricultural setting and loss of the defences of the village, i.e. filling in of the moat and destruction of the above ground parts of enclosure and watch tower walls. Internally individual house plans were altered to include moat area and houses were replaced and enlarged by combining units or increase height, even so the layout of the walled village as in number of rows, central axis, Temple and Entrance Gate, etc is retained. The trench excavations and uncovering of archaeological remains of the watch towers and enclosure walls are parts of Nga Tsin Wai as a walled village.

Nga Tsin Wai is not rare as a walled village in Hong Kong, although it the only example left in Kowloon Bay. There are several more significant examples of walled villages in Hong Kong as a whole which are better preserved and retain more authenticity, but the fact remains that it is the only one left in Kowloon. The significance of Nga Tsin Wai lies mainly in its historical associations, the original layout of the defences and its share as a walled village in the group value of the cultural landscape of historic sites and monuments in Kowloon Bay.

7. IMPACT ASSESSMENT

7.1 Introduction

The proposed development as mentioned in the introduction in the 2016 and 2018 AIA Report is one of the redevelopment projects announced by the former Lands Development Corporation (LDC) to address the increasing problem of deteriorating conditions within the older urban districts in Hong Kong.

From the onset of the redevelopment proposal, partial preservation of the old village including the Tin Hau Temple, Entrance Gate and "Hing Yau Yu" inscription tablet and their incorporation into the proposed design was proposed as part of the Conservation Park in the outline zoning plan. The approach to redevelopment acknowledges the historical importance of Nga Tsin Wai and its character as an historic walled village. The excavated layout of the watch towers are main characteristics of the walled village, and their structural remains are an opportunity to present archaeology to the wider public within the urban area, associated to the other heritage sites in Kowloon Bay and as part of the heritage landscape of Kowloon Bay. The preservation of the key elements of the walled village will enhance the objectives of the Conservation Park and as allow for interpretation as walled village. The residential development will retain the watch tower remains and preserve the remains of the enclosure wall foundations *in situ* as far as practicable.

Subject to detailed design, the proposed development will have two residential towers, with one tower situated on the north and one at the south side of the site. The lowermost residential floors will be raised 15m above ground level with a ground floor podium below each tower footprint to preserve the ambience of the Conservation Park, according to the latest Conservation-led development approach. The ground floor podium will serve as the residential entrance and includes recreational and management facilities, essential services, lift and

staircases, and E/M spaces necessary for the development. In between the lowermost residential floor and the ground floor podium is the transfer plate and podium landscape which augments the Conservation Park. In order to preserve the enclosure wall and watch tower foundation remains *in situ*, the development will not be able to provide an underground carpark.

The development is constrained by the preservation *in situ* of the enclosure walls and watch towers foundation remains in the Conservation Park. The development's foundation (including pile caps) will need to sit aside the village wall foundation remains in order to support the residential towers above. The site formation works will affect archaeological features, deposits and materials within the footprint of the development and within the interior of the village and in the moat. Structural protection for the enclosure walls will be reviewed, developed and put in place according to structural engineer's design.

Since utilities connection to existing infrastructure is necessary for the operation of the proposed development and Conservation Park to meet all regulatory requirements, though impact to Conservation Park should be minimized, this will unavoidably impact on some sections of north and south village wall foundations.

7.2 Development conservation principles and approaches

Based on international standards and guidelines, the following overarching principles and approaches are considered in the case of the proposed development:

- The cultural significance as embodied in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects should be retained as far as possible with the emphasis on multiple values of the heritage;
- The proposed change must be managed and how the impact of proposed changes should be assessed with reference to the statement of significance and the policy for managing the place. It may be necessary to modify proposed changes to better retain cultural significance;
- If some negative impact or loss of fabric is unavoidable, mitigation should be considered to minimise harm. This will normally include making records and archiving parts of significant elements, including archaeological deposits that will be removed or altered prior to and during the work. The extent needs to be agreed with AMO;
- Any development should consider the continuing religious use of Nga Tsin Wai. Ways must be found to accommodate such uses within a conservation framework.

In addition, eight guidelines were formulated specifically for Nga Tsin Wai by AGC Design Ltd. (March 2017) based on international charters and guidelines. They are applicable in the case of partial preservation of archaeological remains:

Overall Setting

Guideline 1: Conservation requires the retention of an appropriate setting of the archaeological and heritage site. This includes retention of the visual and sensory setting, as well as the

retention of spiritual and other cultural relationships that contribute to the cultural significance of the place. Any change or demolition which would adversely affect the setting or relationships is not appropriate.

Respect of the Context

Guideline 2: The physical location of a place is part of its cultural significance. A building, work or other element of a place should remain in its historical location. Relocation is generally unacceptable unless this is the sole practical means of ensuring its survival.

Retain Authenticity and Integrity

Guideline 3: Respect each historic place as a physical record of its time, place and use. Do not create a false sense of historical development by adding elements from other historic places or by combining features of the same property that never co-existed.

Level of Significance

Guideline 4: The level of significance forms the basis for any actions applicable to each category within the Site. These can layout a soundly based analysis and assessment to determine the scope of in situ preservation, and to facilitate planning and maintenance decisions.

Buffer Zone Management

Guideline 5: Places of cultural significance should be safeguarded and not put at risk or left in a vulnerable state. If development occurs, the design should respect the buffer zone and allow for access and display of the remains in a holistic manner. The characteristics or significance of remains as individual areas or as a whole should not be obscured or overwhelmed by the development, encroachment for instance by overhang should be minimized, if any

Conservation Maintenance and Management

Guideline 6: Some ruins are simply best left as ruins, because ruin itself is an effective tool to reflect and evoke past time. To preserve ruins means maintaining the fabric of a place in its existing state and retarding deterioration. That includes physical protective intervention and regular monitoring under the Conservation Plan.

Integrating Old and New

Guideline 7: Conserve the cultural significance of the building fabric when creating any new additions to a historic place or any new construction of compatible design.

Effective Interpretation

Guideline 8: Interpretation should be provided to explain and promote to the general public the cultural significance of the site.

7.3 Identification and Evaluation of archaeological impact

The evaluation of impact on heritage significance of Nga Tsin Wai acknowledge the overarching conservation principles and approaches mentioned in 2016 and 2018 AIA Report

Sections 6.1-6.2 which led to eight identified conservation approach principles specifically for Nga Tsin Wai (mentioned above in 7.2) . The assessment of the proposed development on the eight principles for Nga Tsin Wai is as follows:

1. Overall Setting

The setting of the walled village has already been severely altered from agricultural surroundings to a dense urban environment. Nga Tsin Wai village and in particular the Temple, Entrance Gate and route from interior of the village to ancestral hall, however, remains the setting for Ta Tsui and Tin Hau festival and worship at Tin Hau Temple. The proposed development will not affect the activities associated with festivals or access by people to Tin Hau Temple.

2. Respect of the Context

The location of Nga Tsin Wai is unaffected by the proposed development and remains in its historical location.

3. Retain Authenticity and Integrity

The preserved and retained elements of Nga Tsin Wai are an original record of the village life and early and defensive development of the settlement over time within Kowloon Bay. The proposed development does not aim to affect, co-opt or alter the meaning of Nga Tsin Wai as a walled village but will further affect the setting of the walled village. The design of the proposed development, however, may be used to harmonize the environment of the retained heritage and avoid affecting the authenticity of the village.

4. Level of Significance

The design and construction of new development and associated infrastructure may affect excavated and suspected archaeological features and deposits. The excavations of AIA and Further Investigation have shown that the archaeological evidence for the village includes the four watch towers, enclosure wall and house foundations, lanes with drains belonging to various phases (possibly 16th c. earliest and more likely 18th c. to modern).

The investigations focussed on the corners of the village and achieved exposure of the watch tower areas and adjacent enclosure wall remnants. The current proposed development footprint allows for the preservation *in situ* of the excavated watch tower foundation remains. Although overhang of the tower construction intersects with four preservation areas, the overhang does not affect the exposed structural remains.

It is expected that the entire enclosure wall exist within the buried areas to various states of preservation, including underneath the proposed north and south tower footprints. As such, sections of the suspected north and south enclosure walls may be affected. Further Investigation to expose and ascertain the village wall sections (part of Northern and part of Southern village wall) is required prior to recommending mitigation.

The Ming/early Qing material and Coastal Evacuation layer recognized at the front of the village as well as the assumed oldest stone walls at the rear of the village pose some further question as to whether a (walled) settlement existed at that time at this location. While the assumed oldest stone walls at the rear of the village will not be affected by the proposed development, adverse impact is expected on the continuation of Ming/early Qing material and Coastal Evacuation layer recognized in T1, T3 and T5 and its relationship to the interior of the village which does not present the early occupation evidence. The archaeological findings did not provide conclusive evidence, although some TL-dates of tiles and pottery finds suggest a significant presence around the historical date of construction of the first walled village, 1570-1574 (Hase 1999 and Hase in LCM & Associates 2007). Mitigation, in the form of rescue excavation will be required within the interior of the village and moat to establish the relationship between the early occupation stratigraphical evidence at the front of the village and the interior of the village and preserve the archaeological information of Nga Tsin Wai prior to development.

The structural remains although modified during the centuries are easily identifyable as towers and enclosure walls, major characteristics of a walled village. The currently extensive exposed archaeological structural findings are relatively unique in Hong Kong within an urban setting and will be preserved *in situ* as part of the proposed development design as far as practicable.

5. Buffer Zone Management

The proposed development footprint retains the characteristics and significance of walled village remains as individual areas and as a whole through the preservation of the watch tower corners, the elements in the Conservation Park, and leaving the underground foundation remains of eastern and western village walls undisturbed as far as practicable. Although the overhang of residential tower is proposed, the overhang areas are limited and will not overhang the exposed structural remains of the watch towers. The management of the exposed structural remains of the watch towers will be proposed separately under the Conservation Plan, which will be reviewed and commented by AMO and relevant departments.

6. Conservation Maintenance and Management

The current assessment includes provisions for the proposed development only. The physical protective intervention measures and regular monitoring of the preserved and retained historic elements will be proposed separately under the Conservation Plan, which will be reviewed and commented by AMO and relevant departments.

7. Integrating Old and New

The proposed development aims to separate as far as practicable the preserved ancient remains and the new construction. Final design of the proposed development is not known at this stage but should be compatible with the historic place.

8. Effective Interpretation

The interpretation of cultural significance of the historic place and promulgation to the general public will be included in the Conservation Plan, which will be reviewed and commented by AMO and relevant departments.

In summary, **the development proposal** currently consists of residential towers to the north and south of the village, with possible overhang construction, and a podium footprint, which is set back to allow for the preservation *in situ* of the four-corner watch tower foundation. A Conservation Park in the middle will preserve the two graded historic buildings- Tin Hau Temple and Entrance Gate, the "Hing Yau Yu" inscription tablet, the central axis and existing village houses / structures, will be expanded to include the four-corner watch tower foundations for public display and appreciation. Village wall foundations at the front and rear of the village (i.e. near eastern and western boundary) likely exist but are located within the Conservation Park area; hence it will not be disturbed. Further Investigation (and rescue excavations) is proposed for the remaining enclosure walls at the north and south of the village, parts of village interior and moat areas affected by the proposed development, as part of mitigation recommendations. Based on the outcome of the Further Investigation, suitable section(s) of the suspected north and south wall foundations will be proposed to be relocated to the Conservation Park for public display, educational and interpretation purposes and to facilitate utilities connection. The proposed development is **deemed acceptable with mitigation**.

8. MITIGATION RECOMMENDATIONS

Based on the above assessment of the proposed development on Nga Tsin Wai village and its significance, the following two-stage approach and mitigation measures are recommended for areas of archaeological interest with expected adverse impacts.

(A) Stage One: Archaeological Investigations

Archaeological investigations to be led by an archaeologist with a licence issued under the Antiquities and Monuments Ordinance (Cap. 53) should be conducted to identify the conditions of the wall foundation remains at northern and southern village enclosure walls and explore the most suitable section(s) to be dismantled by hand. All the foundation remains agreed to be dismantled by hand should be recorded fully and stored properly before any development work to commence and pending for reassemble in the future Conservation Park of the new development.

The archaeological investigations will fully expose the top portion of the north and south wall foundation remains of Nga Tsin Wai Village to the satisfaction of AMO to investigate the condition of the remains for evaluation of the most suitable section(s), in terms of preservation condition and suitability for future display, educational and interpretation purposes, etc., to be dismantled by hand and reassemble in the future Conservation Park for public display, education and interpretation purposes. Based on the findings of the archaeological investigations, the licensed archaeologist will recommend i) the most suitable section(s) of the wall foundation remains to be dismantled by hand and reassemble in the future Conservation Park; and ii) the measure(s) for the *in situ* preservation and protection of the remaining portions

of the north and south wall foundation remains for consideration and agreement by AMO, if possible.

(B) Stage Two: Rescue Excavations

Rescue excavations (RE) are required to be conducted at the areas of Nga Tsin Wai Village (interior village and moat areas) within the development of the northern and the southern towers including the selected section(s) of wall foundation remains to be dismantled, if applicable, to be recommended in the report of Stage 1 Archaeological Investigations and approved by the Antiquities Authority. Area or areas with no archaeological impact as shown in Figure 8.1 will not be required for RE.

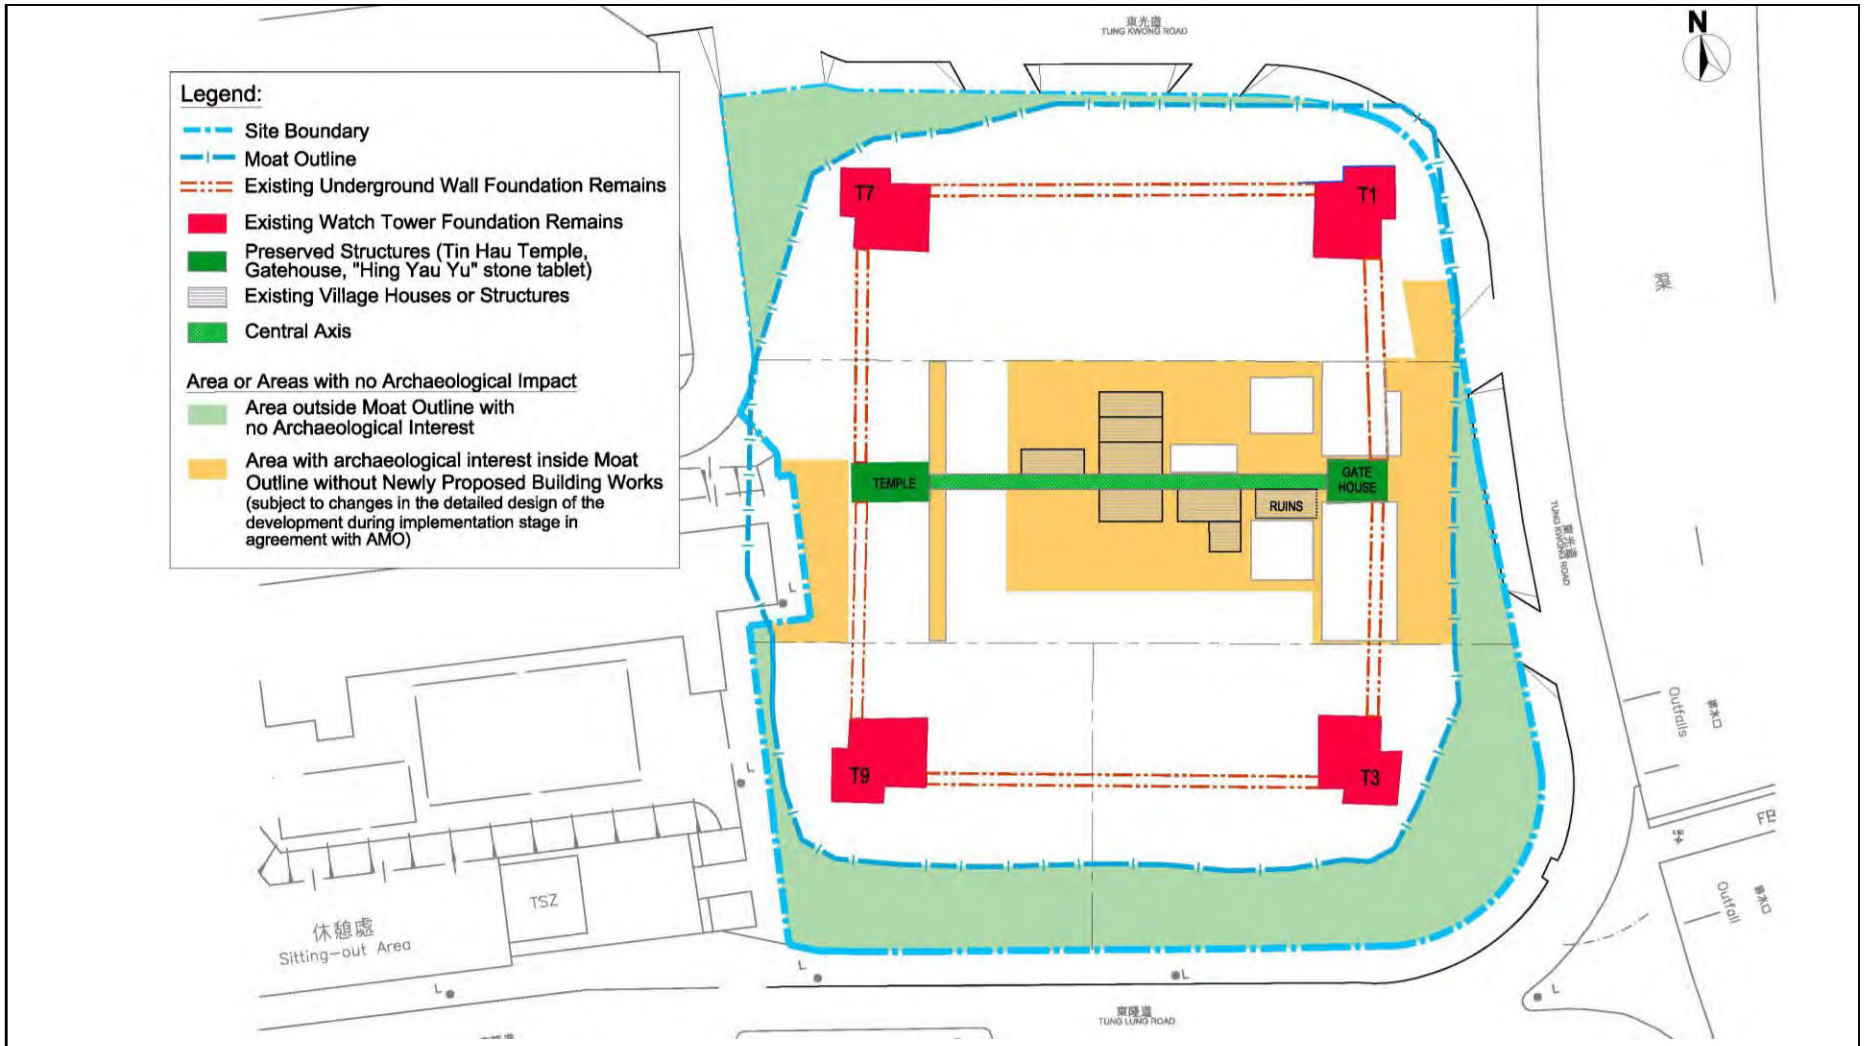


Figure 8.1 Tentative Area or Areas with no archaeological impact (subject to change in detailed design of the development during implementation stage in agreement with AMO)

Remark: Figure 8.1 was prepared in January 2023 after the completion of Archaeological Impact Assessment, Further Investigation and Stage 1 Further Investigation of Enclosure Wall.

A qualified archaeologist needs to be engaged for conducting rescue excavations with a Licence issued under the Antiquities and Monuments Ordinance (Cap. 53). The Licence will include details of the proposed rescue excavations, e.g. scope and methodology in the form of an Archaeological Action Plan and will be submitted for comment and agreement by AMO before formal submission of the Licence application.

The development includes the installation of sheet piles and sheet plates on site to protect the watch tower and wall foundation remains and to meet all relevant statutory building and safety requirements, as well as providing the machinery necessary for removing the top layer of modern construction, vegetation and depositions to facilitate the excavations of the impacted areas including the moat. Furthermore, it is expected that the sheet piles and steel plates installed would be left in place after construction works.

In principle all finds and archaeological information revealed from the RE shall be properly processed and preserved by record in accordance with the Licence to Excavate and Search for Antiquities requirements. The archaeological features, recovered in the RE, may be required for submission to the AMO for handling after processing, and/ or relocated for preservation within the Conservation Park, provided all such requisite measures as required by the AMO and adopted by the Developer shall facilitate the redevelopment to proceed, and shall by no means prohibit the construction works at the development footprint according to the final AIA reports. If significant archaeological features are discovered in the course of the rescue excavation, appropriate measures should be agreed with AMO. For avoidance of doubt, no finds will be required to be preserved *in situ* except the archaeological features already identified and recommended, which are:-

a) The four-corner watchtowers foundation remains, and
b) The village wall foundation remains, except for the selected sections of wall foundation remains which are to be relocated to the Conservation Park for education interpretation and display purpose to the public

9. SUMMARY AND CONCLUSION

The overall significance of Nga Tsin Wai lies in its historical associations and its share in the group value of the cultural landscape of historic sites and monuments in Kowloon Bay. Nga Tsin Wai is a typical walled village, albeit the only remaining one in Kowloon. Structurally part of the village is still standing, in particular the Entrance Gate, Temple and some houses along the central axis. The Temple and Entrance Gate have been extensively renovated and remodelled but retain a strong connection to the intangible heritage of Nga Tsin Wai and are important during the festivals of Tin Hau and Ta Tsui.

The exposed remains demonstrate authentic structural elements of the Nga Tsin Wai walled village of which little remains on the surface. They show the original interior layout of the village and reveal the construction methods and chronology of the enclosure wall and four corner towers and the shape of the moat. Archaeological evidence also illustrates the many modifications of the village through time and sequence of events filling in the moat.

A tangible connection to the heritage landscape of Kowloon Bay will remain through the creation of the proposed Conservation Park which would preserve the Tin Hau Temple (Grade 3) and Entrance Gate (Grade 3) as well as "Hing Yau Yu" inscription tablet and the preservation *in situ* of the archaeological remains at four corners of the village. The Conservation Park and preserved areas provides an ongoing space and use of the village during the Tin Hau and Ta Tsui festivals, and for worship at the Tin Hau Temple through the preserved Entrance Gate of Nga Tsin Wai.

The proposed development includes the *in situ* preservation of four exposed watch tower layouts, in addition to the Conservation Park in the middle. Further Investigation of suspected enclosure walls and areas affected by the proposed development are outlined as follows:

Stage 1- to partially excavate the north and south wall foundation remains of Nga Tsin Wai Village to ascertain their presence and condition and acquire information to preserve *in situ* as far as possible village wall in the proposed re-development and to potentially recommend incorporation of the selected sections of village wall foundation remains in the Conservation Park, and

Stage 2- to undertake rescue excavation within the development area within interior village and moat areas prior to development.

The preservation of the main characteristic of the village offers a valuable opportunity for the public to be educated on the importance of Kowloon Bay in the development of Hong Kong since early historical times. The village can join heritage sites currently under protection of the Government including Lung Tsun Stone Bridge and Pavilion for Greeting Officials (Site of Archaeological Interest), the Former Yamen Building (Declared Monument) and Remnants of the South Gate of Kowloon Walled City (Declared Monument), Sung Wong Toi Inscription Rock (Government Historic Site identified by the Antiquities and Monuments Office), Hau Wong Temple (Kowloon City) (Declared Monument) and Nga Tsin Wai Village, Ng Ancestral Hall, Kowloon (Grade 3), the [WW II] Old Pillbox (Grade 2) and Royal Air Force Hangar (Grade 3) to create an accessible heritage landscape spanning much of the history of Hong Kong. In conclusion, while the archaeological remains are not considered highly significant,

they present authentic elements of the last walled village in Kowloon and are a testimony of historical events and changes over the centuries in Kowloon Bay.

The preservation and display to the public of the exposed remains at the four corners enhances the current limited public archaeological patrimony of Hong Kong The significance of Nga Tsin Wai village is largely in its historical value as the sole remaining member of the coalition against piracy, Kowloon League of Seven, in Kowloon Bay, and its intangible heritage, including celebration of the Tin Hau festival at the Temple since 1726 and the Ta Tsiu festival every ten years in front of Nga Tsin Wai. The village is part of an important cultural landscape comprising the historic sites and monuments in Kowloon Bay.

For these reasons the proposed development including *in situ* preservation of the foundation remains of four watch tower corners, preservation of the enclosure wall foundation remains as far as possible, and rescue excavation within the development footprint in addition to the Conservation Park in the middle is deemed acceptable with mitigation. The action and mitigation measures recommended include rescue excavation of the development footprint (Stage 2) and exploration excavation of the Northern and Southern village wall remains and possible recommendations for display of wall foundation remains in the Conservation Park (Stage 1).

Annex A

ANNEX A Overview of Find Types

Examples of select finds which represent the codes assigned to finds category/material/form in trench data in Annex C.

1. CBM = ceramic building material

TL= tile, thick with cloth imprint, [co.3092]

TL= tile, glazed with cloth imprint, [co.7097]

TL= tile, thin plain grey fabric, [co.9092]

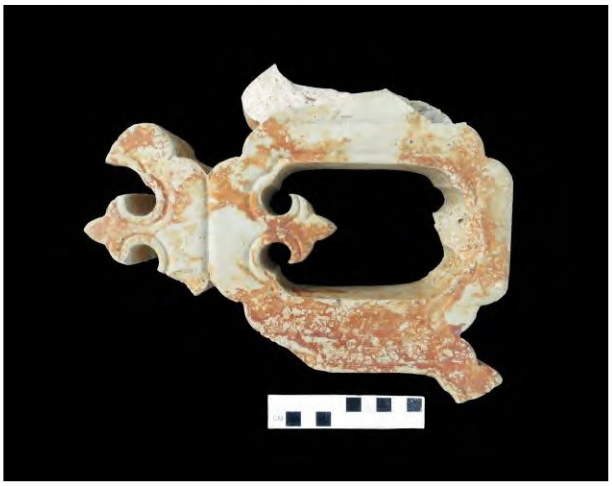
TL= tile, thin plain red fabric, [co.9092]

TL= tile, thin plain whitish fabric, [co.3070]

BR = brick, [co.5044]

TE = tesserae, [co.9012]

BT = baluster, [co.7074]



WL= window lattice, [co.7028]

PP = pipe, [co.7048]

OB= object, Shiwan figurine, [co.9012]

OB= object, Shiwan figurine, [co.9012]

OB= object, tile fragments, possibly recycled as gaming discs, [co.5028]

2. FCL = fired clay

ST= stove, [co.7048]

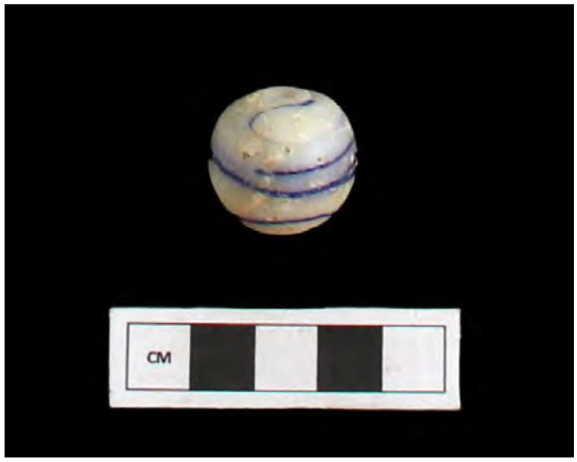
FG=fire-grate, [co.1089B&C]

NW=net weight, [co.1210]

OB= object, prop or stand, [co.1173]

3. GLA= glass

BT= bottle, [co.7008]



OB= object, marble, [co.7085]

4. MET=metal

ALU= aluminum, SN=spoon, handle [co.5028]

COP= copper, CO=coin, [co.1139]

IRO= iron, OB=object, [co.1085]

IRO= iron, OB=object or NL=nail, [co.5067]

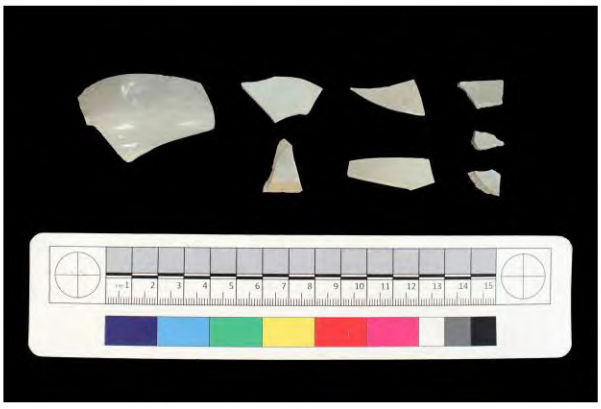
LEA=lead, OB=object, [co.3041]

SIL=sliver, CO=coin, [co.3076]

5. PLA=plastic

OB= object, [co. 9032]

6. POT=pottery (including porcelain and pottery)



POC = porcelain (celadon), [co.5070]

POC = porcelain (celadon), [co.5066]

POQ = porcelain (Qingbai), [co.7048]

POP = provincial porcelain, [co.9012]

PCF = prehistoric coarse fabric, [co.5067]

HSW = historic stoneware, [co.1210]

HFF = historic fine fabric, [co.7059]

BL=bowl, [co.1075]

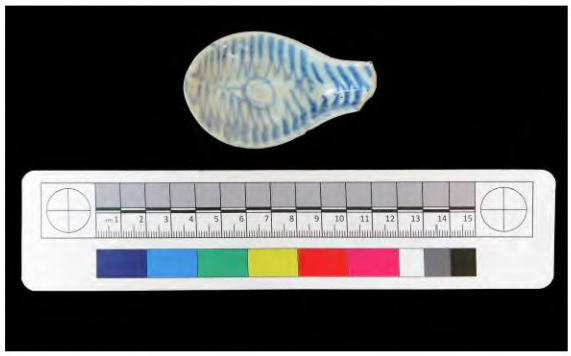
DI=dish, [co.9012]

DI=dish, [co.9012]

CU=cup, [co.9012]

CR = cuspidor / spittoon, [co.9012]

TP = teapot, [co.9012]



SN= spoon, [co.7048]

CA= candle stand, [co.207] in T2m

LS=lamp stand, [co.9012]

PI= pillow, [co.9012]

JR=jar, [co.7059]

VT=vat, [co.3031]

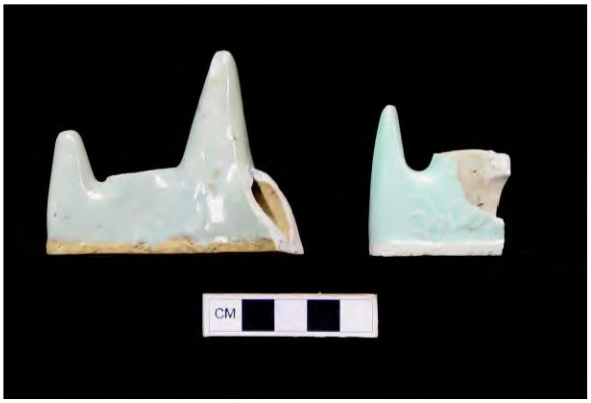
BS=basin, [co.9012]

BX=box, [co.9012]

BX=box/OJ=opium jar, [co.7048]

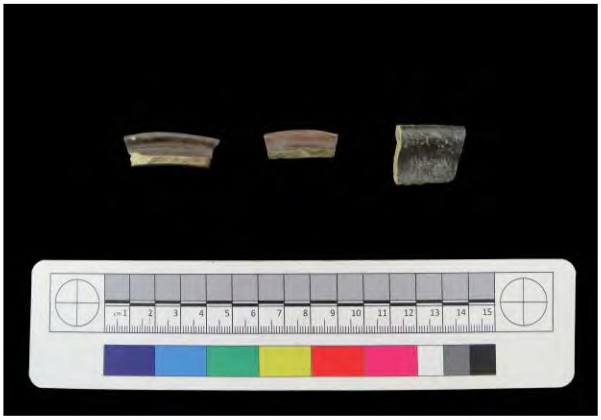
OJ=opium jar, [co.7059]

Cp=ccoking pot, [co.7048]

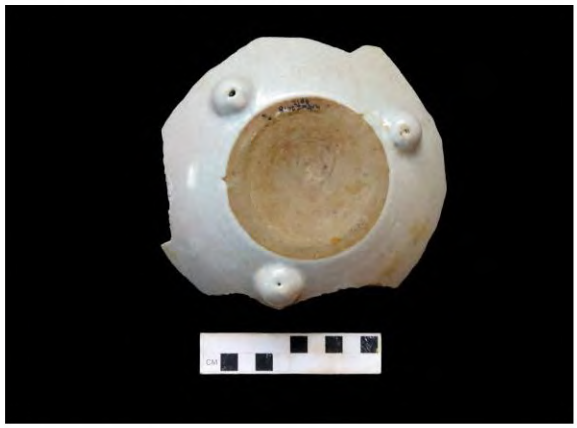


PH=pen holder, [co.203] in T2m

PH=pen holder, [co.7039]



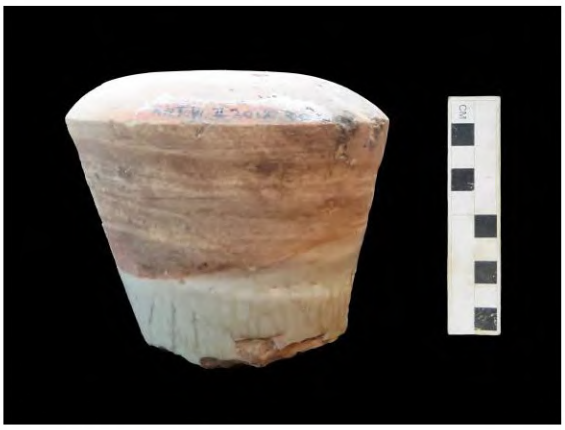
IB= incense burner, [co.5070]



IB= incense burner, [co.9012]

VA=vase, [co.9012]

VA=vase, [co.9012]



OB=object, [co.9012]

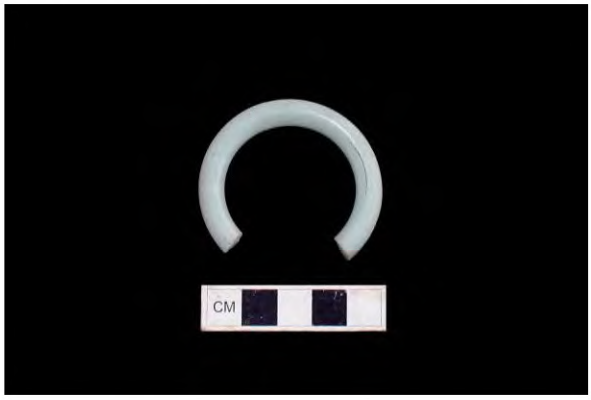
OB=object, [co.9012]

7. STO= Stone

CRY/ QUA=crystal/quartz, [co. 1086]

OB=object, Waisted pebble net weight, [co.5095]

OB=object, pointed stone tool, [co. 1227]



OB=object, bracelet, [co.204A] in T2m

OB= object, stone hammer, [co.5083]

OB= object, adze, [co.5049]

OB= object, worked flint flake, [co.7046]

IS=inkstone, [co.9129]

Annex B

ANNEX B Note on artefacts found at Nga Tsin Wai

The bulk of artefacts excavated at Nga Tsin Wai consisted of construction material, including mortar, bricks, stone, and tiles. Two major types of bricks in terms of shape, fabric and colour could be distinguished. A grey/greenish rectangular brick found *in situ* on top of the stone foundation of southwest and southeast watch tower rooms and part of the village walls (in T9, T7 and T3) and in excavated context. The other type is relatively large, reddish to orange brick with a concave base and slightly domed top (Plate 1, a). This type was associated with features found within the walled village, such as floor pavement (T9), brick wall (T7) and drain structure (T1 and T5).

Roof tiles, however, far exceed bricks and are the most frequent recovered artefact at Nga Tsin Wai. Different types are distinguished depending on thickness, colour, presence of cloth texture pattern on interior of tiles, and glaze. The dating of the cloth imprint tiles in Hong Kong has ranged from Song to Qing dynasty. In this report both the thick (>1cm) and thin (<1cm) cloth imprint tiles and thick plain tiles are proposed to date from Ming to Qing dynasties. The remainder of the thin (<1cm) plain tiles are dated Qing dynasty to modern. There has been no formal dating on the tile fragments, and it is not believed TL-dating can date accurately enough to establish a chronology based on the types. Furthermore, while the difference in form is believed to have occurred over time, it is also possible that different types of tiles were used for different use or status of buildings, i.e. temples versus residential or animal pens. The cloth imprint was likely formed during the manufacturing process while a glaze was likely applied during use to prevent water seepage (Plate 1, b).

Two large, near intact tiles were excavated from the moat. These different from the regular tiles in both size and weight. They are interpreted as ridge tiles, whereby the protruding end connects to the adjacent tiles negative notch (Plate 1, c) and the weight serves to hold the flat roof tiles in place. Similar tiles were found at Shek Kong (SF379) (AECOM 2014) and Wu Kai Sha. Another possible interpretation which could be explored is that they are tile manufacturing moulds.

More unusual within the archaeological context, was the recovery of wood in water-logged strata of T5. Wooden artefacts are difficult to preserve in the soil, and thus rare in archaeological sites. The recovered wood consisted largely of twigs and branches, but identifiable objects were present. Wooden stakes (Plate 1, d and e) are with artificial sharpening and burnt tips. In addition to wooden object, negative evidence recorded as postholes and stake

holes suggests timber structures. At Nga Tsin Wai, stake hole alignments were found in almost every trench (except T9), and within different phases (for example T3 co.3082-SHs and co.3093-SHs). It is worth noticing that some of the stake holes had charcoal mixed into the fills and sides, suggesting the stakes were plugged into the ground while burning or after being burnt.

Plate 1 **a.** brick, [co.5044]; **b.** glazed cloth tile, [co.7097]; **c.** roof ridge tile, [co.7022]; **d-e.** wooden stakes, [co.5095]; **f-h.** wooden wedge or nail, **f** and **g**: [co. 5048/5057], **h**: [co.5049]; **i.** worked wood component, [co.5059]; **j.** wooden component, possibly a tenon, [co.5067]; **k.** wooden component, possibly a mortise, [co.5067] ; **l.** Part of ornamental house decoration or door [co.5062].

Other identifiable objects are related to manufacturing techniques of traditional Chinese timber structures and furniture with the use of mortise and tenon joints (Plate 1, j and k), polished woods (Plate 1, i) and wooden nails (Plate 1, f-h). The wooden nails are small and elongated, have one end diagonally cut and the other end tapered to a point, some of them have facets or burnt or blackened tips. The nails were used to fix in place mortise and tenon joints (Liu and Zhou 2012:93). The craftsmanship is often seen in wooden furniture of Ming or Qing dynasty date and the diagonal cut on the nails was used to even out the surface of the object (Zhang 2007). The wooden object in Plate 1, l. is possibly part of ornamental house decoration or door.

Other perishable objects found, include bamboo, rope, and woven mat. Some seeds, and bones were recovered and are described in T5.E of ANNEX C and ANNEX D respectively.
Other building materials and decorative building components found on site are manufactured of ceramic and include elaborated window lattices, green glazed balusters with the molded motif, (possibly) Shiwan human figurines in ancient costume, ceramic pipe drains.
The second most prolific artefacts excavated are related to the preparation, processing, serving or storage of food. The household wares can be divided into two main categories, namely village ware and porcelains. The dating of common village wares is notoriously difficult and often can be dated to a few centuries (or general period) only.

The village ware finds include grinding basin used to grind food such as rice (Plate 2, a). Grinding basin sherds found on site mostly belong to non-glazed and flat based ware but in some occasions seen olive green glaze applied to the exterior or with a foot-ring attached to the base. Basins can be used for mixing, kneading and rinsing food, or for personal hygienic use, such as hands washing. The sherds found are often with a brown glaze applied on the interior to achieve a water-proof and unabsorbent working surface, which also makes them suitable for processes such as pickling (Plate 2, b). Pickling is a method which can enhance the flavor but also preserve vegetables. It is thought some of large pots (within T1 and T3) found buried into the ground served this purpose (Plate T1.15 and Plate T3.10 within Annex C), as the underground temperature fluctuation (especially indoors) tends to be stable and favors the fermenting process.

Most storage wares found, consisted of brown-glazed wares of types found manufactured between 16th to 20th century and were made in Shiwan or Pearl River Delta area in Guangdong. The wares include large jars, and thin-walled lidded jars (Plate 3); some of these wares have lugs or lids. Currently, in depth academic research on the functions, dating and other relevant aspects of these wares is limited (Wong 2017:346). Recent research (Wong 2017:347-8) provided some reference regarding the dating and production kilns for storage jars found on site, for instance the olive green-glazed jar with impressed pattern (Plate 3, f) found in the moat is comparable to a 19th to 20th century jar found near the Monte Fortress site in Macau.

Plate 2 Food processing wares found in Nga Tsin Wai. **a.** Grinding basin sherds, [co.3002], Qing dynasty to early 20th century; **b.** Basin sherd, [co.207], 19th -20th centuries; **c.** High-collared cooking pot, T9 moat fill; **d.** herbal pot rim, [co.9012], 19th -20th centuries, with Chinese inscription "生利"; **e.** Open form cooking pot, [co.303], 20th century; **f.** stove sherds, [co.312], Qing dynasty to early 20th century.

Plate 3 Storage wares found in Nga Tsin Wai. **a.** Lugged beaded rim jars; [co.204], 16th -18th centuries; **b.** Jar rims, [co.9012], 19th -20th centuries; **c.** Jar rim, [co.204], 16th -20th centuries; **d.** Jar body sherds, [co.209], 16th - 20th centuries; **e.** Thin-walled lidded jar, [co.9S06], Qing dynasty to early 20th century; **f.** Jar rims, [co.9S06], early 20th century.

A type of portable three-legged stove with holed fire-grate and cooking pots with lid and handle, including high-collared pots (similar to those unearthed from the Kowloon Walled City), herbal pots, and open form cooking pots were excavated (Plate 2, c-f). The stove and cooking pots are types still found at local markets. Workshop or brand names are sometimes inscribed on the pots, such as "生利", "義盛双边", "義和" etc., they are testimony of a highly competitive market in the 19th to 20th century.

Bowls, dishes, sauce dishes, cups, spoons, wine jars, and teapots or spouted pots are more often produced in porcelain and sometimes stoneware (Plate 4 and Plate 5). While most of the porcelain wares at Nga Tsin Wai date from Qing to early 20th century and came from local kilns such as Wun Yiu in Tai Po (for example Plate 4, i and j), there are some earlier, possibly imported pieces brought in via trade from Fujian, Jiangxi, and Huizhou of Guangdong and other places.

Few older pieces were excavated from the moat, including a Song dynasty bowl with worn-off green glaze (Plate 4, a) and a 14th century incised celadon dish base (Plate 5, d). In addition, a broken Yuan/Ming Qingbai celadon bowl was found during the 2016 AIA stage (at T5) (Plate 4, b). Sherds dated to Ming dynasty include some incised celadon sherds (Plate 4, c and d) and some blue and white (B&W) bowl fragments (Plate 4, e). For most village households, however, the imported high-quality celadon were probably too luxurious to own, and their presence is negligible.

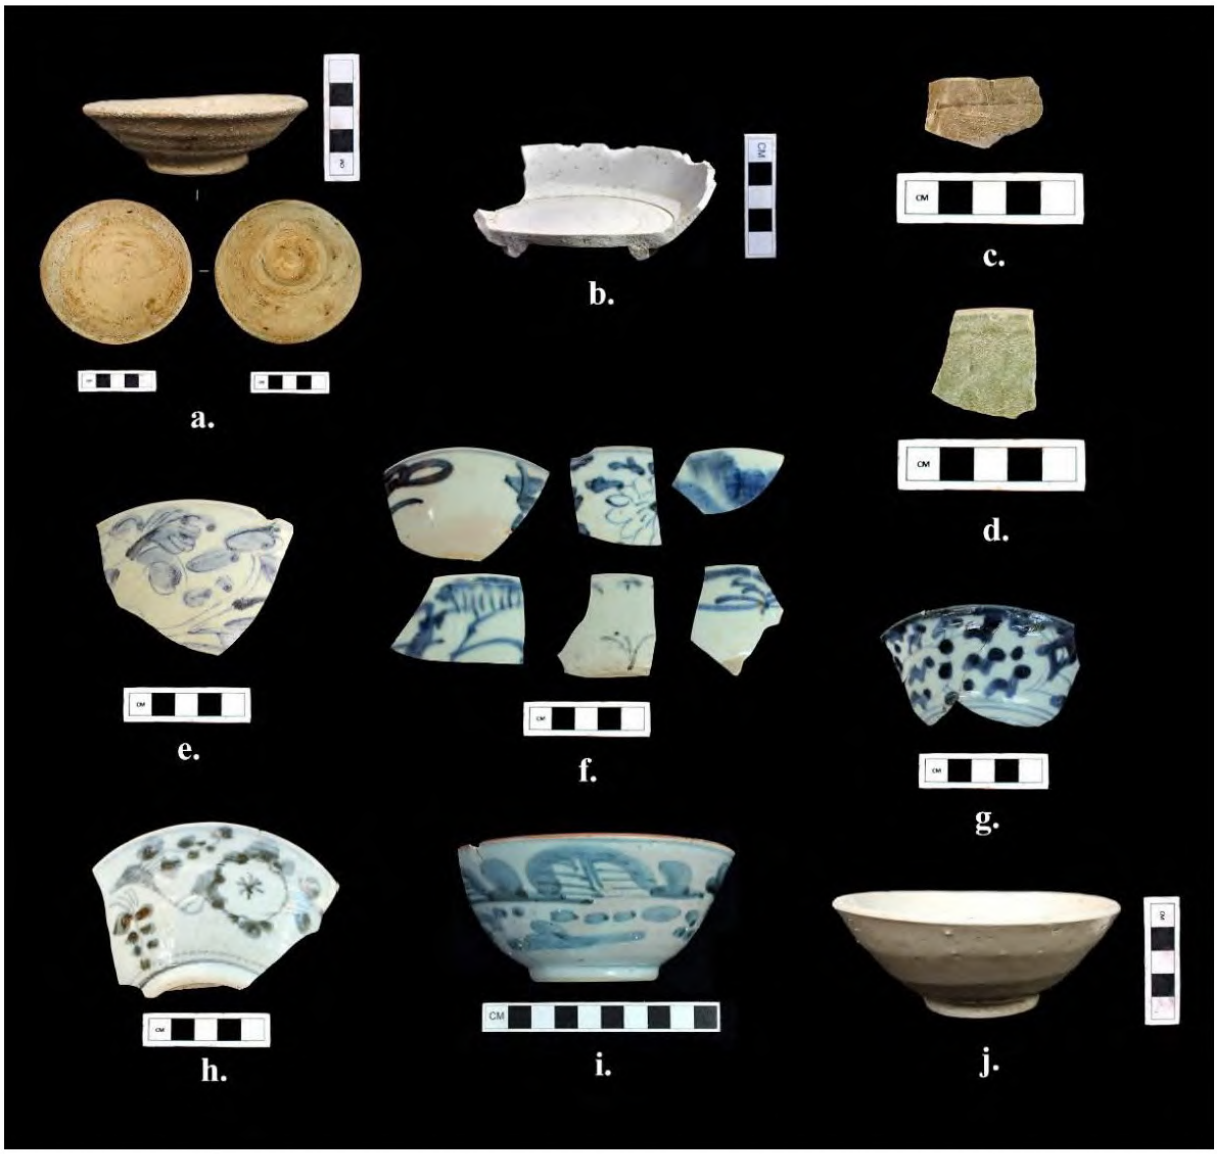


Plate 4 Dining ware: porcelain bowls found in Nga Tsin Wai. **a.** Worn-off glaze, [co.203], Song dynasty; **b.** Qingbai celadon, [co.514], Yuan/Ming dynasties, from Fujian or Jiangxi; **c.** Incised celadon, [co.5066], Ming/16th century, from Huizhou of Guangdong; **d.** Incised celadon, [co.7056F], Ming dynasty/16th century, from Huizhou of Guangdong; **e.** B&W, [co.5095], late Ming dynasty/early 17th century; **f.** B&W, [co.5092], early Qing dynasty, from Guangdong or Fujian; **g.** B&W, [co.3008], 18th-19th centuries, from Fujian; **h.** B&W, [co.204A], mid-18th century, from Fujian; **i.** B&W , [co.917], Qing dynasty, from Wun Yiu; **j.** Green glazed, [co.7048], 19th century, from Wun Yiu.

Plate 5 Dining wares found in Nga Tsin Wai: dish, source dish, cup, spoon, teapot, spouted pot, chopsticks holder. **a.** B&W dish, [co.7031], 18th century, from Fujian; **b.** White glazed source dish, [co.7031], mid-late Qing dynasty; **c**. B&W wine cup, [co.7044], Qing dynasty, from Wun Yiu, inscription "祿享千鍾"; **d.** Qingbai celadon dish, [co.209], 14th century, from Fujian; **e.** B&W spoons, left:[co.926], 19th century, from Wun Yiu; right:[co.121], 19th -20th centuries; **f.** Wine jar, [co.207], Qing dynasty, from Wun Yiu; **g.** B&W teapot, [co.9012], 19th -20th centuries; **h.** Spouted pot, [co.203], possibly Qing dynasty; **i.** Chopsticks holder, [co.9138], 19th -20th centuries, from Shiwan.

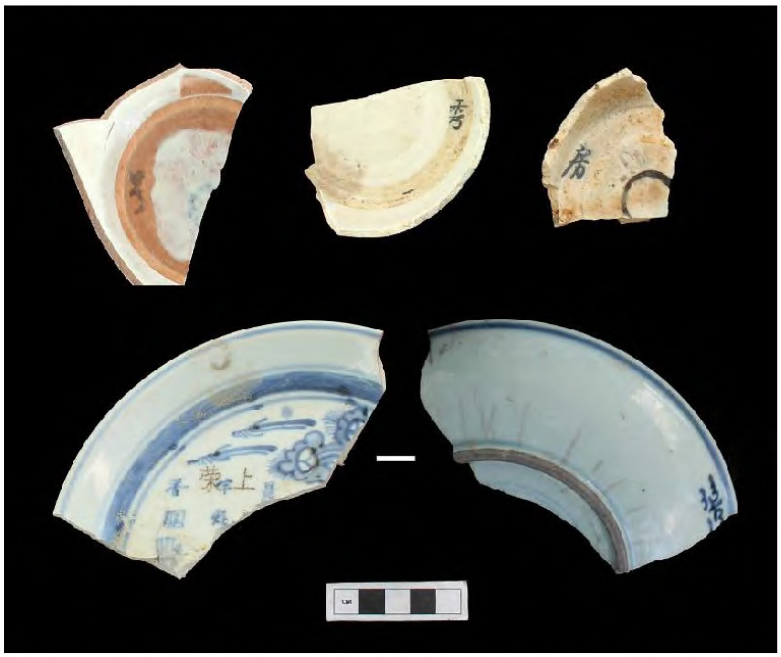

Plate 6 Ownership of dining wares; all base sherds from [co.207]; inscription read "号"，"秀"，"房" and "上榮".

Few of the porcelain wares have inscription which show ownership. It is often found on the base of bowls and dishes and consists of one or two inked or engraved Chinese characters (Plate 6). The characters have been applied on both glazed and unglazed surfaces. Literate villagers could do the ink signatures, yet chisel engraving required certain craftsmanship and would have been by hired hands (Yan 2017). The dining wares would have been brought to communal feasts or banquets and easily reclaimed with the marks (Yan 2017). It is an effective practice still in use in some parts of China and Asia.

Other ceramics include pillows which appear as rectangular box-shape with glaze and painted decoration applied on the exterior (Plate 7, a and b). These ceramic pillows, cool to the touch, were used during summer times (Liu 2017:109; Kong 2014:90; Zhao 2014:58). The inside of pillow is hollow, and the short sides have openings to let air out during kiln firing (Kong 2014:84) to avoid damage caused by air expansion. The space inside the pillow could be used for storage of valuables (Fu 2019:31).

Another ceramic is the spittoon (Plate 7, c) which could double up as night commode. According to the 1902 map and village elders, there was no toilet inside the village. Human waste was collected by chamber pots then dumped into wooden buckets placed at the end of the lane. Night soil collectors would come at night to carry away the waste. The under-glaze inscription on the spittoon "請勿唾痰在地" (Please do not spit on the ground), reflects an awareness of public hygiene.

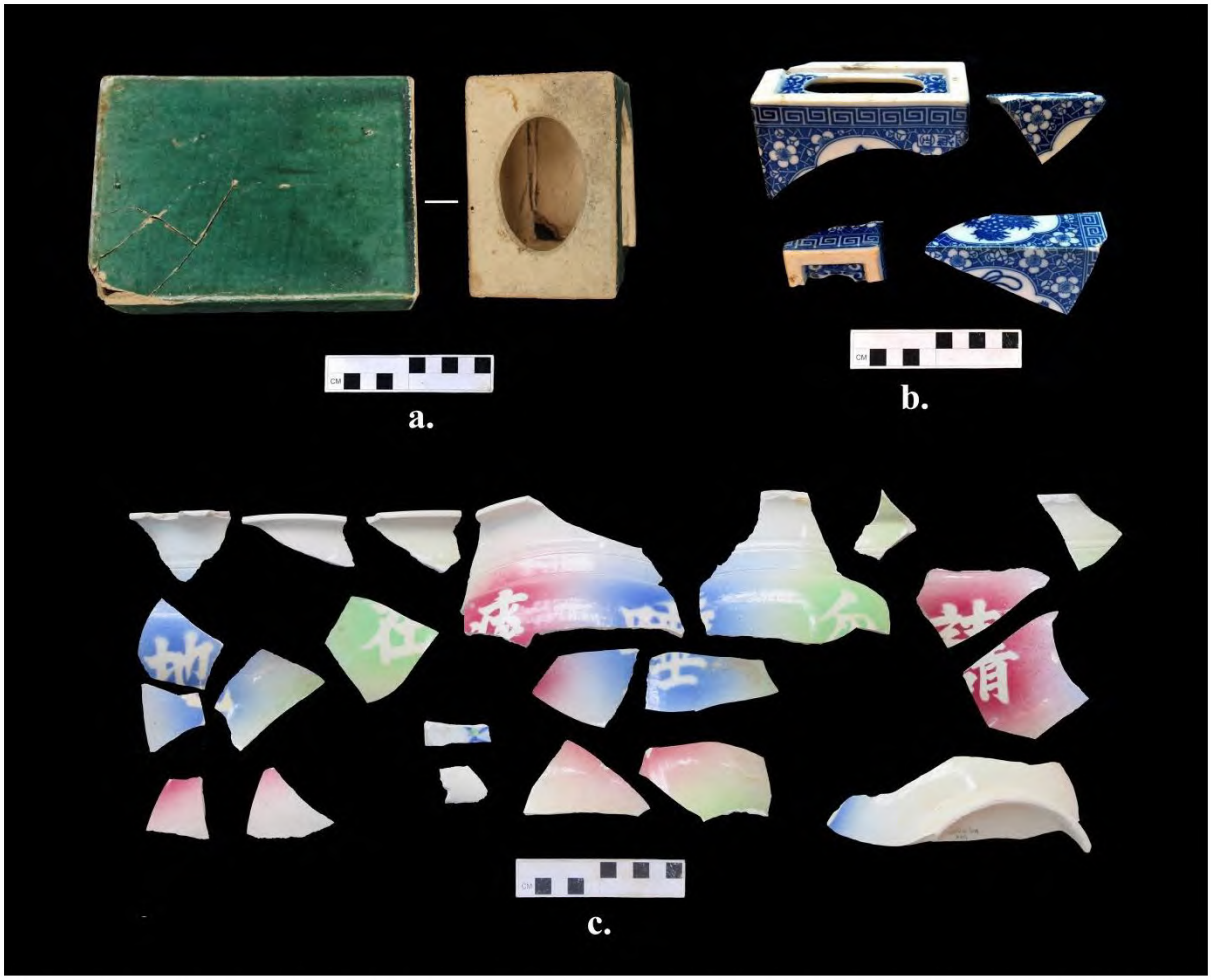

Plate 7 Wares related to sleeping found in Nga Tsin Wai. **a.** Green glazed pillow, [co. 9011], 19th -20th centuries, from Shiwan; **b.** B&W porcelain pillow sherds, [co.9105], 20th century; **c.** Polychrome spittoon, as also used as night urine pot, [co.9012], 20th century, inscription: "請勿唾痰在地" (Please do not expectorate on the ground).

Prior to the late 19th century, rice farming was the main activity of the village, later the proximity to the market at Kowloon encouraged market gardening of vegetables and rearing of livestock (Hase in LCM & Associates and Laurence Loh 2007:28). In the wet environment of the moat deposit, some broken pieces of ox yoke were excavated (Plate 8, a). An ox yoke is a bow-shaped or triangular arch wooden frame set on the shoulder of an ox. The illustration in a Ming dynasty book *Tiangong Kaiwu* written by Song Yingxing shows how it was used in farming (Plate 9).

Plate 8 Subsistence related artefacts found in Nga Tsin Wai. **a.** Possibly Ox yokes, [co.202/203]; **b.** Net weights, [co.1210]; **c.** Net weight, [co.5082].

Plate 9 Ox yoke used in farming shown *Tiangong Kaiwu* (*Exploitation of the works of nature*); cited after Luo and Si (2010:79).

Evidence for fishing, i.e. net weights, were also retrieved (Plate 8, b and c) from various contexts at Nga Tsin Wai. Two types of pottery net weights can be distinguished: bead-shaped with a central hole through the long axis, and oval or sub-rectangular block-shaped with two holes on the flat side. The more sophisticated ones have a groove linking the two holes (such as Plate 8, c), possibly designed for fitting a knot.

Not everyone one in the village would have been farmers however, scholar's table wares related to imperial exams *Keju* or general writing and painting such as inkstones, brush pen holders, pen racks and later developed industrially made ink bottles were unearthed (Plate 10).

A square *Duan* inkstone—produced in Zhaoqing of Guangdong, one of the four renown inkstone producing sites in China—was found in T9 with a possible incised surname at the back, suggesting personal ownership to the stationery (Plate 10, a). The inkstone is used to mix inkstick with water to produce liquid ink. A brush pen holder with designed blue underglaze Chinese inscription "三元及(第)" (Plate 10, c) points to a good wish for obtaining the highest titles in all three ascending levels of the *Keju* exams, namely in the Ming/Qing dynasties context, *jieyuan* in elementary, *huiyuan* in provincial, and *zhuangyuan* in metropolitan examinations. Similar wish to become a court official is also pictured on a Wun Yiu wine cup (Plate 5, c) with an inscription of "祿享千鍾", meaning (of a state bureaucracy) enjoying the

salary worth a thousand units of grains. A brush pen rack made in the shape of a symbolic mountain, with peaks pointing up (Plate 10, e) is an example of another type of scholar's tableware used to avoid the brush tip touching the table during writing or painting.

Plate 10 Scholar's tableware found in Nga Tsin Wai. **a.** Inkstone, [co.9129], Song dynasty to early 20th century, possible incised surname "林" at back; **b.** Ink bottle, [co.9012], 19th -20th centuries, with inscription "?義合造" ; **c.** B&W brush pen holder, [co.5028], 19th century, with inscription "三元及(第)"; **d.** B&W brush pen holder, [co.7039], 19th century; **e.** Pen rack, [co.203], 19th -20th centuries.

In Nga Tsin Wai, oil lamps, both stands and dished (Plate 11), and candle stands (Plate 11, a right and f) were found. The oil lamp stands are free-standing and in the form of stem-cups, some decorated with a floral-shaped rim (Plate 11, a, b, f), or two-tiered (Plate 11, e middle and right). They were also found to be hanging lamps with a flat back plate and hollow-out holes (Plate 11, e left).

The oil lamp dishes sometimes have a foot-ring (Plate 11, d) but are mostly without (Plate 11, c). The oil lamps are mainly manufactured in B&W porcelain, brown-glazed fine fabric and green glazed stoneware. While these were purposely manufactured as lamps, reuse of pottery kiln waste and broken bowl bases as lamps was noted (Plate 11, g and h).

Plate 11 Illuminating wares found in Nga Tsin Wai. **a.** Oil Lamp Stand, [co.1130], mid-late Qing dynasty, from Wun Yiu; **b.** Oil lamp stand, [co.203], Qing dynasty, from Wun Yiu; **c.** Oil lamp dish, [co.7048], mid-late Qing dynasty, from Fujian; **d.** Oil lamp dish, [co.1085], 19th -20th centuries; **e.** Lamp stand sherds, [co.203], Qing dynasty; **f.** Lamp stand fragments, [co.9012], 19th-20th centuries; **g.** Wun Yiu kiln waste, possibly used as oil lamp, [co.207], Qing dynasty; **h.** recycled bowl base, possibly used as oil lamp dish, [co.204], Qing dynasty to early 20th century.

Kundika, a pure water sprinkler associated with the worshipping of Kwun Yam was excavated from the moat (Plate 12, a left). Other religious associated wares include candle stands (usually appeared in pair on the altar table, Plate 12, a right and f), incense or joss stick holder (Plate 12, c), a wall-hung joss stick holder (Plate 12, d) and an incense burner stand. The latter is an individual pedestal designed for holding a tri-legged incense burner (Plate 12, e), which reflects the delicateness in serving the deities.

Plate 2 Altar wares found in Nga Tsin Wai. **a.** Left: Kundika (pure water sprinkler), Right: Candle Stand, both from [co.203], mid-late Qing dynasty, from Wun Yiu; **b.** Possible altar ware, [co.207], mid-late Qing dynasty, from Wun Yiu; **c.** Incense or joss sticks holder, [co.203], Qing dynasty; **d.** Incense sticks holder, [co.203], 19th - 20th centuries, from Shiwan; **e.** Stand for tri-legged incense burner, T3 East Moat, 19th -20th centuries; **f.** Candle stand, [co.207], mid-late Qing dynasty, Wun Yiu.

Porcelain pipe chambers, opium jars, and cigarette ashtray (Plate 13, d) were excavated at Nga Tsin Wai. The pipe chambers found, date to Qing dynasty and are both locally made (Plate 13, b) and imported (Plate 13, a). Opium jars are generally dated to the 19th - 20th century and were likely manufactured in Shiwan of Guangdong. Those recovered on site include plain tiny pots (Plate 13, c, right three) and slightly larger ones with brand names inscribed at the base (Plate 13, c, left one and f). The firm titles shown on opium jars found include "義生隆", "章記", "源記", "朱義利", "吳錦興" and others. Opium was smoked for leisure and used to control pain (Atha and Yip 2016:151-2). A villager remembered seeing his grandfather smoking opium while he was a kid. Smoking cigarettes was likely an early 20th century habit and an ashtray produced in Jingdezhen of Jiangxi was found on site (Plate 13, d). The ashtray is made of white porcelain and consists of a tray, a cigarette rack and matches dispenser.

Other leisure items include, rounded tile fragments to form gaming discs (Plate 13, e and g), and a mahjong tile of the 20th century (Plate 13, h). One of the tile fragments reused as gaming

discs has incised Chinese character "相"on both sides (Plate 13, e); it is possible that the disc was used as a chess in a Chinese chess board game called *Xiangqi*.

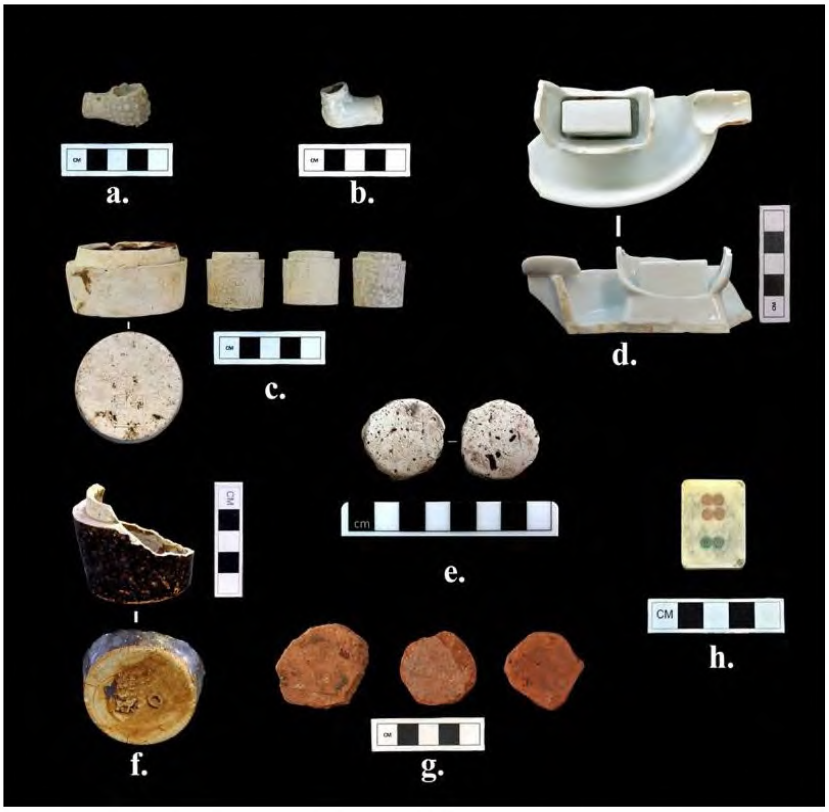

Plate 13 Artefacts related to leisure found in Nga Tsin Wai. **a.** Pipe chamber, [co.5029], mid-late Qing dynasty; **b.** Pipe chamber, [co.7042], Qing dynasty, from Wun Yiu; **c.** Opium jars, [co.7059], 19th - 20th centuries, Chinese inscription at base "朱義利造"; **d.** White glazed ashtray, [co.7085], 20th century, from Jingdezhen of Jiangxi; **e.** possibly Chinese chess made of tile, [co.205], with unfinished Chinese character "相" on both sides; **f.** Opium jar, [co.202] of 2016 AIA stage, 19th -20th centuries, Chinese inscription at base "進 源"; **g.** gaming discs recycled from tile, [co.202]; **h.** Plastic mahjong tile, [co.9S02], 20th century.

Few artefacts of value were recovered in Nga Tsin Wai; they include jadeite ring pendant and bracelets (Plate 14). Jadeite is a semi-gemstone that has been popular in China since Qing dynasty (Qiu *et al* 2007:46; Liu and Capon 2007:17) and yet it is easy to break due to its crystal-link structure. Despite the fragile nature and market value, the jewellery was worn by children (and adults). Wearing jade (nephrite and jadeite included) bracelet has long been thought a way to ward off evil spirits and prevent untimely death by the Chinese (Wong and Chen 2004:53).

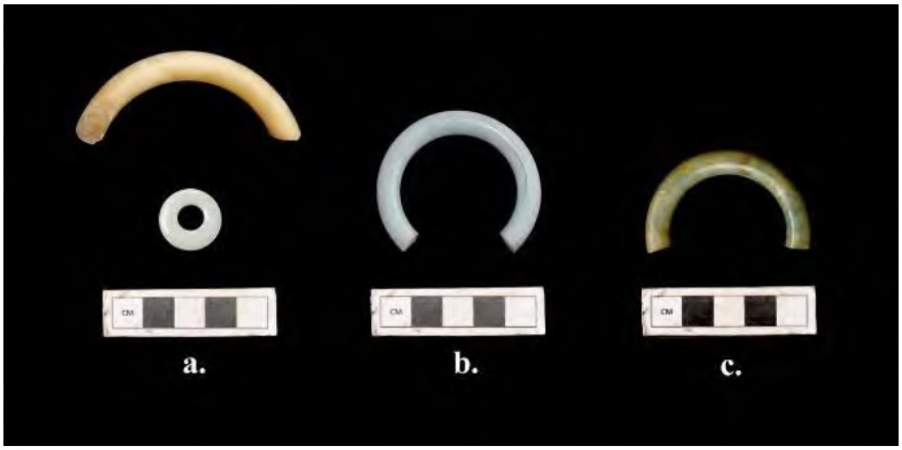

Plate 14 Body ornaments found in Nga Tsin Wai. **a.** Stone bracelet and jadeite pendant ring, [co.7039]; **b.** Jadeite bracelet, possibly for children, [co.204A]; Jadeite bracelet, possibly for children, [co.9151], all dated Qing dynasty to 20th century.

A number of coins were also excavated ranging from the Ming dynasty to modern days. The oldest coin is a Japanese copper coin with inscription "寬永通寶" (Kan'ei Tsūhō, Plate 15, a). It resembles a Chinese coin, with a round outline and square hole at the centre. This type of coin first came into existence in 1625-1626, during the reign of the Japanese Emperor Go-Yōzei and continued to be cast for the next 240 years (Fu 1991:51; Wei 2018:105). In around the Late Ming to Early Qing period, the coins were introduced into China by marine merchants and were often used in southern Chinese markets in the first century of the Qing (Fu 1991:52). The coin found in Nga Tsin Wai reflects the extent of trading network of the time.

Plate 15 Coins found in Nga Tsin Wai. **a.** "寬永通寶" (Kan'ei Tsūhō) coin, [co.3073]; **b.** "乾隆通寶" (Qianlong Tongbao) coin, [co.3008]; **c.** "道光通寶" (Daoguang Tongbao) coin, [co.3073]; **d.** "光緒元寶" (Guangxu Yuanbao) coin, [co.3076]; **e.** "乾隆通寶" (Qianlong Tongbao) coin, [co.7076].

Coins dating to the Qing dynasty found on site include "乾隆通寶" (Qianlong Tongbao), "道光通寶" (Daoguang Tongbao) and "光緒元寶" (Guangxu Yuanbao) (Plate 15, b-d). The former two were made of copper and cast during the Qianlong Reign (1736-1795) and Daoguang Reign (1820 to 50) respectively. The Qianlong and Daoguang Tongbao coins have four Chinese characters on the front and two Manchu characters at the back, indicating the title of the Mint (Zhou 2011:71). In comparison, the Guangxu Yuanbao is a small solid silver coin and reflects a more western influence. This type of coin was first cast in 1897 (Lu and Zhou 2013:3). Both Chinese and English characters are presented. 20th century coins recovered at

Nga Tsin Wai, include a 1904 Hong Kong Five Cent, a Hong Kong Fifty Cent made during 1951 to 1971 and Hong Kong One Dollar coins made in 1960 and 1998.

In late 19th to early 20th century contexts glass containers appear. Glass medicines bottles, and containers for medicinal or cosmetic products were recovered (Plate 16) from moat and inside the village. Some medicine bottles bear Chinese characters such as "江逢治痧藥水" and "癬治水". The names refer to medicinal purpose, for instance "痧" refers to cholera and heatstroke, and "癬" refers to ringworm. Western food products such as Bovril, Valentine's Meat Juice (a tonic reportedly favoured by England's King George V) and Maclaren's Imperial Cheese (dated 1890s to the early 1900) (Plate 16, a right, b, c) and branded skin moisturizer including Harriet Hubbard Ayer made overseas were imported and enjoyed by the villagers.

Plate 3 Glass bottles found in Nga Tsin Wai. **a.** Left two: glass medicine bottles, 19th -20th centuries, Right: food container, "BOVRIL LIMITED", early 20th century, from UK, [co.5028]; **b.** Glass bottle, [co.7059], 1890s to 1957, from USA, with English inscription "VALENTINE'S MEAT JUICE"; **c.** Glass container, [co.207], 1890s to 1900s, from Canada, with English inscription "MACLAREN'S IMPERIAL CHEESE"; **d.** Glass bottle fragments, possibly for cosmetic use, [co.9012], 20th century.

The majority of artefacts retrieved from the site dated to the late historic period, although some prehistoric stone tools were found in historic layers. These finds include utilized stones such as pointed pebble, hammer, waisted net weight, pounder, and a fragment of polished stone adze (Plate 17). While these finds were excavated from later context, they hint at a Neolithic and Bronze Age presence in Kowloon Bay.

Plate 4 Prehistoric stone tools found in Nga Tsin Wai. **a.** Pointed stone tool, [co.1227]; **b.** Stone hammer, [co.5083]; **c.** Waisted stone net weight, [co.5095]; **d.** Possibly stone pounder, [co.5075]; **e.** Stone adze, [co.5049].

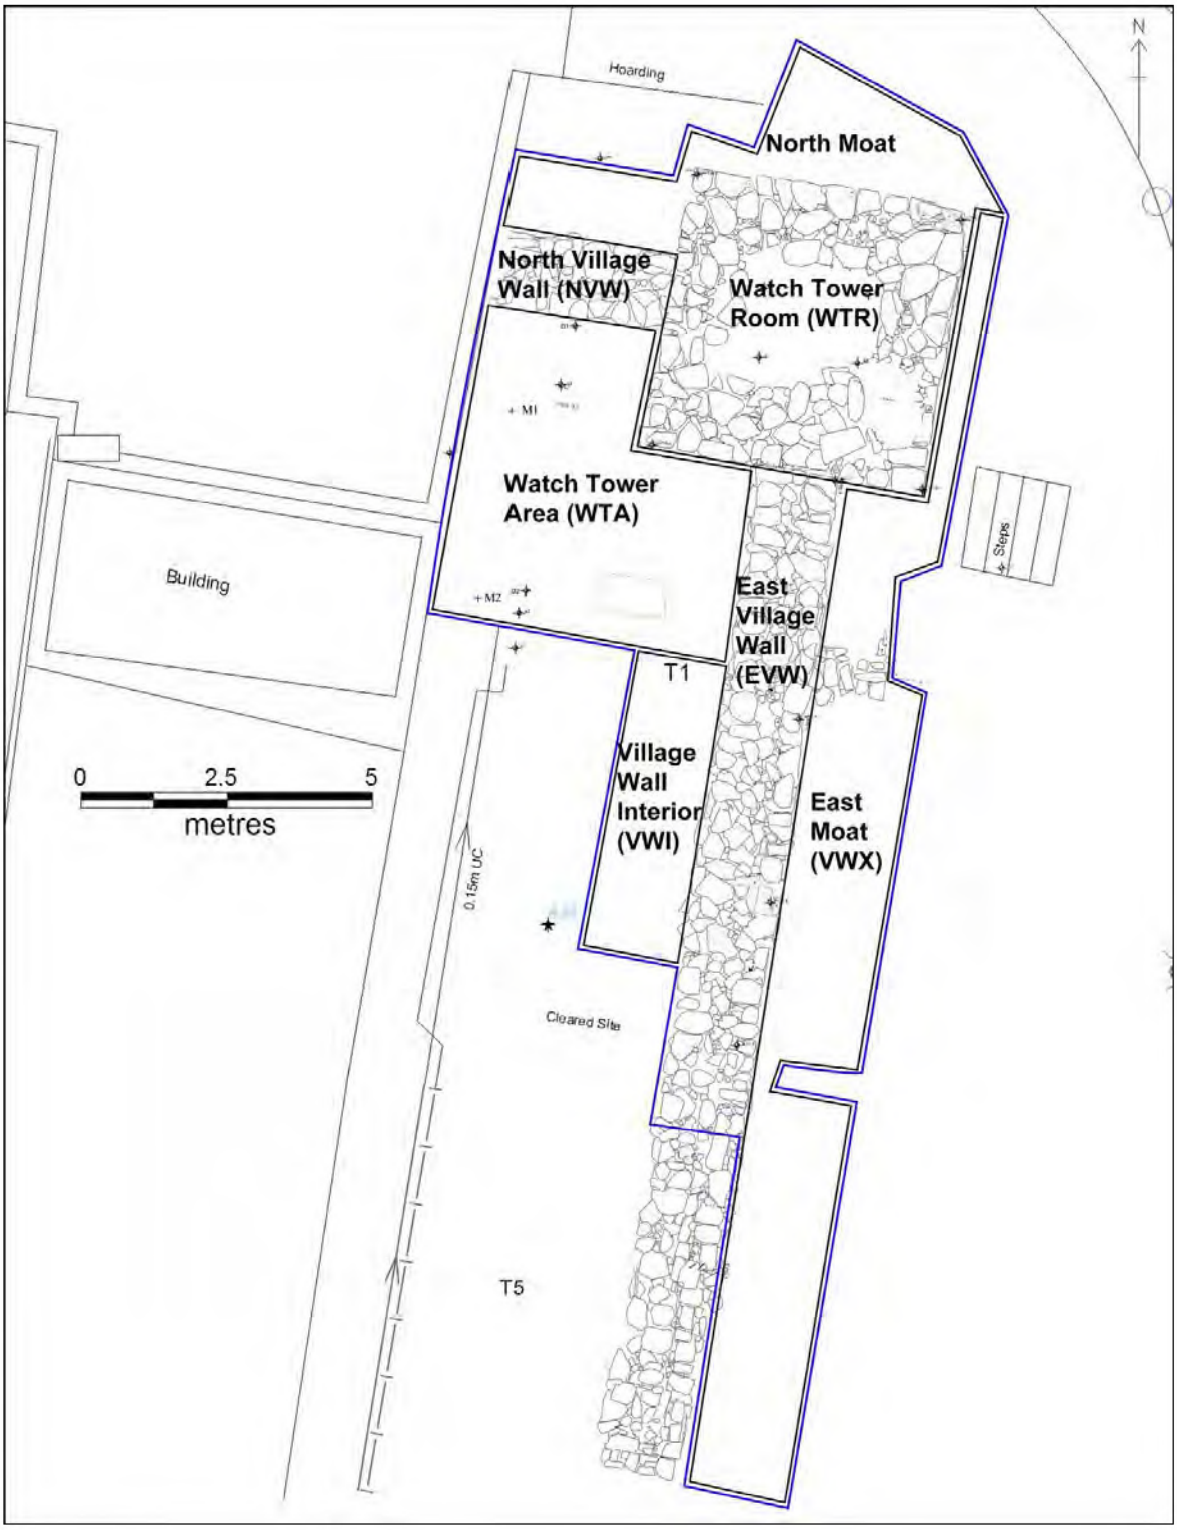
Annex C

Annex C Trench data

Trench 1 data

T1.A Context descriptions



1001: Loose topsoil covering watch tower room (hereafter referred as WTR) and village wall exterior areas, which consisted of dark brown (10YR 3/3) sandy, gravelly silt. It included frequent concrete rubbles, tile and brick fragments.

1002: Firm debris layer consisted of reddish yellow (7.5YR 6/8) gravelly sandy silt over the top of WTR and the north moat. Frequent constructional debris including grey bricks, small tile fragments, concrete, mortar, widow glass, floor tiles were included.

1003: Loose fill of a dog burial under topsoil [1001] and above [1004]. The fill consisted of loose dark yellowish brown (10YR 3/4) sandy silt. Skeleton remains of a canine were found partially wrapped in cloth.

1004: Pit cut for dog burial containing fill [1003] located on top of the WTR north wall. Irregularly dug pit with gradual sides tapering to a pointed base. It truncated debris layer [1002].

1005/1033: Firm fill consisted of dark yellowish brown (10YR 3/6) sandy silt located in watch tower area (hereafter referred as WTA) house below concrete floor [1019]. It contained frequent rubbles, mortar and plastic and a few tile and shell fragments. Same as [1033].

1006: Modern fill layer in north moat included pipe trench, iron pipes, mortar pavement, stone alignments, levelling fills. The levelling fills consisted of sand in various soil colours including dark olive brown (2.5Y 3/3), dark brown (10YR 3/3) and light yellowish brown (10YR 6/4).

1007/1008/1009/1010: Modern house walls ([1007]: western, [1008]: southern and [1009]: northern walls) and threshold [1010] in WTA house. The walls consisted of two rows of cut granite stones and in between filled with mortar. [1008] has reused stone block with square notches and concrete element at east end. The threshold [1010] was made of red bricks and located at the north end of the western wall.

1011/1012/1013/1018: Modern floor and leveller located in WTA lane area. It consisted of a red brick east west alignment in between two concrete floor surfaces and a loose very dark brown (10YR 2/2) sandy levelling fill underneath. The fill contained frequent red and grey tile fragments and occasional potsherds.

1014/1019: Concrete floor levels in WTA house.

1015: House wall foundation made of cut granite and concrete, located in village wall interior (hereafter referred as VWI), west-east aligned.

1016: House wall foundation made of red brick and cut granite, located in VWI, west-east aligned.

1017: Concrete floor in VWI.

1020: Cancelled.

1021: Fill and raised concrete platform east of limit of excavation (L.O.E.); the fill consisted of >50% tiles, construction debris, concrete floor and hollow space.

1022: Cancelled.

1023/1030: Modern stone foundation [1030] and leveller [1023] located in WTA lane area. The stone foundation consisted of cut granite blocks, concrete and bricks. The leveller consisted of loose, black (10YR 2/2) to very dark brown (10 YR 2/2) sandy silt and contained frequent tile.

1024/1130: Fill in east moat consisted of loose yellowish brown (10YR 5/8) silty sand, which contain glass fragments and a few tiles.

1025: context numbers not used.

1026: context numbers not used.

1027: context numbers not used.

1028: Cancelled.

1029: Cancelled.

1030: grouped with [1023].

1031: Cancelled.

1032: Context number not used.

1033: Same as [1005].

1034: Compact floor level in WTA house.

1035: Possible modern pit fill in east moat, consisted of loose, dark brown (10YR 3/3) sand.

1036/1038: Weakly cemented fill in north moat, consisted of coarse sand in greyish brown (2.5YR 5/2) and light yellowish brown (2.5Y 6/4).

1037/1047: Compact to weakly cemented fill in east moat, consisted of brownish yellow (10YR 6/8) coarse sand, which contained frequent bricks, concrete and tile fragments.

1039: Weakly cemented fill in north moat, consisted of light olive brown (2.5Y 5/6) coarse sand, included frequent tile and brick fragments.

1040/1042/1045/1085: Brownish / reddish moat fill in both north and east moat. It consisted of clayey sand and clayey gravel in various brownish tone, including yellowish brown (10YR 5/6), red (2.5YR 4/8) and brown (10YR 4/3). It included tile and brick fragments, stone blocks, glass, and mortar.

1041A: Fill for modern house foundation trench [1041B], located in north moat, just caught on south facing section of north moat. The fill consisted of loose yellowish brown (10YR 5/4) sand and include moderate tile fragments. 1041B: Cut for [1041A].

1042: Same as [1040/1045/1085].

1043: Loose fill in north moat consisted of angular gravels (>70%) and sand respectively in light olive grey (5Y 6/2) and yellowish brown (10YR5/8). It included cut stone blocks and red brick.

1044/1077: Loose fill in north moat. It consisted of light grey (5Y7/1) coarse sand and included frequent tile fragments, moderate stone, and occasional glass.

1045: Same as [1040/1042/1085].

1046: Compact leveller in VWI below concrete. The soil consisted of yellowish grey (2.5YR 5/1) sandy very slightly clayey gravel.

1047: Same as [1037].

1048: Hard, compact floor in VWI. The soil consisted of strong brown (7.5YR 5/6) slightly gravelly clay.

1049: Hard fill in VWI south of [1250], consisted of mottled strong brown (7.5YR 4/6) gravelly clay.

1050: Fill in south side of VWI, consisted of dark brown (10YR 3/3) sandy, gravely clay.

1051: Hard floor and levelling fill in north side of VWI, interrupted by 1016. The floor consisted of dark yellowish brown (10YR 4/4) clayey slightly sandy gravel. The leveller consisted of yellowish red (5YR 5/6) very slightly gravelly clay with mortar.

1052: Fill in VWI consisted of strong brown (7.5YR 5/8) gravelly clay.

1053/1056: Modern house disturbance in north half of VWI. The fill consisted of brown (10YR 4/3) very sandy and very slightly silty clay.

1054A: Fill of pipe trench in north end of VWI. The fill consisted of loose yellowish brown (10YR 5/6) very sandy, slightly silty gravel. 1054B: cut for [1054A].

1055: Fill in the middle part of VWI, consisted of strong brown (7.5YR 5/8) clayey gravel.

1056: Same as [1053].

1057/1058/1060: Soft alluvium in VWI, consisted of yellowish brown (10YR 5/6) to dark yellowish brown (10YR 4/4) clayey sand / gravel.

1059: Cancelled.

1060: Same as [1057/1058].

1061/1062/1063/1064/1065: Modern house remains including cut granite house walls, concrete threshold and brick wall, located on surface level of east moat area.

1066: Stone pavement below concrete in east moat, consisted of several flat stones, largely disturbed.

1067: Western stone wall remains consisted of small sub-angular stones and a shaped stone threshold in WTA house directly below [100]7. At same level with northern house wall [1104].

1068: Same as [1001].

1069: context number not used.

1070 to 1072: context numbers not used.

1073/1079: Compact sterile deposit in VWI, consisted of strong brown (7.5YR 5/6) sandy, very slightly gravely clay.

1074: Compact hard deposit in VWI, consisted of strong brown (7.5YR 5/6) sandy, very slightly gravely clay.

1075: Compact but friable fill on top of east village wall, consisted of brownish yellow (10YR 6/6) silty clayey sand.

1076A: Loose fill of pipe trench 1076B to the immediate south of brick wall 1065 at top level of east moat. It consisted of dark brown (10YR 3/3) clayey silt. 1076B: Cut for [1076A].

1077: Same as [1044], identified in east moat.

1078: Fill in VWI consisted of yellowish brown (10YR 5/6) gravely and sandy clay.

1079: Same as [1073].

1080: Very soft fill in north moat, consisted of light yellowish brown (2.5Y 6/4) clay.

1081: Very soft fill in north moat, consisted of black (2.5Y 2.5/1) clay.

1082/1083/1084: Mortar and concrete lane floor level with accompanied drainage. Below the floor level still produced plastic.

1085: Same as [1040/1042/1045].

1086/1089/1089B&C: Loose fill of stone drain [co.1090] in WTA lane, which consisted of very dark greyish brown (10YR 3/2) to black (10YR 2/1) clayey, slightly gravelly or sandy silt.

1087: Cancelled.

1088: Very dark grey (2.5Y 3/1) loose silty sand fill for cut [1197B], located below stone drain [co.1090], same as [1197A].

1089: Same as [1086].

1090: N-S aligned stone drain comprised of two rows of irregular stone blocks. The southern part appeared dislocated while the northern part more intact. The north portion was made of three layers of carefully laid stone blocks which was supported by small rocks from outside and covered by large flat

stones [co.1187]. The drain was built into the northern village wall. Plastic objects were noticed in the gap during the removal of the stones.

1091: Cancelled.

1092: Cancelled.

1093: Loose fill inside WTR which consisted of dark yellowish brown (10YR 3/6) sandy silt. It contained frequent fragments of tile, brick, glass, and some modern mosaic tile and plastic sheet.

1094/1008 Lower: Stone wall foundation consisted of large angular boulders which form the lowest phase of western and southern walls of WTA house. Strategically, the western wall [1094] is located below its upper phase wall [1067] whilst the southern wall [1008 Lower] is located right beneath the latest phase [1008]. One of the stones in [1094] was with a groove, possibly reused material. Two vertical stone blocks were erected at the northwest and southwest corners of the house.

1094B/1008C: Thin loose fill consisted of olive brown clayey sand below [1094] and [1008 Lower].

1095: Firm fill inside WTR below [1093], which consisted of dark yellowish brown (10YR 4/4) and yellowish brown (10YR 5/8) silty sand. It contained frequent fragments tile, moderate glass, occasional modern mosaic tile and plastic.

1096: Firm fill / alluvial deposit inside WTR below [1095], which consisted of grey (2.5Y 6/1) slightly silty sand.

1097: Loose fill inside WTR below [1001], along the inside of the northern and eastern wall, truncated 1002. The fill consisted of very dark greyish brown (2.5Y 3/2) silty sand.

1098: Cancelled.

1099: Cancelled.

1100: Cancelled.

1101/1106: Levelling fill in WTA house area, consisted of yellowish brown (10YR 5/8) to dark yellowish brown (10YR 4/4) sandy silt. The fill contained frequent tile fragments, moderate bricks and occasional mortar.

1102: Loose fill of cut [1103] identified under stone threshold [1067]. It consisted of very dark grey (10YR 3/1) very slightly clayey silt.

1103: Cut for [1102], possibly related to mounting of stone threshold [1067].

1104: Norther house wall made of two rows of stone in WTA house area, joining southern WTR wall, below 1009. Possible contemporary with western house wall and threshold [1067].

1104B: Compact soil band along the inside of [1067] and [1104], consisted of dark yellowish brown (10YR 6/4) silty sand.

1105: Compact fill inside WTR, truncated by cuts of ditch-like features [1108], [1110], [1123B], [1124B],]1228B] and posthole cuts [1117B] and]1121B]. The fill consisted of strong brown (7.5YR 5/8) clayed, slightly sandy silt; mottled towards the eastern side.

1106: Same as [1101].

1107: Firm fill inside WTR below [1096], appeared to be linear in shape, ditch-like, north-south aligning, contained by cut [1108]. The fill consisted of grey (2.5Y 5/1) silty clayey sand.

1108: Cut for ditch-like feature inside WTR, contained [1107], cut into [1105]. north-south aligning linear, full width 30cm, depth around 8-9cm, with a gradual and concave cross-section, roughly parallel to [1110].

1109: Firm fill inside WTR below [1096], appeared to be in linear shape, ditch-like, north-south aligning, contained by cut [1110]. The fill consisted of grey (2.5Y 5/1) silty, slightly clayed sand.

1110: Cut for ditch-like feature inside WTR, contained [1109], cut into [1105]. north-south aligning linear, full width 36cm, depth around 10cm, with a gradual and concave cross-section, roughly parallel to [1108].

1111: Very loose fill contained inside [1112] at the northwest corner of WTA house, consisted of brown (7.5YR 4/4) sandy silt.

1112: Possibly part of a hearth feature identified at the northwest corner of WTA house. It has a rectangular shallow pit with grooved sides and a lime-lined base and associated with a baked light bluish grey (GLEY 2) soil spread extending towards the southeast side.

1113: Weakly cemented floor level and layer in WTA house, below or truncated by [1125B], [1127B], [1112], [1152] and [1155]. The layer consisted of yellowish brown (10YR 5/8) silty sand.

1114: Loose fill in VWI, contained by cut [1118B], consisted of dark yellowish brown (10YR 4/6) clayed, sandy gravel.

1115: Loose fil in VWI, contained by cut [1118B], consisted of yellowish brown (10YR 5/6) clayey sand.

1116: A thin layer of cement or mortar floor covering the entire WTA house.

1117A: Posthole fill for [1117B], located within WTR; it was identified at the level of [1119], but top opening was possibly on level of [1105]. The fill consisted of mixed grey (10YR 5/1) and dark yellowish brown (10YR 4/6) silty sand.

1117B: Posthole cut for [1117A], located inside WTR, possibly cut [1105].

1118: Loose fill in VWI, contained by cut [1118B], consisted of brown (10YR 5/3) very clayey, slightly gravelly sand.

1119: Sterile within WTR below [1105]. It consisted of soft, yellowish brown (10YR 5/8) with patches of light yellowish brown (10YR 6/4) clayed sand.

1120: Very loose sand deposit in light yellowish brown (2.5Y 6/3), identified along inner edge of the watch tower eastern wall and northern wall, below [1097].

1121A: Inner and outer fills for posthole cut [1121B] located within WTR. The inner fill consisted of compact brown (7.5YR 4/4) silty sand. The outer fill consisted of soft, mix-coloured sandy silt in grey (2.5Y 6/1) mixed with dark yellowish grey (10YR 4/6). [1121B]: Posthole cut for [1121A].

1122A: Posthole fill for [1122B], located within WTR. It consisted of compact dark yellowish brown (10YR 4/6) silty sand. [1122B]: Posthole cut for [1122A].

1123A: Possible ditch fill for [1123B], located on west side outside of sondage inside WTR. it consisted of loose, light brownish grey (2.5Y 6/2) sand. Not excavated. [1123B]: Cut for [1123A].

1124A: Posthole fill for [1124B], SW side truncated by [1134B], located within WTR. it consisted of soft, mix-coloured silty sand in yellowish brown (10YR 5/8) mixed with grey (2.5Y 5/1). [1124B]: Posthole cut for [1124A].

1125A: Firm fill of a possible posthole cut [1125B] at the northwest side of WTA house, close to western house wall [1067]. It consisted of dark yellowish brown (10YR 3/6) silty sand. The west side truncated by [1104B]. [1125B]: Cut for possible posthole fill [1125A], semi-circular in plan.

1126A: Loose fill of pit [1126B] in WTA house, bordering the juncture of WTR southern wall and 1104. Possible associated with [1112]. The fill consisted of dark yellowish brown (10YR 3/6) sandy silt. [1126B]: Cut for pit fill [1126A], semi-circular in plan.

1127A: Loose fill of pit [1127B] in WTA house, south of [1126A/B]. It consisted of dark yellowish brown (10YR 3/6) sandy silt. [1127B]: Cut for pit fill [1127A], sub-rectangular in plan.

1128: A thin and loose fill spread containing charcoal fragments located south of [1112] in WTA house. It consisted of dark yellowish brown (10YR 4/6) sandy silt.

1129: cancelled.

1130: Same as [1024].

1131A: Loose fill of pit cut [1131B] in east moat, consisted of dark yellowish brown (10YR 4/6) sandy silt. [1131B]: Pit cut for [1131A].

1132A: Posthole fill for [1132B], located within WTR. It consisted of soft, mix-coloured silty sand in yellowish brown (10YR 5/8) mixed with grey (2.5Y 6/1). [1132B]: Posthole cut for [1132A].

1133A: Posthole fill for [1133B], located within WTR. It consisted of soft, mix-coloured silty sand in yellowish brown (10YR 5/6) mixed with light brownish grey (2.5Y 6/2). [1133B]: Posthole cut for [1133A].

1134A: Posthole fill for [1134B], located within WTR. It consisted of soft, mix-coloured silty sand in grey (2.5Y 5/1) mixed with brownish yellow (10YR 6/8). [1134B]: Posthole cut for [1134A].

1135A/B: Cancelled.

1136: Thick concrete platform supported by wooden post [1137] in east moat.

1137: Twenty-seven wooden posts , "L" shape in plan in east moat, supporting [1136] concrete.

1138, 1140 to 1148: context numbers not used.

1139: Moat fill inside sondage in east moat. Described as part of 2016 AIA report.

1142 to 1148: context numbers not used.

1149A: Stake hole fill for [1149B], located within WTR. It consisted of soft, light greyish brown silty sand. [1149B]: Stake hole cut for [1149A].

1150: context number not used.

1151A: Loose fill of pot pit [1151B] located at the northeast corner of WTA house. The fill consisted of olive brown (2.5Y 4/4) silty sand. Modern glass fragments were found under the pot [1185]. [1151B]: Pit cut containing fill [1151A].

1152: Loose grey (5Y 5/1) silty sand patch located at the northwest corner of WTA house, truncated by [1151B]. It included a modern mosaic tile.

1153A/B: cancelled.

1154: A loose soil patch located at the northwest corner of WTA house, on the SW side of pot pit [1151B]. It consisted of olive brown (2.5Y 4/3) clayey sand.

1155: Thin soil patch located at the northwest corner of WTA house, on the west side of pot pit [1151B], truncated by [1154]. It consisted of yellowish brown (10YR 5/6) clayey sand and included some charcoal fragments.

1156: North-south lying brick alignment in WTA lane. The bricks are mostly red but with occasional grey ones; distributed along west limit of excavation, some clusters seem dislocated.

1156B: Soil underneath [1156] bricks, consisted of loose, very dark grey (2.5Y 3/1) sandy silt.

1157A/1167A/1177A: Hard floor surface joined by fill layers [1157], [1167] and [1177]. The surface was cut by post hole and stake holes [1158B], [1159B], [1160B], [1161B], [1162B], [1163B], [1164B], [1165B], [1166B], [1170B], [1171B], [1174B], [1199B], [1200B], [1201B], [1204B], [1205B], [1242-H1 to 40], and pit cut [1174B].

1157: Compact fill layer comprised of light olive brown (2.5Y 5/6) slightly silty sand.

1158A: Posthole fill for [1158B] located within WTA house. It consisted of soft to friable grey (10YR 5/1) clayed sand. [1158B]: Posthole cut for [1158A].

1159A: Fill of posthole cut [1159B] located within WTA house. It consisted of loose silty sand in very dark grey (2.5Y 4/1). [1159B]: Posthole cut for [1159A].

1160A: 1st 2cm fill of posthole cut [1160B] located within WTA house. It consisted of mix-coloured silty sand in greyish brown (2.5Y 5/2) and yellowish brown (10YR 5/6). [1160C]: 2nd fill of posthole cut [1160B] (2 to 4cm from top), consisted of hard, dark yellowish brown possibly baked / hardened silty sand. [1160D]: 3rd fill of posthole cut [1160B] (below 4cm), consisted of mix-coloured friable silt in dark yellowish brown (10YR 3/6) and black (10YR 2/1). [1160B]: Posthole cut for [1160A/C/D].

1160C: 2nd fill of posthole cut [1160B] (2 to 4cm from top) located within WTA house. It consisted of hard, dark yellowish brown possibly baked / hardened silty sand.

1160D: 3rd fill of posthole cut [1160B] (below 4cm) located within WTA house. It consisted of mix-coloured friable silt in dark yellowish brown (10YR 3/6) and black (10YR 2/1)

1161A: Fill of posthole cut [1161B] located within WTA house. It consisted of loose dark yellowish brown (2.5Y 4/2) silty sand. [1161B]: Posthole cut for fill [1161A].

1162A: Fill of posthole cut [1162B] located within WTA house. It consisted of loose dark yellowish brown (10YR 4/3) silty sand. [1162B]: Posthole cut for fill [1162A].

1163A: Loose fill of posthole cut [1163B] located in WTA lane, below [1156B]. It consisted of very dark grey (2.5Y 3/1) and light olive brown (2.5Y 5/4) slightly clayey sand. [1163B]: Posthole cut for [1163A], located in WTA lane, cut into [1157A/1167A/1177A].

1164A: Very loose fill of posthole cut [1164B] located in WTA lane below [1156B], consisted of dark grey (2.5Y 4/1) slightly silty sand. [1164B]: Posthole cut for 1164A, cut into [1157A/1167A/1177A].

1165A: Loose fill of posthole cut [1165B] located in WTA lane below [1156B]. It consisted of dark grey (2.5Y 4/1) and light olive brown (2.5Y 5/4) clayed sand. [1165B]: Posthole cut for [1165A], cut into [1157A/1167A/1177A].

1166A: Loose fill of possible stake hole cut [1166B] located in WTA lane below [1156B], consisted of very dark grey (2.5Y 3/1) silty sand. [1166B]: Cut for possible stake hole fill [1166A], located in WTA lane, cut into [1157A/1167A/1177A].

1167: Compact to friable layer covering WTA house and west side of area outside house in the north. It consisted of yellowish brown (10YR 5/6) with occasional patches of dark greyish brown (2.5Y 4/2) silty sand.

1168: cancelled.

1169: cancelled.

1170A: Loose fill of possible stake hole cut [1170B] located in WTA lane, consisted of grey (2.5Y 5/1) mixed with yellowish brown (10YR 5/8) clayey, silty sand. [1170B]: Cut for possible stake hole fill [1170A].

1171A: Loose fill of posthole cut 1171B located in WTA lane below [1156B], consisted of dark grey (2.5Y 4/1) clayey sand, below [1156B]. [1171B]: Posthole cut for [1171A], cut into [1157A/1167A/1177A], cut into [1157A/1167A/1177A].

1172A: Loose fill of posthole cut [1172B] located in WTA lane below [1156B], consisted of dark grey (2.5Y 4/1) clayey sand, below [1156B]. 1172B: Cut for posthole [1172A], cut into [1157A/1167A/1177A].

1173A: Loose fill of posthole cut [1173B] located in WTA lane below 1156B, consisted of very dark grey (2.5Y 3/1) silty sand, below [1156B]. [1173B]: Posthole cut for [1173A], cut into [1157A/1167A/1177A].

1174A: First fill of possible pit cut [1174B] located at the northwest corner of WTA house, identified below cement / mortar floor [1116]. The fill consisted of loose yellowish brown (10YR 5/6) silty sand. [1174B]: Pit cut containing fills [1174A [1216/1222].

1175: Loose fill in WTA lane consisted of sand in greyish brown (2.5Y 5/2) with lens of black (2.5/1).

1176A: Very loose fill of stake hole cut [1176B] located in WTA lane below [1175]. It consisted of dark greyish brown (2.5Y 4/2) sand. [1176B]: Stake hole cut for [1176A], cut into [1177].

1177: Compact layer covering WTA lane area which comprised of silty sand in brownish yellow (10YR 6/6).

1178A: Loose fill of posthole cut [1178B] located in WTA lane, below [1157]. It consisted of very dark grey (2.5Y 3/1) silty sand. [1178B]: Posthole cut for [1178A], cut into [1177].

1179: Loose fill layer covering eastern half of WTA house. It consisted of greyish brown (10YR 5/2) silty sand with patches of dark yellowish brown (10YR 4/4).

1180A: First fill of possible posthole cut [1180B] located near southwest corner of WTR within WTA house. It consisted of very loose yellowish brown (10YR 5/4) sand. [1180C]: 2nd fill of possible posthole cut [1180B], consisted of friable red (2.5YR 5/8) sandy silt, possibly a baked /hardened crust. [1180B]: Cut for possible posthole fills [1180A/ C].

1181A: Loose fill of a southeast-northwest trending ditch-liked feature located at the northeast side of WTA house. It consisted of grey (5Y 5/1) sand. [1181B]: Cut for the fill [1181A].

1182: Ditch fill of the lower southeast-northwest trending ditch cut [1234], identified at the south-centre of WTA house. It consisted of greyish brown (2.5Y 5/2) silty sand.

1183A: Second fill of possible pit cut [1183B] located at northeast corner of WTA house. It consisted of very loose strong brown (7.5YR 5/8) silty sand. [1183B]: Possible pit cut containing fills [1194] and [1183A] at NE corner of WTA house.

1184/1211/1215/1217: Soft to firm fill layer covering the central and eastern part of WTA house, northwest-southeast trending It consisted of yellowish brown (10YR 5/4) clayed silt.

1185: The large pot buried at north west corner of WTA house.

1185A: Very loose fill inside pot [1185], which consisted of light brownish grey (2.5Y 6/2) very coarse sand. It contained modern glass and mosaic tile.

1186: Stone pavement in north end of WTA lane.

1187: Large flat stones covering stone drain [1090] in the north end of WTA lane.

1188: Loose levelling fill below stone pavement [1186] at the north end of WTA lane, consisted of very dark brown (10YR 2/2) sandy silt.

1189: cancelled.

1190: Stone pavement below [1192] at the north end of WTA lane, west of WTR. It was comprised of irregular flat stones and truncated by drain trench cut 1197B in the west.

1191/1192: Compact yellowish brown (10YR 5/8) mortar layer covered stone pavement [1190] and a dark yellowish brown (10YR 4/4) fill in between stone gaps of [1190].

1193A: Loose linear fill along the inside of the northern village wall, consisted of very dark brown (2.5Y 3/2) sandy silt, which contained modern finds. [1193B]: Cut for fill [1193A] along the inside of the northern village wall; west-east aligned, sloping downward towards northern village wall, the surface appears irregular.

1194: 1st fill of possible pit cut [1183B] located at northeast corner of WTA house. It consisted of loose yellowish brown (10YR 5/4) silty sand.

1195: Loose very dark greyish brown (2.5Y 3/2) fill below stone pavement [1190], consisted of sandy silt.

1196: Cancelled.

1197A: Loose fill below stone drain [1090,] located at the northern part of WTA lane. It consisted of very dark grey (2.5Y 3/1) sandy silt, same as [1088]. [1197B]: Possible drain trench cut for [1197A].

1198: context numbers not used.

1199A: Loose fill of posthole cut [1199B] located at the north side of WTA lane below drain trench cut [1197B]. It consisted of grey (2.5Y 5/1) silty sand. [1199B]: Posthole cut for [1199A], cut into [1167A/1177A].

1200A: Loose fill of posthole cut [1200B] located at north side of WTA lane, consisted of very dark grey (10YR 3/1) sandy silt. [1200B]: Posthole cut for [1200A], cut into [1167].

1201A: Fill of posthole cut [1201B] located at the north end of WTA lane below [1197B]. It consisted of grey (2.5Y 5/1) sand. [1201B]: Posthole cut for [1201A], cut into [1167].

1202: Cancelled.

1203: Cancelled.

1204A: Loose fill of posthole cut 1204B located west of the WTR and north of WTA house area. It consisted of dark yellowish brown (10YR 4/4) silt. [1204B]: Posthole cut for [1204A], cut into [1167A/1177A].

1205A: Loose fill of posthole cut [1205B] located in north part of WTA lane. It consisted of clayed sand in mixed grey (10YR 5/1) and light yellowish brown (10YR 6/4). [1205B]: Posthole cut for [1205A], cut into [1167A/1177A].

1206A/B: Cancelled.

1207A/B: Cancelled.

1208A/B: Cancelled.

1209: Loose fill layer in the north side of WTA, same as [1167/1177/lower 1167]. It consisted of strong brown (7.5YR 5/8) silt.

1210: Very loose fill layer covering the west side of WTA. It consisted of mottled grey (5Y 5/1) sand with brown (10YR 5/3) and light olive brown (2.5Y 5/3) colours.

1211: Grouped with [1184/1217/1215].

1212A: First fill of posthole cut [1212D] located at southwest side of WTA. It consisted of loose dark grey (2.5Y 4/1) slightly clayed sand. [1212B]: second fill of posthole cut [1212D], consisted of friable, possibly baked silty sand in yellowish brown (10YR 5/6). 1[212C]: third fill or outer crust of posthole cut [1212D], consisted of hard, possibly baked silty sand in light yellowish brown (10YR 6/4). [1212D]: Posthole cut for [1212A/B/C].

1213: Cancelled.

1214A: Loose fill of ditch-like feature located in WTA, at the west side of WTR. It consisted of grey (5Y 5/1) sand. [1214B]: Cut for fill [1214A].

1215: Same as [1184/1211/1217].

1216/1222: Second pit fill of pit [1174B]. It consisted of loose slightly clay sand in strong brown (7.5Y 4/6) with patches of grey (2.5Y 6/1).

1217: Same as [1184/1211/1215].

1218: Orange deposit identified on the northeast bank of ditch [1234]. It consisted of friable silty sand in yellowish brown (10YR 5/6), possibly same as [1223].

1219: Loose fill layer in west side of WTA below [1210]. It consisted of light brownish grey (10YR 6/2) sand.

1220: Cancelled.

1221/1227: Same as [1227].

1222: Grouped with [1216].

1223: Fill layer below [1210] in WTA, truncated by ditch cut [1234] and stake hole alignment [1243-SA1 to 25] and stake holes [1244-SH 26 to 37], [1235/1236]. It consisted of friable silty sand in yellowish brown (10YR 5/6) colour with pockets of yellowish brown (10YR 5/4).

1224A: Loose fill for ditch-like feature within WTA, located in between [1107] and [1109], north=-south trending. It consisted of grey (2.5Y 5/1) silty to clayey sand. [1224B]: Cut for [1224A].

1225: Cancelled.

1226: Cancelled.

1227: Ditch fill of a northwest-southeast trending water channel /ditch cut [1245] in WTA. It consisted of loose, greyish brown (10YR 5/2) slightly clayed sand.

1228A: Loose fill of ditch-like feature within WTA- located on the east side of [1109], north=-south trending. It consisted of friable grey (2.5Y 5/1) clayey sand. [1228B]: Cut for [1228A].

1229: Iron pan layer cut by and along both sides of the water channel /ditch cut [1245] in WTA. It consisted of dark brown (10YR 3/3) with spots of black (10YR 2/1) gravel.

1230: A very thin deposit of the lower northwest-southeast trending ditch cut [1234] in WTA. It covered the entire surface of [1234] and consisted of pale brown (2.5Y 7/3) fine sand, with black (10YR 2/1) stains influenced by iron pan [1229].

1231: Cancelled.

1232: Very loose ditch fill of the lower northwest-southeast trending ditch cut [1234], identified at the southeast corner of WTA. It consisted of pale brown (10YR 6/3) sand.

1233: Ditch fill of the northwest-southeast trending ditch cut [1245] in WTA. It consisted of loose yellowish brown (10YR 5/6) sand.

1234: Hard surface /ditch cut for the lower northwest-southeast trending ditch in WTA. It was at the same level as [1223].

1235A: Loose fill of stake hole cut [1235B] located at the middle of WTA, identified on [1234]. It consisted of dark yellowish brown (10YR 4/4) fine sand. [1235B]: Stake hole cut for [1235A].

1236A: Loose fill of stake hole cut [1236B] located on the west side of [1235] in WTA, identified on [1234]. It consisted of yellowish brown (10YR 5/6) sand. [1236B]: Stake hole cut for [1236A].

1237A: Loose fill of posthole cut [1237B] identified on east facing section of WTA, located near south end of WTA lane. It consisted of dark grey silty (2.5Y 4/1) sand. [1237B]: Posthole cut for [1237A], cut into [1157].

1238A: Loose fill of posthole cut [1238B] identified on north facing section of WTA, located at the end of WTA lane. It consisted of dark greyish brown (2.5Y 4/2) sandy silt. [1238B]: Posthole cut for [1238A], cut into [1157].

1239A: Loose fill of posthole cut [1239B] identified on north facing section of WTA, located at the south end of lane. It consisted of dark olive brown (2.5Y 4/1) silty sand. [1239B]: Posthole cut for [1239A].

1240A: Loose fill of posthole cut [1240B] identified on east facing section of WTA, cutting into [1157A/1167A/1177A]. It consisted of dark grey (2.5Y 4/1) slightly silty sand. [1240B]: Posthole cut for [1240A].

1241: Ditch fill of the northwest-southeast trending ditch in WTA. It consisted of light greyish brown (2.5Y 6/2) sand.

1242-H1: Loose fill of hole feature consisted of black (10YR 2/1) silty sand.

1242-H2: Loose fill of hole feature consisted of black (10YR 2/1) silty sand and included charcoal.

1242-H3: Loose fills of hole feature. 1st 2cm in brown (10YR 4/3), 2nd fill 2 to 7cm in black (10YR 2/1). Both of gravely silt.

1242-H4: Loose fill of hole feature consisted of gravelly, silty sand in dark yellowish brown (10YR 4/3) and included charcoal, shell and possible slag.

1242-H5: Loose fill of hole feature consisted of silty sand in dark yellowish brown (10YR 4/3) with patches of black (10YR 2/1), and included charcoal and shell fragments.

1242-H6: Loose fill of hole feature consisted of black (10YR 2/1) silty sand and included charcoal.

1242-H7: Cancelled.

1242-H8: Loose fill of hole feature consisted of brown (10YR 4/3) silty and coarse sand, and included frequent shell, moderate charcoal and occasional iron fragments.

1242-H9: Loose fill of hole feature consisted of dark yellowish brown (10YR 4/6) silty sand and included frequent charcoal fragments.

1242-H10: Loose fill of hole feature consisted of dark greyish brown (10YR 4/2) silty sand with occasional charcoal.

1242-H11: Loose fill of hole feature consisted of yellowish brown (10YR 5/8) silty sand and included charcoal.

1242-H12: Very loose fill of hole feature consisted of black (10YR 2/2) silty sand and included frequent shell fragments.

1242-H13: Loose fill of hole feature consisted of black (10YR 2/1) silty sand.

1242-H14: Very loose fill of hole feature consisted of dark yellowish brown (10YR 3/6) gravelly sand with occasional iron fragment.

1242-H15: Cancelled.

1242-H16: Loose fill of hole feature consisted of dark yellowish brown (10YR 4/6) silty sand.

1242-H17: Cancelled.

1242-H18: Loose fill of hole feature consisted of very dark brown (10YR 2/2) silty sand.

1242-H19: Loose fill of hole feature consisted of silty sand in black (10YR 2/2) mixed with brown (10YR 4/3), and included frequent shell.

1242-H21: Loose fill of hole feature consisted of dark brown (10YR 3/3) silty sand and included frequent charcoal.

1242-H22: Loose fill of hole feature consisted of very dark brown (10YR 3/2) silty sand and included occasional charcoal.

1242-H23A/B: Very loose fills of two joining hole features consisted of very dark brown (10YR 3/2) silty sand and included frequent shell fragments.

1242-H24: Same as [1242-H36].

1242-H25: Loose fill of hole feature consisted of silty sand in yellowish brown (10YR 5/8) mixed with black (10YR 2/1).

1242-H27: Loose fill of hole feature consisted of dark brown (10YR 3/3) silty sand and included frequent shell fragments.

1242-H28: Loose fill of hole feature consisted of yellowish brown (10YR 5/8) silty sand with occasional cement fragment and an iron fragment.

1242-H29: Very loose fill of hole feature consisted of very dark brown (10YR 3/2) silty sand.

1242-H30: Loose fill of hole feature consisted of silty sand in yellowish brown (10YR 5/6) mixed with black (10YR 2/1).

1242-H31: Loose fill of hole feature consisted of very dark brown (10YR 3/3) silty sand and included charcoal, slags and red brick fragment.

1242-H32: Very loose fill of hole feature consisted of black (10YR 2/1) silty sand with occasional shell fragment.

1242-H33: Cancelled.

1242-H34: Very loose fill of hole feature consisted of silty sand in dark yellowish brown (10YR 4/6) mixed with black (10YR 2/1).

1242-H35: Very loose fill of hole feature consisted of dark yellowish brown (10YR 3/4) silty sand and included occasional charcoal.

1242-H36: Loose fill of hole feature consisted of very dark brown (10YR 3/2) silty sand.

1242-H37: Loose fill of hole feature consisted of very dark brown (10YR 3/2) silty sand.

1242-H38: Loose fill of hole feature consisted of very dark brown (10YR 2/2) silty sand.

1242-H39: Two loose fills of hole feature consisted of sandy silt. 0-3cm was the first fill, in black (2.5Y 2.5/1); below 3cm was the second fill, in dark yellowish brown (10YR 4/4). Both fills contained shell fragments.

1242-H40: Loose fill of hole feature consisted of silty / gravely sand in yellowish brown (10YR 5/8) mixed with black (10YR 2/1).

1243: north-south trending stake hole alignment (including SA1 to 25 within L.O.E) cutting into the western edge of [1223] in WTA.

1243-SA1: Stake hole; the fill consisted of very loose dark yellowish brown (10YR 4/2) sand.

1243-SA2: Stake hole; the fill consisted of very loose sand in very dark yellowish brown (10YR 3/2).

1243-SA3: Stake hole; the fill consisted of very loose greyish brown (10YR 5/2) sand.

1243-SA4: Stake hole; the fill consisted of very loose grey (10YR 5/1) sand.

1243-SA5: Stake hole; the fill consisted of very loose light brownish grey (10YR 6/2) sand.

1243-SA6: Stake hole; the fill consisted of very loose light brownish grey (10YR 6/2) sand.

1243-SA7: Stake hole; the fill consisted of very loose light brownish grey (10YR 6/2) sand.

1243-SA8: Stake hole; the fill consisted of very loose pale brown (10YR 6/3) sand.

1243-SA9: Stake hole; the fill consisted of very loose light brownish grey (10YR 6/2) sand.

1243-SA10: Stake hole; the fill consisted of loose, very dark grey (10YR 3/1) sand.

1243-SA11: Stake hole; the fill consisted of loose, brown (10YR 5/3) silty sand.

1243-SA12: Stake hole; the fill consisted of loose, very dark grey (10YR 3/1) silty sand.

1243-SA13: Stake hole; the fill consisted of very loose light grey (10YR 7/1) sand.

1243-SA14: Stake hole; the fill consisted of loose dark grey (10YR 4/1) silty sand.

1243-SA15: Stake hole; the fill consisted of very loose light brownish grey (10YR 6/2) sand.

1243-SA16: Stake hole; the fill consisted of loose greyish brown (10YR 5/2) sand.

1243-SA17: Under groundwater level, not excavated.

1243-SA18: Under groundwater level, not excavated.

1243-SA19: Stake hole; the fill consisted of very loose light brownish grey (10YR 6/2) sand.

1243-SA20: Stake hole; has two fills. First fill identified at a depth at 13cm to 23cm (top was empty) from top and consisted of loose dark grey (10YR 4/1) silty sand. Second fill from 23cm to 27cm, consisted of loose light brownish grey sand.

1243-SA21: Stake hole; the fill consisted of loose light brownish grey (10YR 6/2) sand.

1243-SA22: Stake hole; the fill consisted of loose light brownish grey (10YR 6/2) sand.

1243-SA23: Stake hole; the fill consisted of very loose grey (10YR 5/1) sand.

1243-SA24: Stake hole; the fill consisted of very loose dark greyish brown (10YR 4/2) silty sand.

1243-SA25: Stake hole; the fill consisted of loose greyish brown (10YR 5/2) sand.

1244: Less-structuralized stake holes located on [1223], including SH26 to 37.

1244-SH26: Stake hole; the fill consisted of soft, greyish brown (10YR 5/2) slightly sandy clay.

1244-SH27: Stake hole; the fill consisted of firm, silty to clayey sand in grey (2.5Y 5/1).

1244-SH28: Stake hole; the fill consisted of loose, silty to clayey sand in greyish brown (10YR 5/2).

1244-SH29: Stake hole; has two fills. First fill (top 5cm) consisted of loose dark greyish brown (10YR 4/2) slightly silty sand. Second fill (below 5cm) consisted of loose light brownish grey (10YR 6/2) sand.

1244-SH30: Stake hole; the fill consisted of loose brown (10YR 5/3) slightly sandy clay.

1244-SH31: Stake hole; the fill consisted of loose brown (10YR 5/3) slightly sandy clay.

1244-SH32: Stake hole; the fill consisted of loose brown (10YR 5/3) silty sand.

1244-SH33: Stake hole; the fill consisted of loose, very slightly sandy clay in greyish brown (10YR 5/2).

1244-SH34: Stake hole; the fill consisted of loose, silty to clayey sand in greyish brown (10YR 5/2).

1244-SH35: Cancelled.

1244-SH36: Stake hole; the fill consisted of loose, light brownish grey (10YR 6/2) silty sand.

1244-SH37: Stake hole; the fill consisted of loose, light brownish grey (10YR 6/2) silty sand.

1245: Cut for the upper northwest-southeast trending water channel / ditch.

1246: Stone house foundation and fill in north moat, located near the northwest corner of the WTR. The house foundation was comprised of cut granite blocks. The fill consisted of very dark grey (10YR 3/4) sandy silt.

1247: Concrete platform in north moat, under [1246], supported by wooden post [1248].

1248: Two wooden post supporting [1247] concrete in north moat.

1249: Mortar and levelling fill in northwest corner of north moat, above [1246]. The levelling fill consisted of pale brown (10YR 6/3) sandy silt.

1250: House foundation pit in VWI.

1251: Watch tower room stone walls, roughly square shape in plan. It has the eastern wall more intact than the rest three walls. It was constructed of irregularly shaped granite at bottom; displaced cut granite was noted on top of northern wall. Gaps were filled with smaller rocks. Mortar paving remnant was noted on top of northeast corner and on external walls.

1252: East village wall, connects to the watch tower room at north end. It largely consisted of irregularly shaped stone. Displaced cut granite blocks and modern house remains however, such as concrete and mortar were observed.

1253: North village wall, connects to the watch tower room at east end. It largely consisted of irregularly shaped stone. Concrete paving was noted on top in the west edge. A stone drain [1090] was built into the wall body.

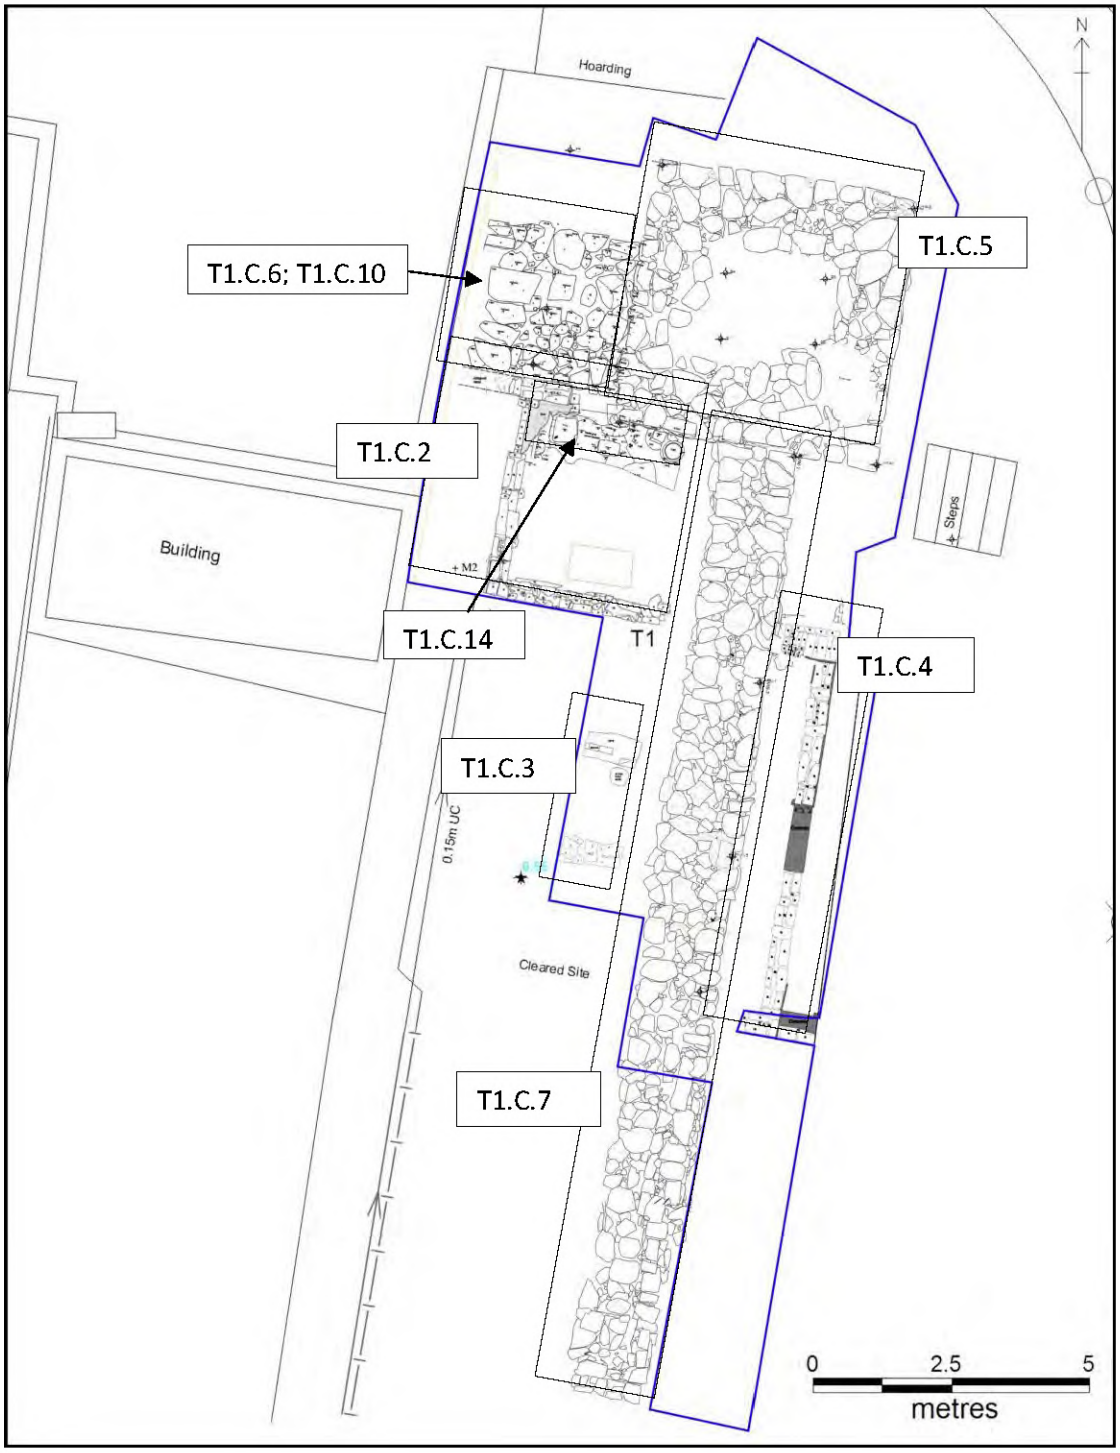
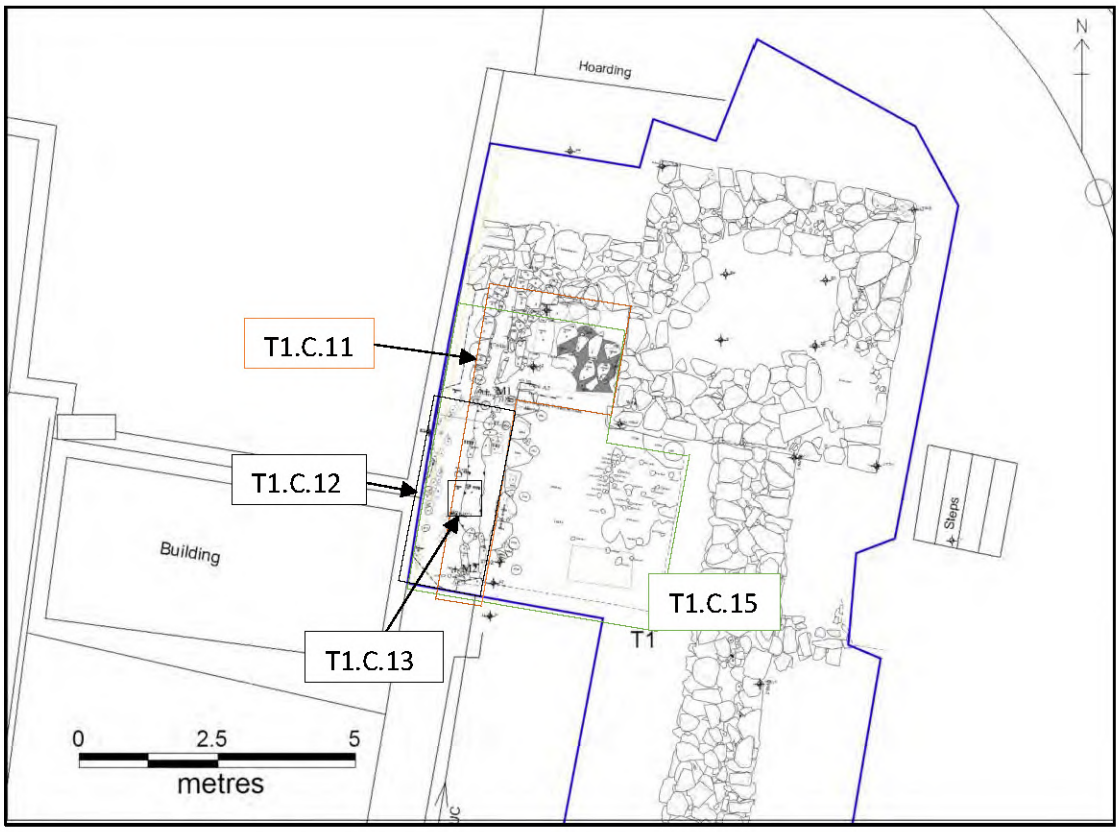
*Proposed dating based on stratigraphy, diagnostic artefacts, TL-dating and historical information.

T1.C Trench 1 drawings

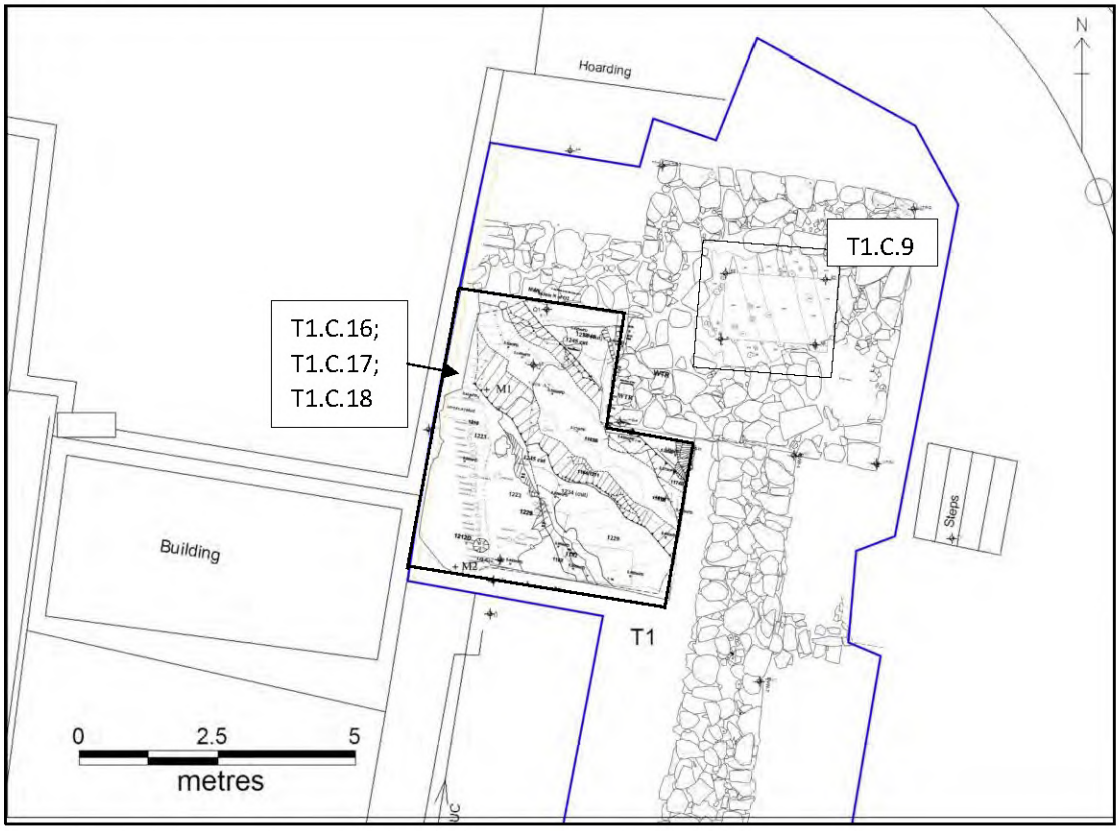
Key to ground plan (1):



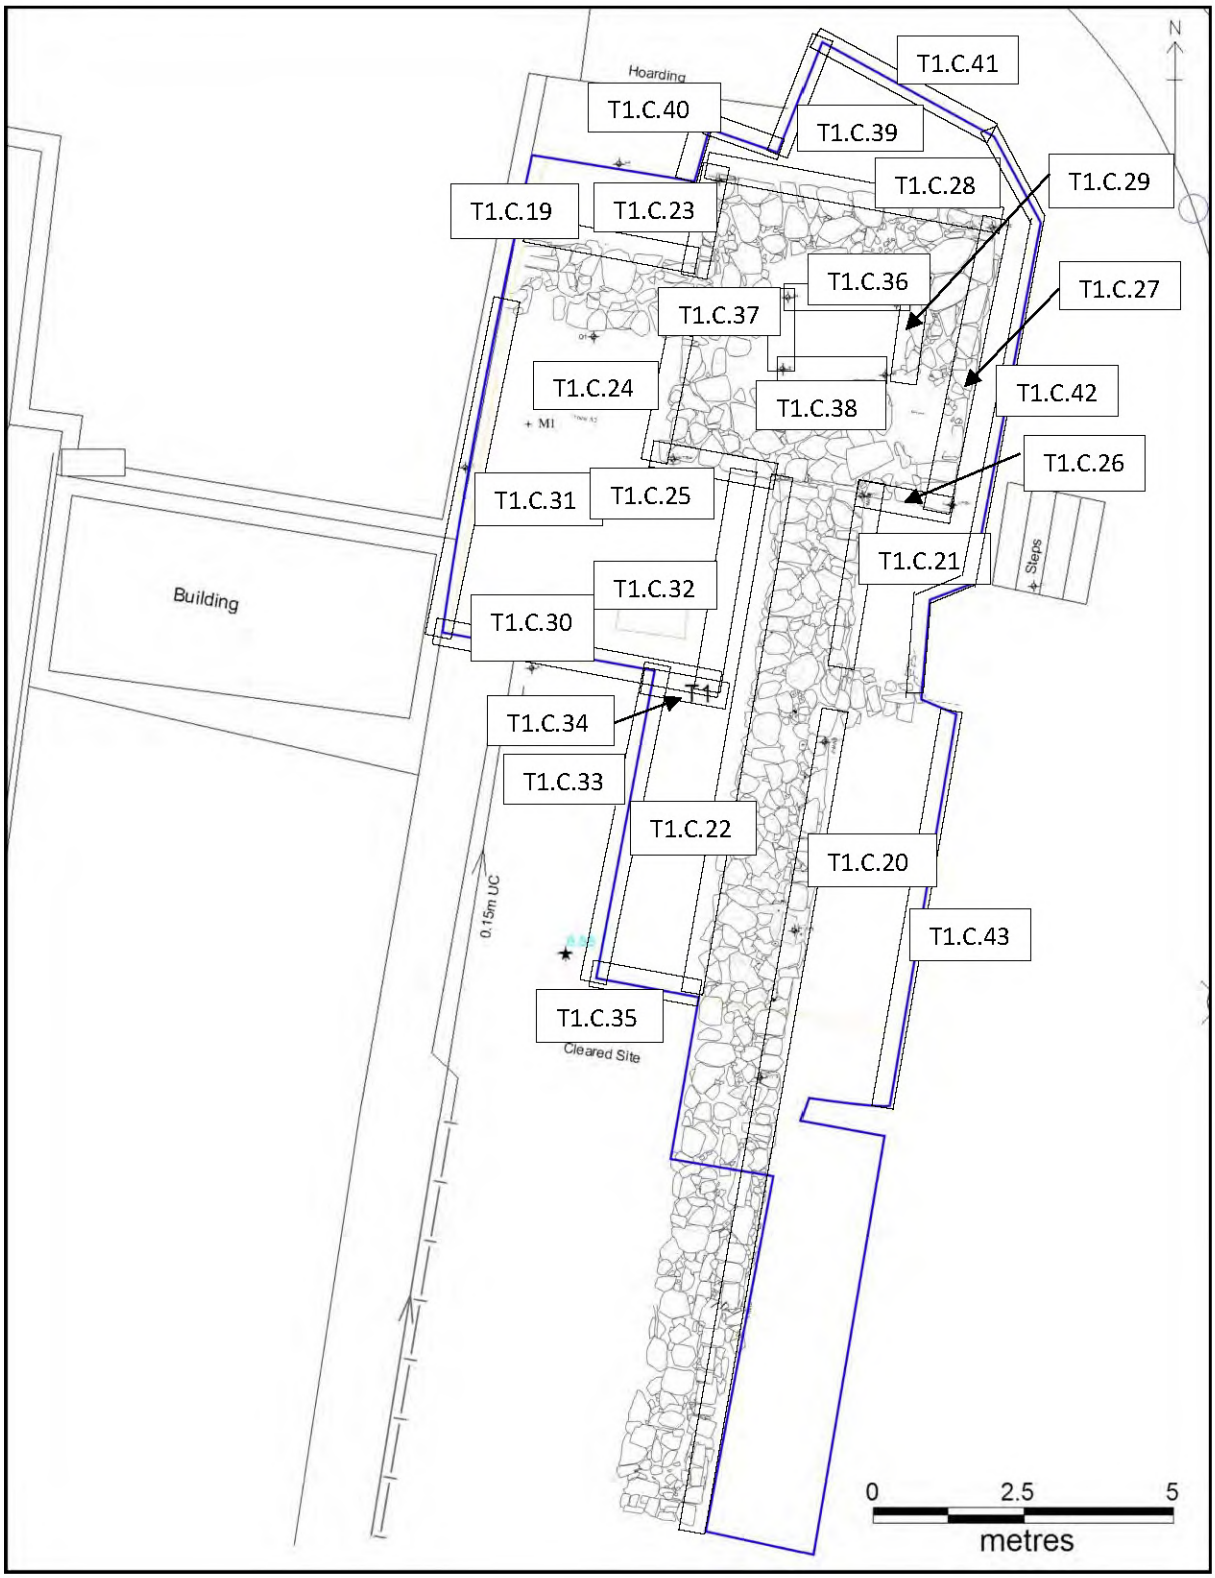
Key to ground plan (2):



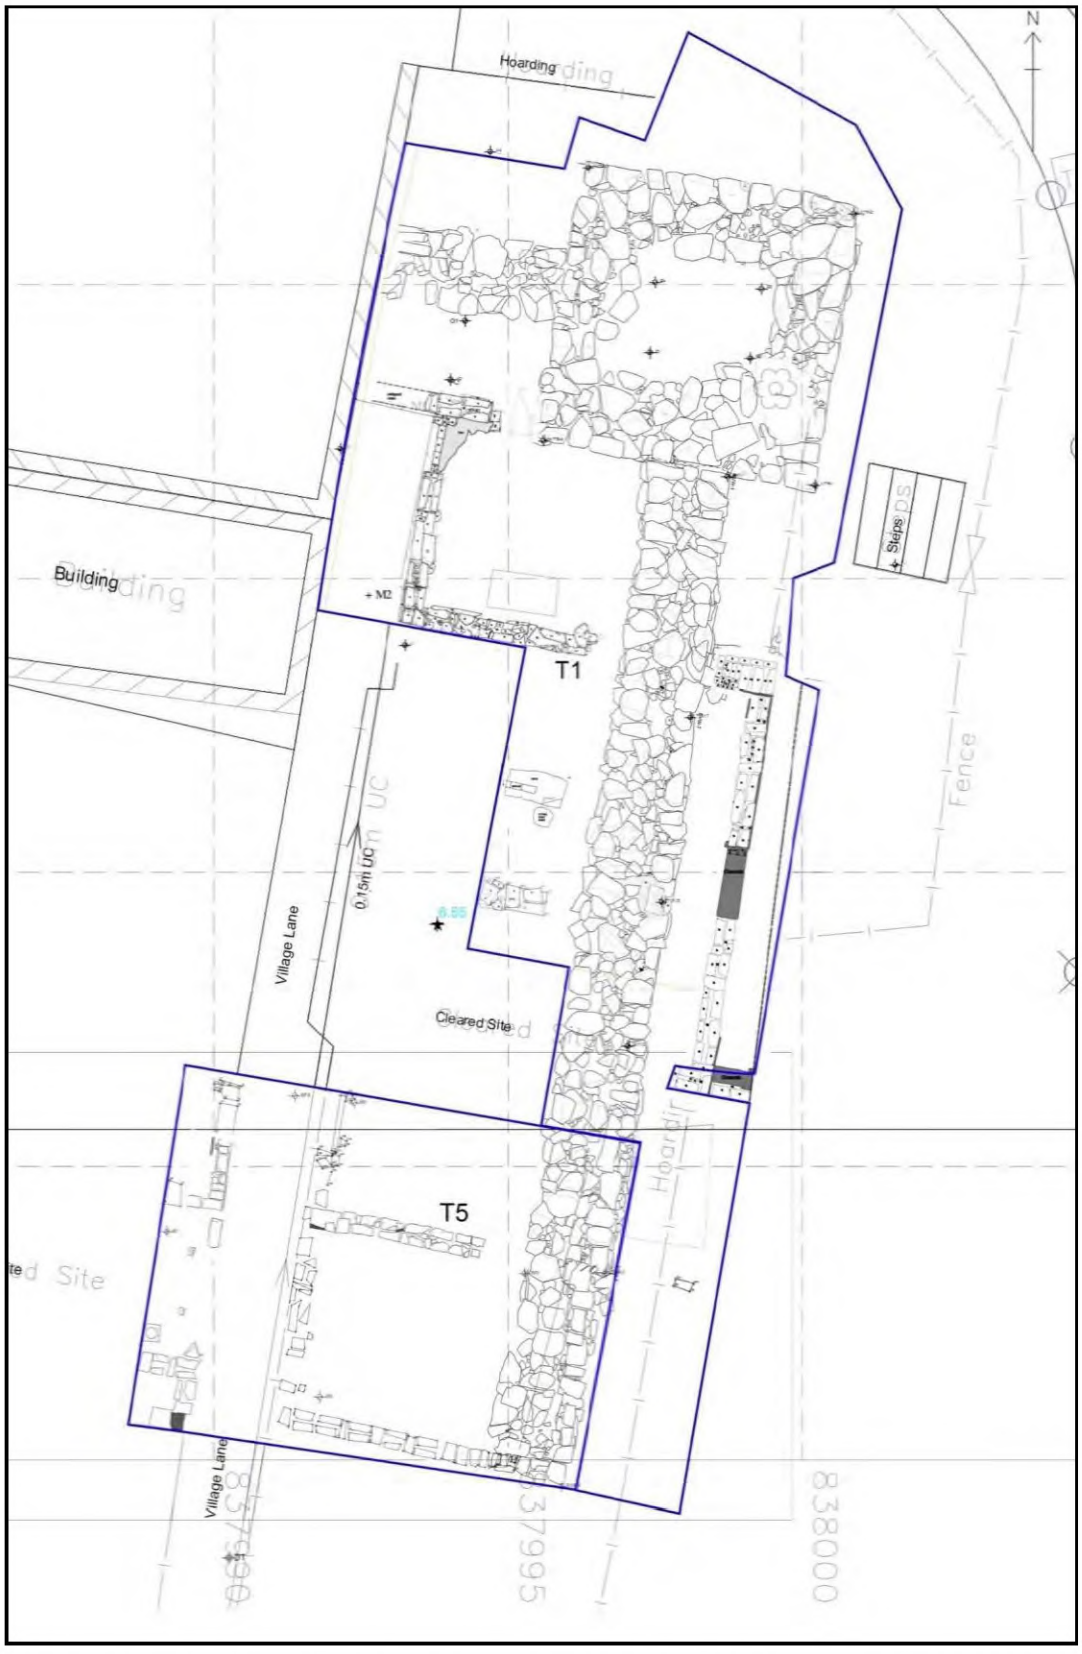
Key to ground plan (3):



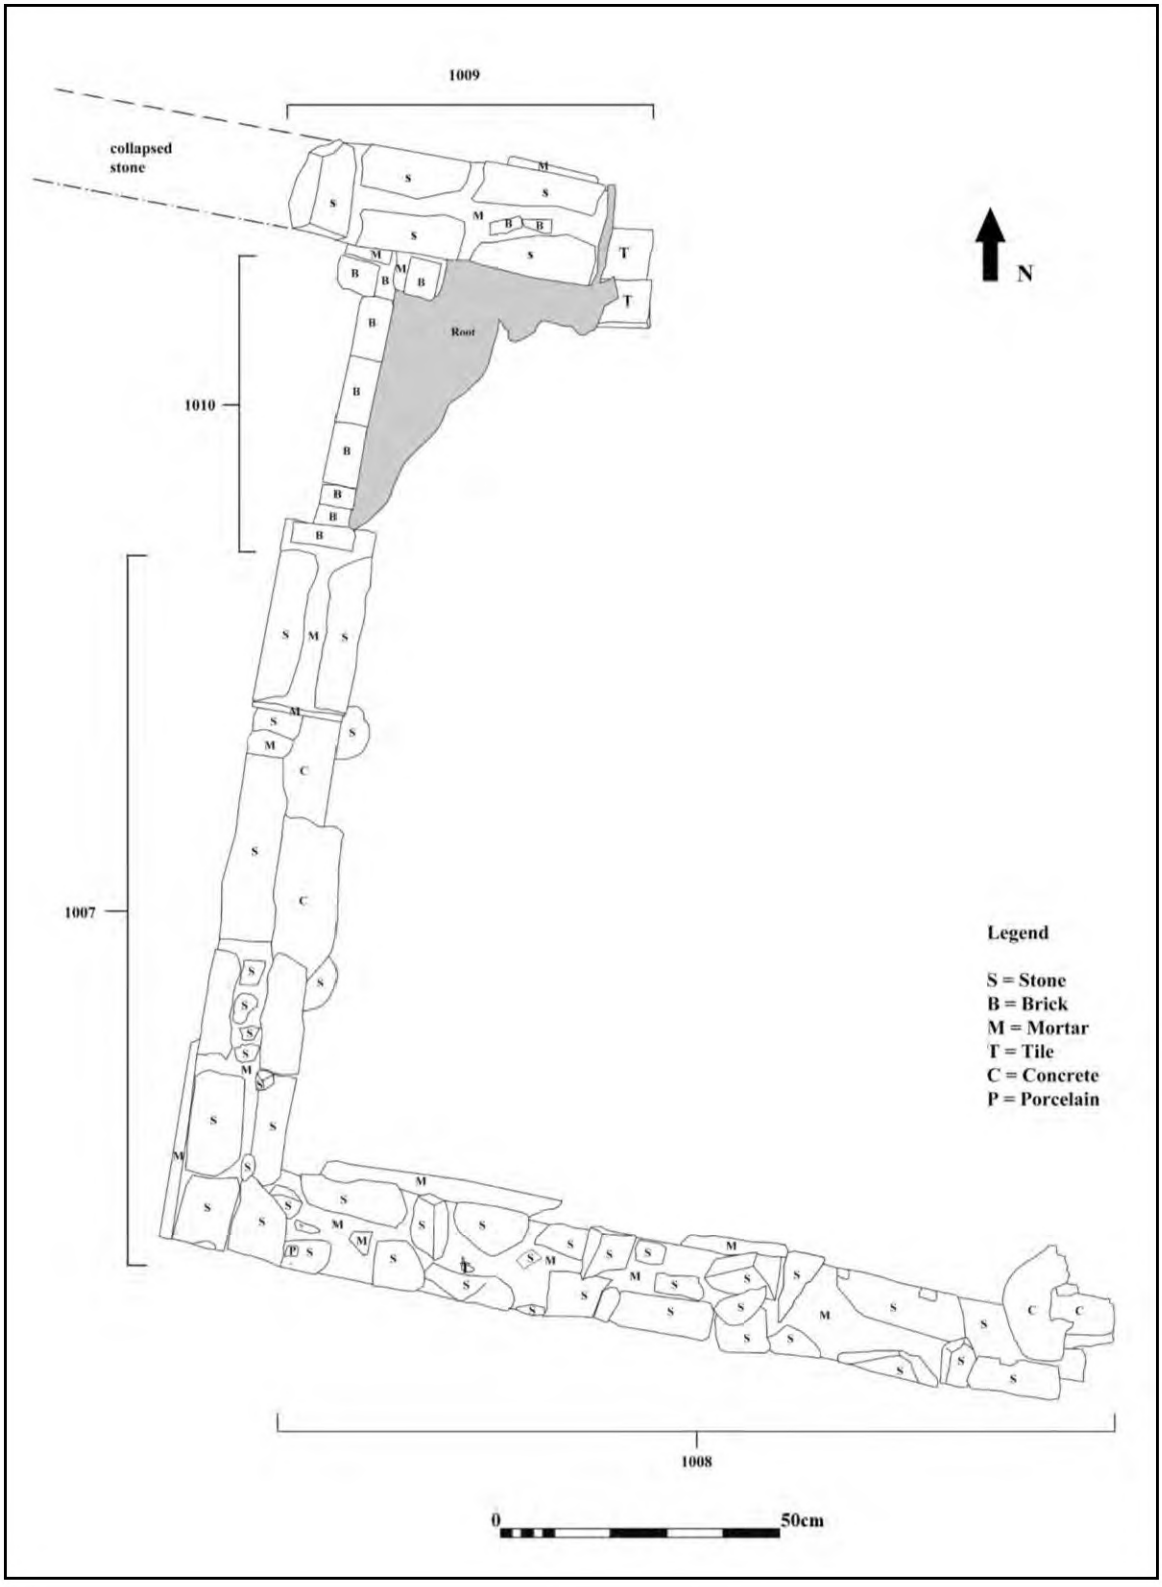
Key to sections:



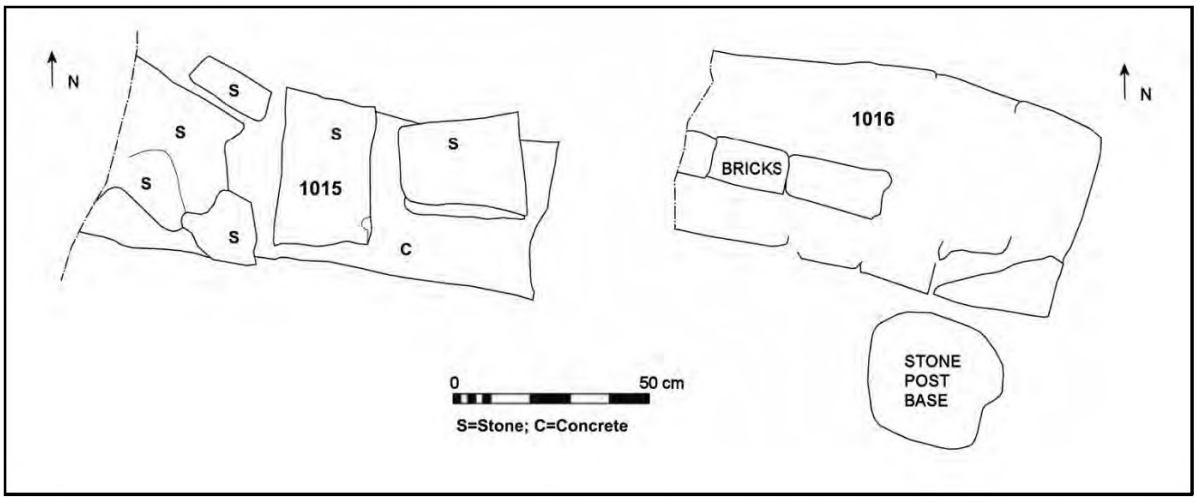
Ground plan of modern house walls, watch tower room walls and village walls



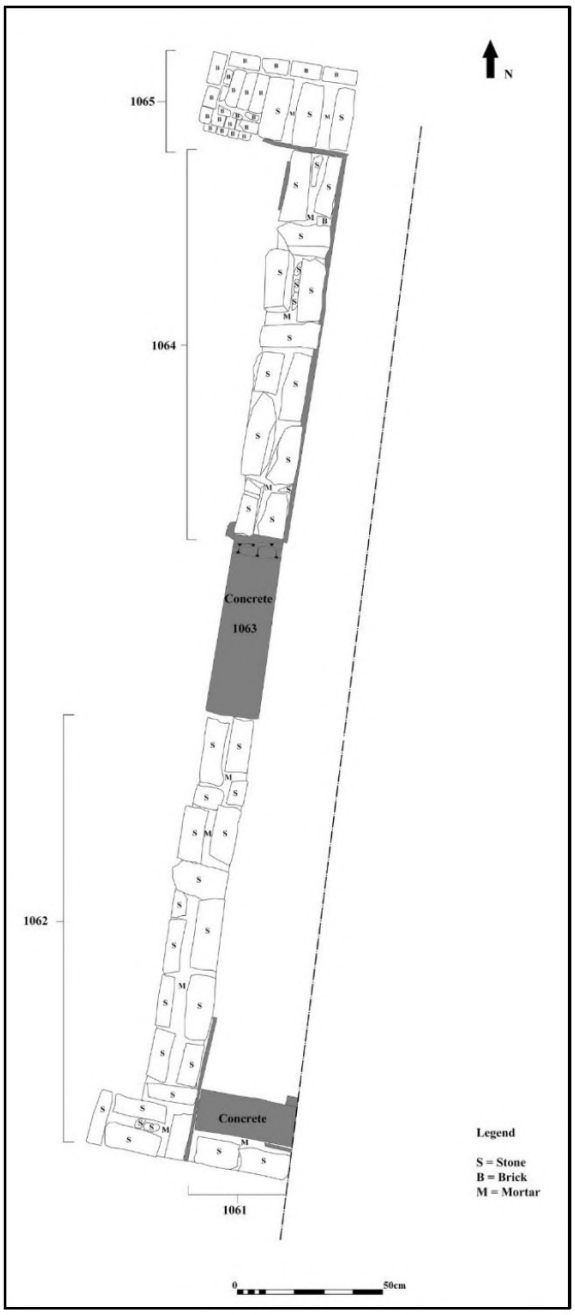
T1.C.1 Layout of modern village house walls in relation to village walls and watch tower room in T1 and T5.



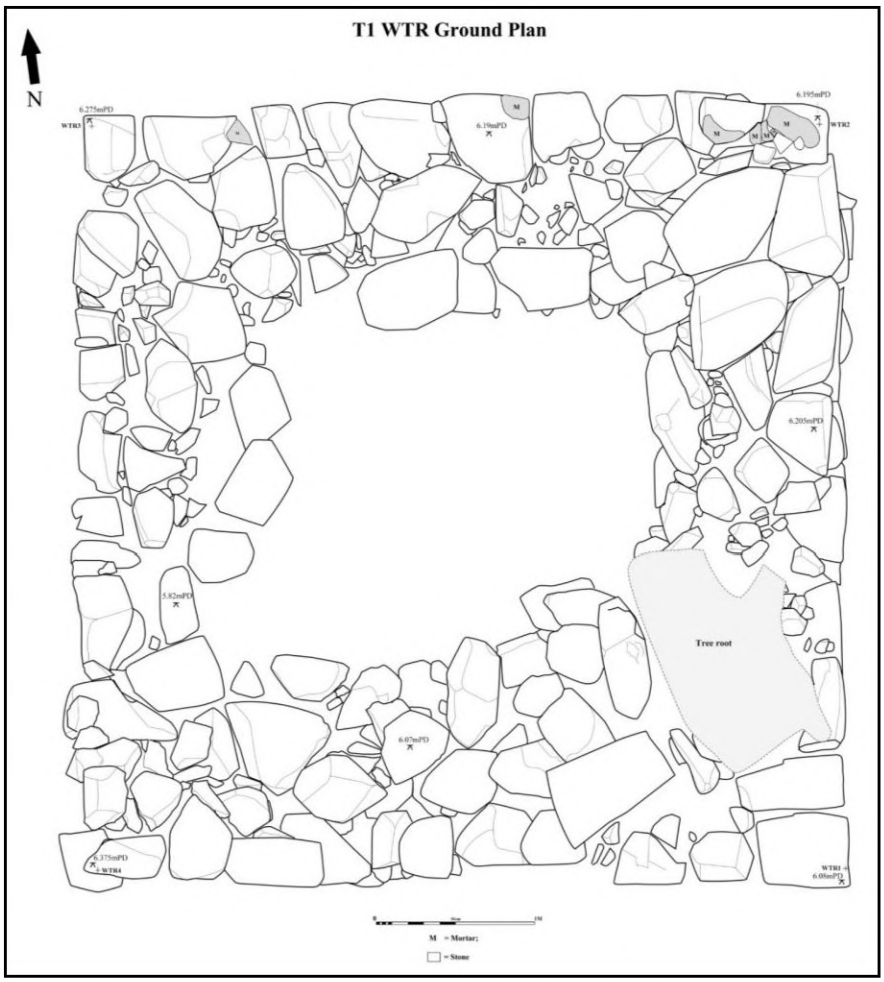
T1.C.2 Modern houses walls [**co.1007/1008/1009/1010**] in T1 watch tower area



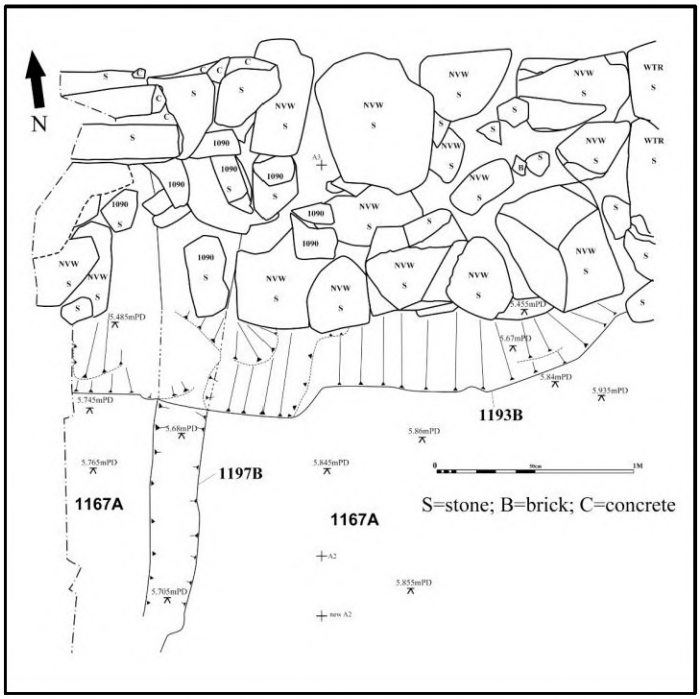
T1.C.3 Modern houses walls [**co.1015**] and [**co.1016**] in T1 village wall interior area.



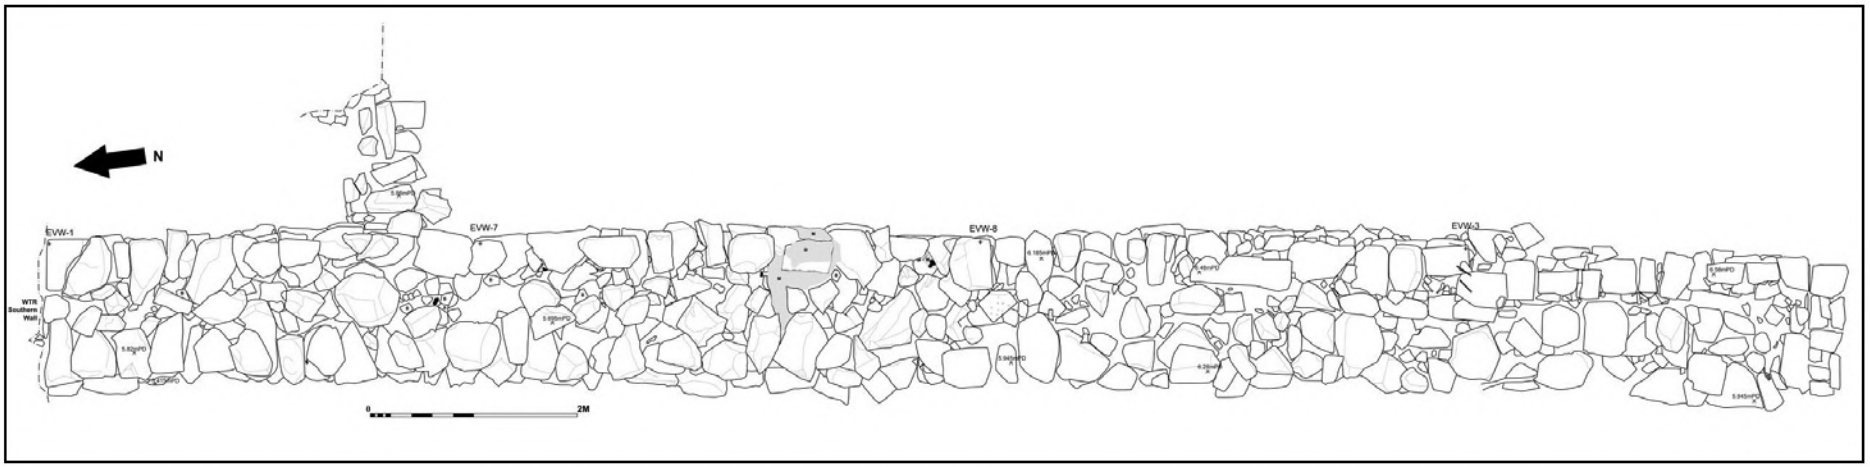
T1.C.4 Modern house walls and concrete threshold [**co. 1061/1062/1063/1064/1065**] on top of east moat.



T1.C.5 Plan of T1 watch tower room [co. 1251].

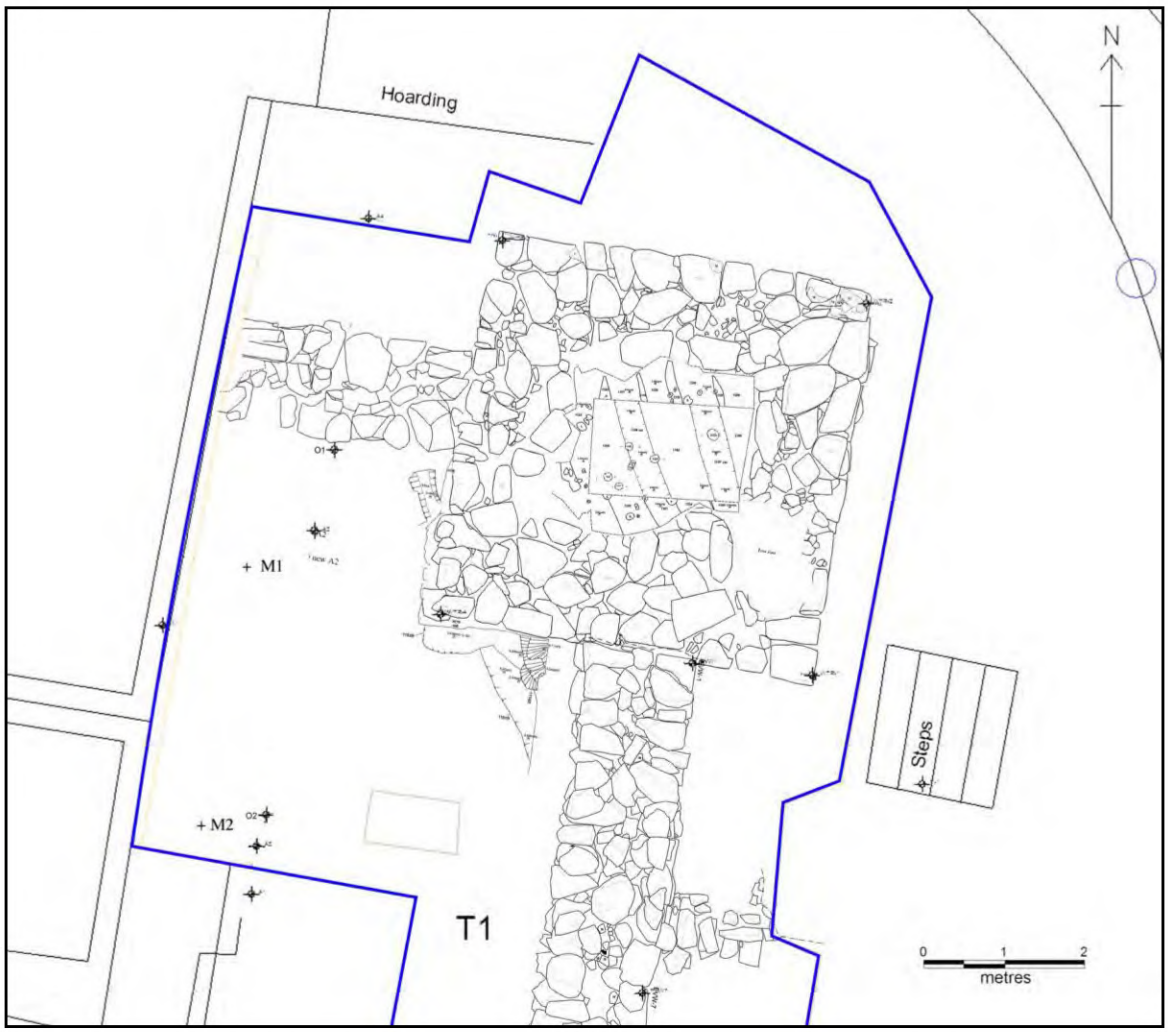


T1.C.6 Plan of north village wall **[co. 1253]**, **[co.1193B]** and **[co.1197B]** on **[co.1167A]** in north end of watch tower area

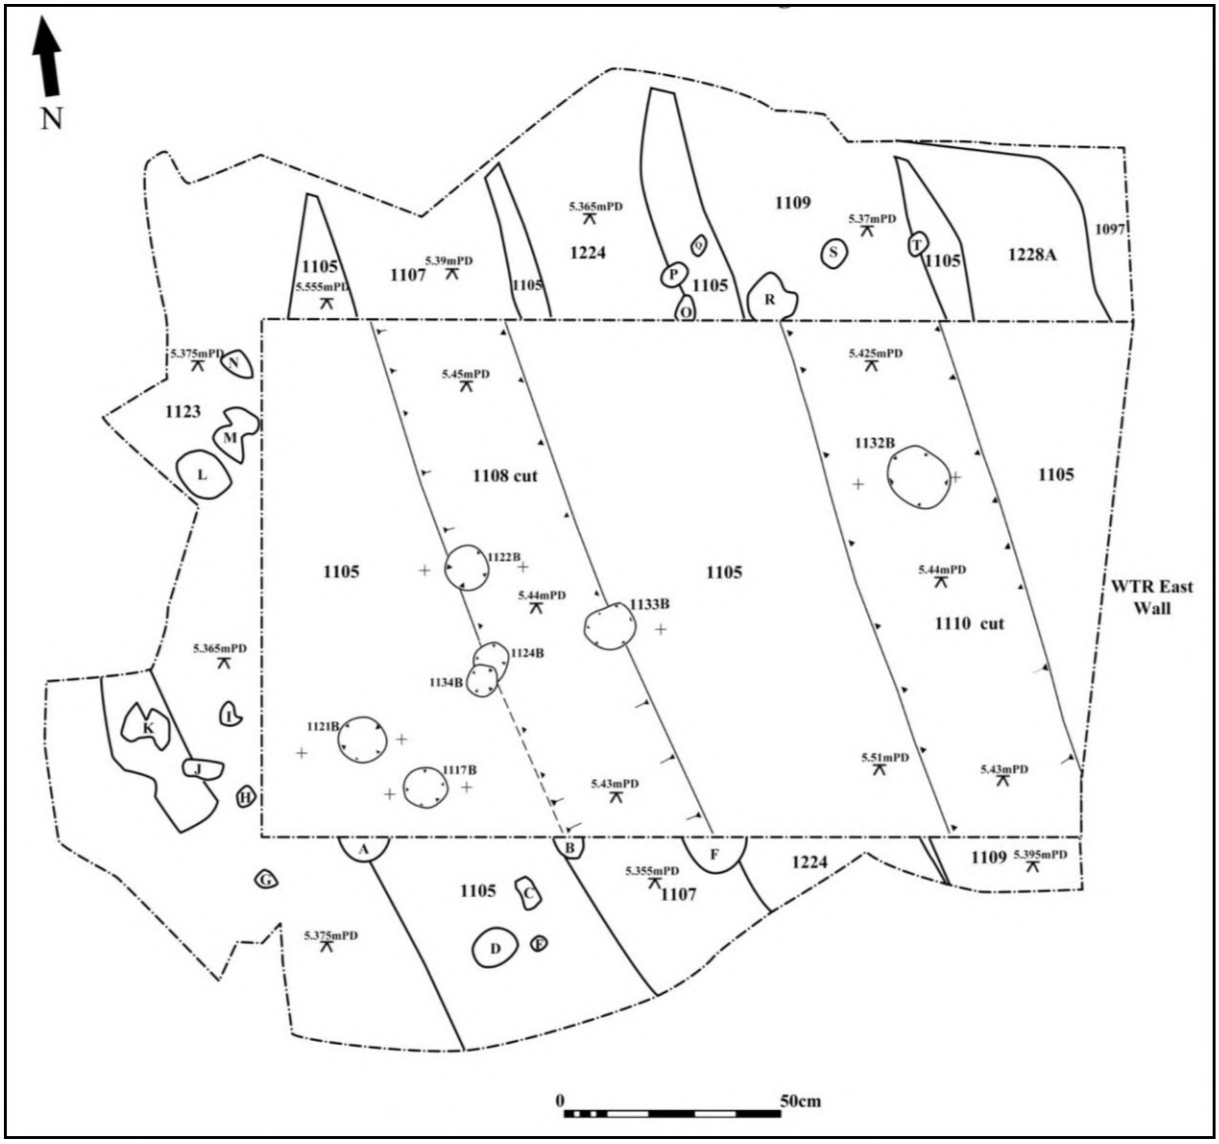


T1.C.7 Plan of east village wall [**co.1252**] in T1; Note the stones on the east side was stone wall below modern house wall [**co.1065**].

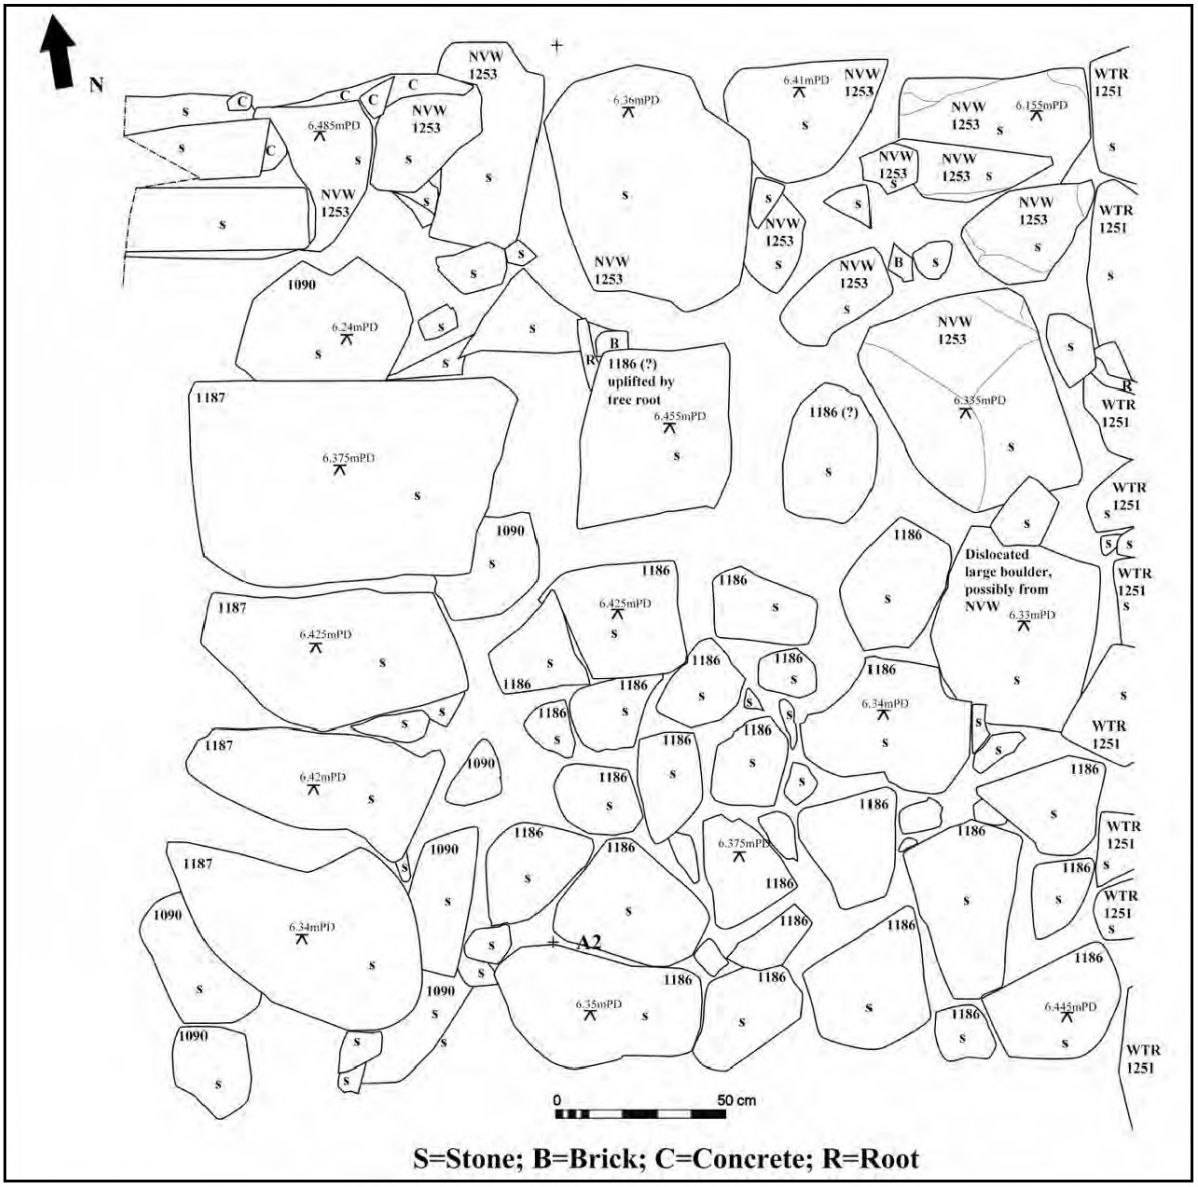
Plan of features



T1.C.8 Pre-watch tower ditches **[co.1214B, 1181B, 1107/1108, 1109/1110, 1223, 1224, 1228]** and postholes in relation to north and east village walls and watch tower room.

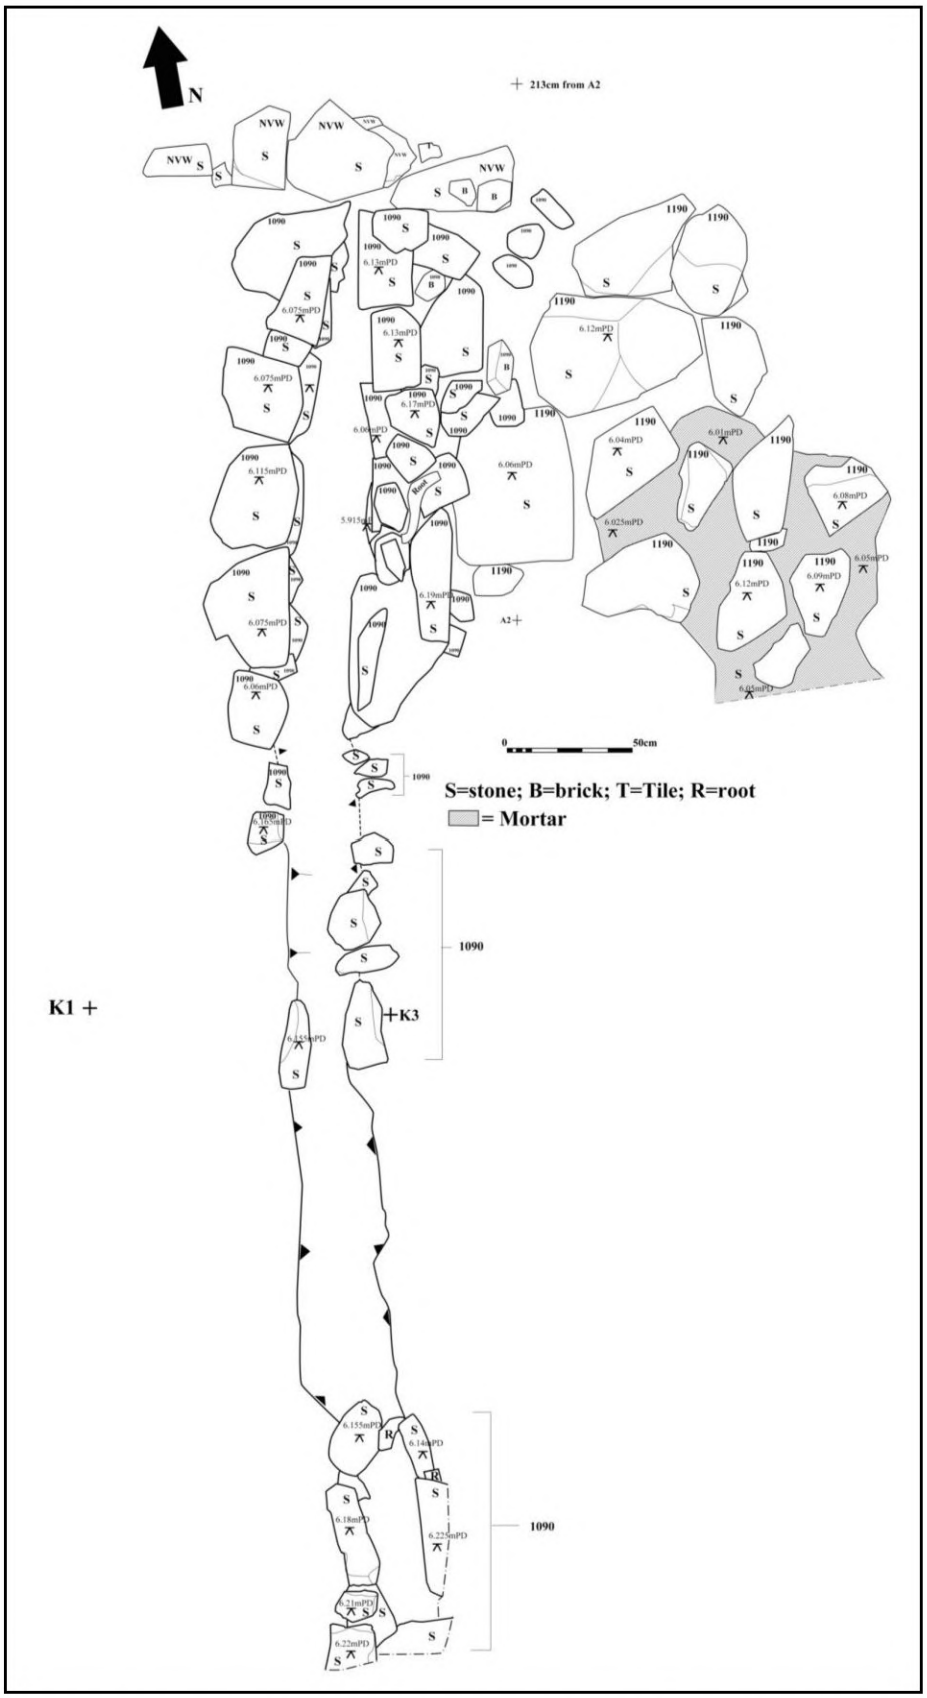


T1.C.9 Features on level of **[co.1105]**, showing ditch-like features **[co.1123]**, **[co.1107/1108]**, **[co.1224]**, **[co.1109/1110]**, **[co.1228A]**, and possible postholes/stake holes **[co.1121B]**, **[co.1117B]**, **[co.1134B]**, **[co.1124B]**, **[co.1122B]**, **[co.1133B]**, **[co.1132B]** within the WTR and Sondage; also note modern intrusion fill **[co.1097]** on the north and east edge, and unexcavated hole features "A" to "T" outside of Sondage.

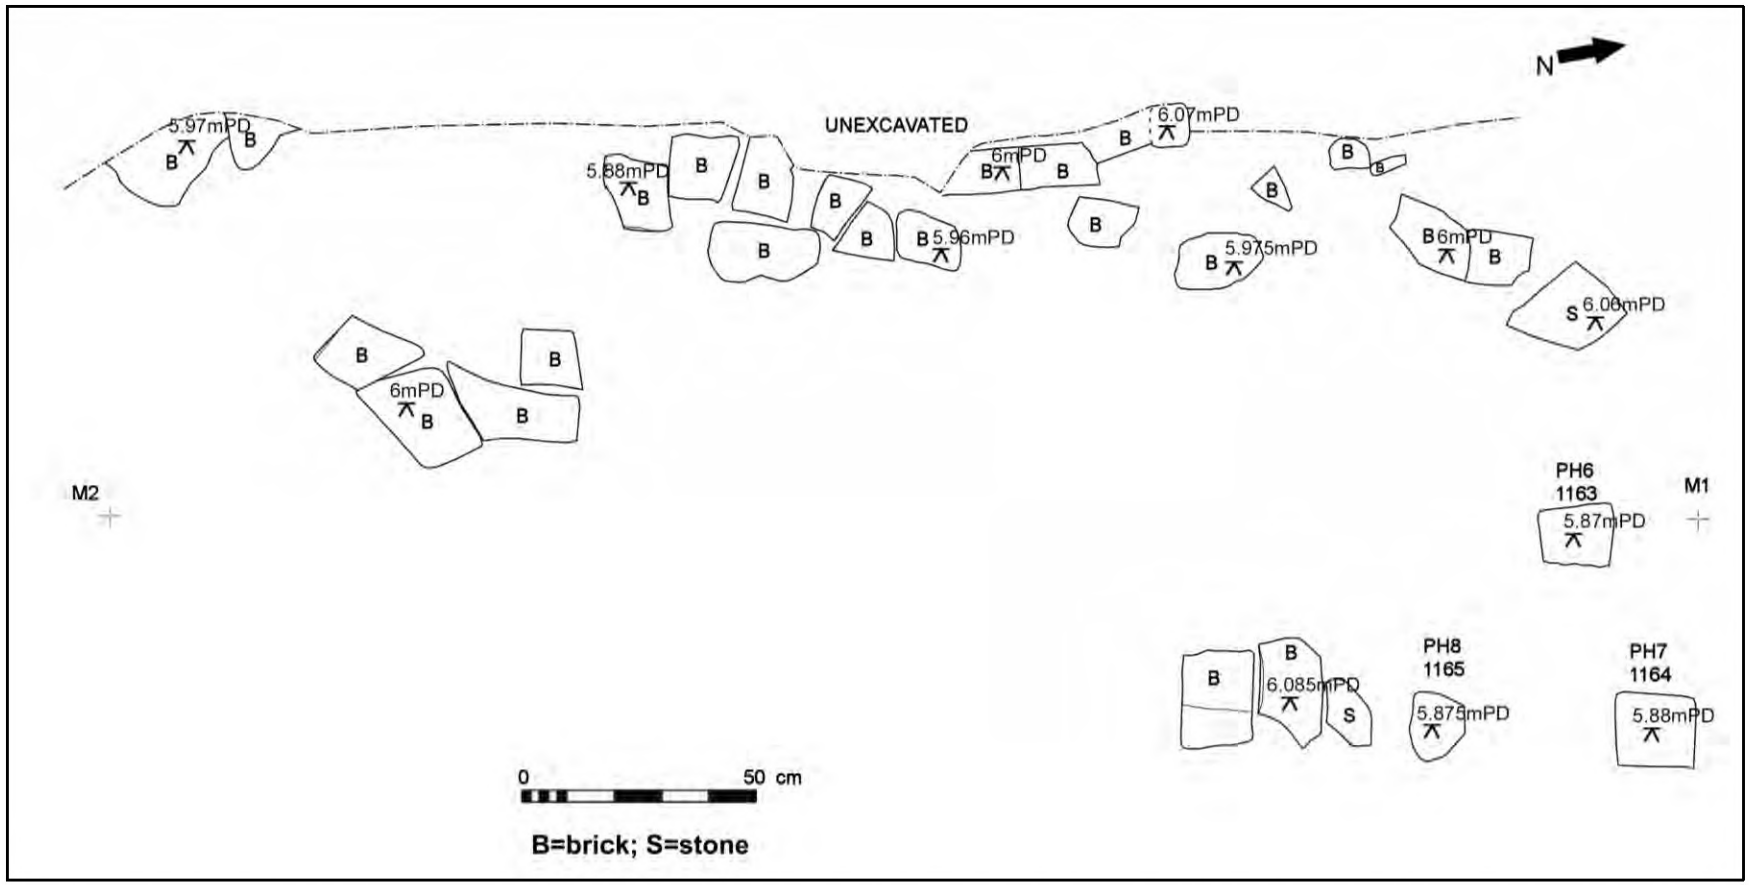


T1.C.10 Plan for cover stones [**co.1187**] of stone drain [**co.1090**] built into north village wall and stone pavement [**co.1186**] located at the north end of watch tower area; Note: to the east is western wall of watch tower room in T1.

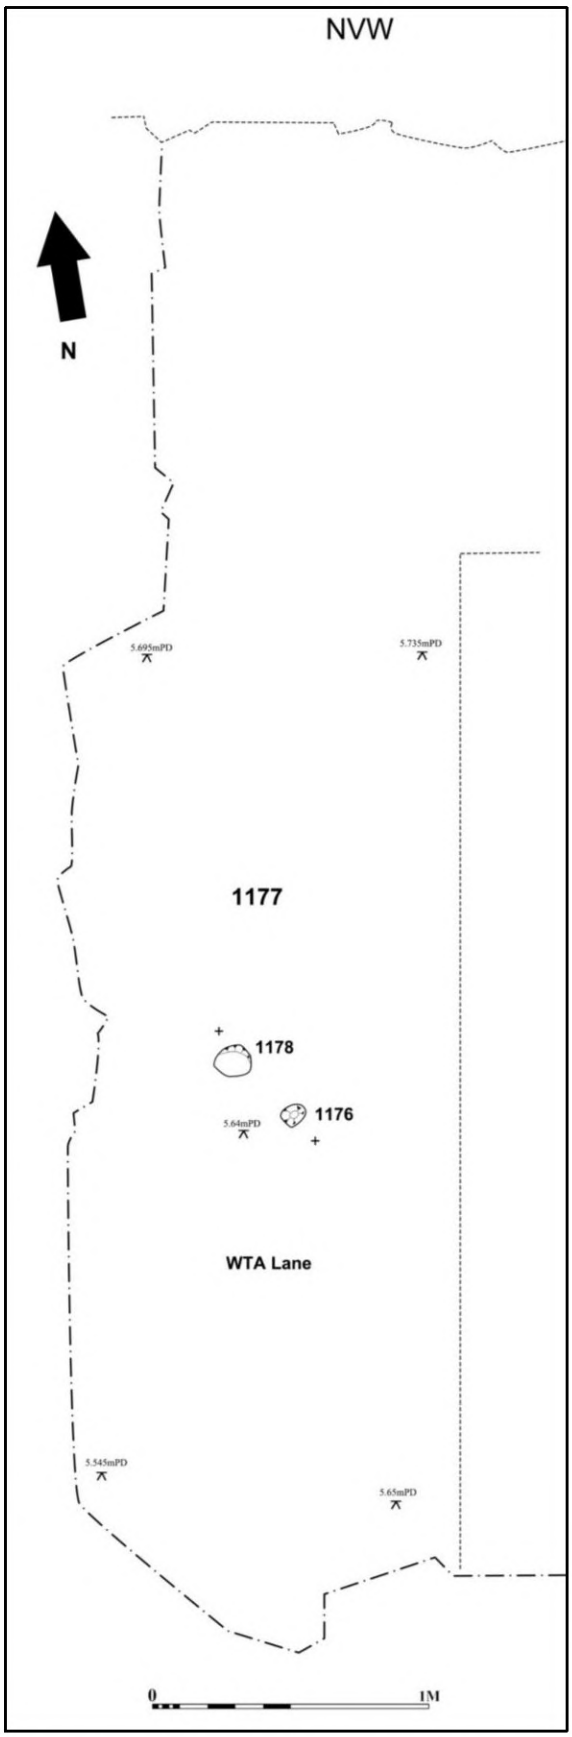
Within lane



T1.C.11 Plan for stone drain [**co.1090**] and stone pavement [**co.1190**] recorded within the Lane.

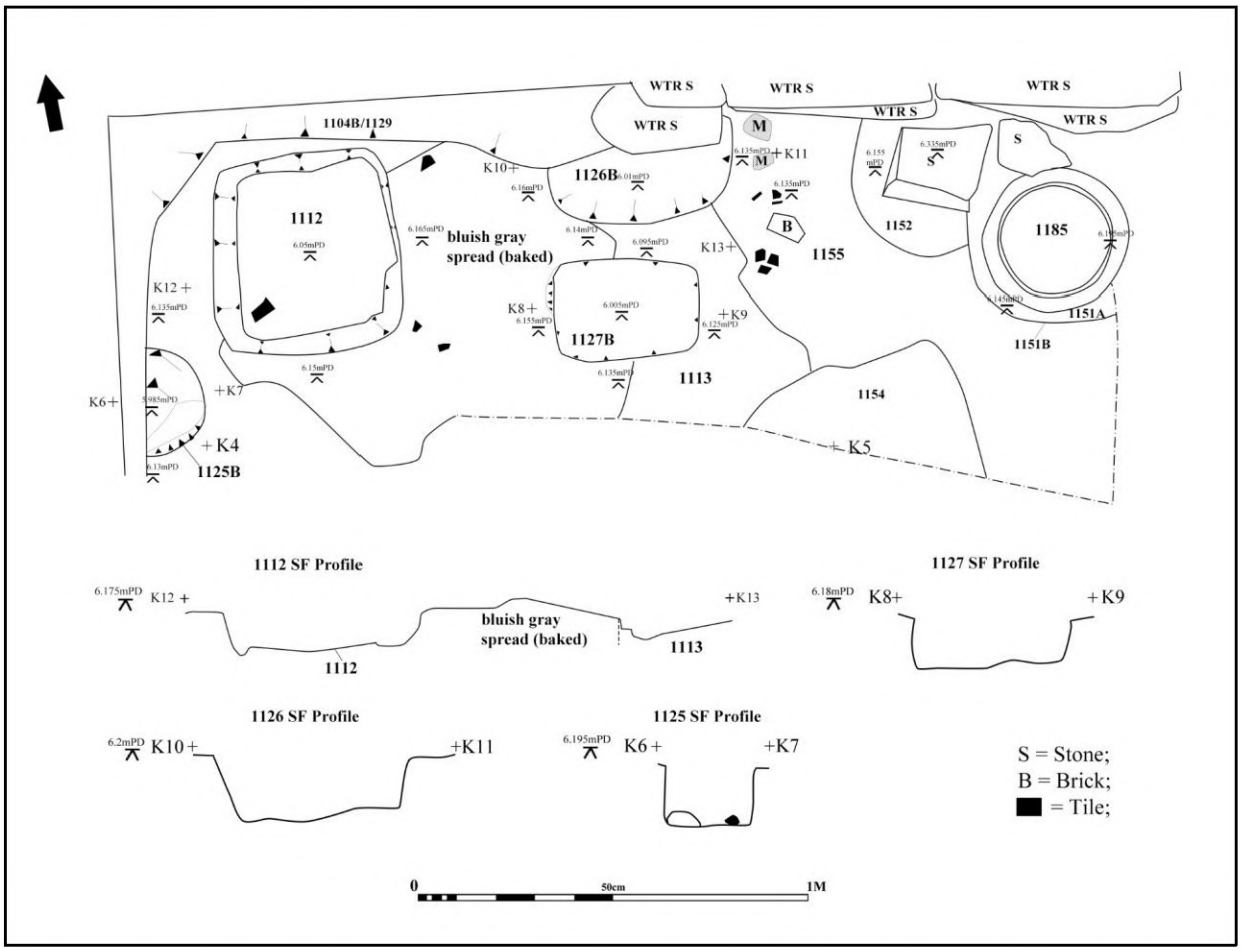


T1.C.12 Plan for brick alignment **[co.1156]** in lane (part of watch tower area); and locations of (pre-excavation) postholes **[co.1163]**, **[co.1164]**, and **[co.1165]**.

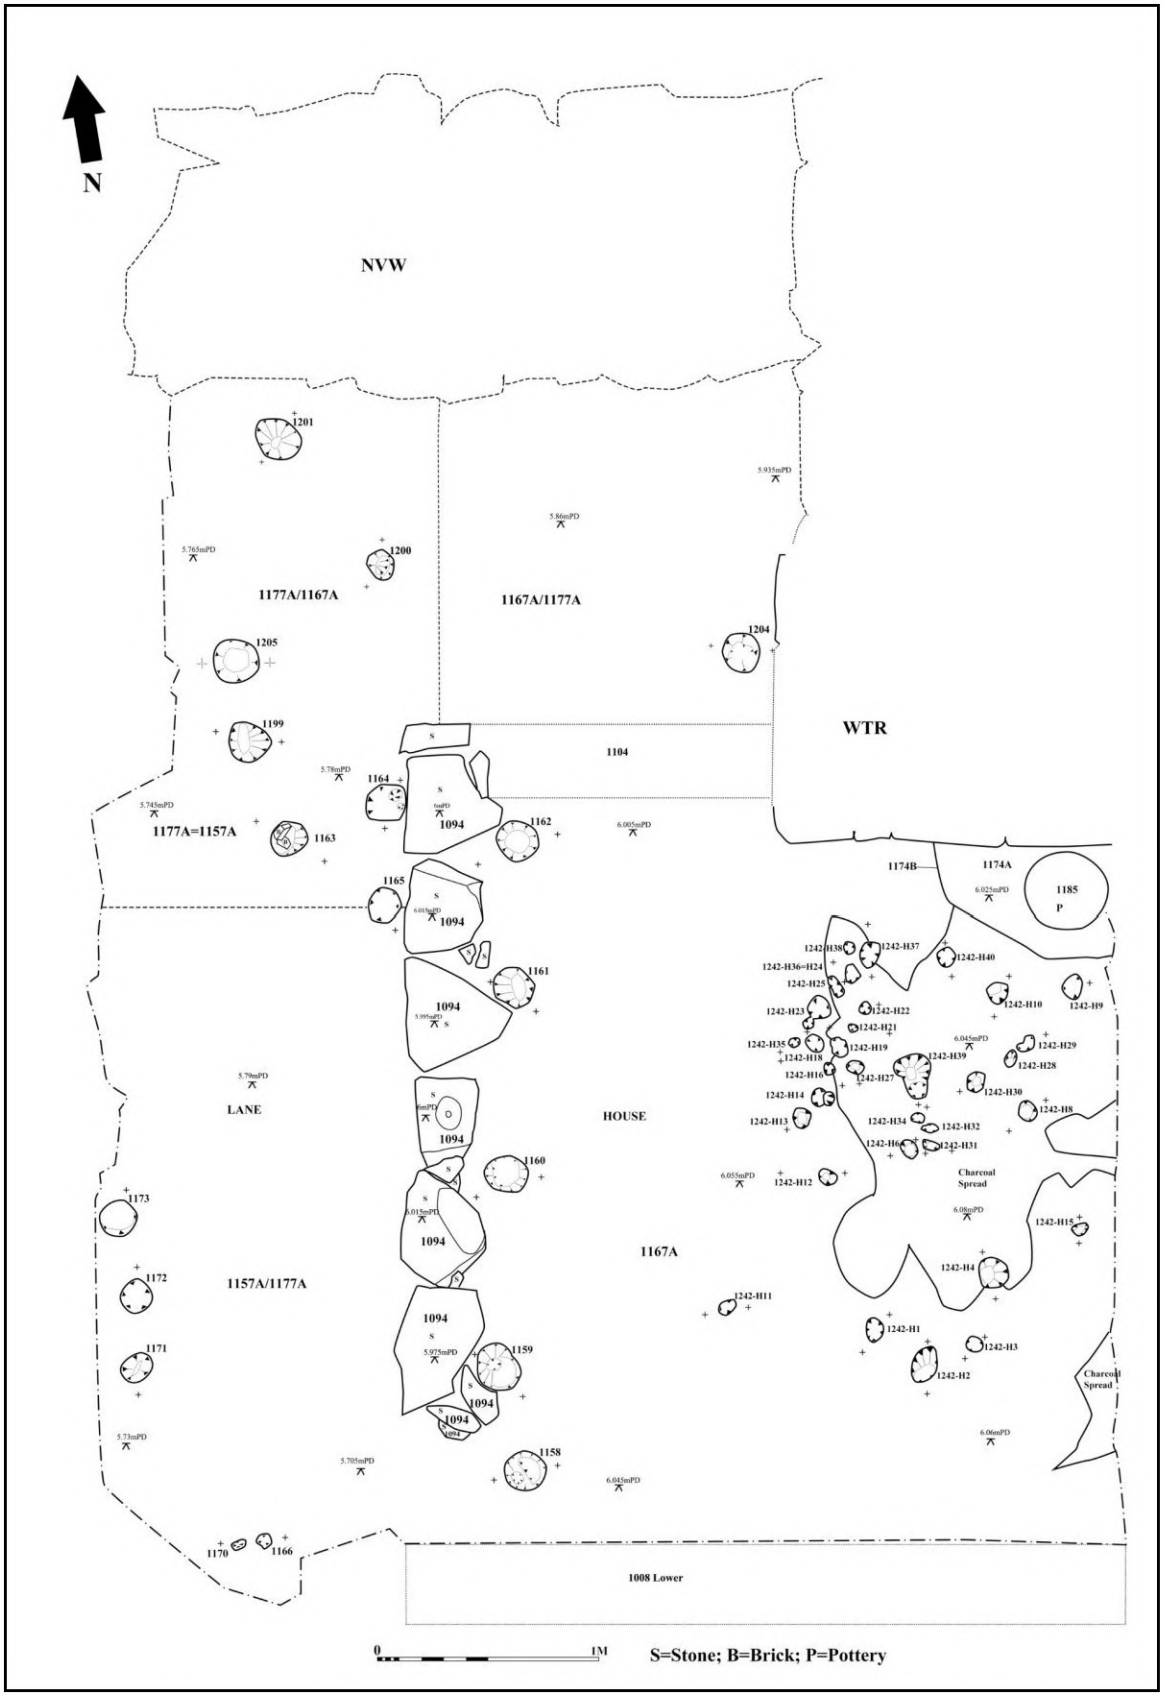


T1.C.13 Plan of postholes [**co.1176A/B**] and [**co.1178A/B**] on [**co.1177**] in lane of T1 watch tower area.

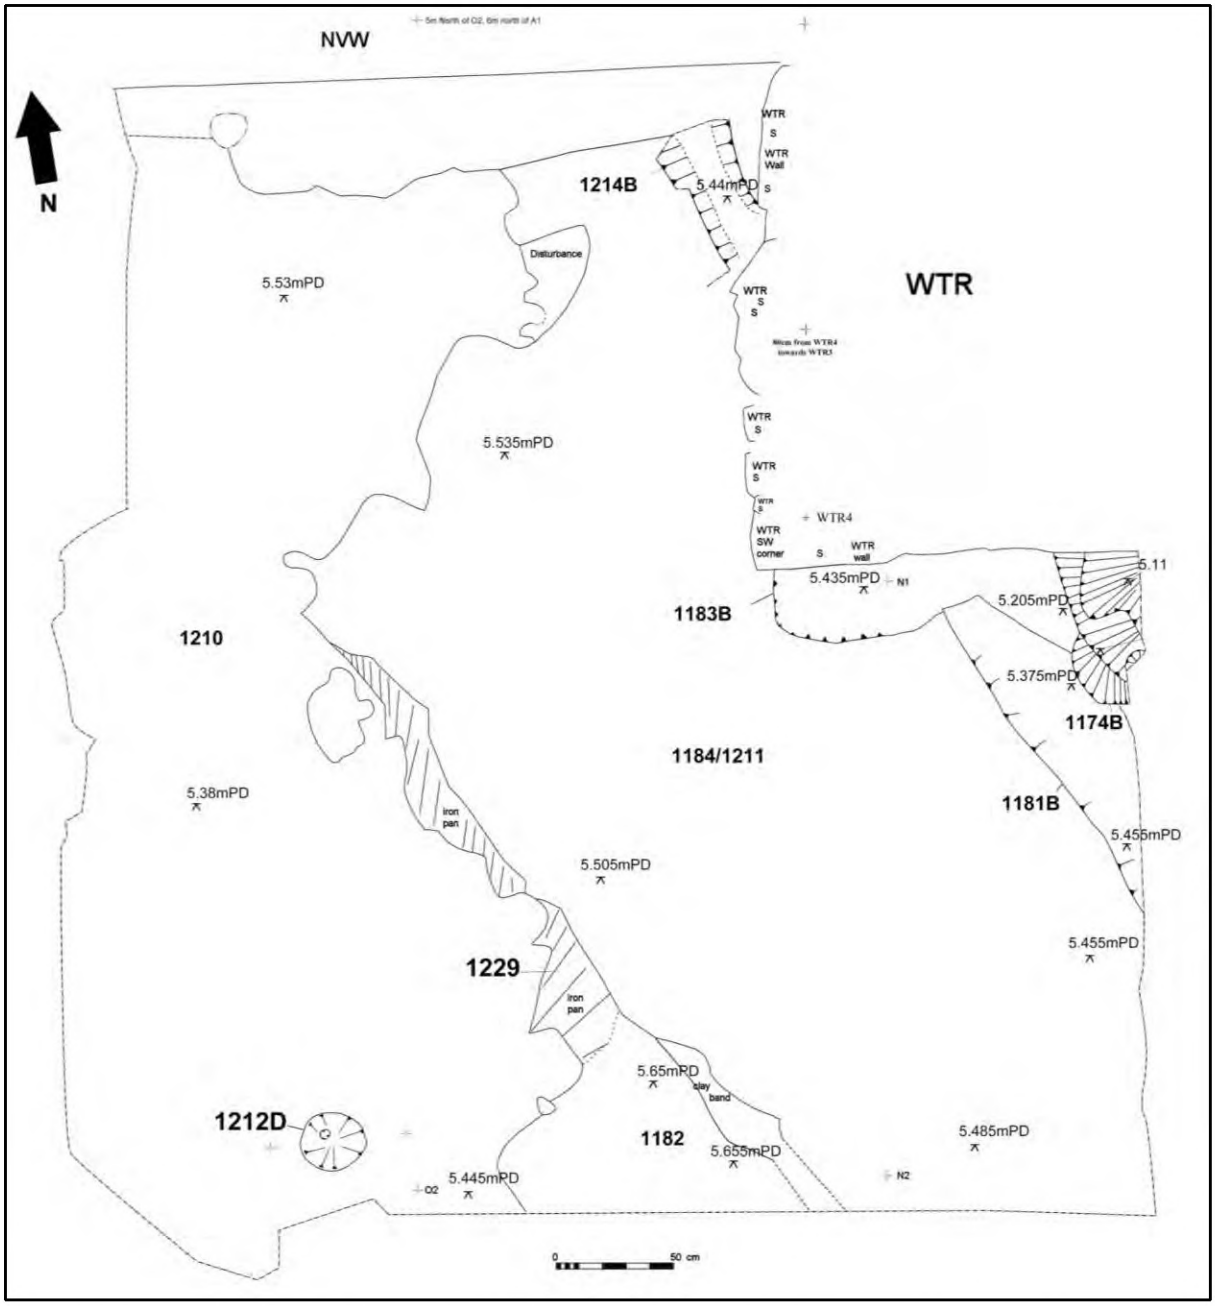
Within WTA and WTA/lane



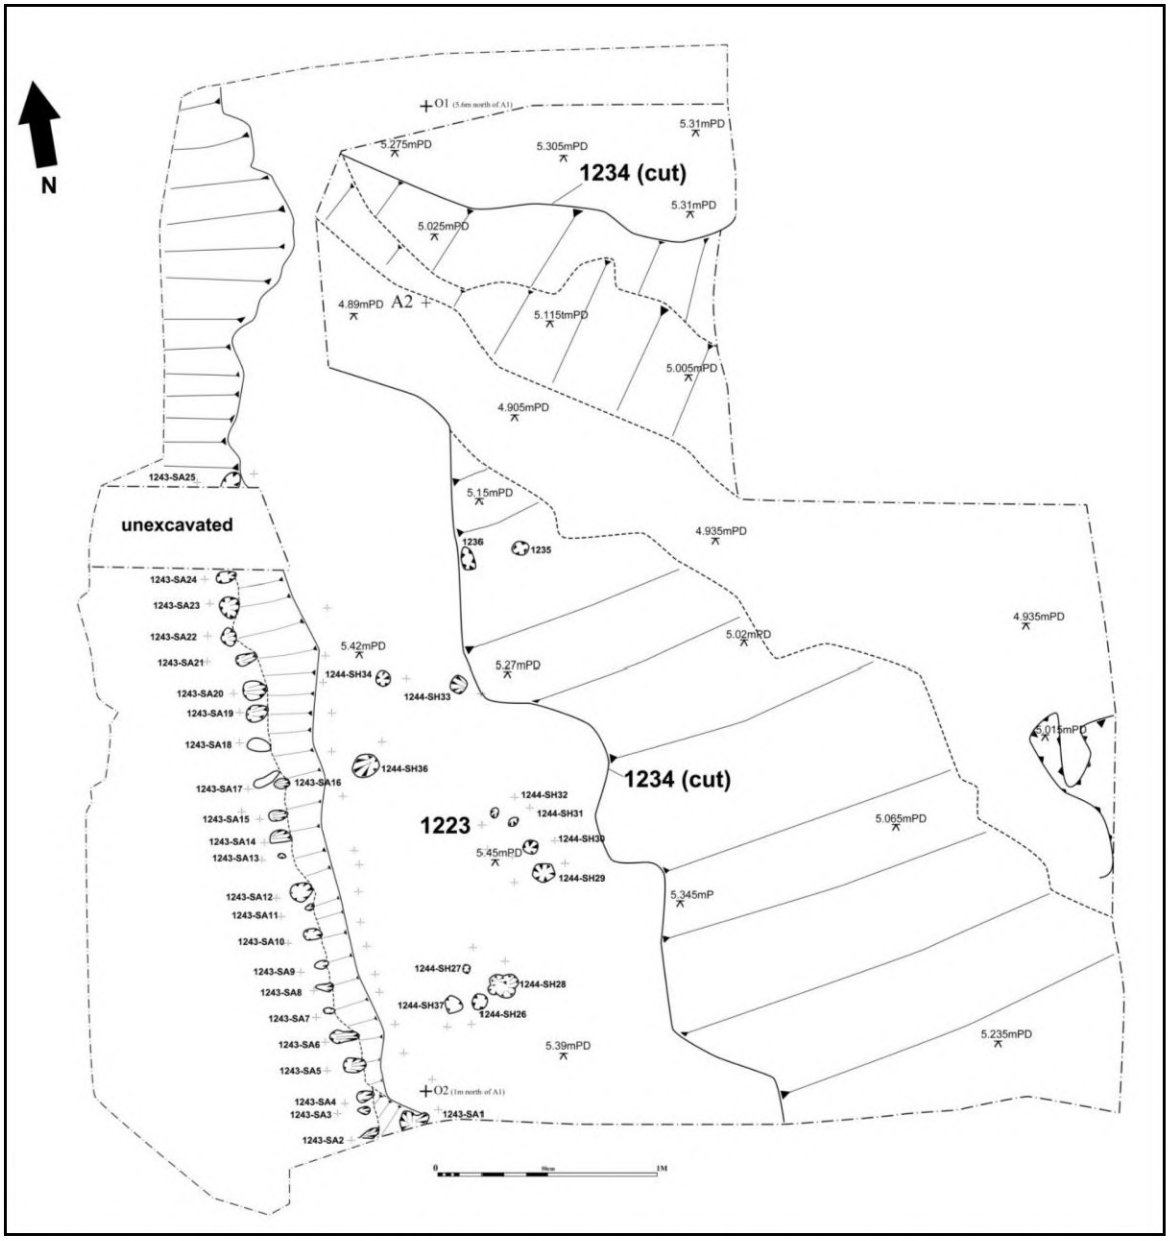
T1.C.14 Plan and profile drawings for features [**co.1111/1112**], [**co.1125B**], [**co.1126B**], [**co.1127B**], [**co.1151A/B**], [**co.1152**], [**co.1154**], [**co.1155**], and pot [**co.1185**] in watch tower area.



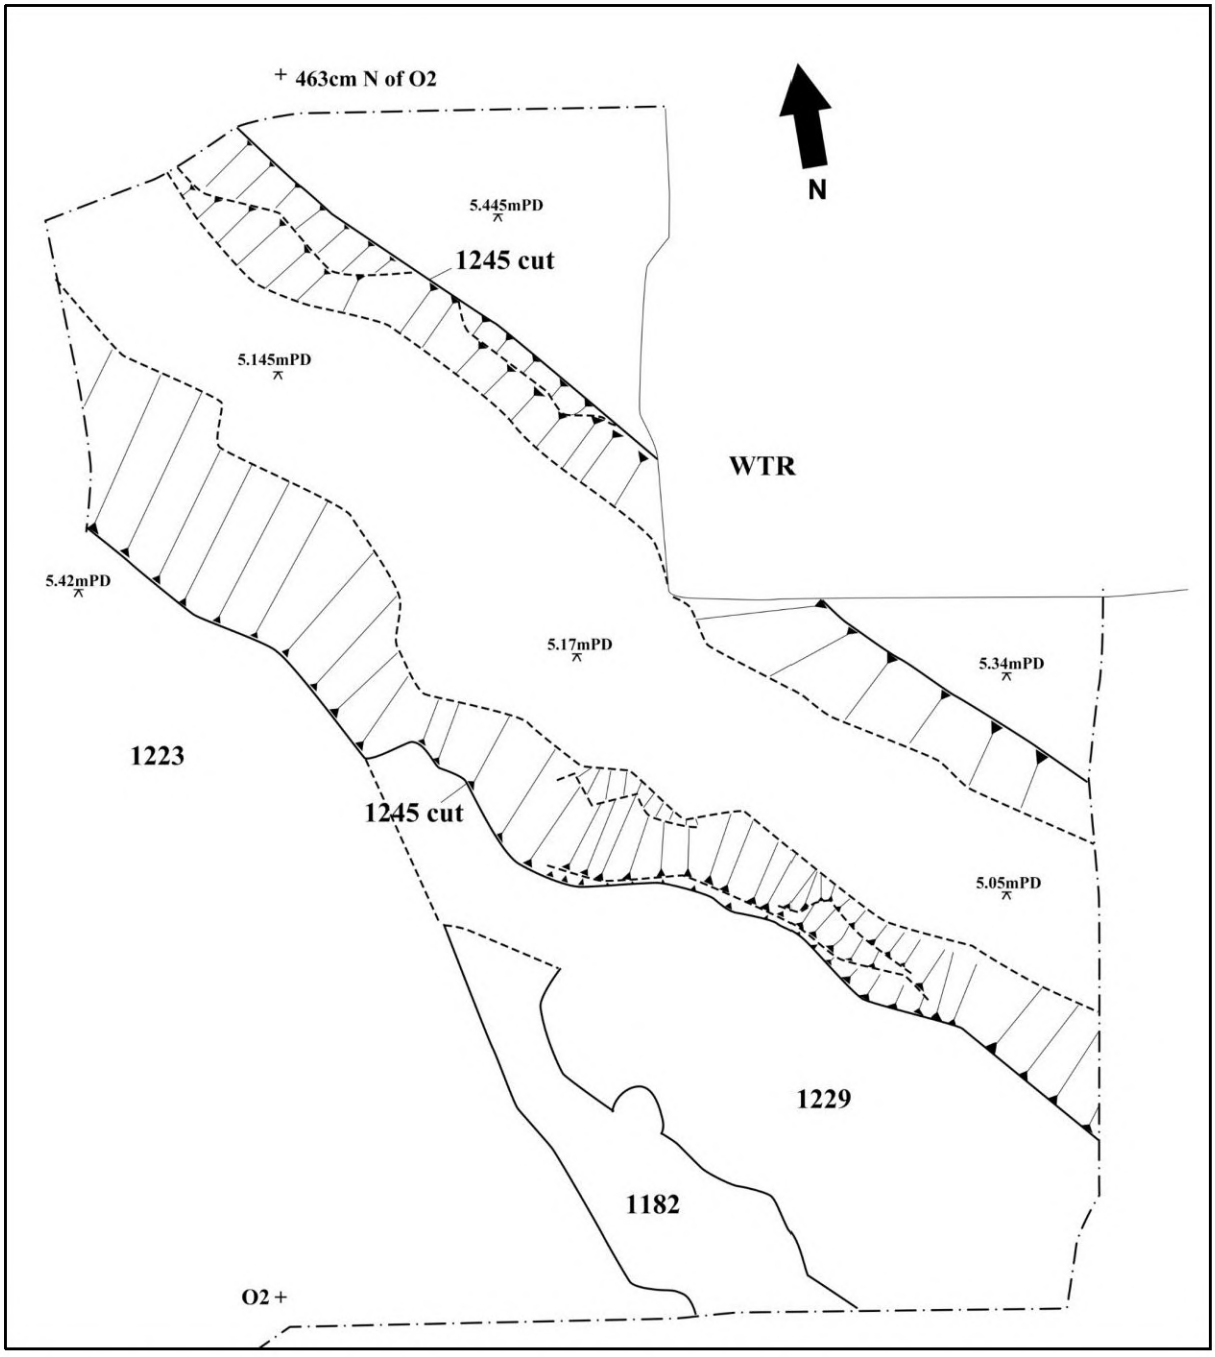
T1.C.15 Multi-feature plan within a same floor surface [**co. 1157A/1177A/1167A**] in watch tower area, including [**co.1094/1104, 1158-1166, 1170-1173, 1174A/B, 1185, 1199-1201, 1204-1205, 1242-Hs**].



T1.C.16 Plan of **[co.1181B]**, **[co.1182]**, **[co.1183B]**, **[co.1184/1211]**, **[co.1210]**, **[co.1212D]**, **[co.1214B]**, **[co.1174B]**, and **[co.1229]** in T1 watch tower area.



T1.C.17 Plan of stake hole alignment [**co.1243-SH1 to 25**], stake holes [**co.1244-SH26 to 37**], [**co.1235**] and [**co.1236**] and ditch cut [**co.1234**] on [**co.1223**].



T1.C.18 Plan of ditch cut [**co.1245**] on [**co.1223**] within the WTA.

Stratigraphical soil sections and sections drawings of structural remains

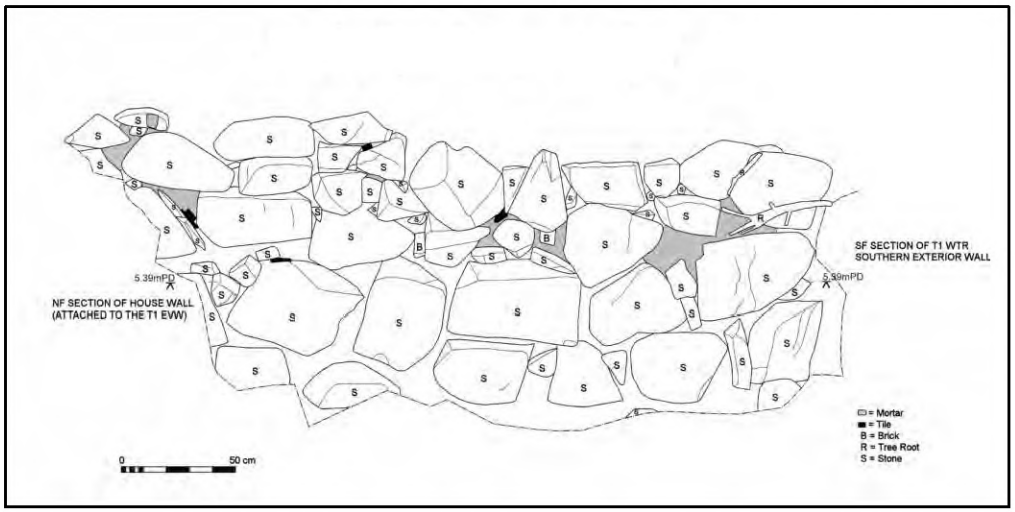
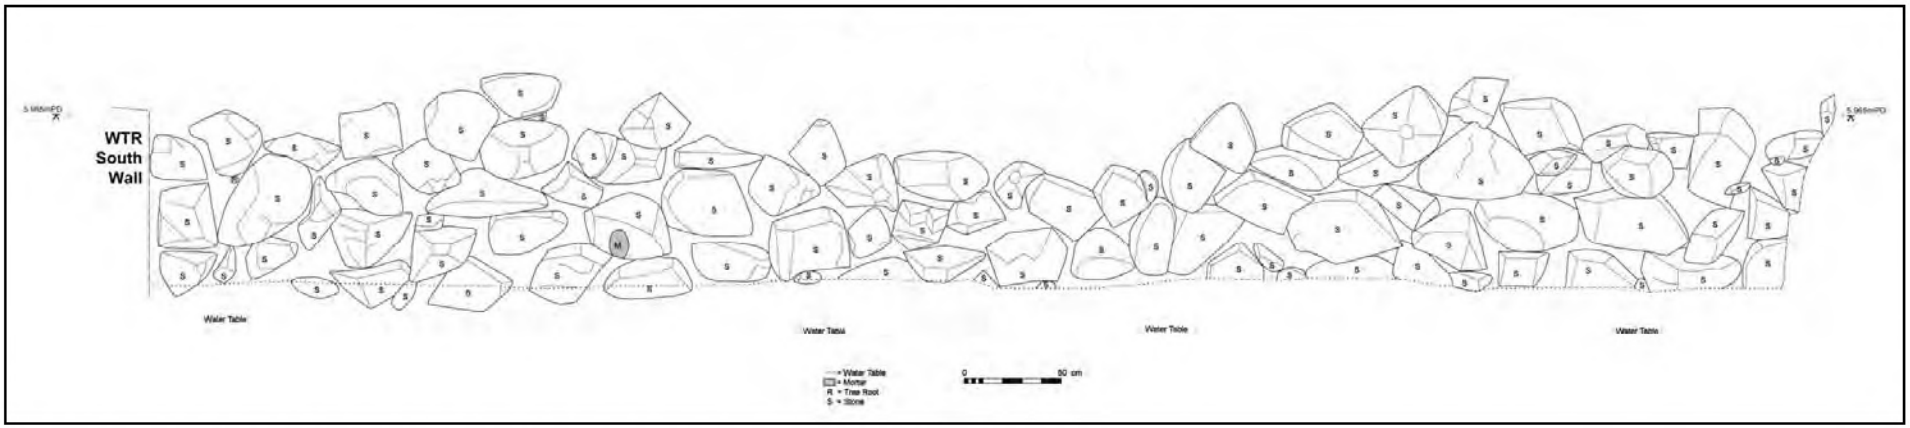
T1.C.20 East facing section (exterior) of eastern village wall [**co.1252**].

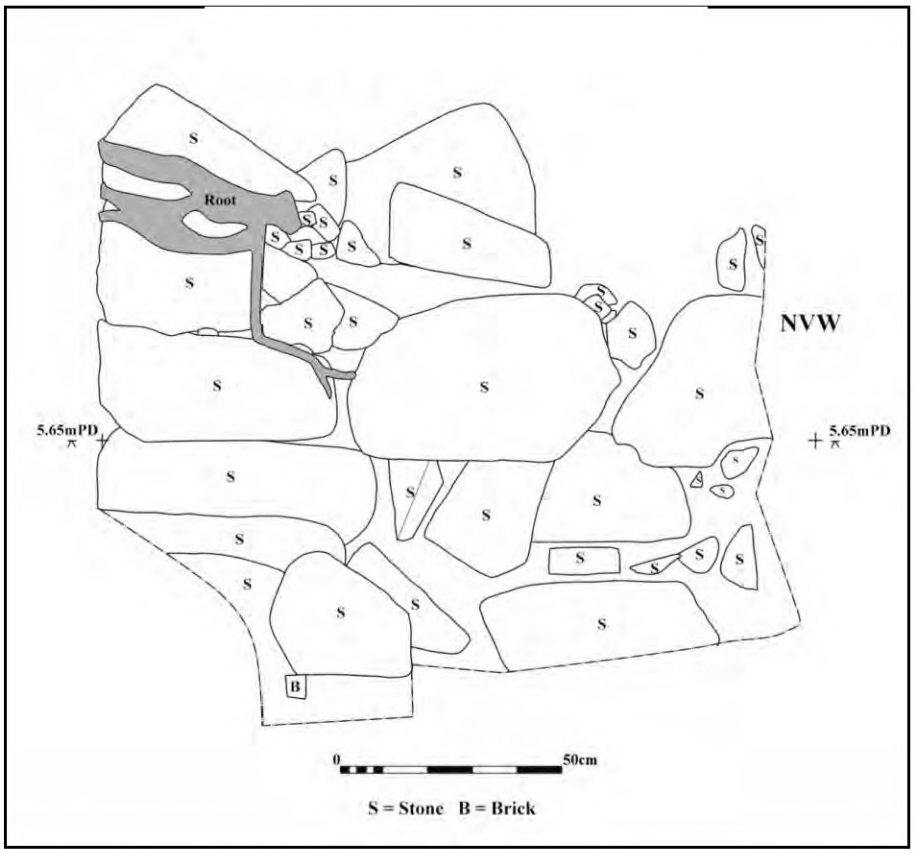


T1.C.21 East facing section (exterior) of eastern village wall [**co.1252**] near watch tower room; continuation of 1.C.20 above towards the north.

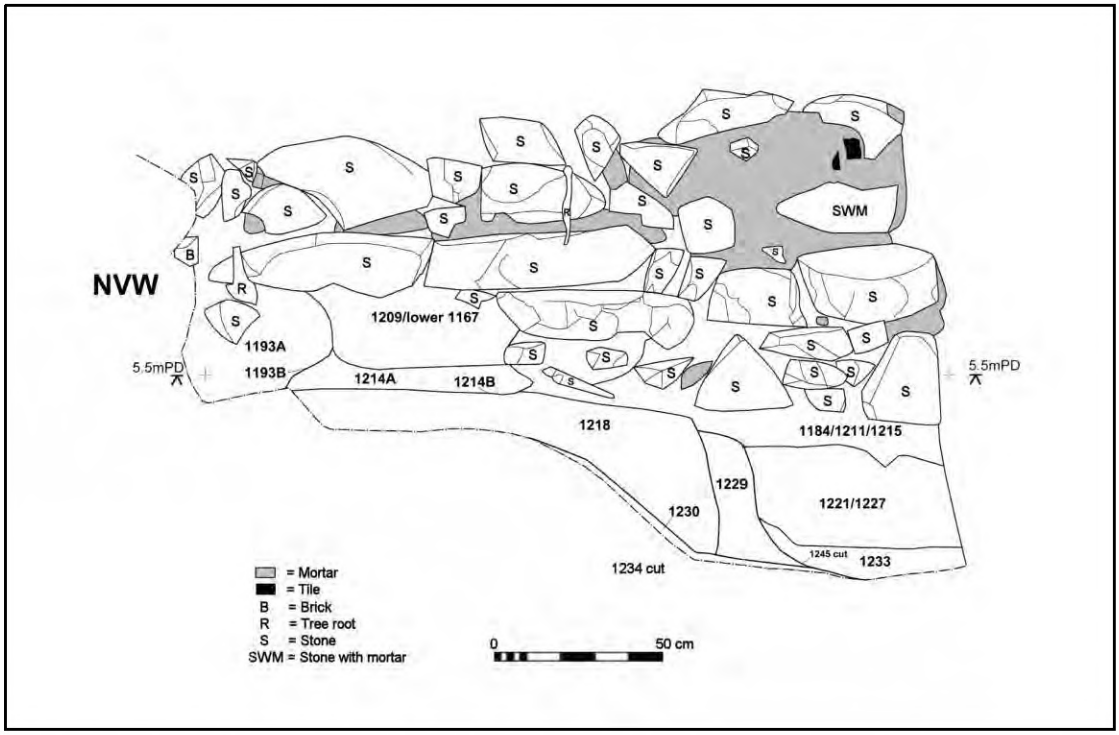


T1.C.22 West facing section (interior) of eastern village wall [**co.1252**].

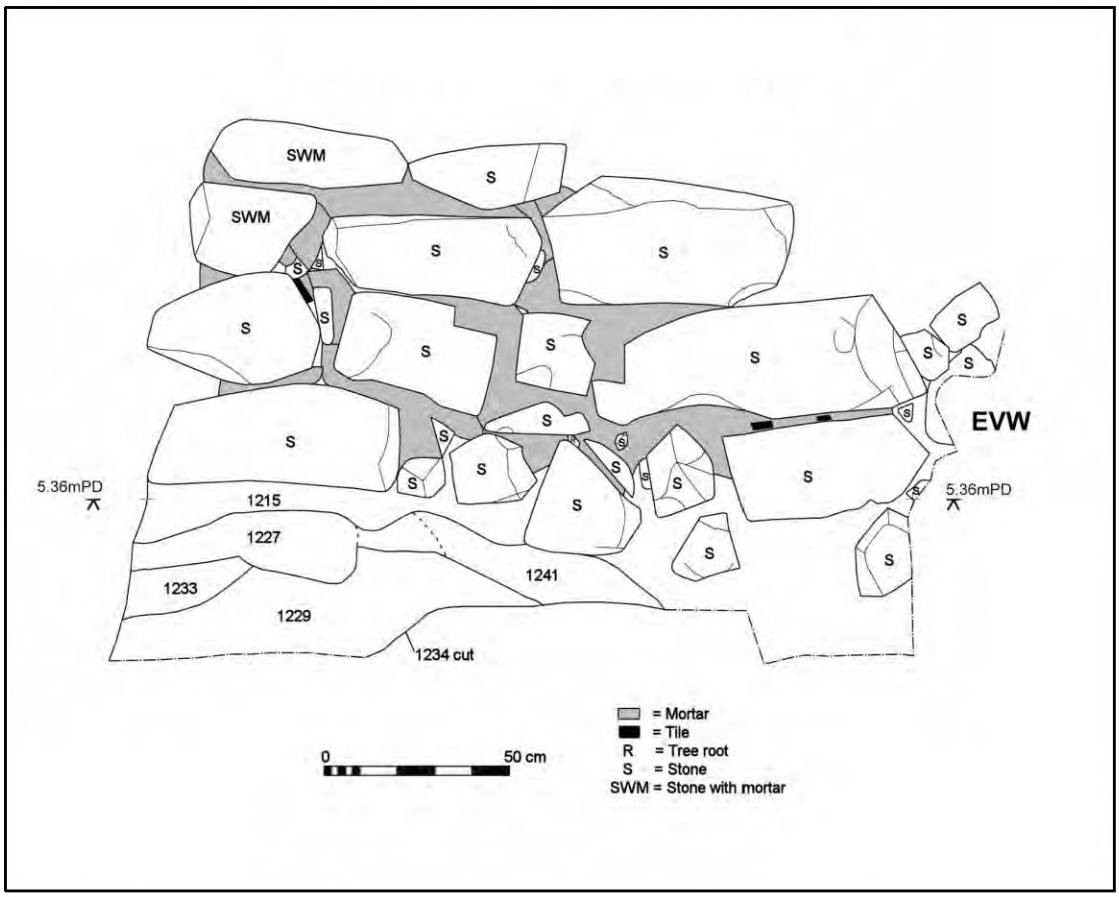
Watch tower room walls



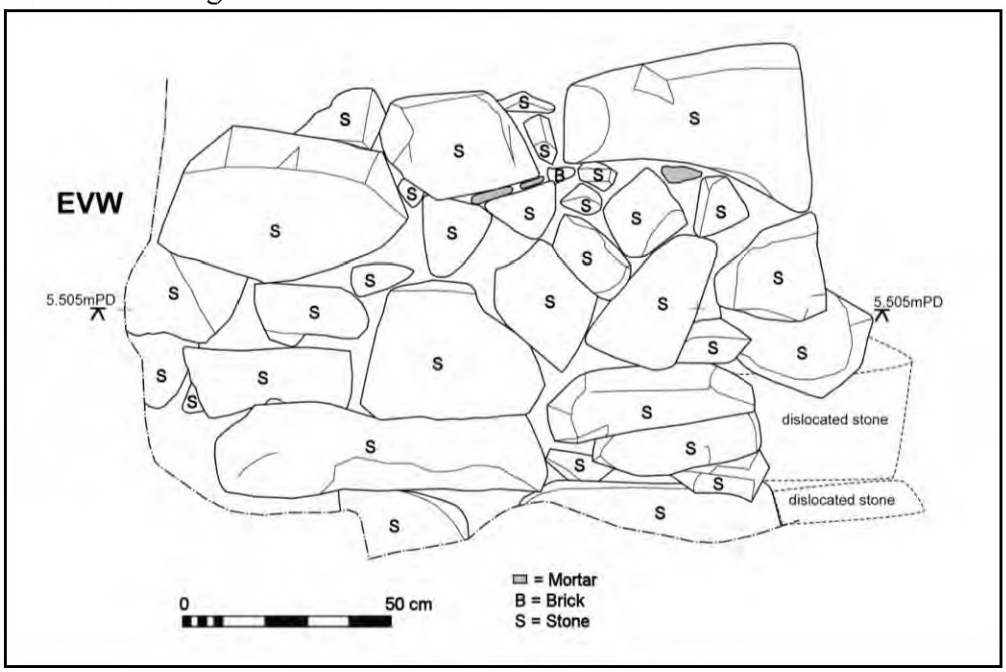
T1.C.23 West facing section of (exterior) watch tower room **[co. 1251]** western wall in moat.



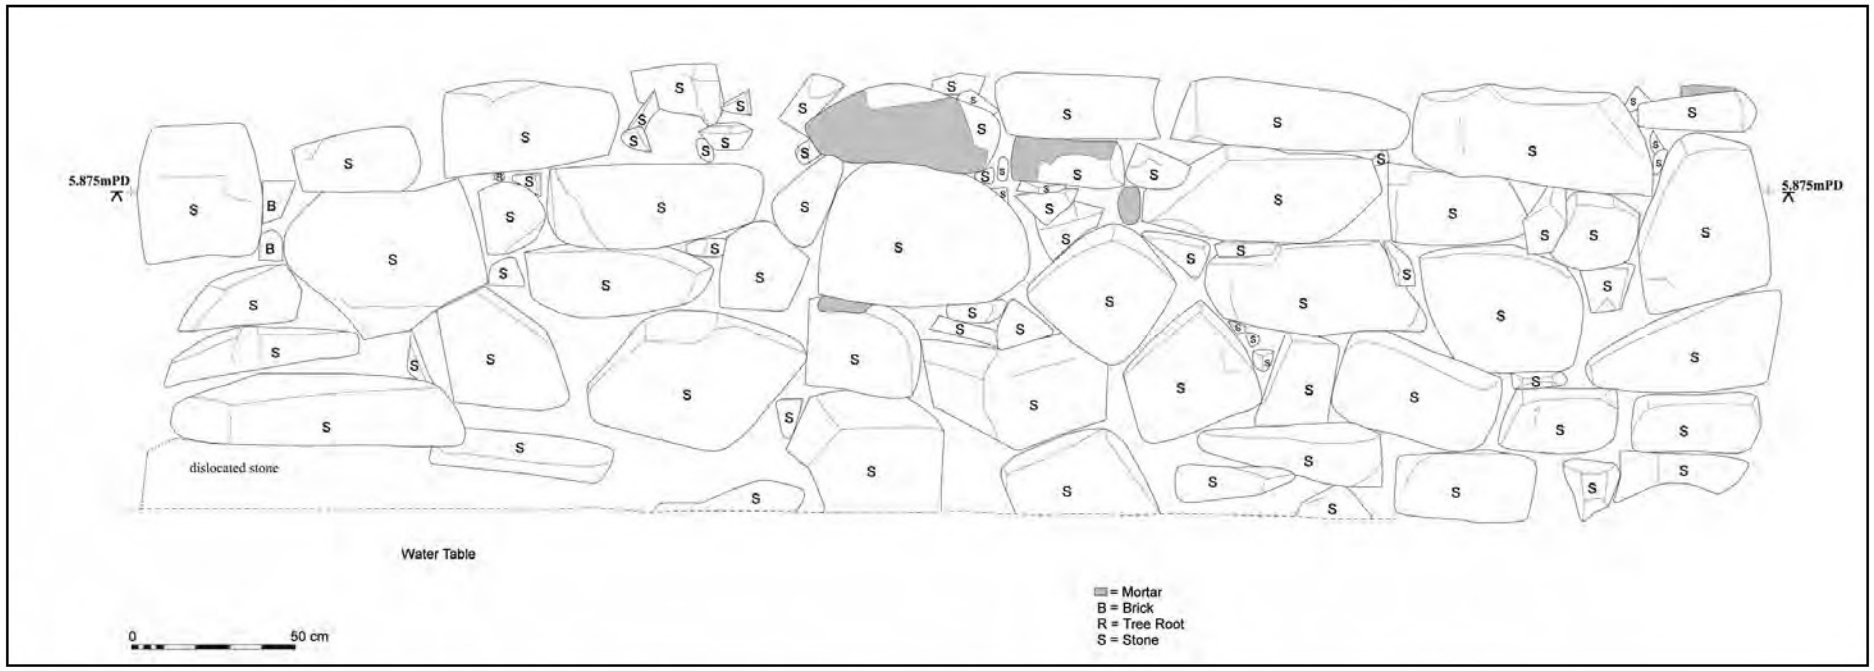
T1.C.24 West facing section of (exterior) watch tower room **[co. 1251]** western wall inside village.



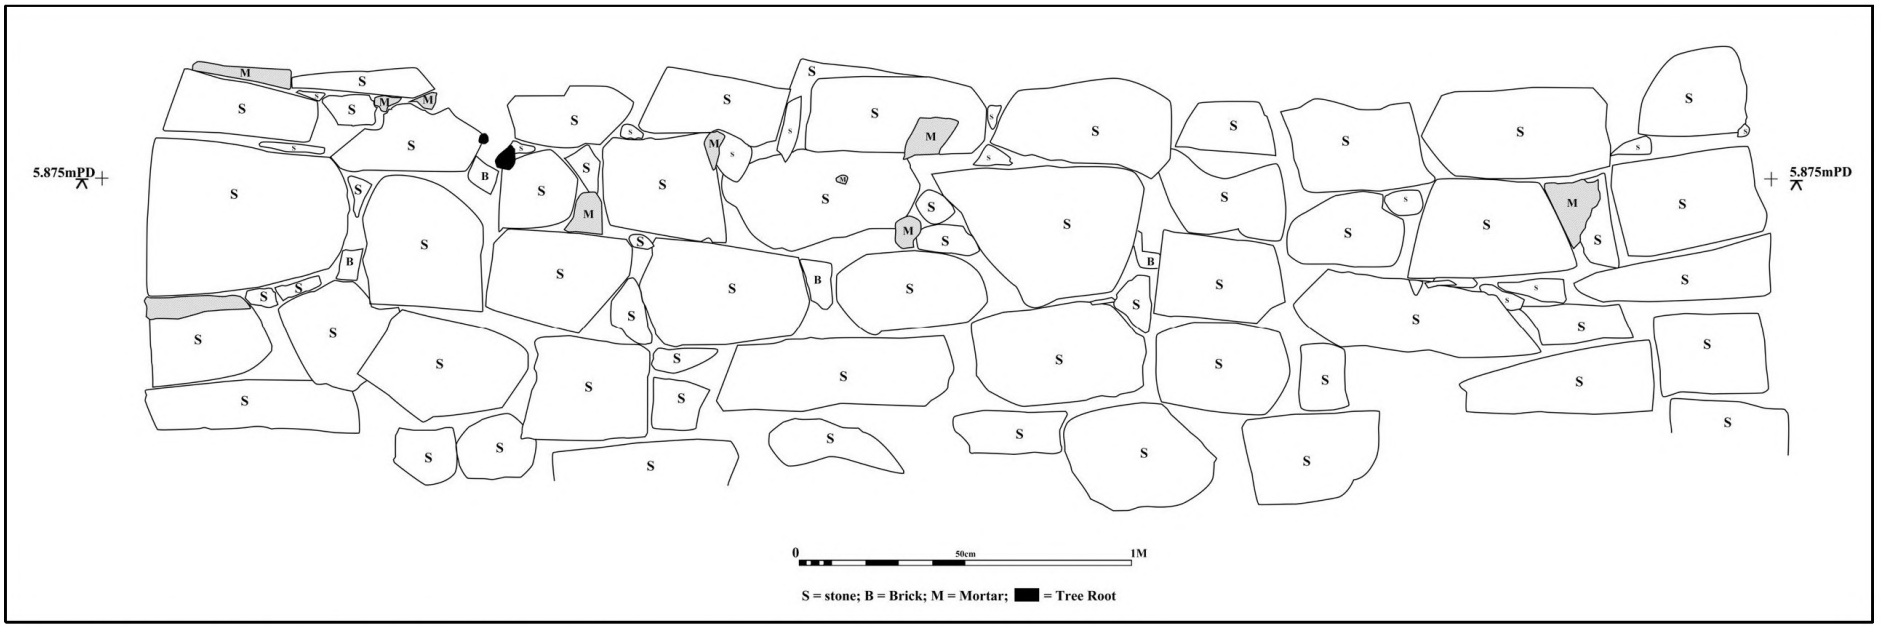
T1.C.25 South facing section of (exterior) watch tower room [**co. 1251**] southern wall inside village.



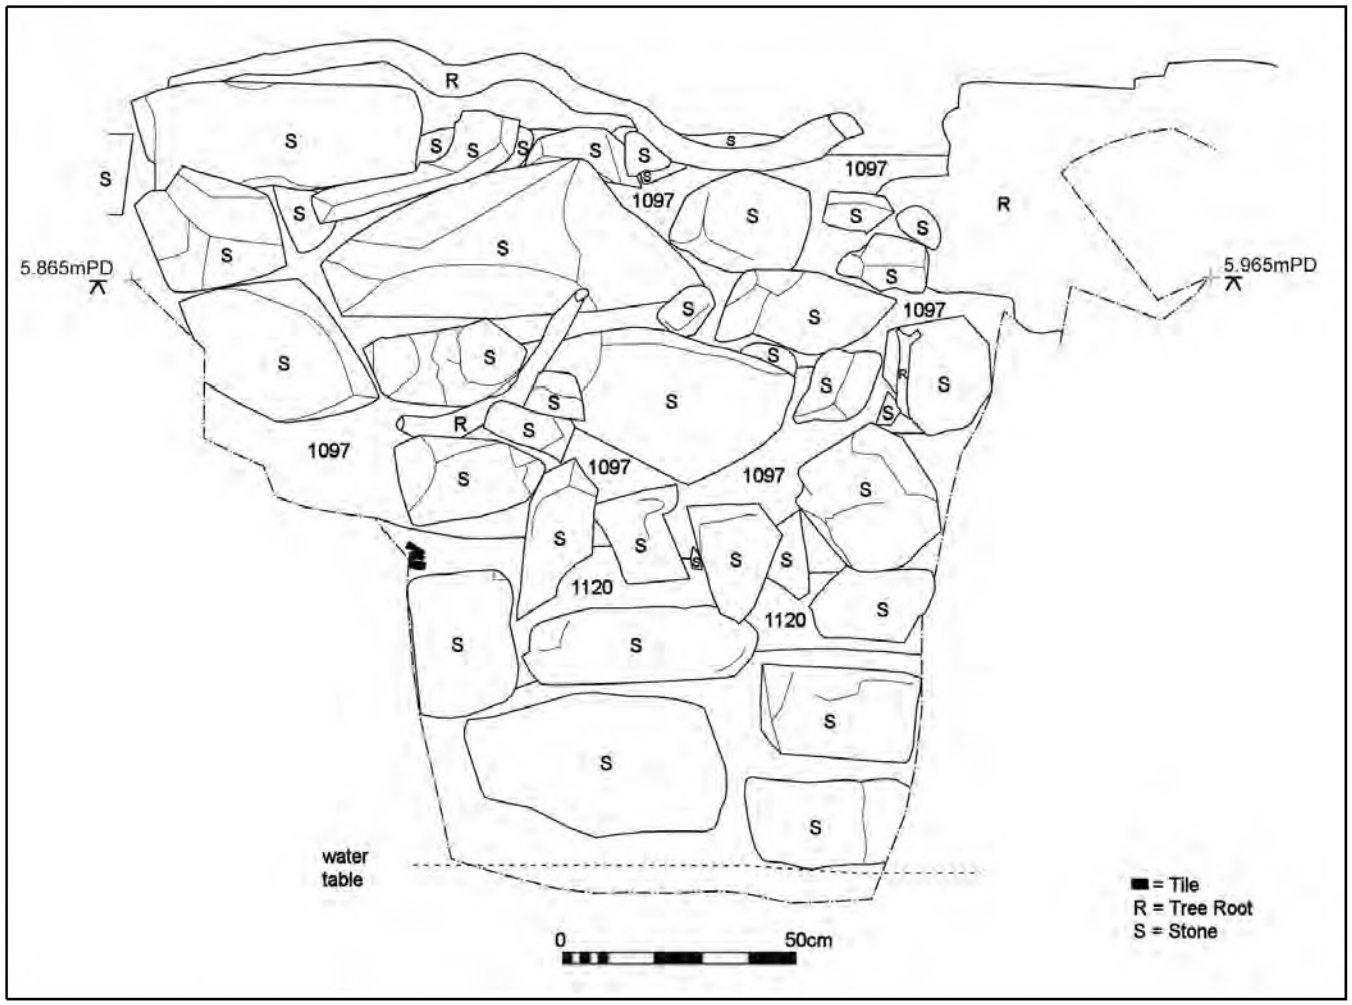
T1.C.26 South facing section of (exterior) watch tower room [**co. 1251**] southern wall in moat.



T1.C.27 East facing section (exterior) of watch tower room [**co. 1251**] eastern wall.

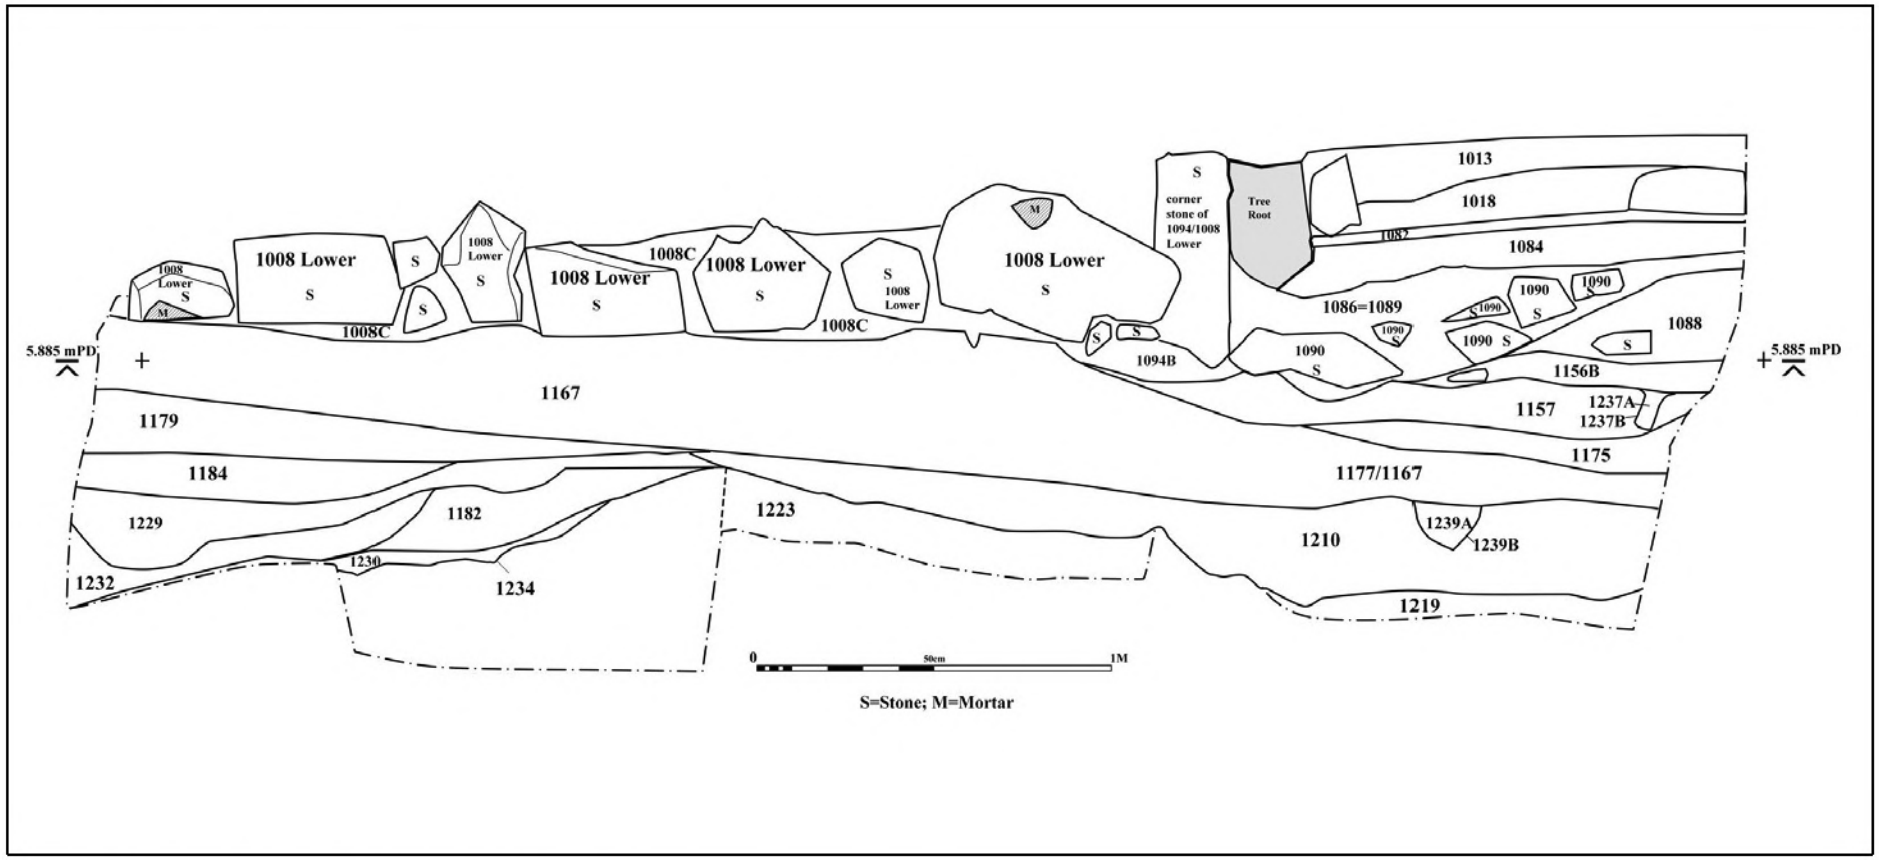


T1.C.28 North facing section (exterior) of watch tower room **[co. 1251]** northern wall.

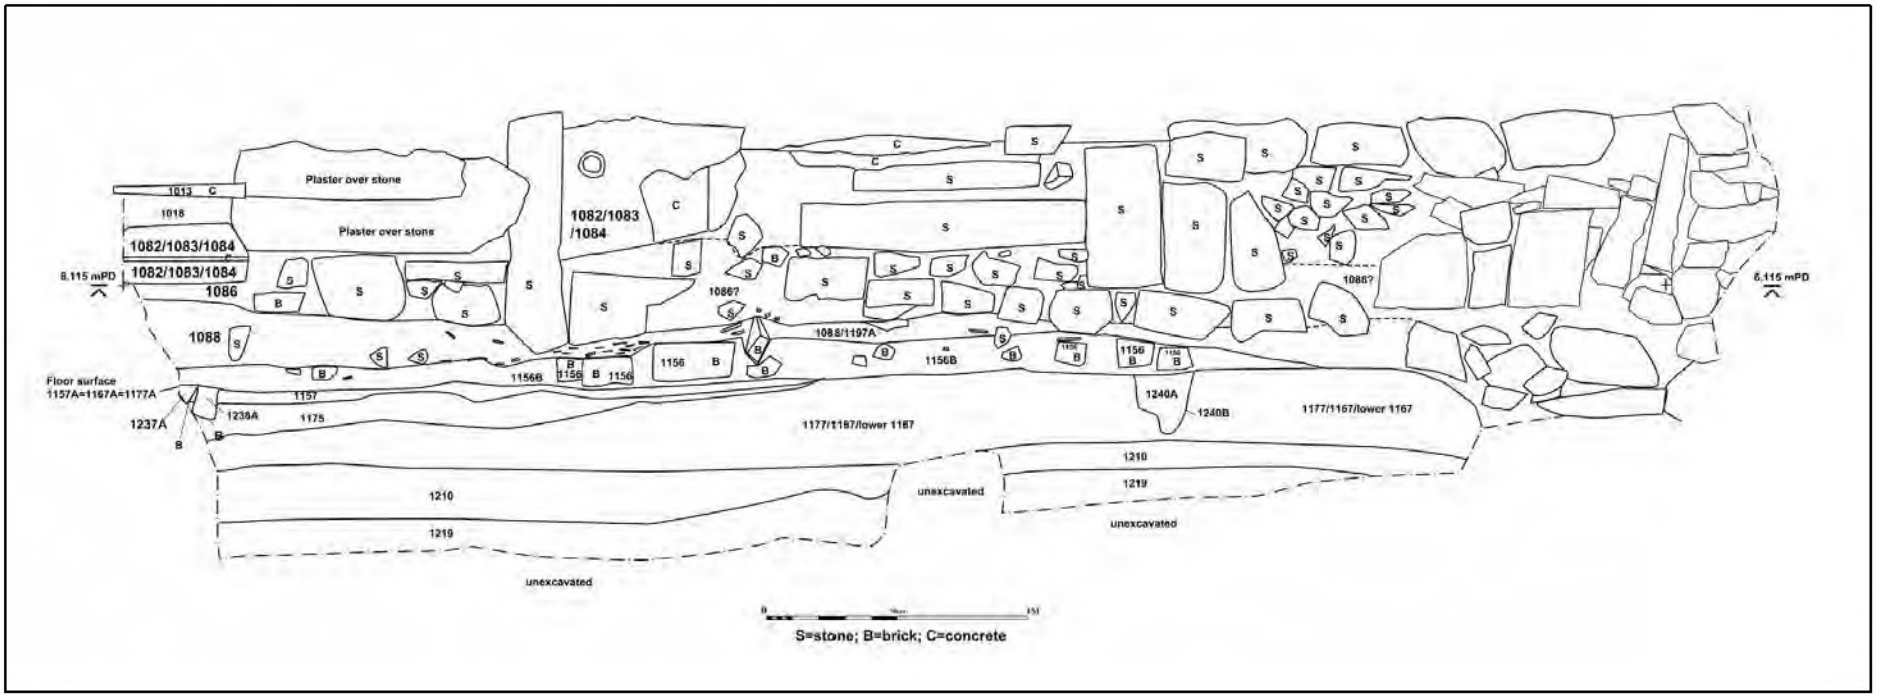


T1.C.29 west facing section (interior) of watch tower room [**co. 1251**] eastern wall.

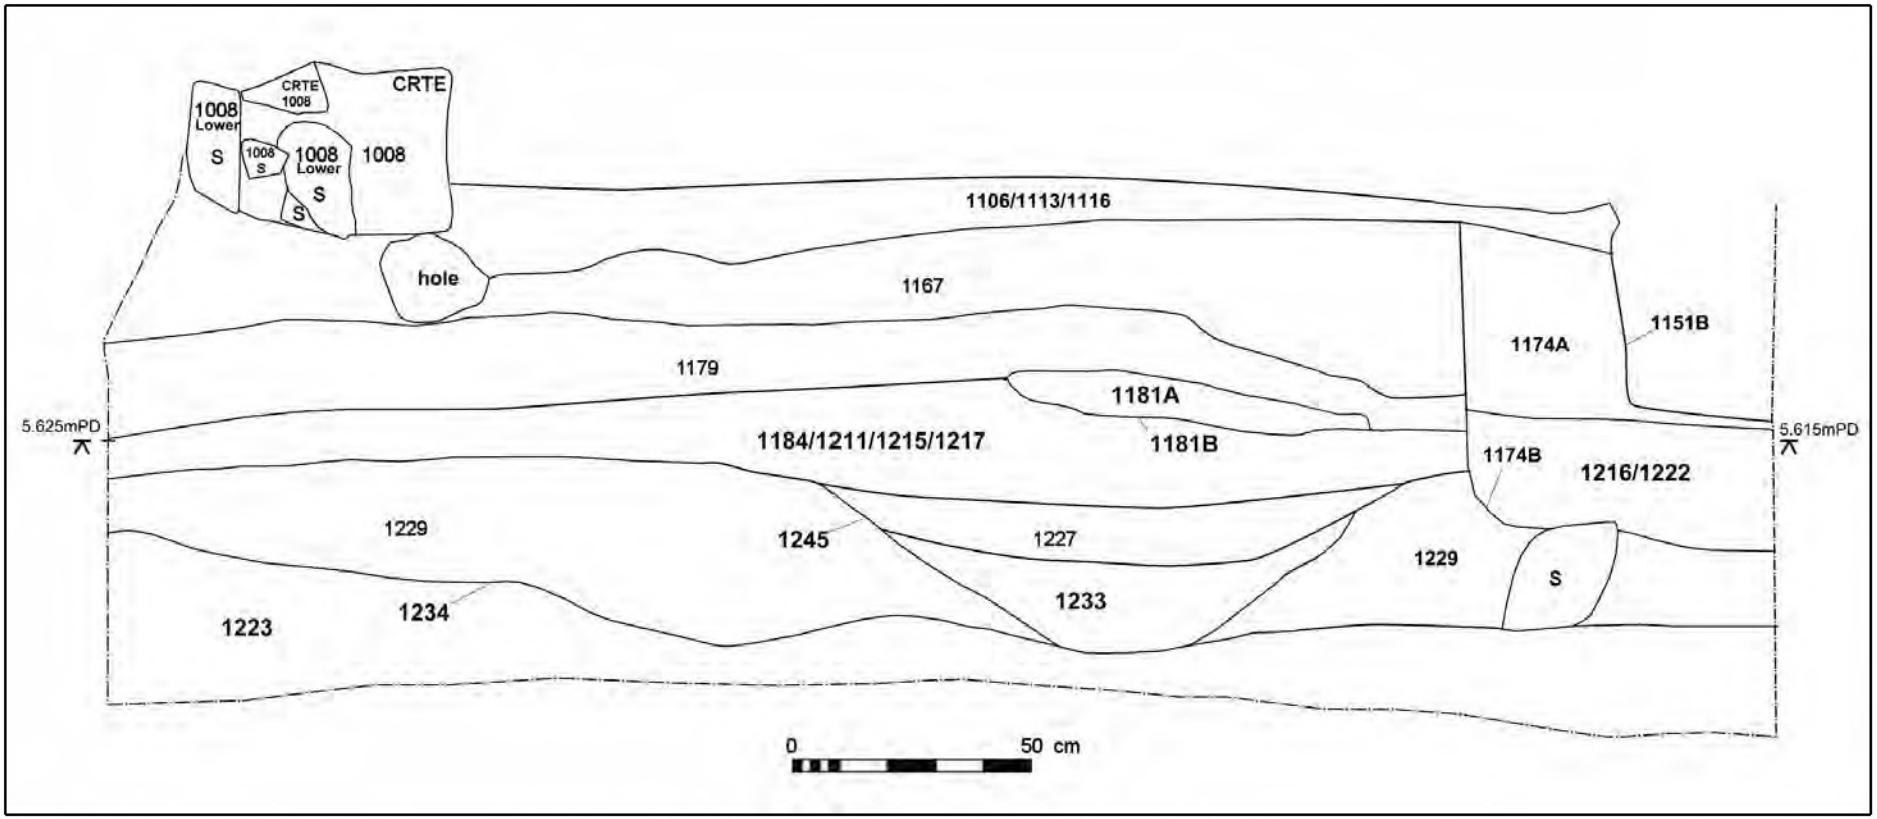
Soil stratigraphical sections



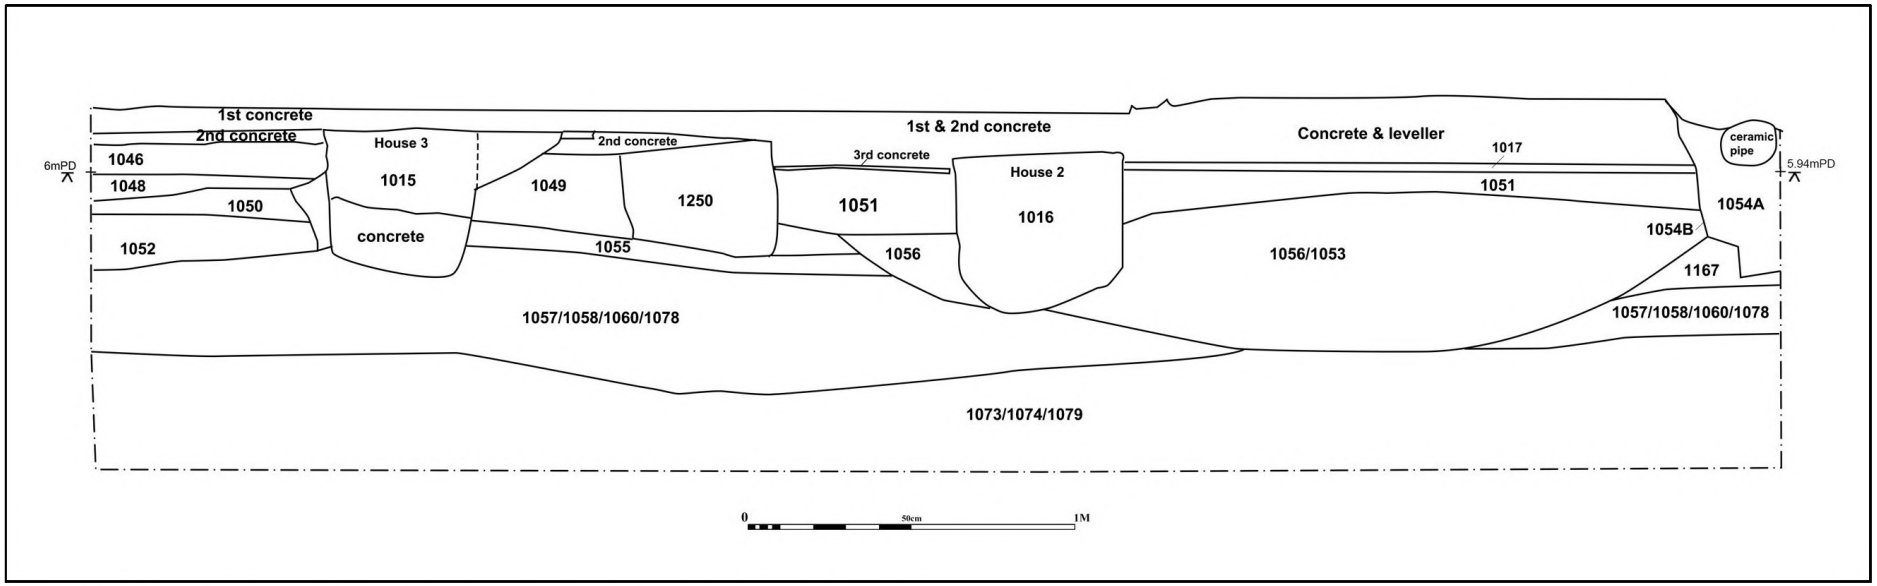
T1.C.30 North facing section of watch tower area.



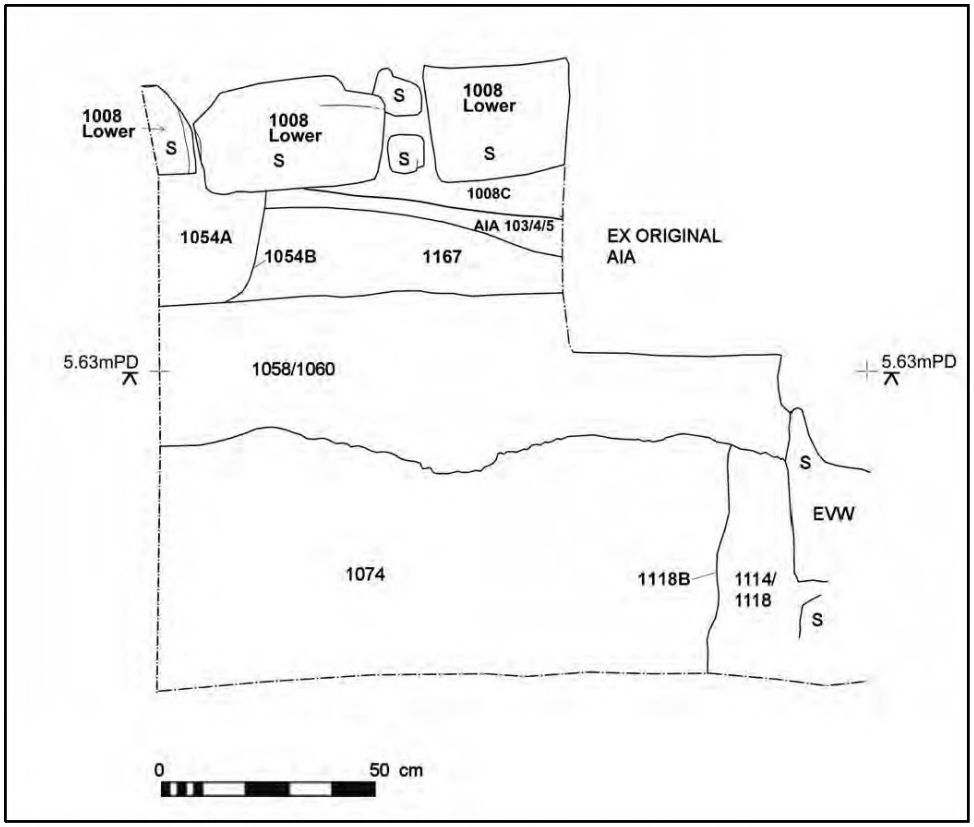
T1.C.31 East facing section of watch tower area.



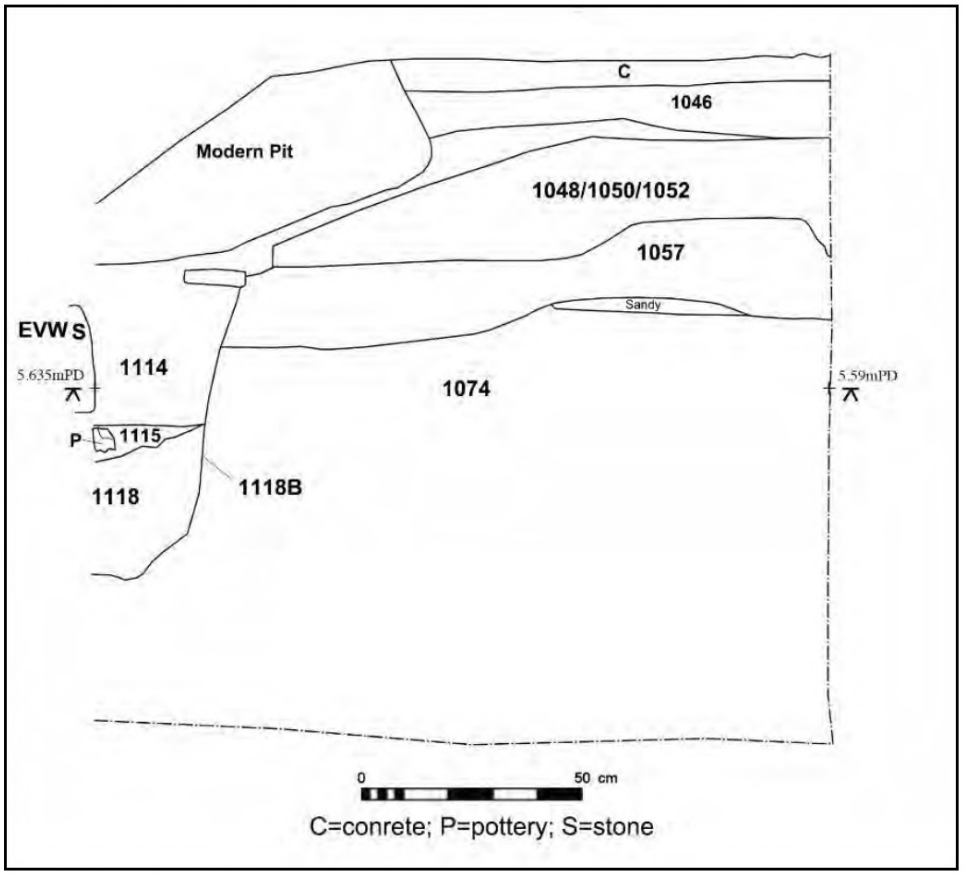
T1.C.32 East facing section of watch tower area parallel with eastern village wall; Note: S=Stone.



T1.C.33 East facing section of village wall interior area.

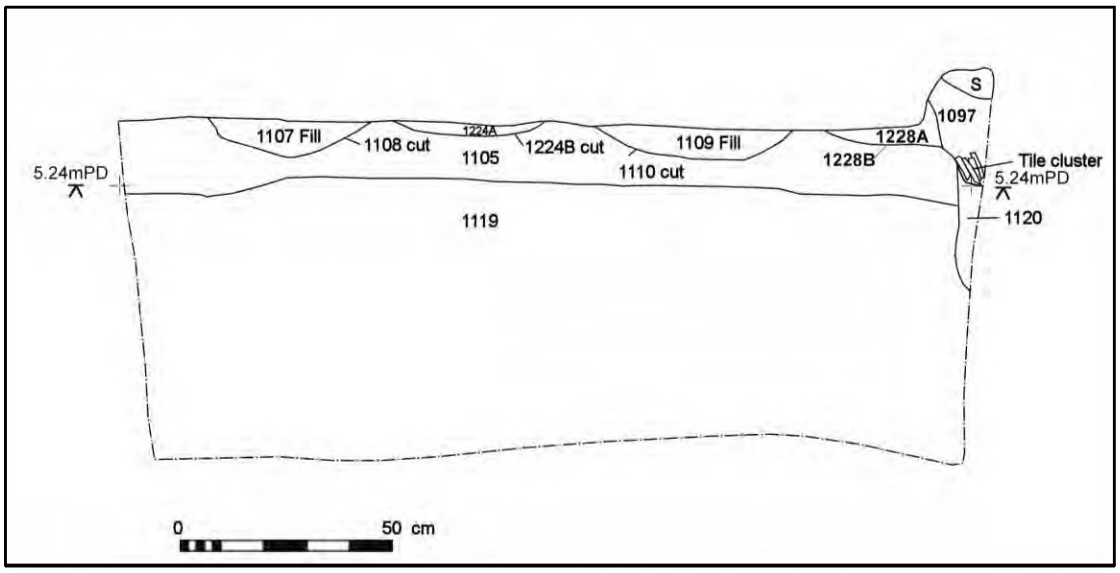


T1.C.34 South facing section of village wall interior area.

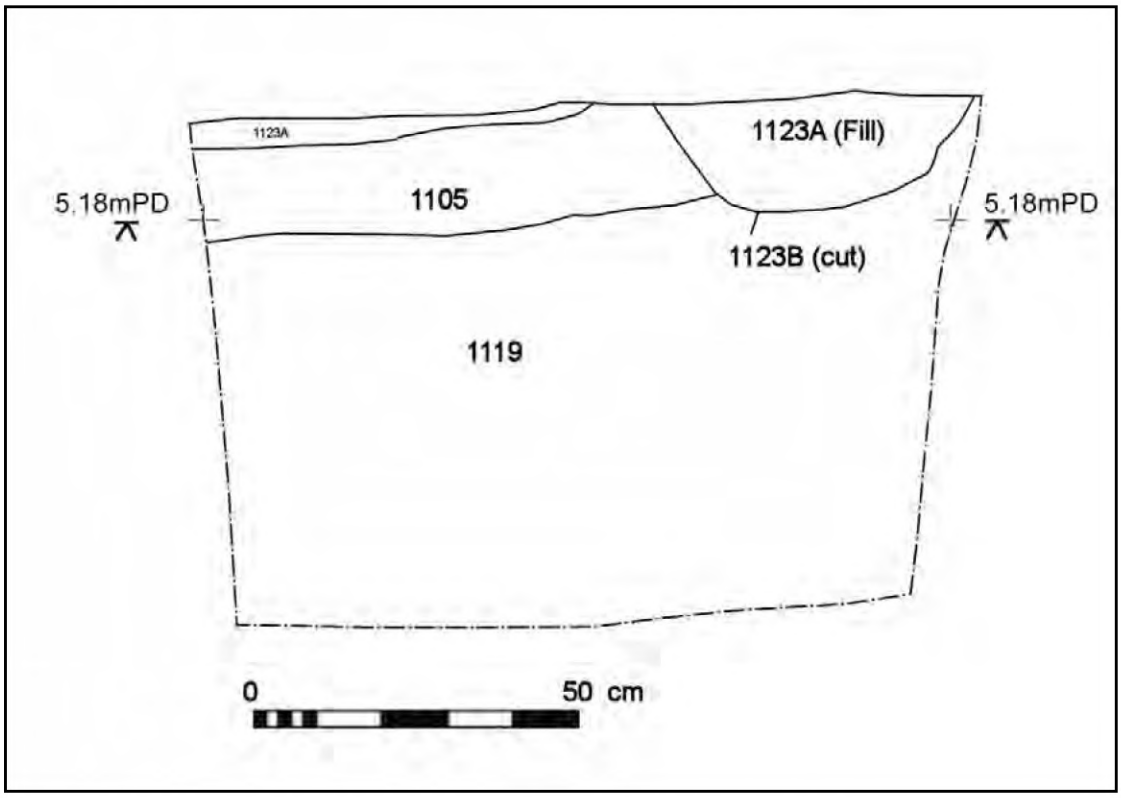


T1.C.35 North facing section of village wall interior area

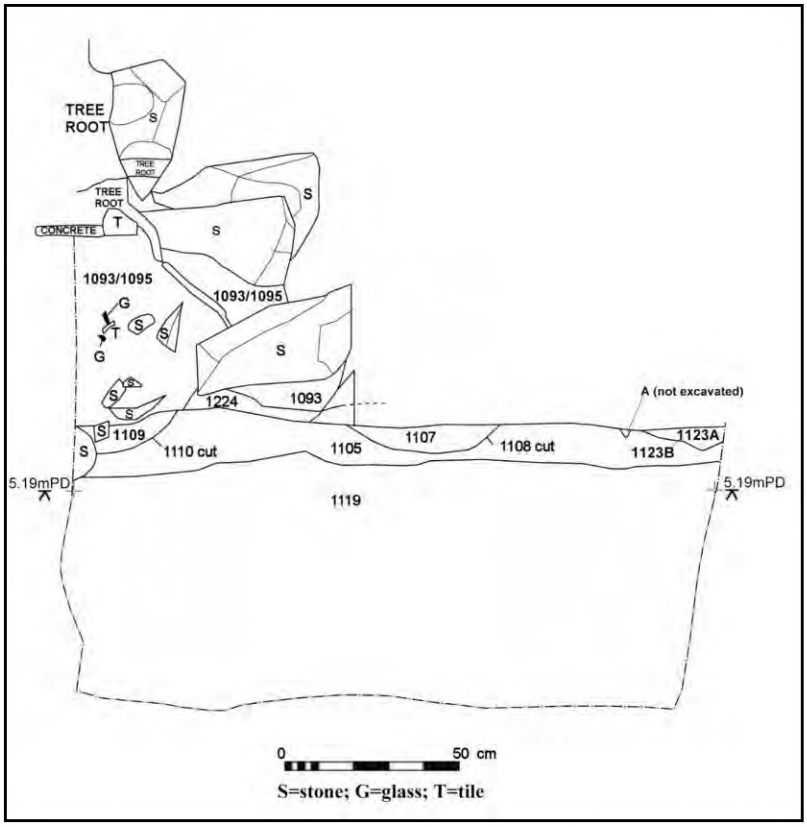
WTR sondage soil profiles



T1.C.36 South facing section of sondage inside watch tower room

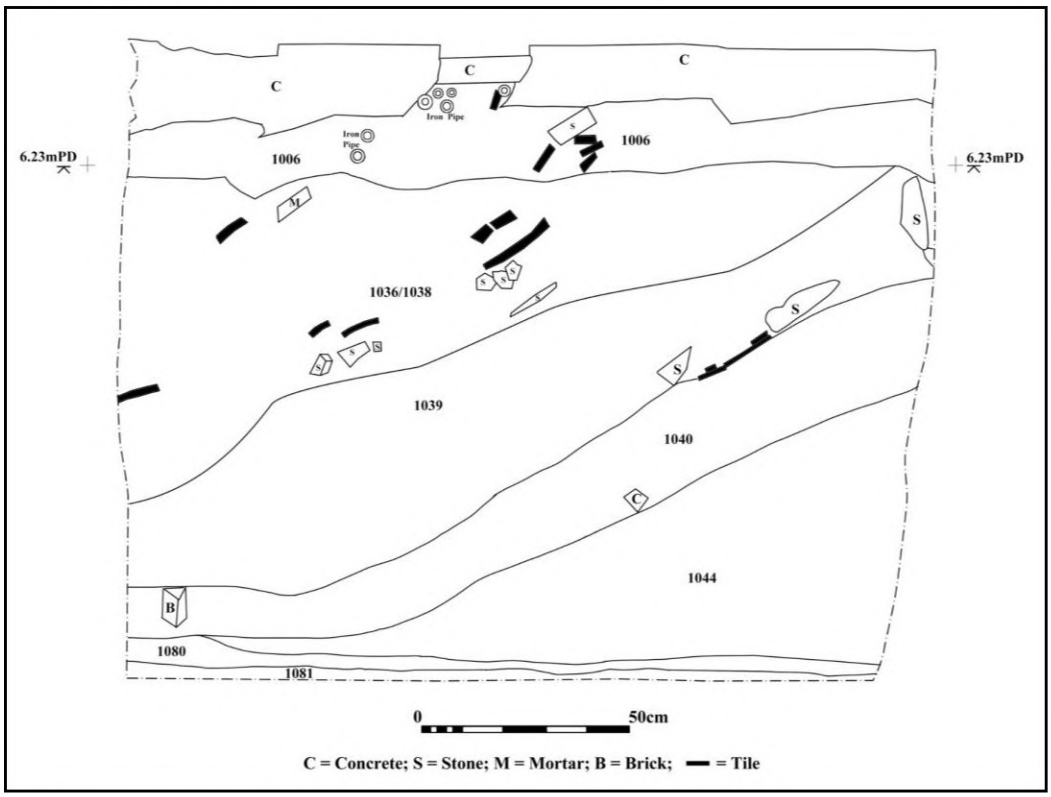


T1.C.37 East facing section of sondage inside watch tower room

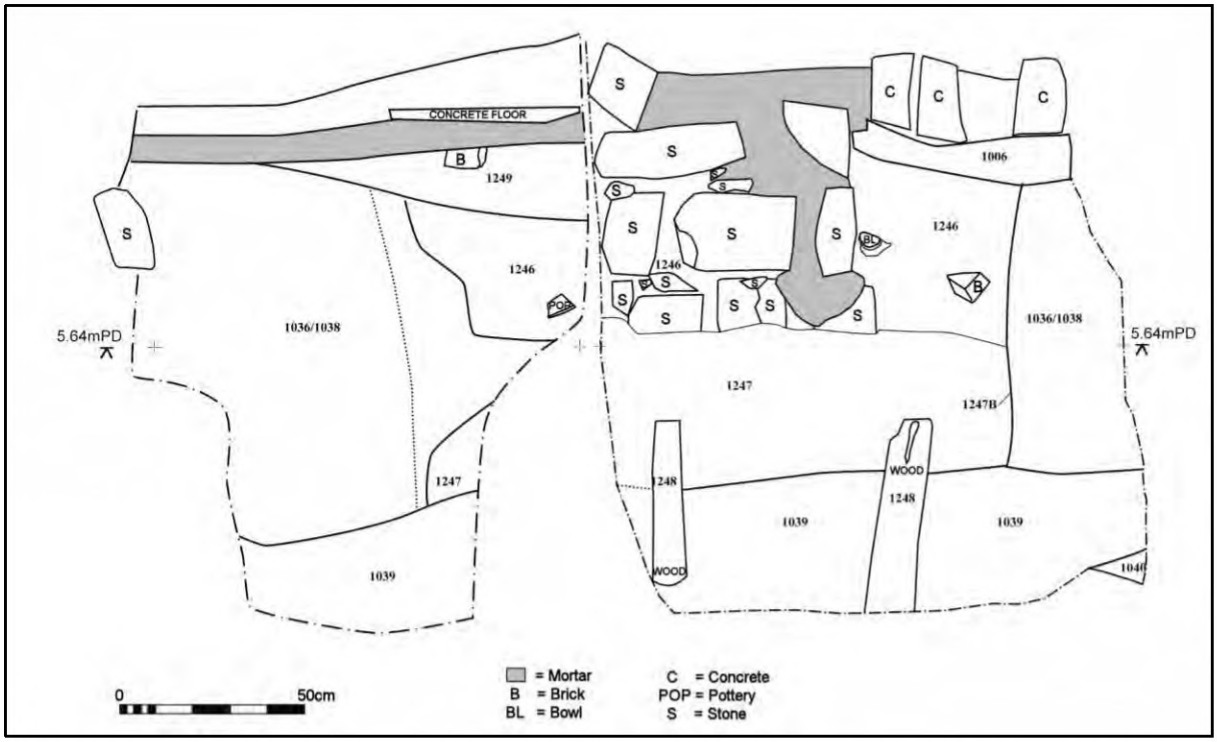


T1.C.38 North facing section of sondage inside watch tower room; note: stones on top of the section are collapsed stones from the watch tower.

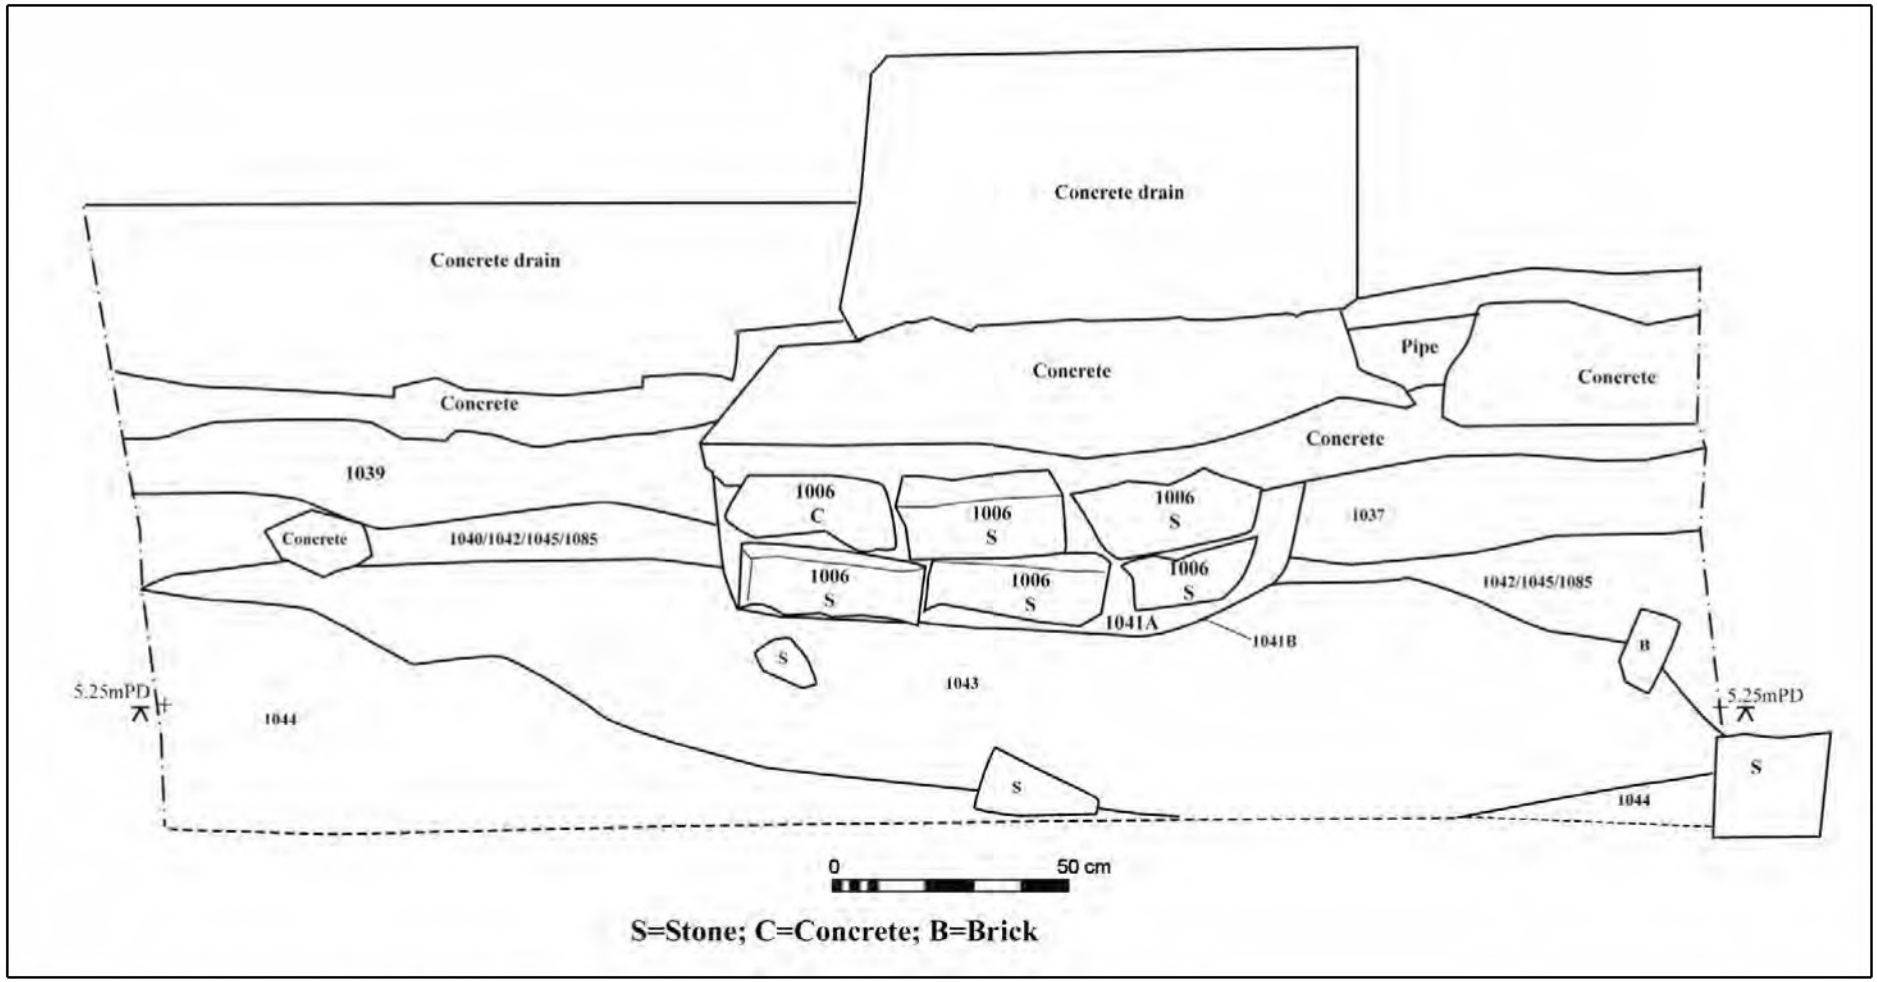
Moat stratigraphy



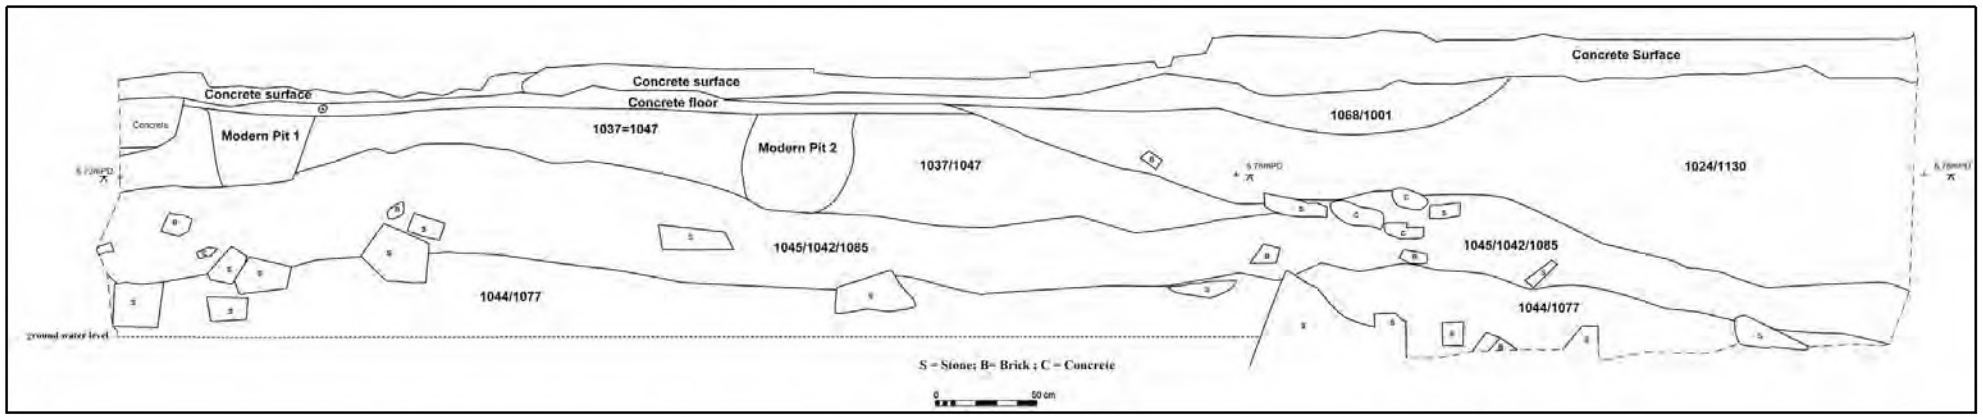
T1.C.39 East facing section of north moat



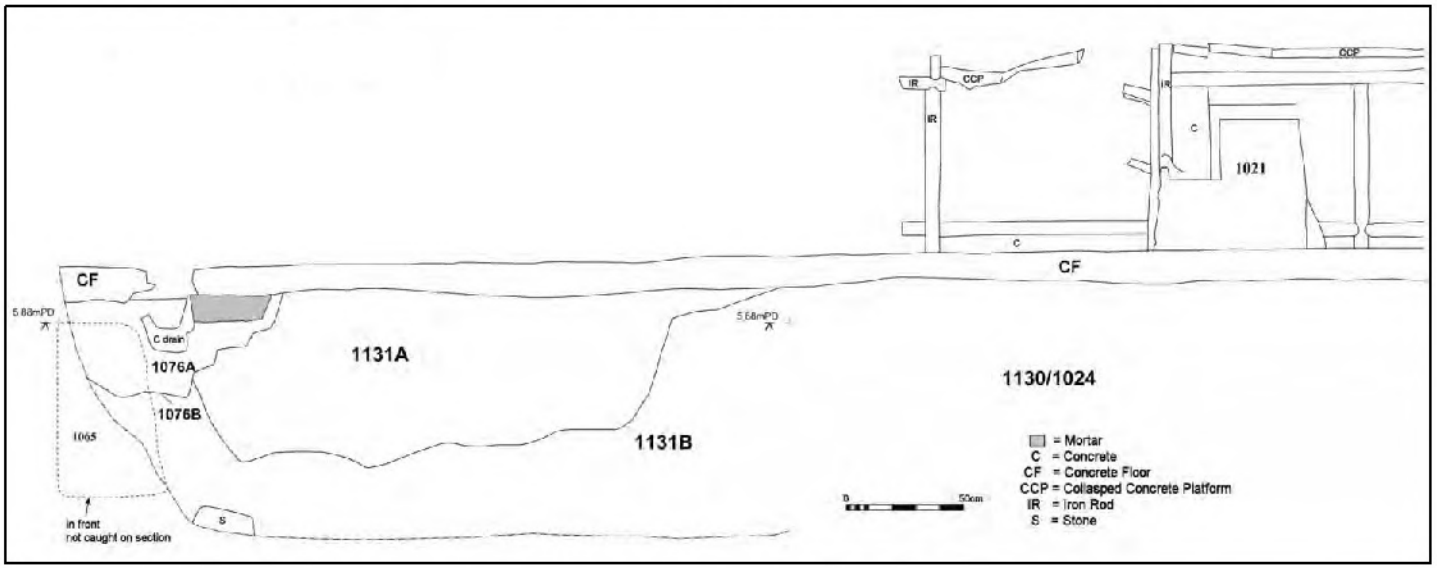
T1.C.40 East facing section and south facing section of north moat, at a location opposite to north west corner of watch tower.



T1.C.41 South facing section of north moat.

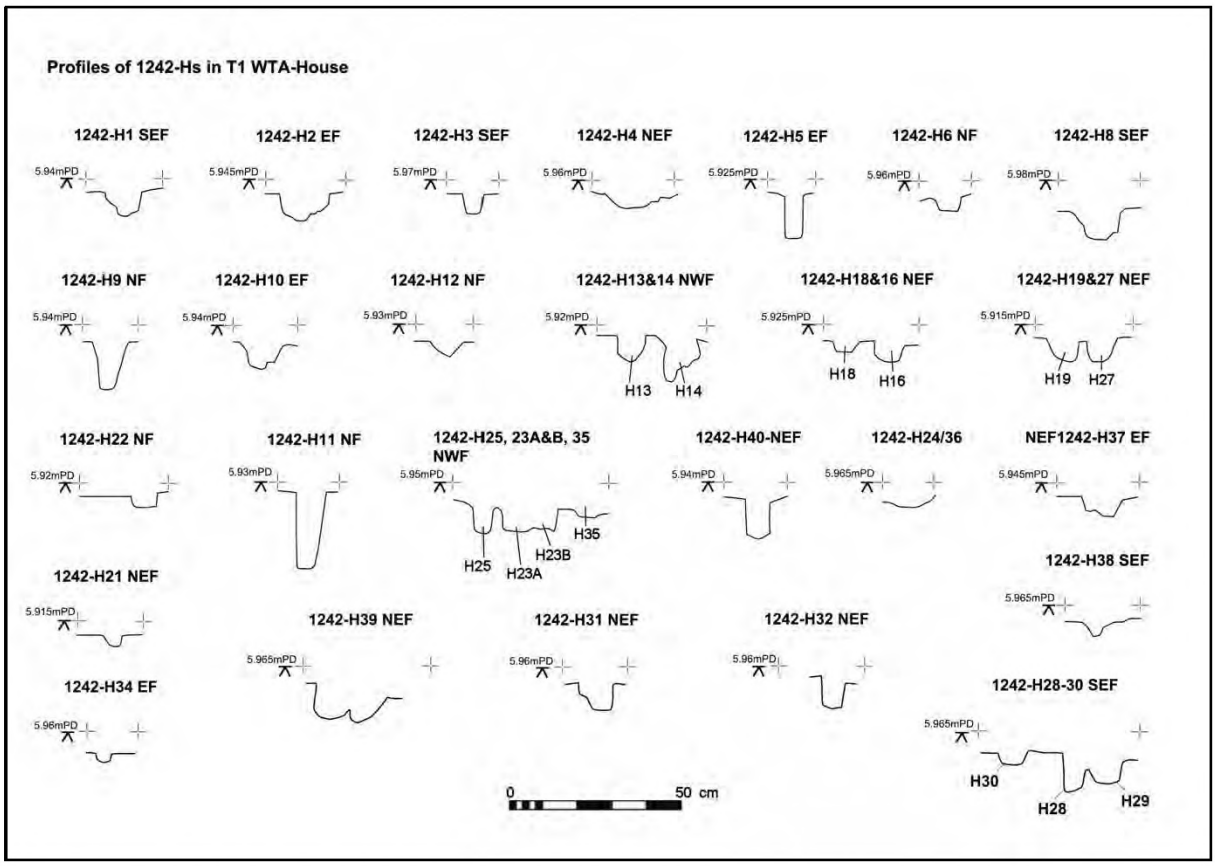


T1.C.42 In two parts: West facing section of east moat; south side stops at north side of [**co.1065**], see below.

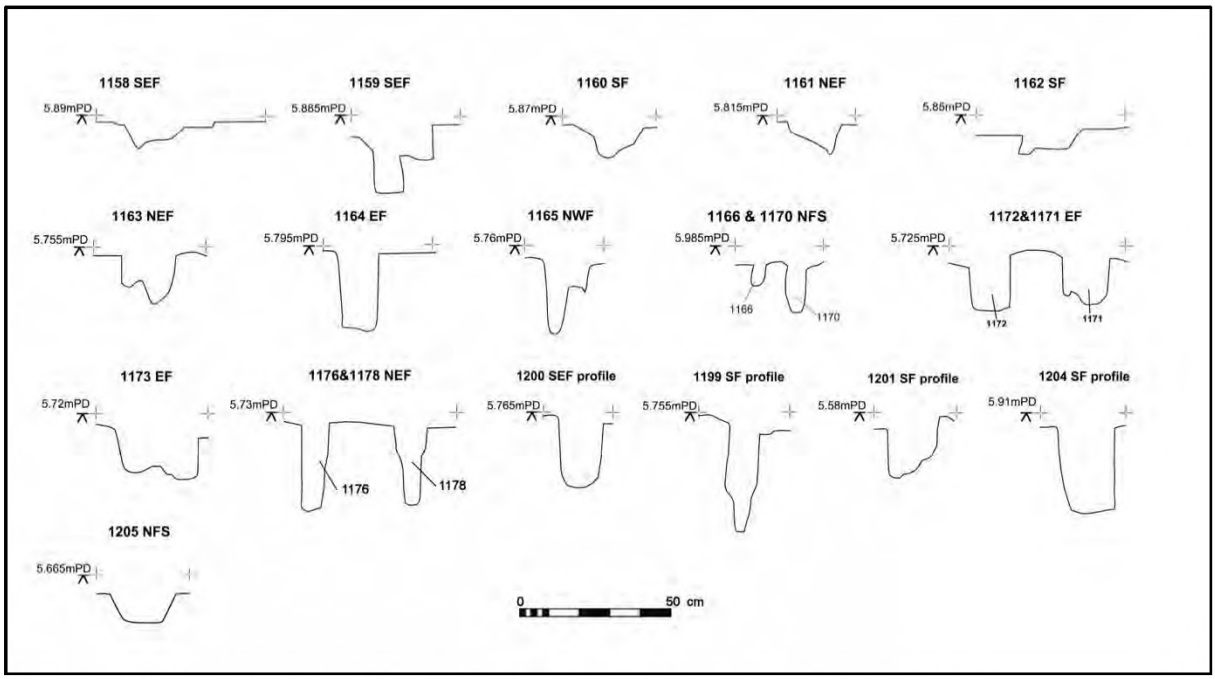


T1.C.43 West facing section of east moat; north side starts behind [**co.1065**].

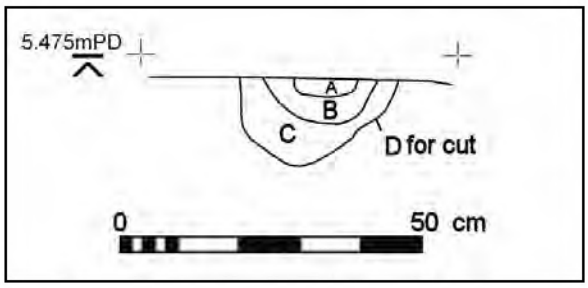
Post and stake hole profiles



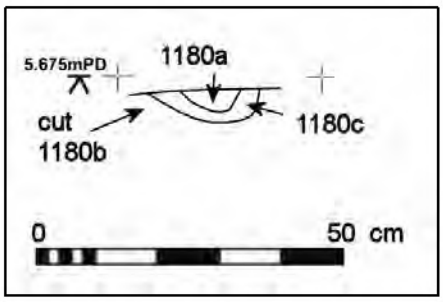
T1.C.44 Profile drawings of hole features [**co.1242-Hs**] in east side of house in watch tower area.



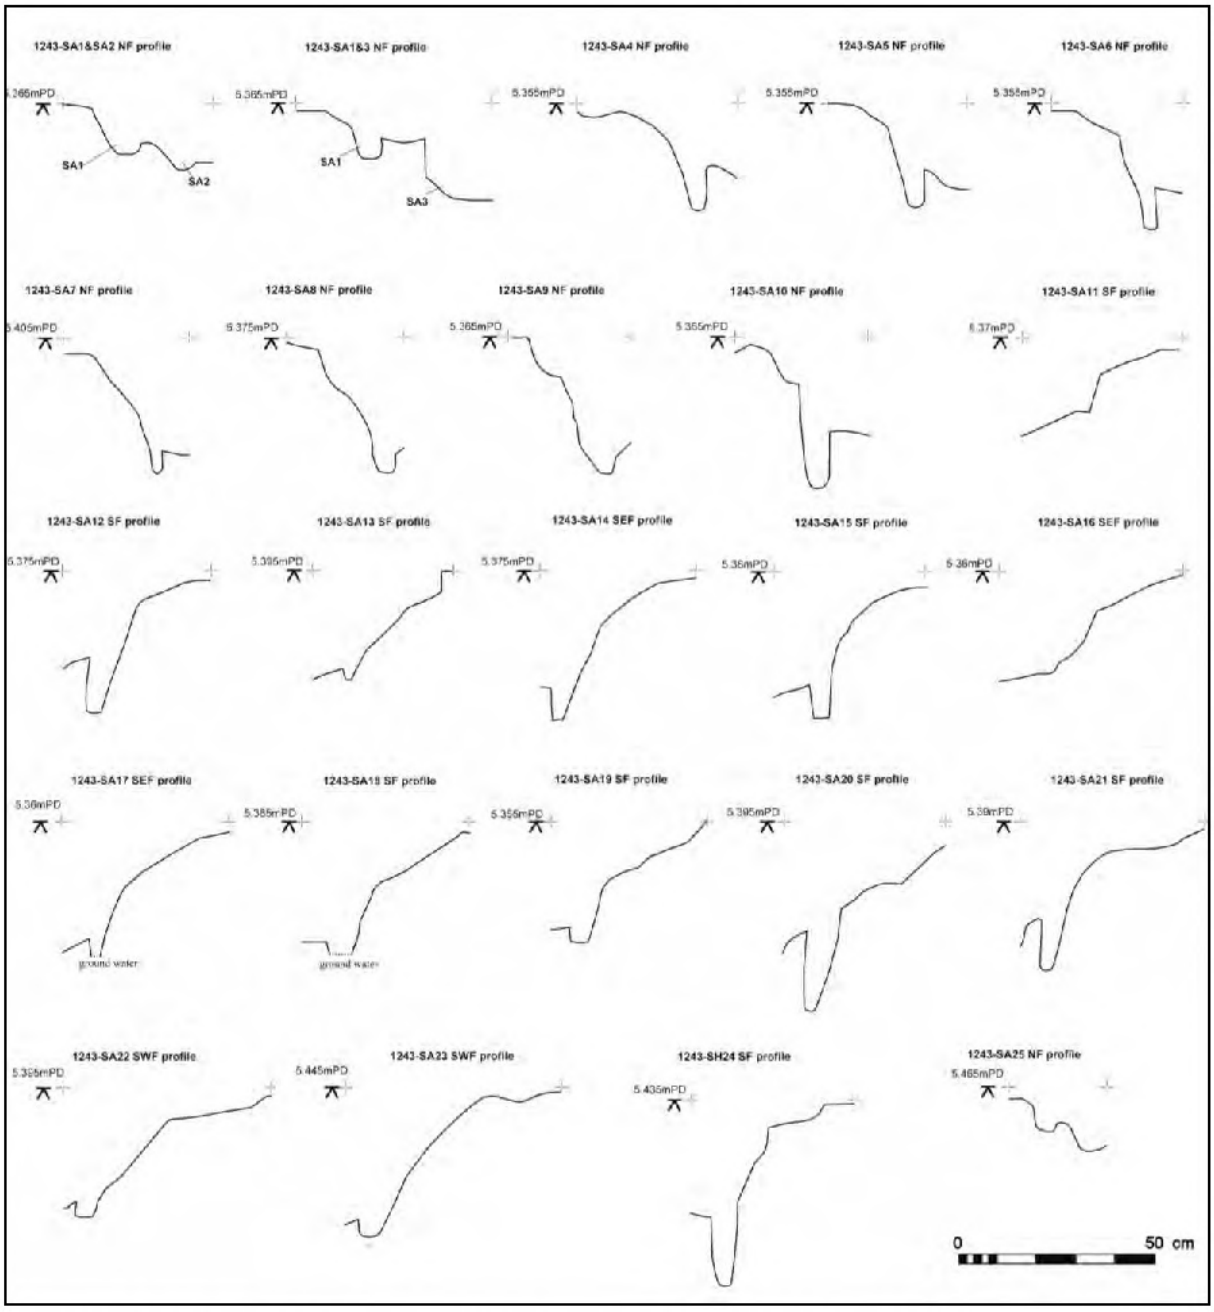
T1.C.45 Profile drawings of postholes and stake holes in watch tower area.



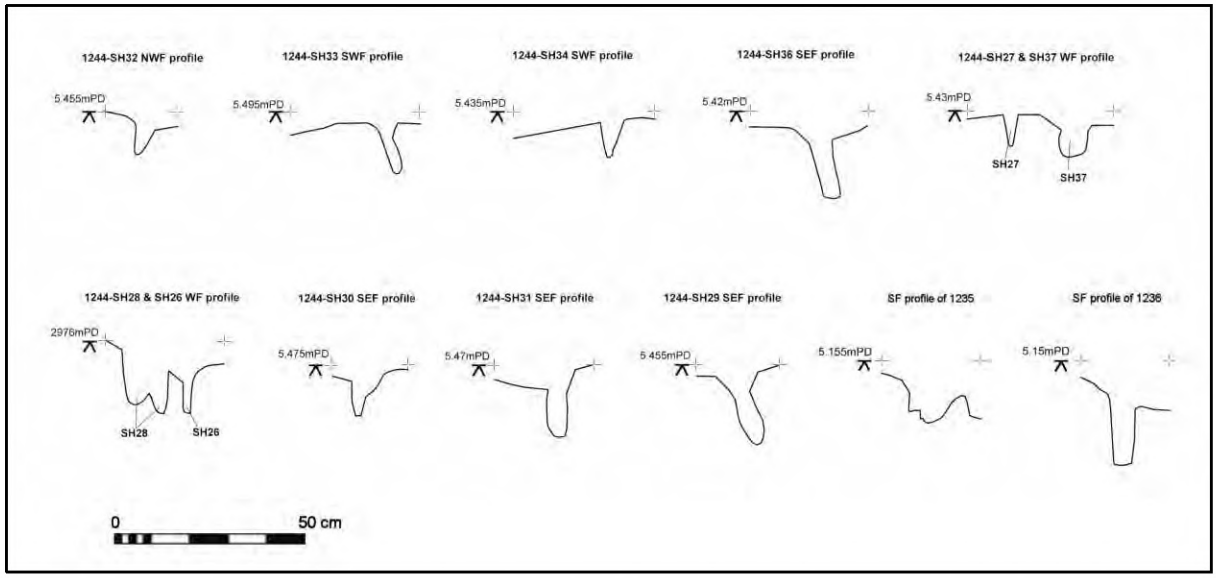
T1.C.46 North facing section of posthole [**co.1212**]



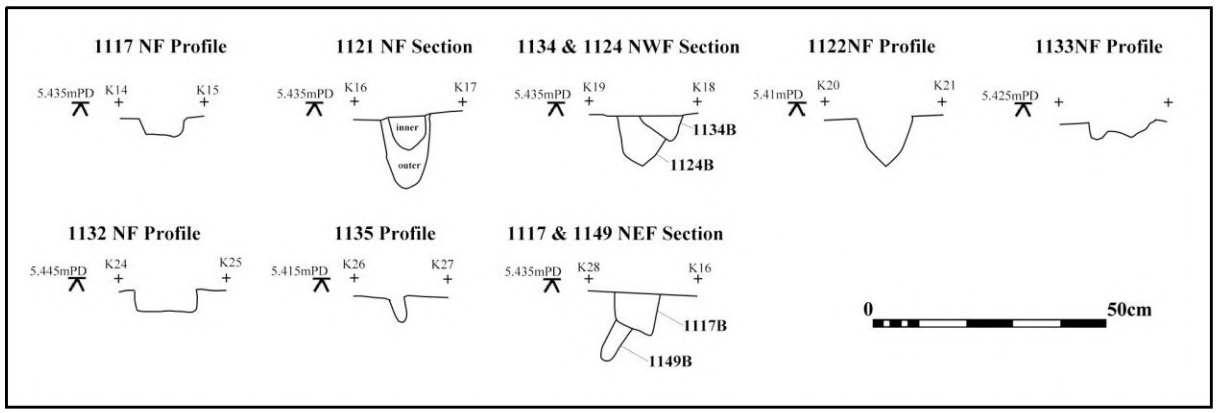
T1.C.47 South facing section of posthole [**co.1180**]



T1.C.48 Profile drawings for stake hole alignment [**co.1243-SH1 to 25**].



T1.C.49 Profile drawings of stake holes [**co.1244-SH26 to 37**], [**co.1235**] and [**co.1236**]



T1.C.50 Profile drawings for possible postholes/stake holes on [**co.1105**] within sondage inside watch tower room.

T1.D Trench 1 photos

T1.D.1 Top of reddish yellow fill [**co.1002**] on top of watch tower room (left side) and modern fill [**co.1006**] on top of north moat (right side); looking west.

T1.D.2 Modern dog burial fill [**co.1003**] on top of watch tower room upper strata; looking north. Note: presence of modern material including plastic fibre, cloth and cord string.

T1.D.3 Irregular cut for modern dog burial **[co.1004]** cutting into **[co.1002]**; looking north.

T1.D.4 East facing section of north moat, showing **[co.1249]**, **[co.1246]**, **[co.1036/1038]**, **[co.1039]**, and **[co.1247]**; looking west.

T1.D.5 South facing section of north moat near southwest corner of watch tower room, showing **[co.1006]**, **[co.1039]**, **[co.1036/1038]**, **[co.1246]**, **[co.1247]**, and **[co.1248]**; looking north.

T1.D.6 East facing section of north moat, showing **[co.1006]**, [co.1036/1038], **[co.1039]**, **[co.1040]**, **[co.1044]**, **[co.1080]**, and [co.1081] under water; looking west.

T1.D.7 South facing section of north moat, showing [**co.1006**], [**co.1039**], [**co.1040/1042/1045/1085**], [**co.1037**], [**co.1041A/B**], [**co.1043**], [**co.1044**]; looking north.

T1.D.8 West facing section of east moat opposite to watch tower room, showing [**co.1037/1047**], [**co.1042/1045/1085**], and [**co.1044/1077**]; looking southeast.

T1.D.9 West facing section of east moat near juncture of watch tower room and east village wall, showing **[co.1068/1001]**, **[co. 1024/1130]**, **[co.1042/1045/1085]**, **[co.1044/1077]**; looking east.

T1.D.10 West facing section of east moat, showing **[1076A/B]**, **[co.1131A/B]**, **[co.1024/1130]**; looking east.

T1.D.11 West facing section of east moat at south end of Trench 1, showing a very loose moat fill [**co.1024/1130**]; looking east.

T1.D.12 North facing section of east moat at south end of Trench 1, showing a very loose moat fill [**co.1024/1130**]; looking south.

T1.D.13 View of thick concrete [**co.1136**] in east moat; looking southwest.

T1.D.14 View of wooden posts [**co.1137**] below [**co.1136**]; looking north.

T1.D.15 Stone pavement [**co.1066**] above east moat.

T1.D.16 View of levelling fill **[co.1005/1033]** below concrete at east side of house in watch tower area; looking north.

T1.D.17 Concrete floor levels **[co.1014/1019]** at west side of house in watch tower area; looking north.

T1.D.18 Floor level **[co.1017]** and modern house wall remain **[co.1016]** in village wall interior; looking north.

T1.D.19 Modern stone foundation and leveller **[co. 1023/1030]** below concrete floor **[co.1011/1012/1013]** in lane of watch tower area; looking north.

T1.D.20 View of lane and house in watch tower area, showing remaining house floor level [**co.1034**] and levelling fill [**co. 1101/1106**] showing up on the east; also included northern house wall [**co.1104**], superimposed western house wall [**co.1067A**] above an earlier phrase [**co.1094**] and southern house wall [**co.1008**]; in front partially showing displaced north-south trending stone drain [**co.1090**] and also disturbed brick drain [**co.1156**]; looking east.

T1.D.21 General view of house, showing features on levels of [**co.1113**], [**co.1116**] and [**co. 1157A/1167A/1177A**]; looking east. Note: features on remaining [**co.1113**] on the left and charcoal spread related to [**co.1242-Hs**] showing up on [**co.1167**] at east after partial removal of cement floor [**co.1116**].

T1.D.22 Detailed view of soil patches [**co.1152**], [**co.1154**], [**co.1155**] around pot pit [**co.1151A/B**] containing pot [**co.1185**] on northeast corner of house; looking north.

T1.D.23 Detailed view of soil patch [**co.1128**] south of [**co.1112**] and pits [**co.1126B**] and [**co.1127A**], and posthole [**co.1125A**] at northwest corner of house; looking north.

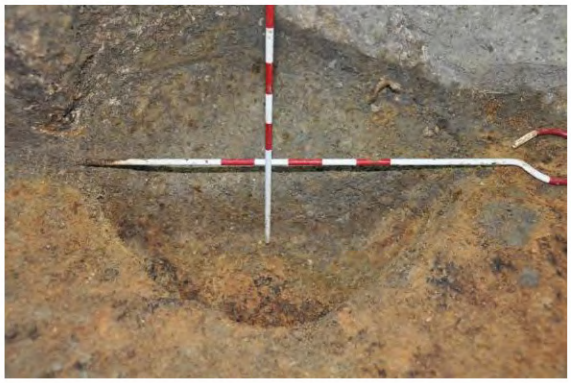
T1.D.24 View of dark soil [**co.1102/1103**] below [**co.1067**]; looking west.

T1.D.25 Pre-ex plan view of house on level of [**co. 1157A/1167A/1177A**]; Note: charcoal spread associated with [**co.1242-Hs**] and a row of south-north trending postholes [**co.1158**] to [**co.1162**] along inside of [**co.1094**]; looking east.

T1.D.26 Post-ex plan view of house on level of [**co.1167**], showing [**co.1242-Hs**] and postholes [**co.1158**] to [**co.1162**]; looking northeast.

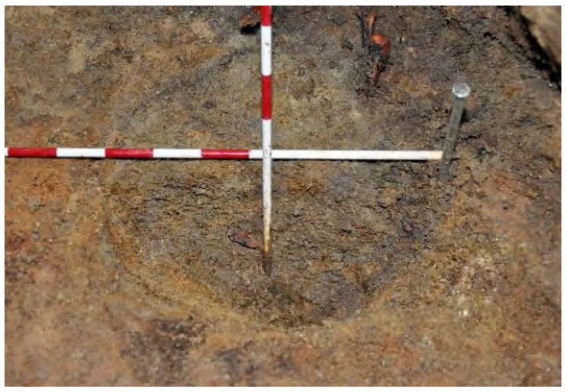
T1.D.27 View of postholes [**co.1163**] to [**co.1165**], [**co.1171**] to [**co.1173**] in lane; looking north.

Northeast facing section of [**co.1158A/B**]

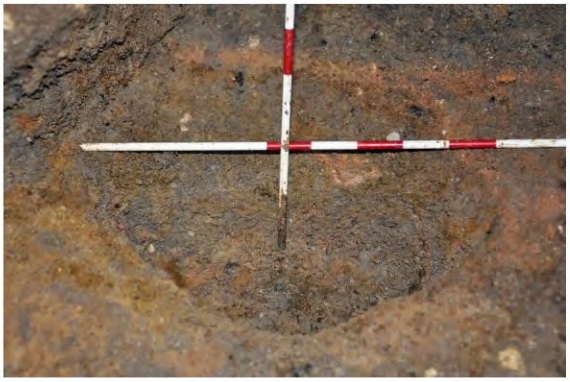


East facing section of [**co.1159A/B**]

Northeast facing section of [**co.1160A/B**]

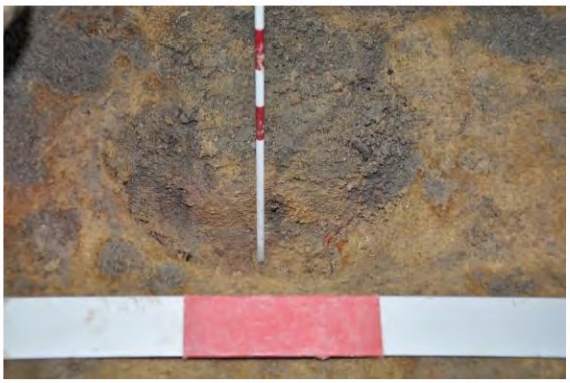


Northeast facing section of [**co.1161A/B**]



South facing section of [**co.1162A/B**]

[**co.1163**] halved, looking northeast.



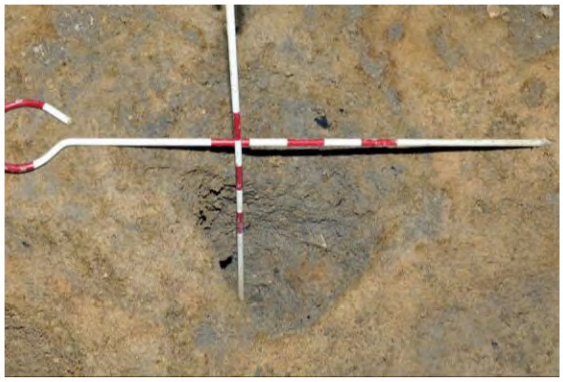
West facing section of [**co.1164**]

[**co.1165**] halved, looking west.

East facing section of [**co.1171**]

East facing section of [**co.1172**]

Northeast facing section of [**co.1173**]

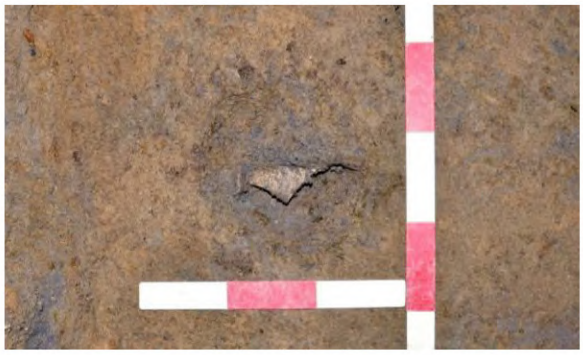


South facing section of [**co.1199**]

South facing section of [**co.1200**]

South facing section of [**co.1201**]

South facing section of [**co.1204**]



[**co.1205**] halved, looking north

T1.D.28 View of postholes cutting into [**co.1157A/1167A/1177A**] in house and lane.

T1.D.29 Stone pavement **[co.1186]** and drain cover stones **[co.1187]** on top of **[co.1090]** at north end of watch tower area; looking south.

T1.D.30 Southern part of stone drain **[co.1090]**; looking north.

T1.D.31 Northern part of stone drain **[co.1090]**; looking south.

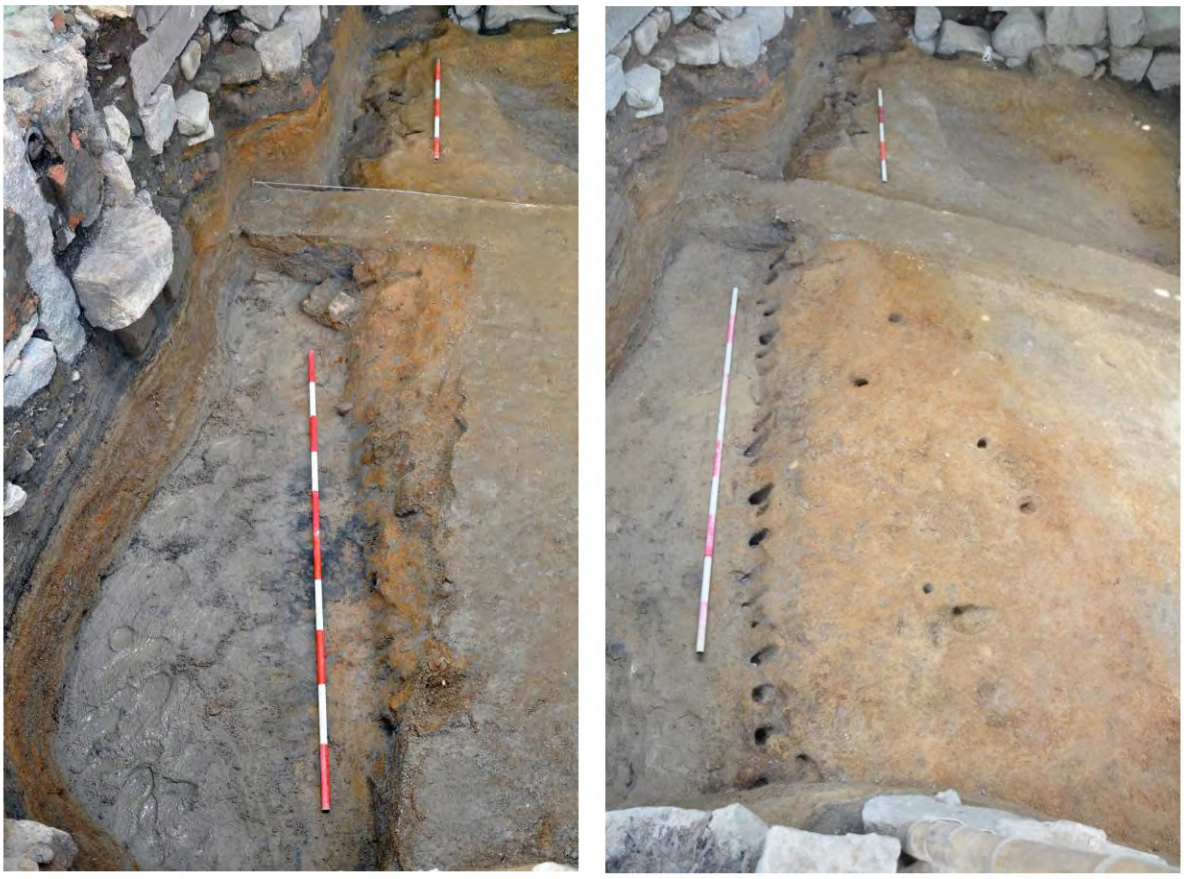
T1.D.32 Mortar [**co.1191**] on top of stone pavement [**co.1190**] west of watch tower room; Note: large boulders possibly belong to north village wall, now displaced; looking east.

T1.D.33 South facing section before excavation of watch tower area west of watch tower room; looking north; showing stone drain [**co.1187/1090**], stone pavement [**co.1186**] and [**co.1188**] underneath it, also a layer of dark soil [**co.1195**] above [**co.1167**].

T1.D.34 General view of watch tower area below **[co. 1179]**, showing **[co.1209/lower 1167]**, **[co.1210]**, **[co.1212]**, **[co.1184]**, **[co.1183A/B]**, **[co.1181A/B]**, **[co.1216/1222]**, **[co.1229]**, **[co.1182]**; looking east.

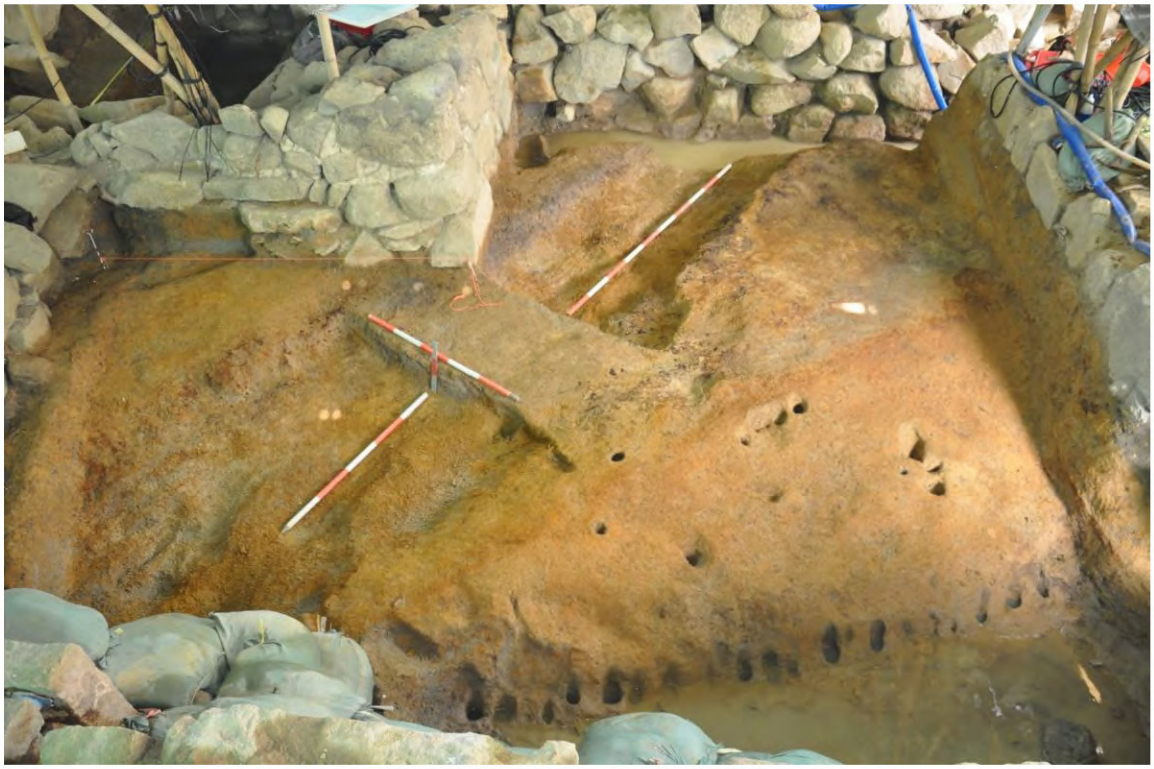
T1.D.35 View of features **[co.1194, 1183A/B, 1181A/B]** on level of **[co.1184]**; looking south; note: stone wall in front is the watch tower room's southern wall.

T1.D.36 View of ditch-like feature **[co.1214A/B]** with grey fill extending out of the western wall of the watch tower room; looking southeast.

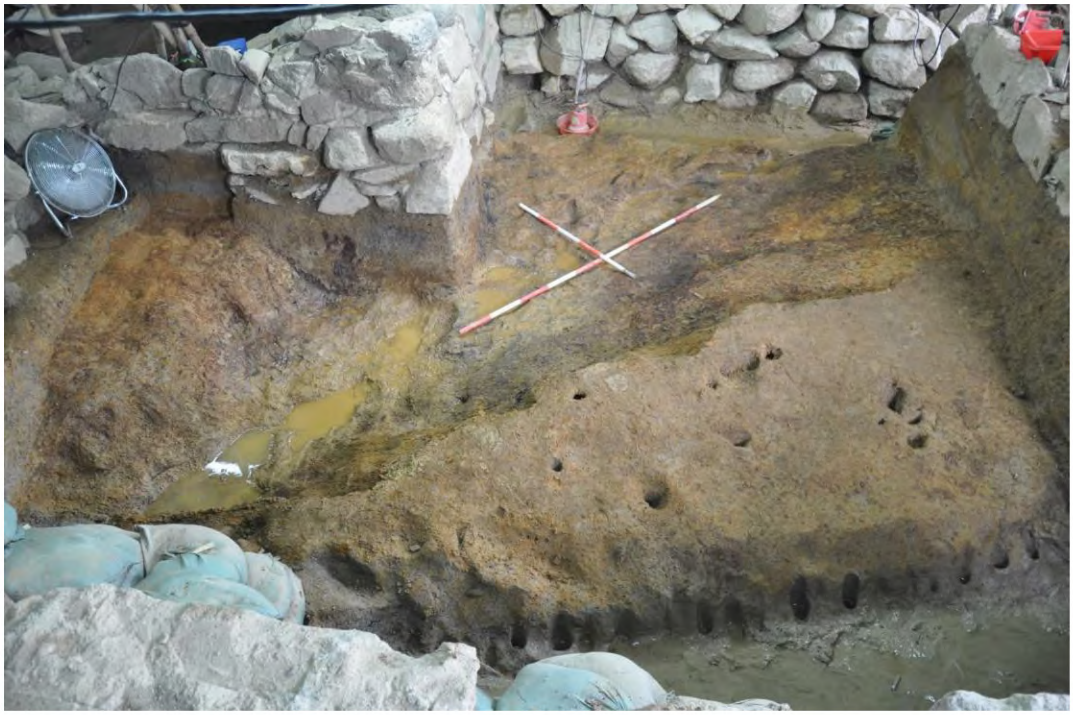


T1.D.37 Pre-ex and post-ex views of stake hole alignment **[co.1243-SAs]**; looking north.

T1.D.38 View of northwest-southeast trending ditch/water channel **[co. 1221/1227, 1245]**; looking northeast.



T1.D.39 Post-ex view of northwest-southeast trending ditch/water channel **[co.1245]**; looking east.



T1.D.40 Post-ex view of the lower and wider ditch/water channel [**co.1234**]; looking east.

T1.D.41 North facing section of watch tower area.

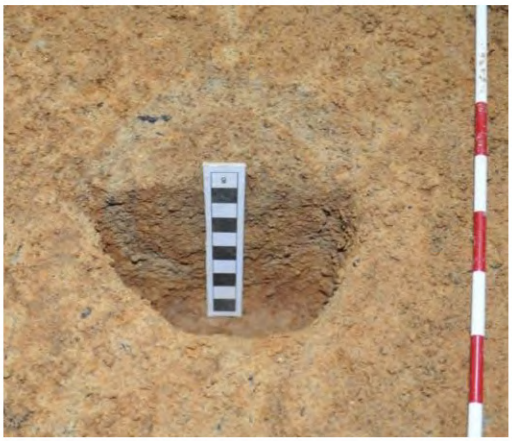
T1.D.42 East facing section of watch tower area.

T1.D.43 View of possibly ditches inside the watch tower room; looking east.

T1.D.44 View of possibly ditches [**co.1107/1108, 1109/1110**] in Sondage inside the watch tower room; looking east.

T1.D.45 View of postholes [**co. 1117A/B, 1121A/B, 1122A/B, 1124A/B, 1132A/B, 1133A/B, 1134A/B, 1149A/B**] in Sondage inside watch tower room; looking east.

North facing section of [**co. 1117A/B**]

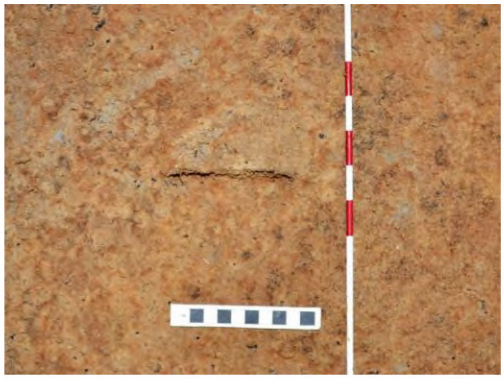


North facing section of [**co.1121A/B**]

North facing section of [**co. 1122A/B**]

Northwest facing section of [**co.1134A/B, 1124A/B**]

North facing section of [**co.1132A/B**]



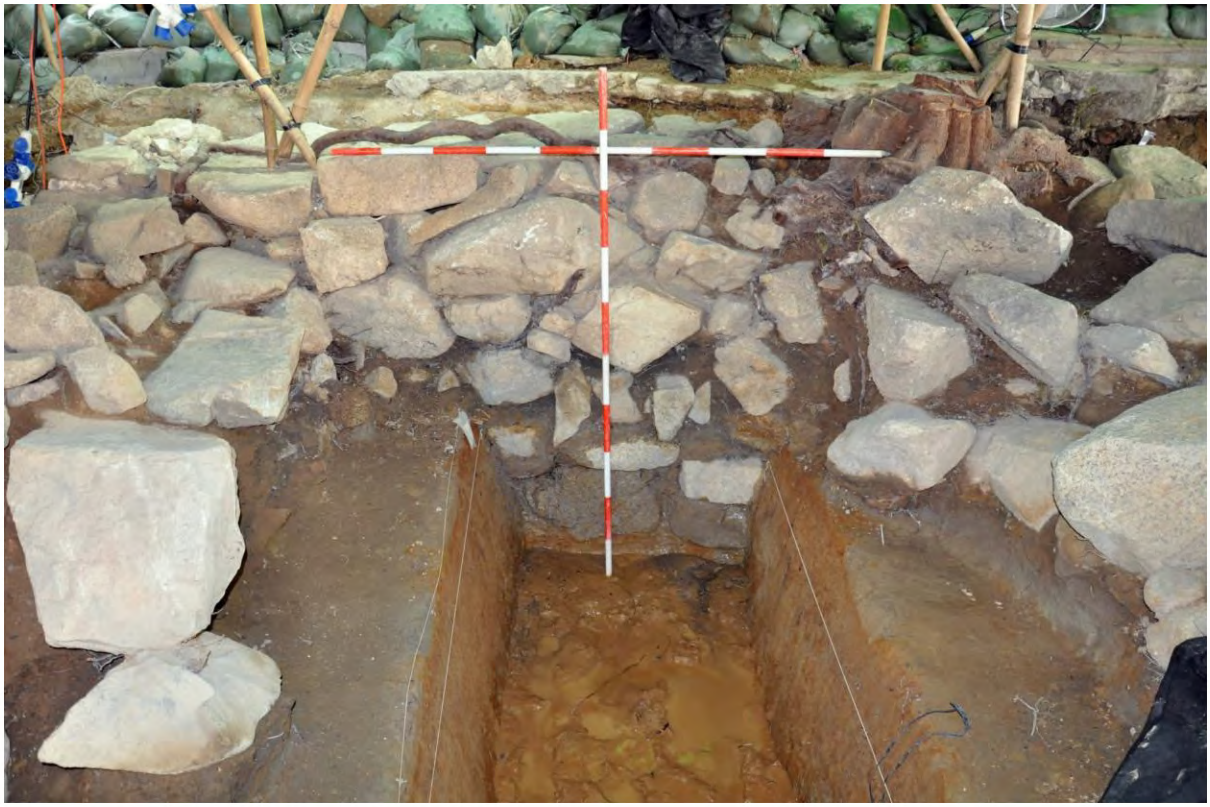
North facing section of [**co.1133A/B**]

T1.D.46 View of sections of posthole inside watch tower room.

T1.D.47 View of watch tower room [**co.1251**], east village wall [**co.1252**] and north village wall [**co.1253**]; looking southwest.

T1.D.48 View of watch tower room western wall facing watch tower area; looking east.

T1.D.49 View of watch tower room southern wall facing watch tower area; looking north.



T1.D.50 View of eastern wall interior of watch tower room **[co.1251]**/ west facing section of Sondage.

T1.D.51 View of northern wall interior of watch tower room **[co.1251]**/ south facing section of Sondage.

T1.D.52 View of western wall interior of watch tower room **[co.1251]**/ east facing section of Sondage.

T1.D.53 View of southern wall interior of watch tower room **[co.1251]**/ north facing section of Sondage. Note: grey fill **[co/1096]** below collapsed stones.

T1.D.54 North facing section of T1 village wall interior.

T1.D.55a Southern part of east facing section in village wall interior

T1.D.55b Northern part of east facing section in village wall interior

T1.D.56 South facing section in village wall interior.

T1.E Trench 1 artefact description

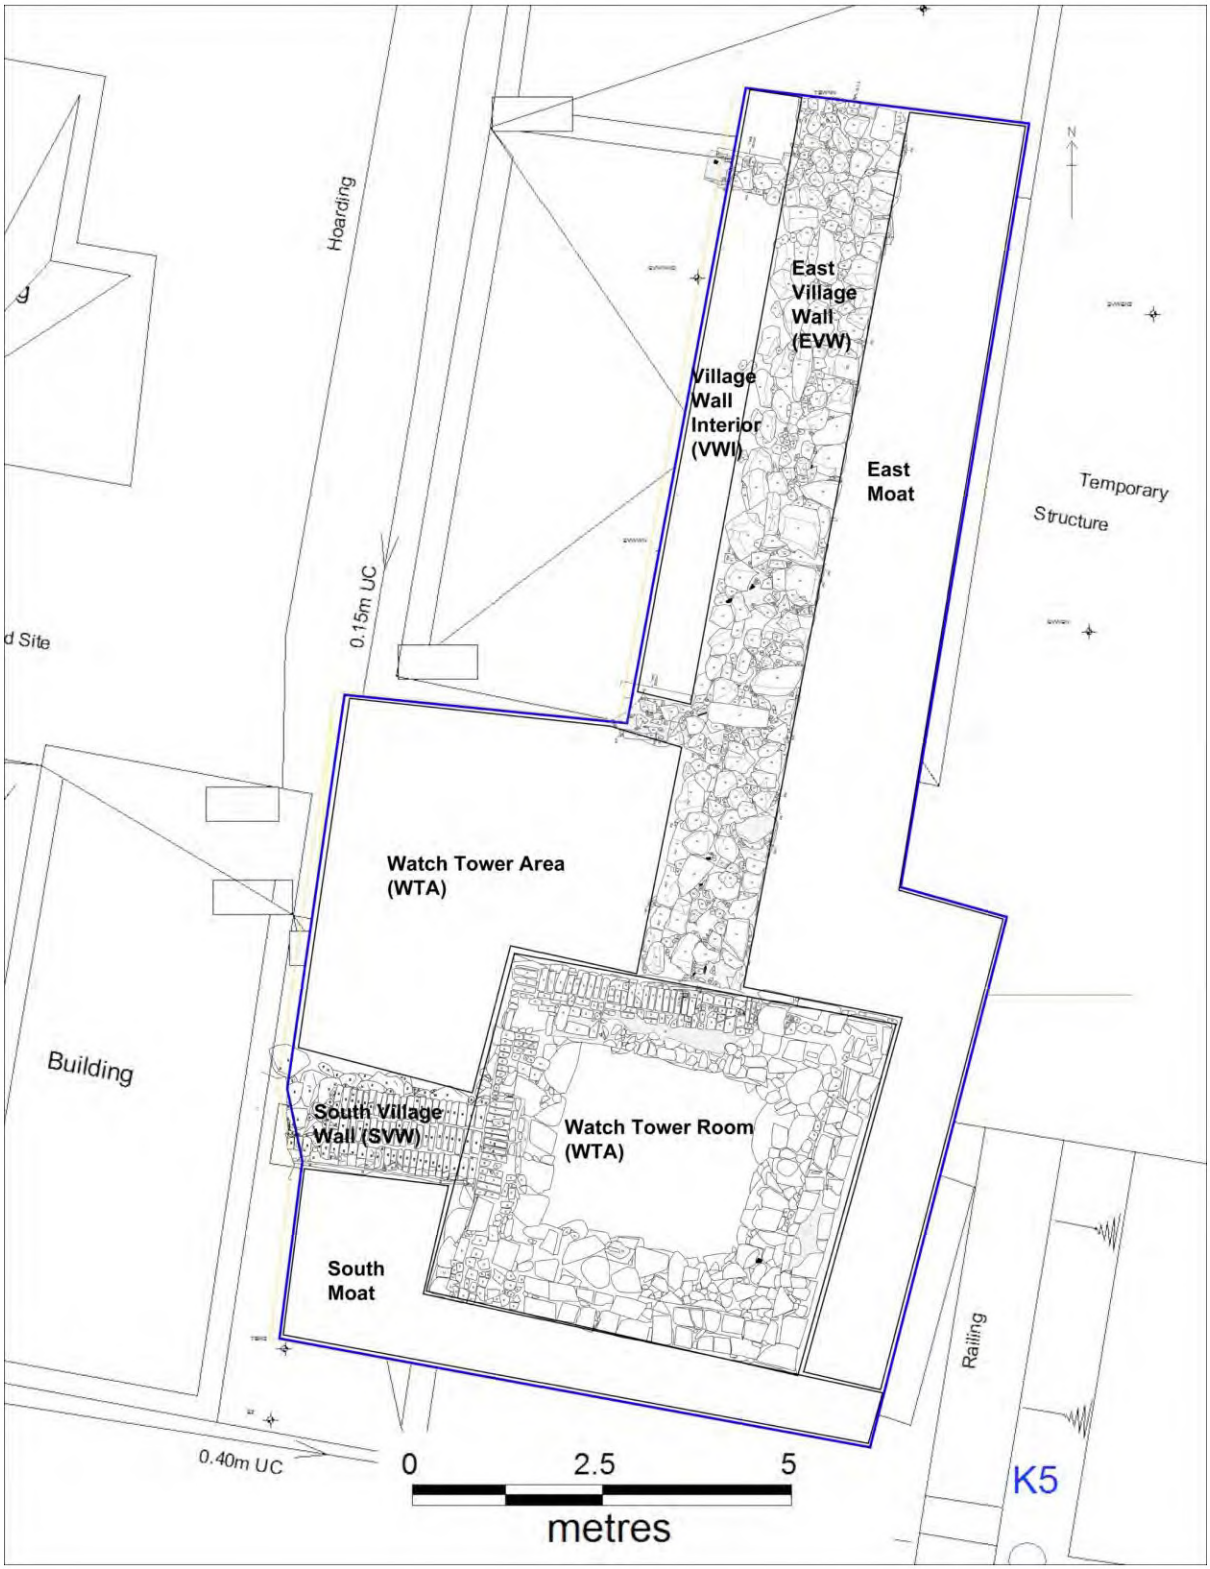
Trench 3 data

T3.A Context descriptions



3001: Foundation stones of demolished house. It consisted of cut granite blocks on top of northern, eastern and southern walls of watch tower room and irregularly faceted stones extended from the northern watch tower wall towards the west side.

3002: Plaster floor with levelling fill.

3003: Stone platform inside watch tower room (hereafter referred as WTR).

3004: East-west brick alignment on top surface of south village wall.

3005: North-south lying brick alignment on western and part of northern watch tower walls

3006: Watch tower foundation wall consisted of larger boulders.

3007: Levelling fill consisted of brown (10YR 4/3) slightly sandy silt with clay chunks located at southeast edge of [3003] inside WTR.

3008: Levelling fill below [3002], consisted of dark yellowish brown (10YR 4/4) gravelly, slightly silty, very slightly clayey sand.

3009: levelling fill consisted of reddish yellow (7.5YR 7/6) sandy gravel added to [3008] to make it level.

3010: A fill layer below 3008/3009 at the north central of WTR. It consisted of dark brown (10YR 3/3) very slightly sandy and gravelly, slightly clayey silt.

3011: Topsoil fill on the eastern part inside watch tower room, consisted of brown (10YR 4/3) slightly clayey, very slightly sandy silt, very disturbed.

3012: A pot buried at north-central side inside WTR.

3013: Fill mix disturbed by borehole around pot [3014]. It consisted of brownish yellow (10YR 6/6) very slightly clayey, slightly silty sand and very pale brown (10YR 7/4) very slightly silty, very slightly gravelly sand

3014: Pot partially destroyed by borehole located at the centre of WTR.

3014A: Fill of pot pit below pot [3014].

3015: Modern rubbish dump debris located at south moat below concrete. It consisted of reddish brown (5YR 4/4) very slightly silty, sandy gravel.

3016: Fill in west entry to WTR over bricks [3005]. It consisted of strong brown (7.5YR 5/6) slightly silty, slightly gravelly sand with small fragments of building debris.

3017: a concrete floor in watch tower area; it covered stone floor [3019], drain [3023/3047/3060] and south village wall foundation [3021] and WTR entry [3005].

3018: Old concrete path and utilities at southwest corner of excavation area, on top of south moat fill.

3019: Stone floor to the west of WTR entry /in watch tower area (hereafter referred as WTA).

3020: Displaced/re-used bricks by south wall over WTR stone foundation.

3021: South village wall stone foundation consisted of boulders.

3022: Fill between [3019] stones consisting brown (7.5YR4/4) slightly silty and gravelly sand.

3023/3047/3060: Stone drain with loose brick lining and mortar/cement base, located along west edge of WTA lane. The south end was covered by large cut stone.

3024: Tile and mortar-like sand packing fill between brick [3004] and stone foundation [3021] of south village wall; mortar like friable, consisted of brownish yellow (10YR6/6) silty sand.

3025: Fill between stones of [3003]. It consisted of dark greyish brown (10YR4/2) clayey, slightly sandy silt.

3026: Patchy fill under [3003, 3010] and bits of [3011]. It consisted of strong brown (7.5YR 5/8) sandy, slightly silty and clayey gravel.

3027: A very hard compressed patch around the pots with tiles impressed into surface. It consisted of strong brown (7.5YR 5/6) sandy gravel.

3028: Fill under filler [3101], consisted of brown (7.5YR 5/4) to strong brown (7.5YR 5/8) slightly clayey and silty, sandy gravel.

3029: Stone alignment alongside of north WTR wall by a rectangle structure.

3030: Dump of building debris located at the southeast side inside WTR. It consisted of dark yellowish brown (10YR 3/4) slightly gravelly, sandy, silty clay and included mostly broken bricks.

3031: Fill under [3018] in south moat, consisted of greyish brown (10YR 5/2) silty, sandy gravel.

3032: Fill under [3018] in south moat, consisted of dark greyish brown (10YR 4/2) very slightly clayey, slightly sandy, gravelly silt.

3033: Cut and fill for pot pit containing pot [3012] at lower section in [3026]. The fill consisted of light olive brown (2.5Y 5/3) sandy gravel.

3034: Packing fill of brick around top of pot [3012]. It consisted of brownish yellow (10YR 6/8) gravelly, sandy clay with chunks of clay.

3035: Concrete L-shape platform/ledge attached to south village wall exterior and wester WTR wall exterior.

3036: Patchy fill consisted of strong brown (7.5YR 5/6) gravelly sand inside WTR.

3037: Modern fill inside WTR; it consisted of dark yellowish brown (10YR 4/4) very sandy, gravelly, silty CLAY.

3038: Building debris dump along the inside of eastern and northern WTR walls.

3039: Hard compact red gravel under [3036]. It consisted of yellowish brown (10YR 5/8) very slightly clayey, slightly sandy, silty gravel.

3040: Clean gravel in [3037] consisted of light greyish brown (10YR 6/2) sandy gravel.

3041: Fill of area along southern and south half of western/southern boulder edge. It consisted of greyish brown (10YR 5/2) slightly sandy and gravelly and silty clay. Same as [3096].

3042: Collapsed stones below building debris [3030].

3043: Sand continuing in [3039], consisted of light yellowish brown (10YR 6/3) gravelly sand.

3044: A thin layer under [3039], consisted of gravelly, slightly sandy and silty clay. Possibly same as [3092] in WTA.

3045/3095: Compact sterile deposit within watch tower room (hereafter referred as WTR), consisted of brownish yellow (10YR 6/6) gravely, silty, slightly sandy clay.

3046: Loose fill in WTA, consisted of dark yellowish brown (10YR 4/4) very slightly clayey, silty gravel. It was associated with stone drain [3023/3047/3060].

3047: Stone drain with loose brick lining and mortar/cement base, located along west edge of watch tower area (hereafter referred as WTA). The south end was covered by large cut stone. Same as [3023/3060].

3048: Hard fill in WTA, consisted of yellowish brown (10YR 5/8) slightly sandy clay.

3049/3051/3052: Loose fill in east moat consisted of yellowish brown (10YR 5/6) sand.

3050: Loose fill in WTA below 3048. It consisted of dark yellowish brown (10YR 4/4) very sandy clay.

3053: Red (2.5YR 5/6) mortar in village wall interior (hereafter referred as VWI), below which still produced plastic sheets.

3054: Soft fill above east village wall (hereafter referred as EVW), consisted of yellowish brown (10YR 5/4) clayey gravel.

3055: Firm fill in WTA and VWI, consisted of brown silt in yellowish brown (10YR 5/8) with patches of brown (10YR 4/3).

3056: Compact and crumbly levelling fill (?) in southwest corner of WTA. It consisted of yellowish brown (10YR 5/8) very slightly gravelly clay.

3057: A thin layer of fill in SW corner of WTA, consisted of dark greyish brown (10YR 4/2) very sandy clay.

3058: Compact floor in WTA consisted of silty sand in brownish yellow (10YR 6/6) with patches of dark greyish brown (2.5Y 4/2).

3059W/S: Western and southern stone wall foundation of a house in WTA. The upper layer was made of large pebbles with plastic noticed underneath. The bottom consisted of large boulder.

3060: Same as [3023/3047].

3061: Cancelled.

3062: Cancelled.

3063: Very loose levelling fill partially covered WTA, northwest-southeast trending, consisted of grey (2.5Y 6/1) sand.

3064: Loose levelling fill covering WTA. It consisted of lens of fills: light olive brown (2.5Y 5/4) silty sand on top, brownish yellow (10YR 6/8) clayey sand in the middle and dark greyish brown (2.5Y 4/2) clayey silt at bottom. It contained frequent tiny tile fragments.

3065: A large pot buried in into the ground in WTA, east of stone drain [3023/3047/3060].

3065A: Fill of pot pit [3065D], located in west-centre of WTA. It consisted of very dark greyish brown (10YR 3/2) sandy silt and included moderate modern tile fragments.

3065B: Upper fill contained within pot [3065], consisted of loose, very dark grey (10YR 3/1) sandy silt and included plastic.

3065C: Lower fill contained within pot [3065], consisted of very loose greyish brown (10YR 5/2) gravelly silt. It contained modern glass. 3065D: Pot pit cut for [3065A].

3066: Stone drain along west edge of WT, directly below [3023/3047/3060] drain. It consisted of roughly cut and angularly faceted stone blocks and built on hard floor. Its south end was covered by large flat stone. The drain was built into / through the south village wall (hereafter referred as SVW). Similar to drain found in T1 and T5. The bottom consisted of weakly cemented to compact very pale brown (10YR 7/4) silt.

3067A: Upper fill of stone drain [3066], consisted of loose dark brown (10YR 3/3) silt.

3067B: Lower fill of stone drain [3066], consisted of very loose black (2.5Y 2.5/1) sandy silt.

3068: Loose fill along east side / outside of [3066] drain in WTA. It consisted of very dark grey (10YR 3/1) silt.

3069: Cancelled.

3070: Loose levelling fill covering the centre and west side of WTA. It consisted of light yellowish brown (2.5Y 6/4) silty, slightly clayey sand and included frequent large, yellowish white tile fragments and occasional grey/red brick fragments and porcelain; below [3064] above [3078].

3071/3072: A cluster of shattered bricks located on the east-centre of WTA, next to the east village wall, found below [3074A], above [3074C].

3073: Loose fill located in VWI, below [3053] and stone pavements 1 and 2. It consisted of silty sand in yellowish brown (10YR 5/6) at south end of VWI, brownish yellow (10YR 6/8) mixed with yellowish brown (10YR 5/8) at north end.

3074A: Loose top fill of a shallow pit located at the northwest side of WTA. It consisted of greyish brown (2.5Y 5/2) silty, slightly clayey sand. 3074B: Cut for [3074A].

3075A: Fill of a shallow pit located at the north west side of WTA, north west of [3074]. It consisted of mix-coloured silt in dark grey (2.5Y 4/1) and brownish yellow (10YR 6/8). 3075B: Cut for [3075A].

3076: Moderately soft fill along inside of EVW, 2 large pits in south house and within middle and north house, also partially on top of EVW. It consisted of brown (10YR 4/3) gravelly, sandy clay.

3077/3080/3083/3085/3087: Compact floor covering the entire WTA below [3078]. The soil consisted of yellowish brown (10YR 5/8) silty, slightly clayey sand. It was cut by stake hole alignments [3082-SHs] and post holes [3082-PHs].

3078/3079: A thin layer of deposit covering the entire WTA on top of [3077] and sealed [3082 features. It consisted of greyish brown (10YR 5/2) clayey sand and included moderate small tile fragments.

3081: Brick cluster / alignment in WTA, filling a slopping area along the inside of southern village wall; roughly east-west oriented; below [3079], above [3077/3080/3085]. It consisted of mostly red and some grey bricks with very eroded edge.

3082: the context is comprised of three lines of stake hole alignments (alignment 1: 3082-SH1 to 20, 56 to 58; alignment 2: 3082-SH25 to 28, 47 to 48; alignment 3: 3082-SH29 to 33, 44 to 45) and postholes (3082-PH24, 46, 49, 51, 52, 53, 59, 60, and 61) located in WTA.

3082-SH1: Loose stake hole fill consisted of light yellowish brown (2.5Y 6/3) clayey sand.

3082-SH2: Loose stake hole fill consisted of light brownish grey (2.5Y 6/2) very slightly clayey sand.

3082-SH3: Loose stake hole fill consisted of light yellowish brown (2.5Y 6/3) very slightly clayey sand.

3082-SH4: Loose stake hole fill consisted of greyish brown light brownish grey (2.5Y 6/2) clayey sand.

3082-SH5: Loose stake hole fill consisted of greyish brown (2.5Y 6/2) slightly clayey sand.

3082-SH6: Soft stake hole fill consisted of greyish brown (2.5Y 5/2) very clayey sand.

3082-SH7: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) slightly clayey sand.

3082-SH8: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayed sand.

3082-SH9: Soft stake hole fill consisted of greyish brown (2.5Y 5/1) slightly sandy clay.

3082-SH10: Soft stake hole fill consisted of light yellowish brown (2.5Y 6/3) slightly sandy clay.

3082-SH11: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayed sand.

3082-SH12: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH13: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH14: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH15: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH16: Soft stake hole fill consisted of light yellowish brown (2.5Y 6/3) slightly sandy clay.

3082-SH17: Loose stake hole fill consisted of yellowish brown (10YR 5/4) sandy clay.

3082-SH18: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) slightly sandy clay. Very little fill left in this stake hole.

3082-SH19: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) slightly clayey sand.

3082-SH20: Soft stake hole fill consisted of brown (10YR 5/3) clayey sand.

3082-SH25: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH26: Loose stake hole fill consisted of grey (2.5Y 5/1) clayey sand.

3082-SH27: Loose inner and outer stake hole fills. The inner fill consisted of greyish brown (2.5Y 5/2) slightly sandy clay. The outer fill consisted of strong brown (7.5YR 5/6) very slightly clayey sand.

3082-SH28: Loose stake hole fill consisted of yellowish brown (10YR 5/6) sandy silt.

3082-SH29: Soft stake hole fill consisted of greyish brown (2.5Y 5/2) slightly sandy clay.

3082-SH30: Soft stake hole fill consisted of greyish brown (2.5Y 5/2) very slightly sandy clay.

3082-SH31: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH32: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH33: Loose stake hole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-SH44: Soft stake hole fill consisted of dark grey (2.5Y 4/1) clay.

3082-SH45: Loose stake hole fill consisted of pale brown (10YR 6/3) slightly sandy clay.

3082-SH47: Loose stake hole fill consisted of grey (2.5Y 5/1) clay.

3082-SH48: Loose stake hole fill consisted of greyish brown (2.5 5/2) clayey sand.

3082-SH55: Soft stake hole fill consisted of grey (2.5Y 5/1) clay.

3082-SH56: Loose stake hole fill consisted of grey (2.5Y 5/1) slightly clayey sand.

3082-SH57: Loose stake hole fill consisted of grey (2.5 5/1) slightly clayey sand.

3082-SH58: Loose stake hole fill consisted of grey (2.5 5/1) slightly clayey sand.

3082-PH24: Loose posthole fill consisted of greyish brown (2.5Y 5/2) clayey sand.

3082-PH46: Loose posthole fill consisted of greyish brown (2.5Y 5/2) silty sand.

3082-PH49: Loose posthole fill consisted of greyish brown (2.5Y 5/2) slightly sandy clay.

3082-PH51: Loose posthole fill consisted of slightly sandy clay in yellowish brown (10YR 5/6) with dark grey (2.5Y 4/1) spots.

3082-PH52: Loose posthole fill consisted of slightly clayey sand in dark grey (2.5Y 4/1) with light yellowish brown (10YR 6/4) spots.

3082-PH53: Loose posthole fill consisted of mix-coloured clayey sand in greyish brown (2.5Y 5/2) and light olive brown (2.5Y 5/6).

3082-PH59: Loose posthole fill consisted of slightly clayey sand in dark grey (2.5Y 4/1).

3082-PH60: Loose posthole fill consisted of greyish brown (2.5Y 5/2) sandy clay.

3082-PH61: Loose posthole fill consisted of slightly silty sand in grey (10YR 5/1) mixed with light yellowish brown (10YR 6/4).

3084/3086/3088: Very loose thin deposit covering WTA below [3077/3080/3083/3085/3087], above [3089]. It consisted of greyish brown (2.5Y 5/2) sand.

3089: Compact fill layer below [3084/3086/3088] and above [3092] in WTA. It consisted of yellowish brown (10YR 5/6) slightly clayey sand.

3090: A semi-circular patch of fill in east side of WTA, near the EVW; above [3092], below [3077/3080/3083/3085/3087]. It consisted of patchy-coloured, slightly clayey sand in strong brown (7.5YR 5/8) with grey (2.5Y 5/1) spots.

3091A: Loose posthole fill located at the west-middle of WTA, below [3084/3086/3088]; above [3089]. The fill consisted of light olive brown (2.5Y 5/3) sand. Excavated to a depth where ground water level was encountered. 3091B: cut for posthole [3091A].

3092: Loose fill covering WTA, below [3089]. It consisted of greyish brown (2.5Y 5/2) sand.

3093: the context includes a N-S aligned stake hole alignment (comprised of 3093-SH1, 10, 14, 20, 21, 25, 29, 32, 33, 34, 36, 37, 41) and some loose stake holes (including 3093-SH9, 23, 24, 39, 40) and one possible posthole (3093-PH38).

3093-PH38: Posthole sealed by [3092] and cut into [3094], located very close to EVW on the northeast side of WTA. The fill consisted of very soft greyish brown (2.5Y 5/2) slightly sandy clay.

3093-SH1: Loose fill of stake hole consisted of dark greyish brown (2.5Y 4/2) silty sand.

3093-SH9: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) slightly clayey sand.

3093-SH10: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) silty sand.

3093-SH14: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) silty sand.

3093-SH20: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) silty sand.

3093-SH21: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) clayey sand.

3093-SH23: Soft fill of stake hole consisted of greyish brown (10YR 5/2) clayed sand.

3093-SH24: Soft fill of stake hole consisted of yellowish brown (10YR 5/4) clayey sand.

3093-SH25: Loose fill of stake hole consisted of brown (10YR 4/3) silty sand.

3093-SH29: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) sand.

3093-SH32: Soft fill of stake hole consisted of greyish brown (2.5Y 5/2) silty sand.

3093-SH33: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) sand.

3093-SH34: Loose fill of stake hole consisted of light greyish brown (2.5Y 6/2) silty sand.

3093-SH36: Loose fill of stake hole consisted of light greyish brown (2.5Y 6/2) sand.

3093-SH37: Loose fill of stake hole consisted of greyish brown (2.5Y 5/2) sand.

3093-SH39: Loose fill of stake hole consisted of greyish brown (2.5Y 5.2) slightly silty sand.

3093-SH40: Loose fill of stake hole consisted of dark grey (2.5Y 4/1) sand.

3093-SH41: Very loose fill of stake hole consisted of greyish brown (2.5Y 5/2) slightly silty sand.

3094: Compact deposit found on the eastern side of WTA, cut by [3093-SHs] and [-PH38]. It consisted of brownish yellow (10YR 6/8) clayey gravel; cut by [3093] features; possibly same as [3045/3095] inside WTR.

3096: Modern intrusion spots within WTR. The fill consisted of soft dark grey (2.5Y 4/1) clay and loose greyish brown (2.5Y 5/2) sandy clay. Same as [3041].

3097: Stone pavement 1, located near north end of VWI, below [3053]. It consisted of irregular flat stones and laid next to EVW.

3098: Stone pavement 2, located at south end of VWI, below [3053]. It consisted of flat stone, possibly disturbed.

3099: Stone pavement 3, located on west edge of WTA, build next to the EVW, above [3055]. It consisted of flat stone, possibly disturbed.

3100: East village wall made of stones.

3101: Filler under [3018] in south moat.

3102: Fill in south moat consisted of yellowish brown (10YR 5/8) slightly sandy clayey gravel.

3103: Fill in south moat in yellowish brown (10YR 5/4).

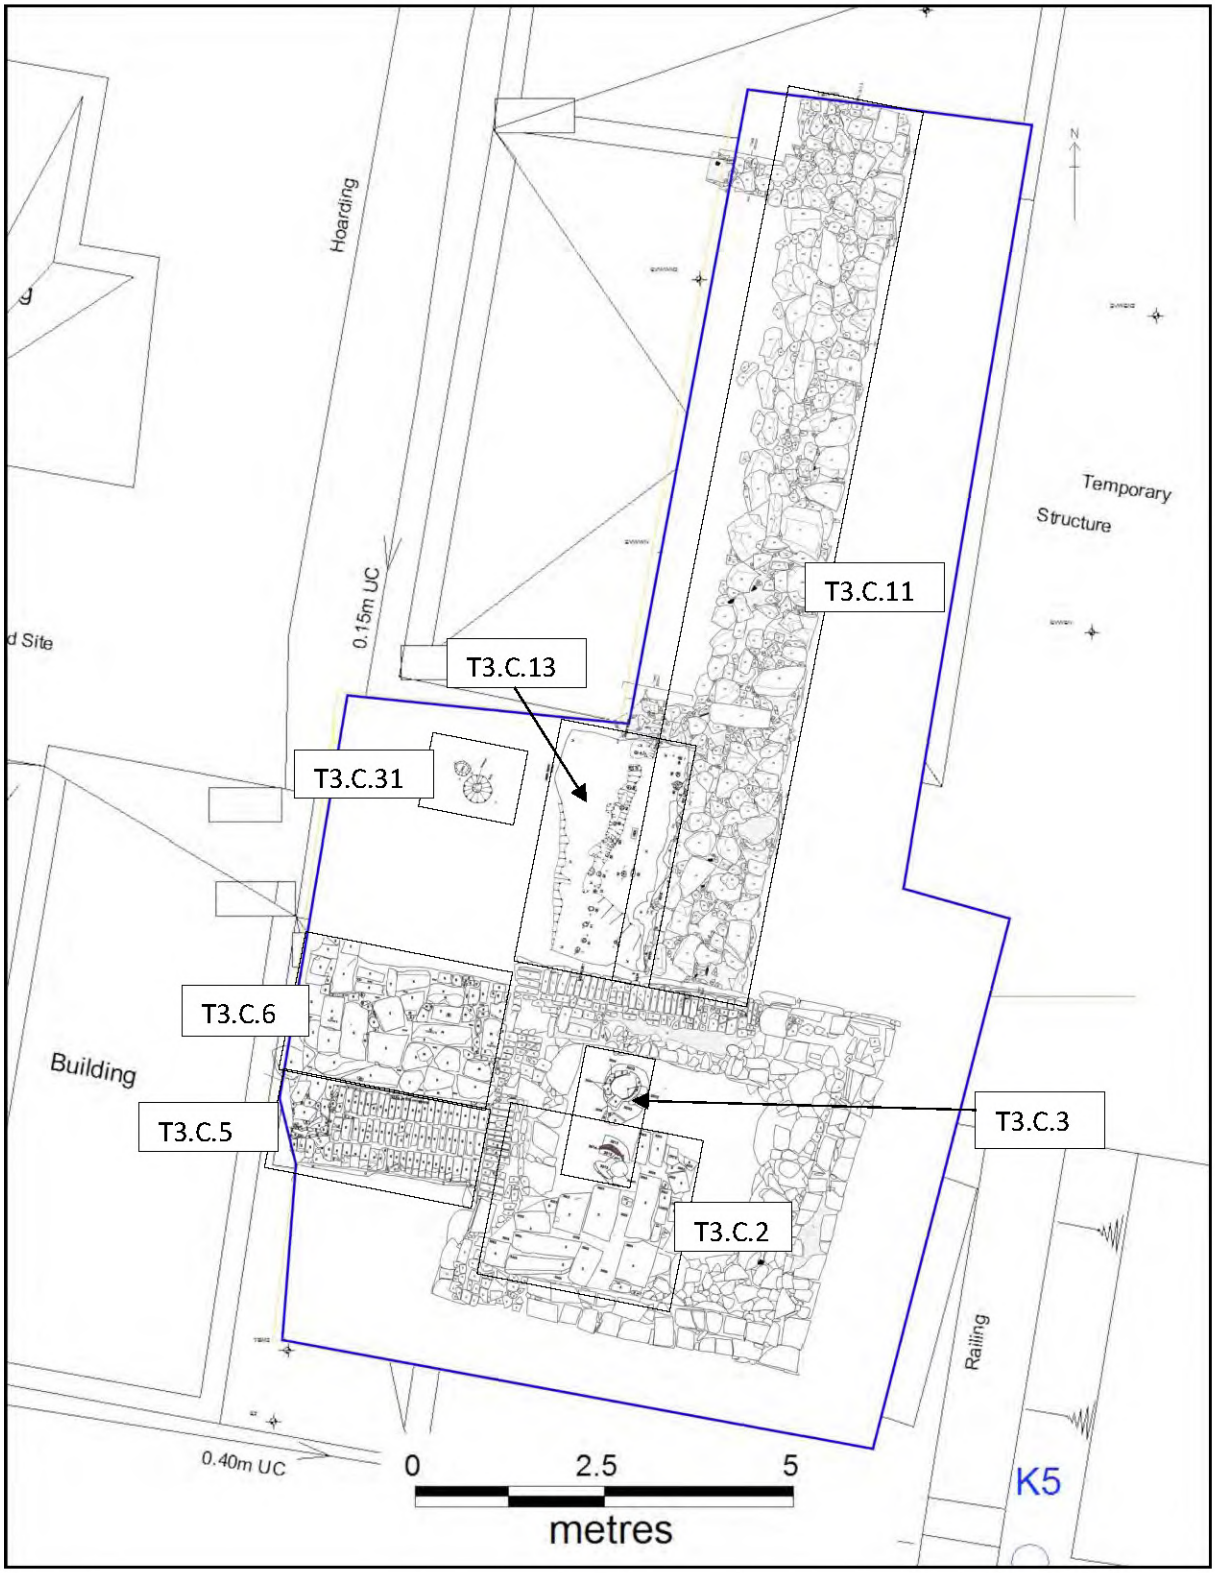
* Finds presented with category/fabric code, for further information please see ***Annex A and B Trench artefact description***

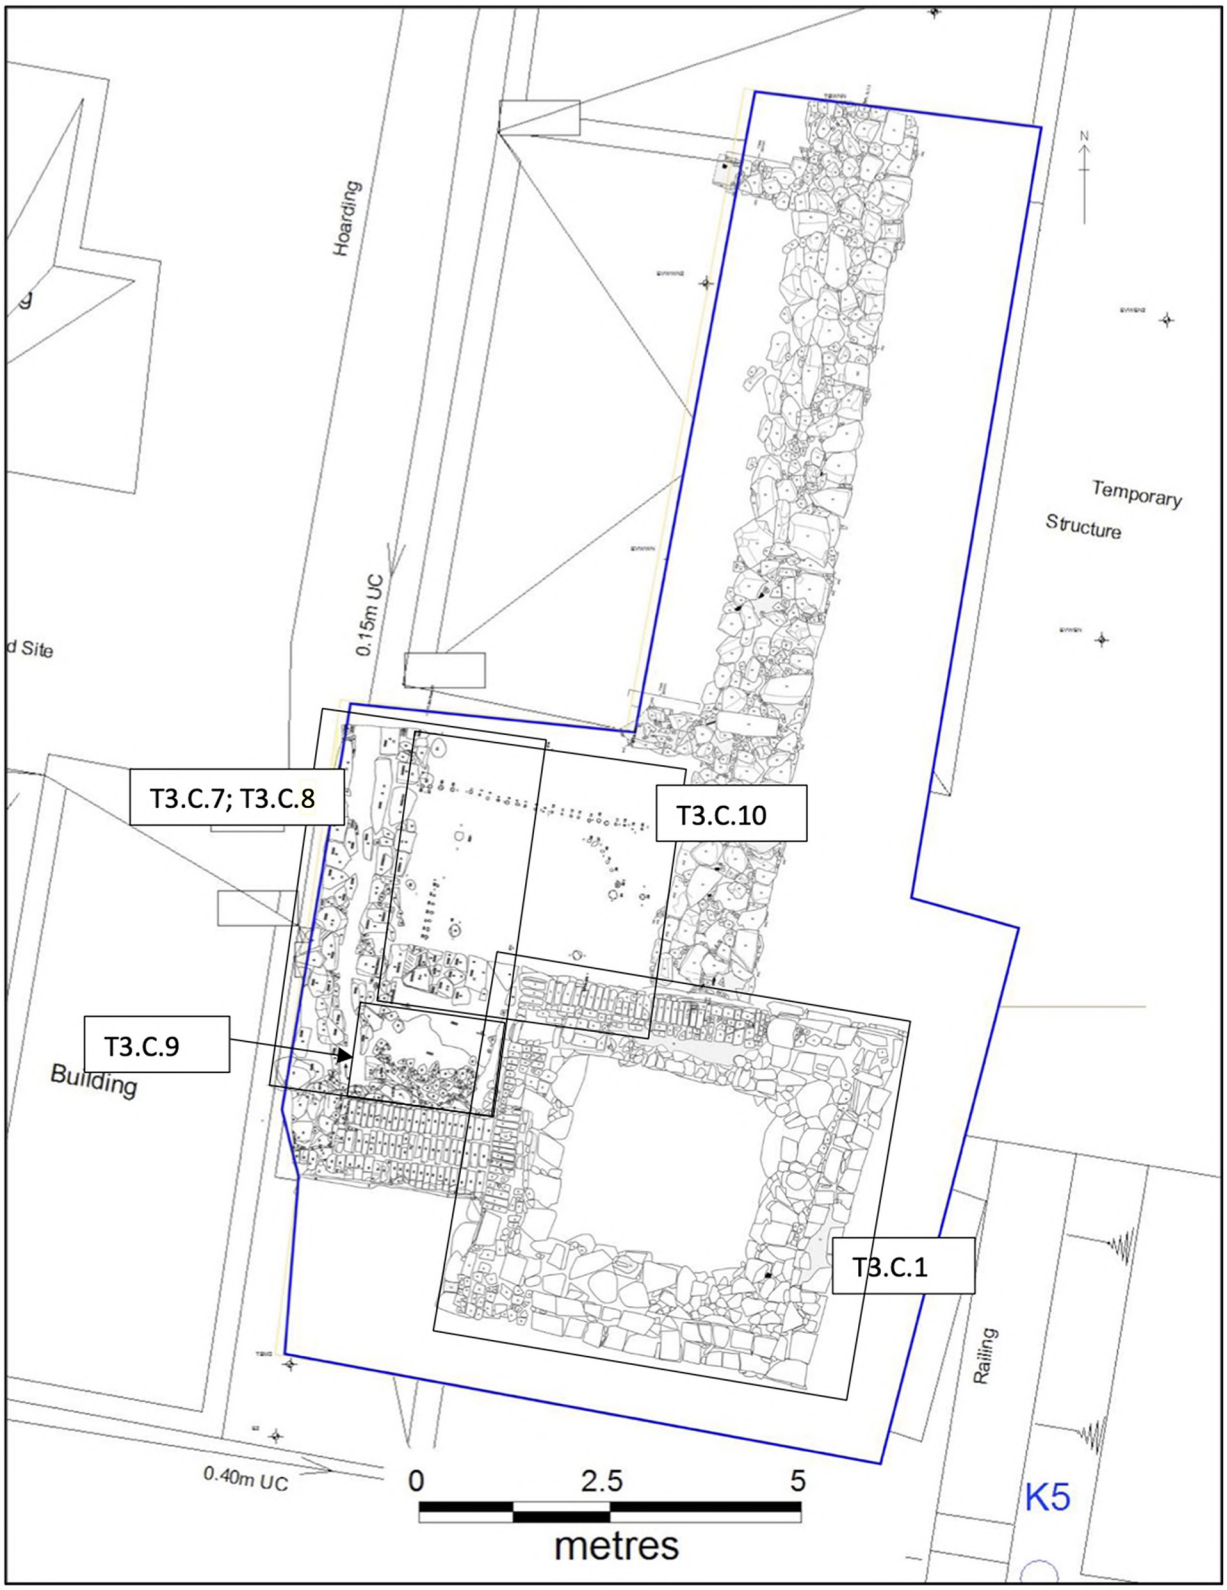
**Proposed dating based on stratigraphy, diagnostic artefacts, TL-dating and historical information.

T3.C Trench 3 drawings

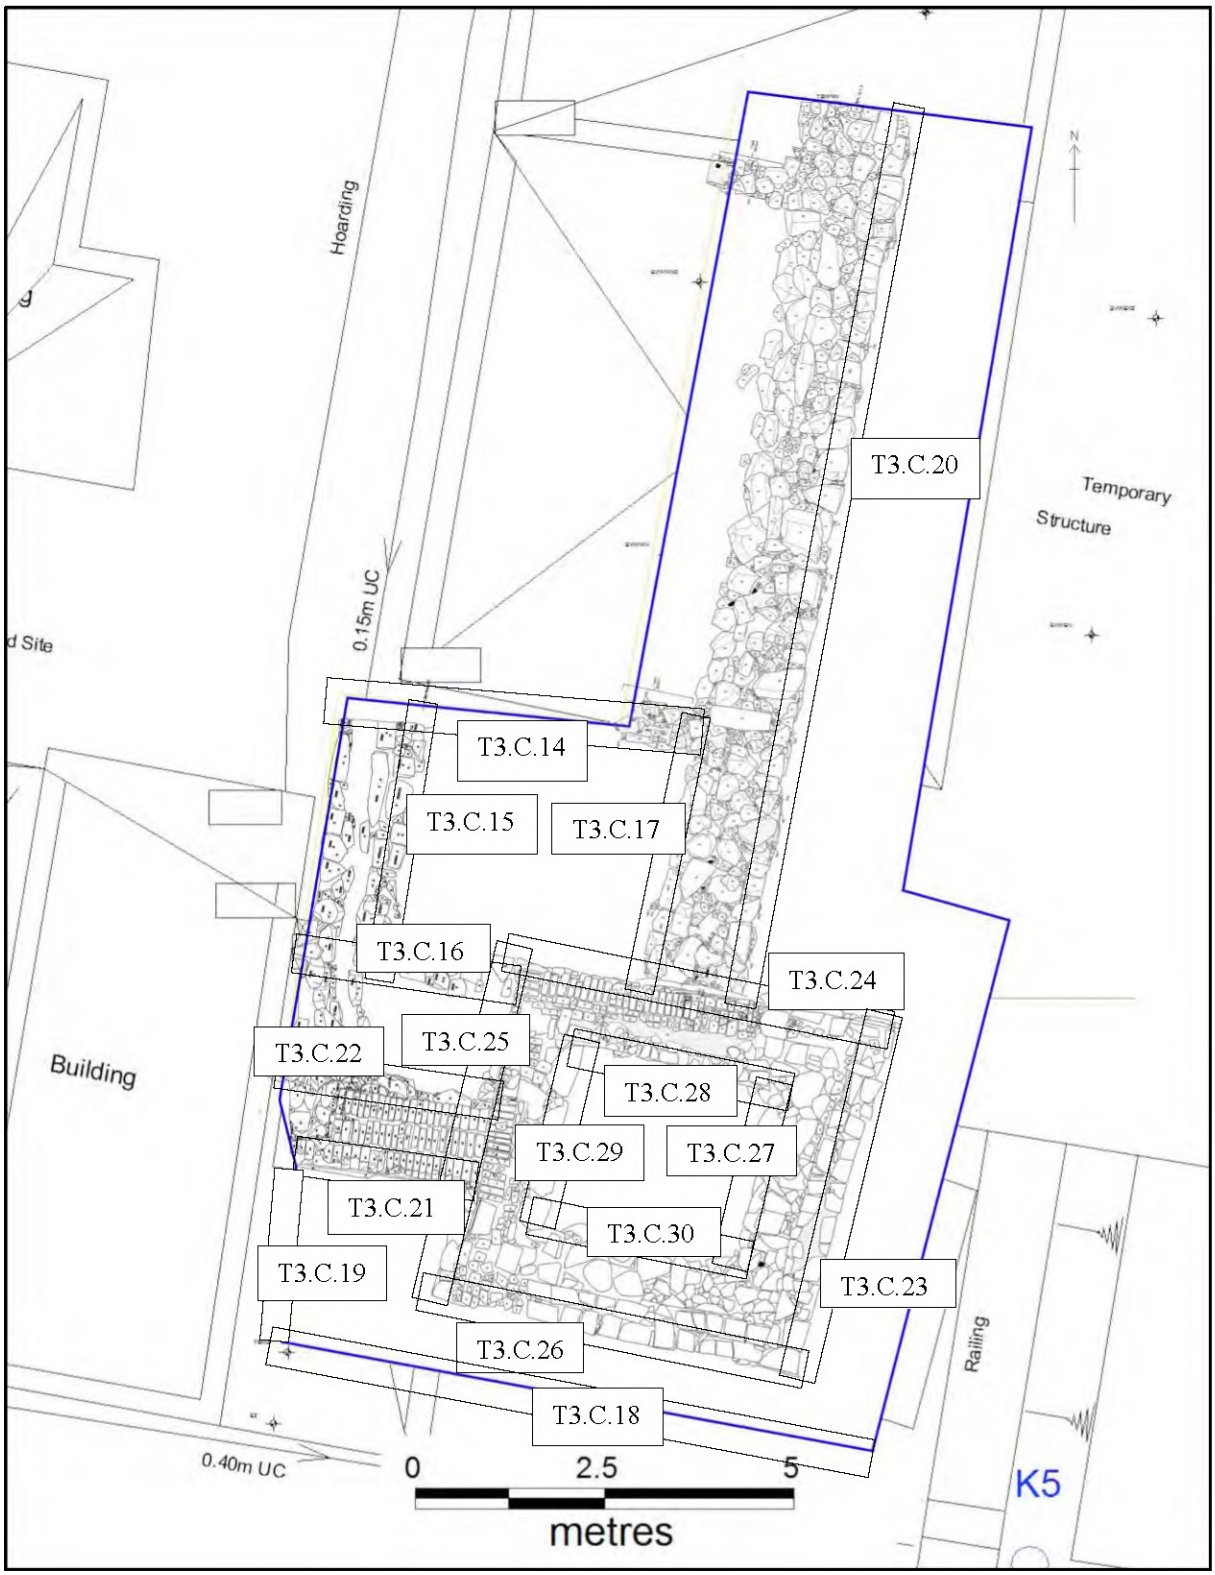
Key to ground plans (1):



Key to ground plans (2):

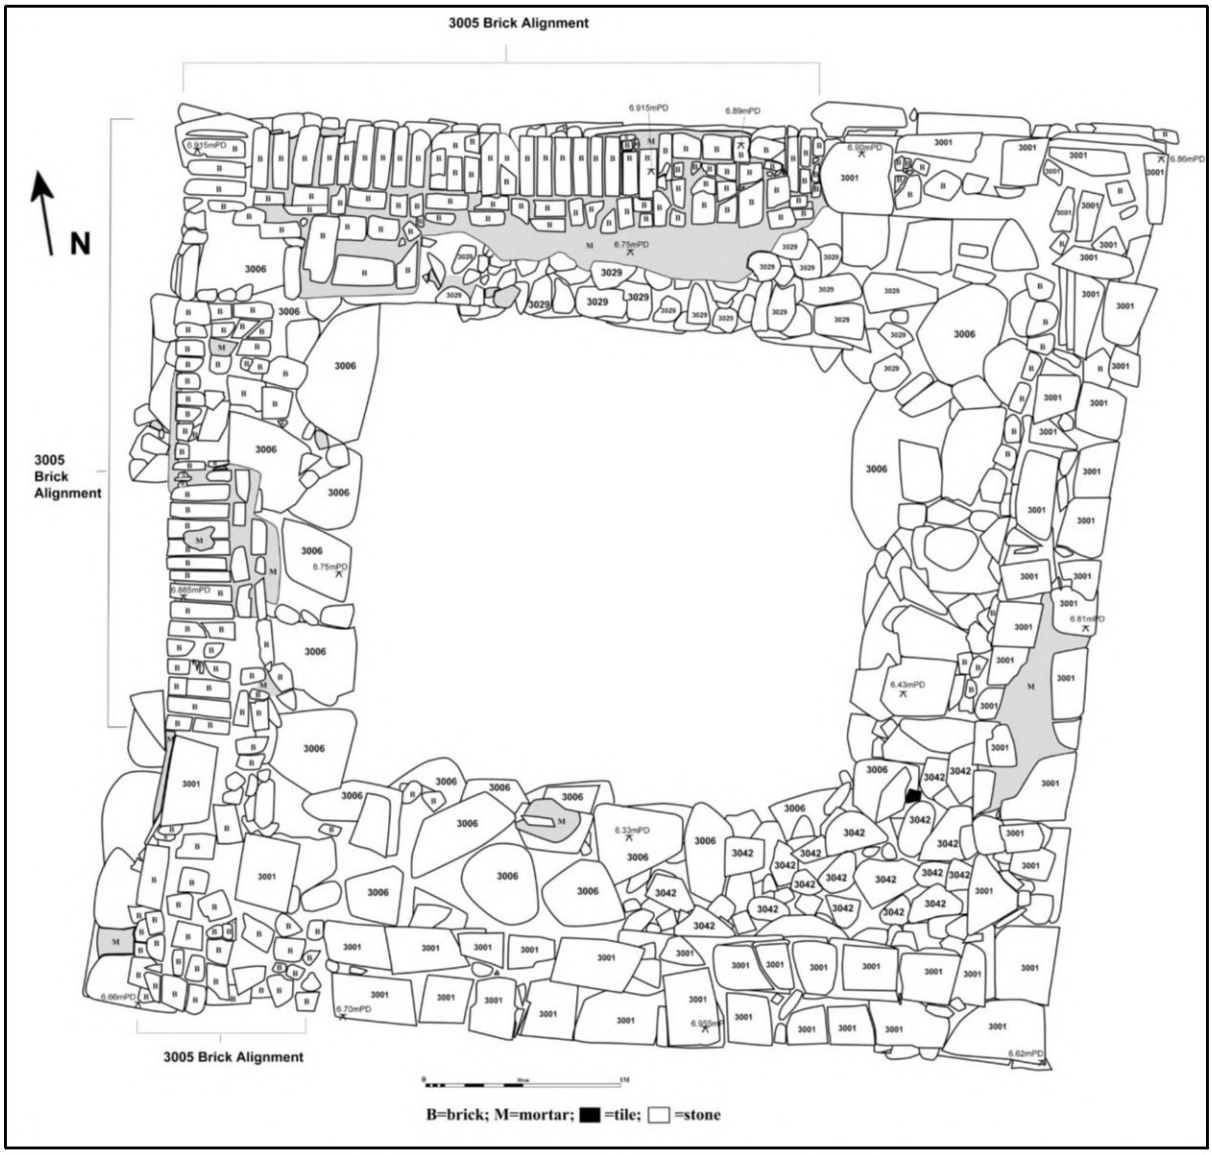


Key to sections:

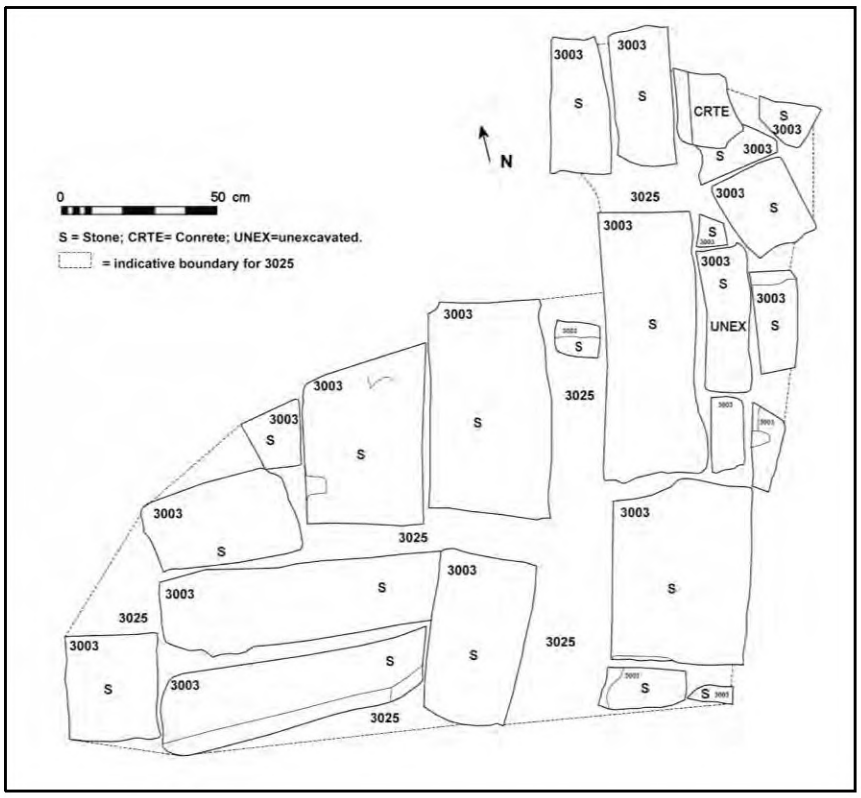


Ground plan of structural remains and features

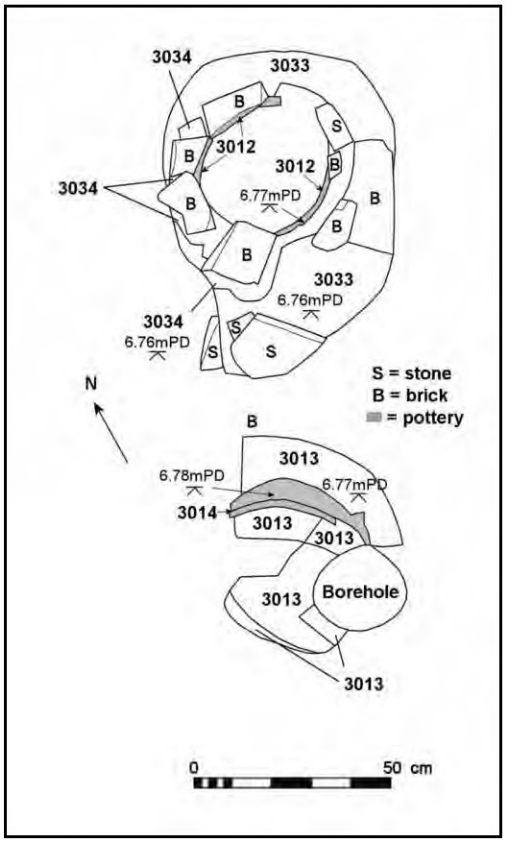
Watch tower room



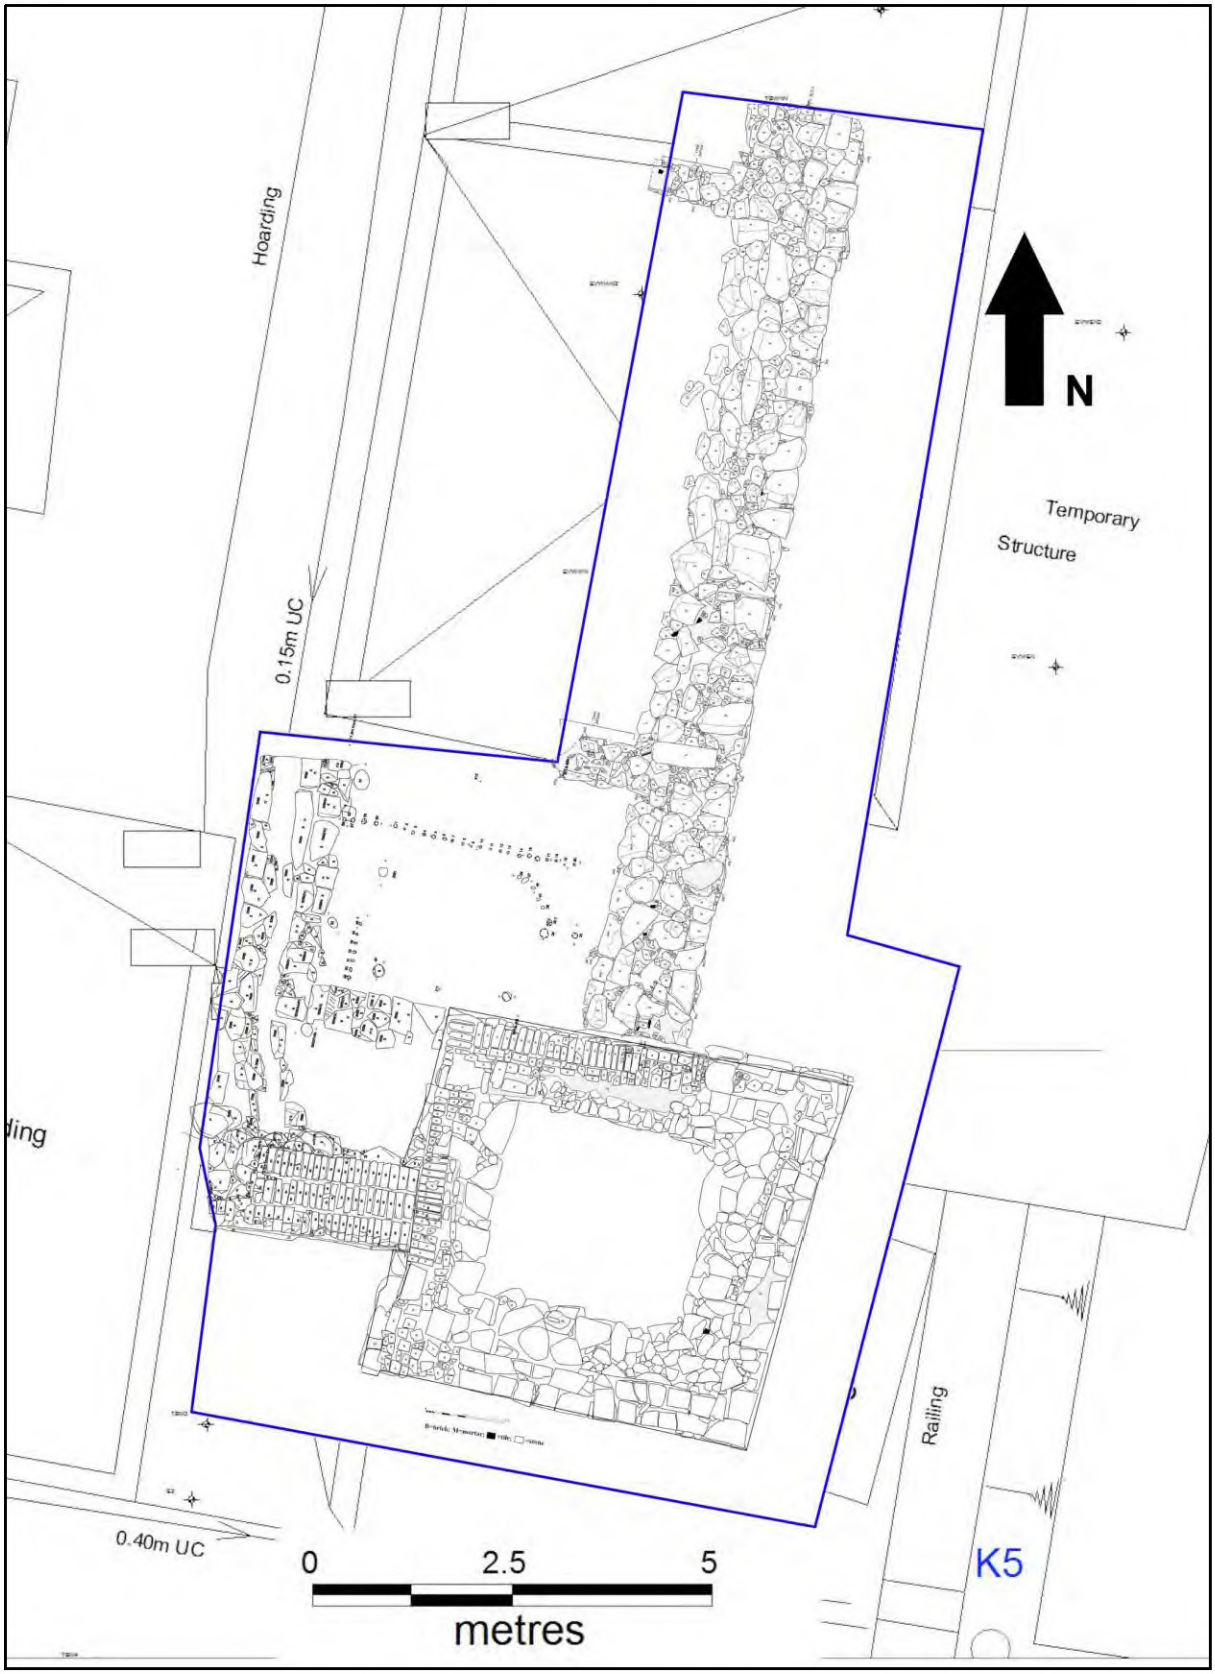
T3.C.1 Plan of T3 watch tower room



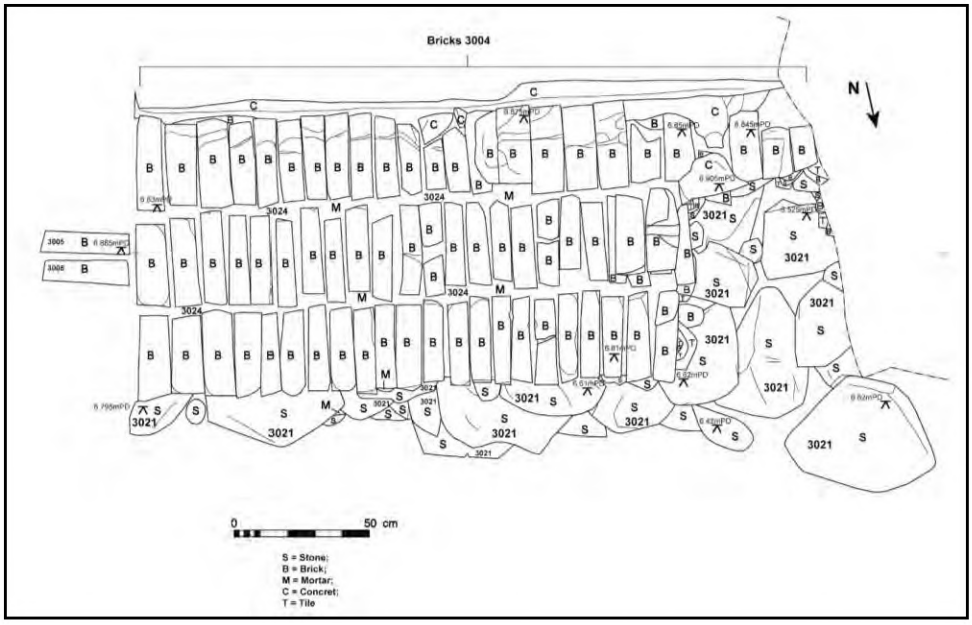
T3.C.2 Stone Pavement [**co.3003**] within the watch tower room



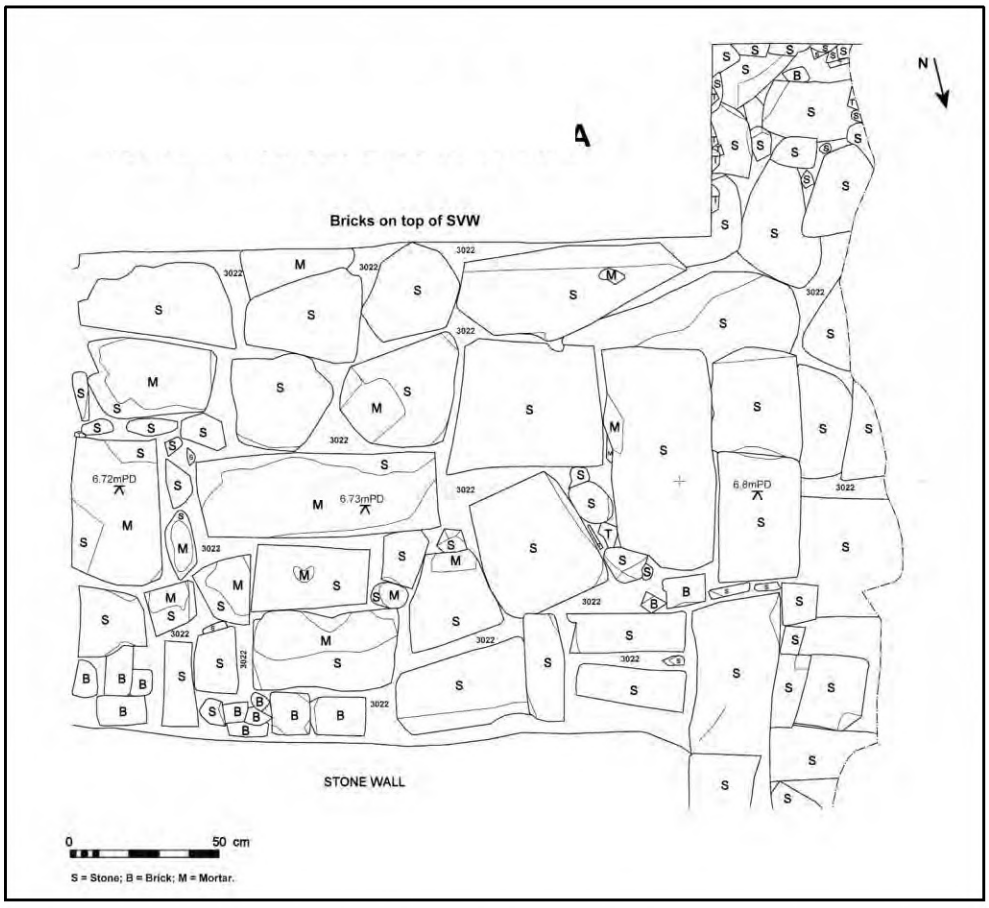
T3.C.3 Plan for vessels [**co.3012**] and [**co.3014**], and surrounding soils [**co.3033**] and [**co.3013**].



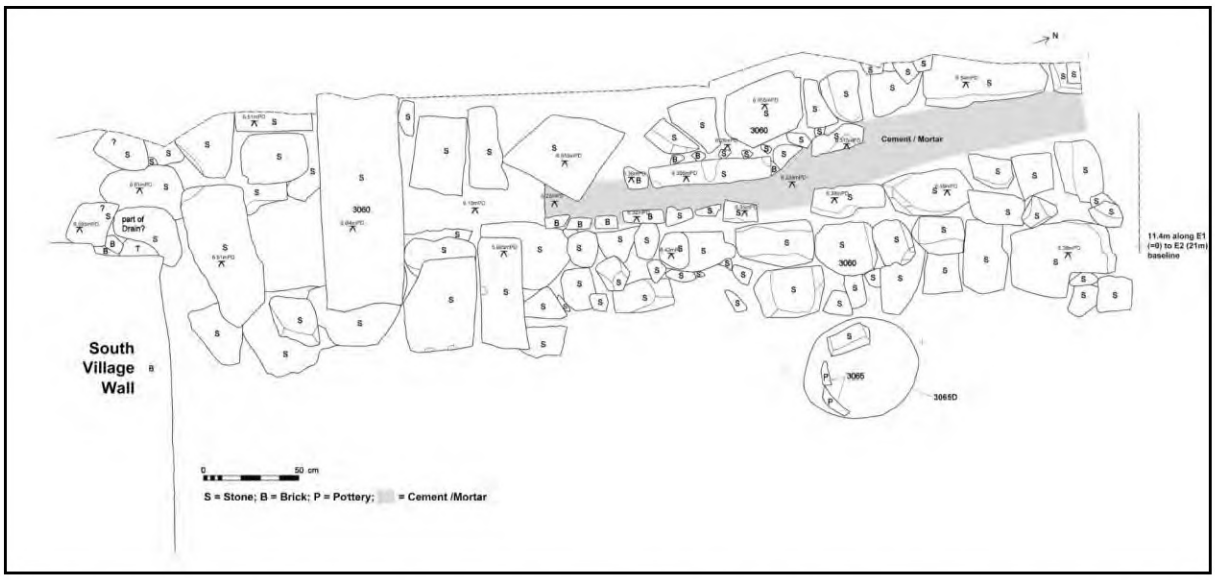
T3.C.4 Ground plan showing spatial relationship between stone drain [**co.3066**], stake hole alignments [**co.3082-SHs**], potholes [**co.3082-PHs**], stone house wall [**co. 3059 W/S**], and the layout of watch tower room, east and south village walls.



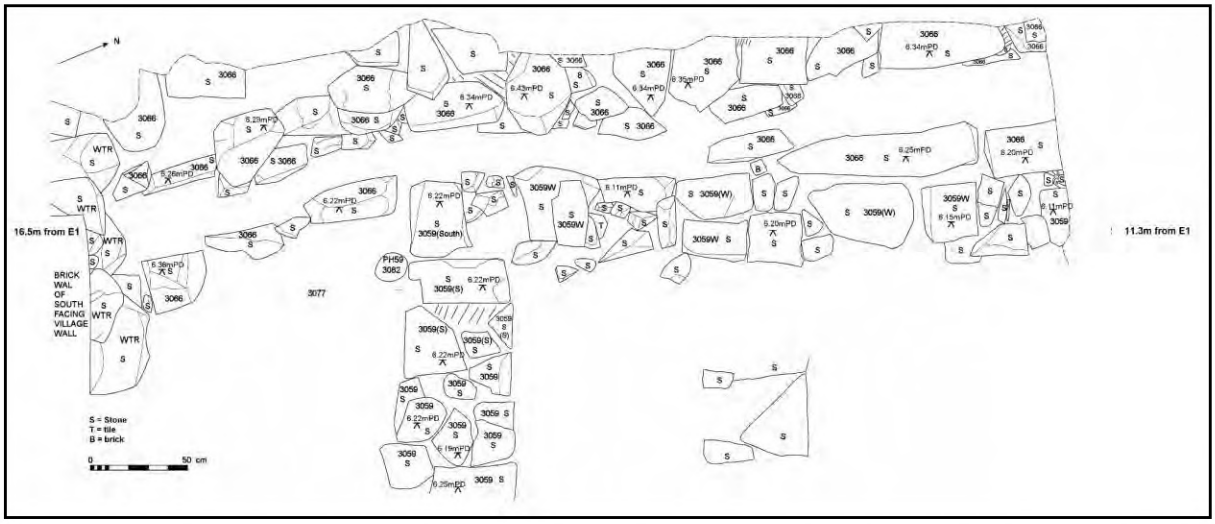
T3.C.5 Plan of southern village wall, showing bricks **[co.3004]**, mortar **[co.3024]** and southern village wall stone **[co.3021]**



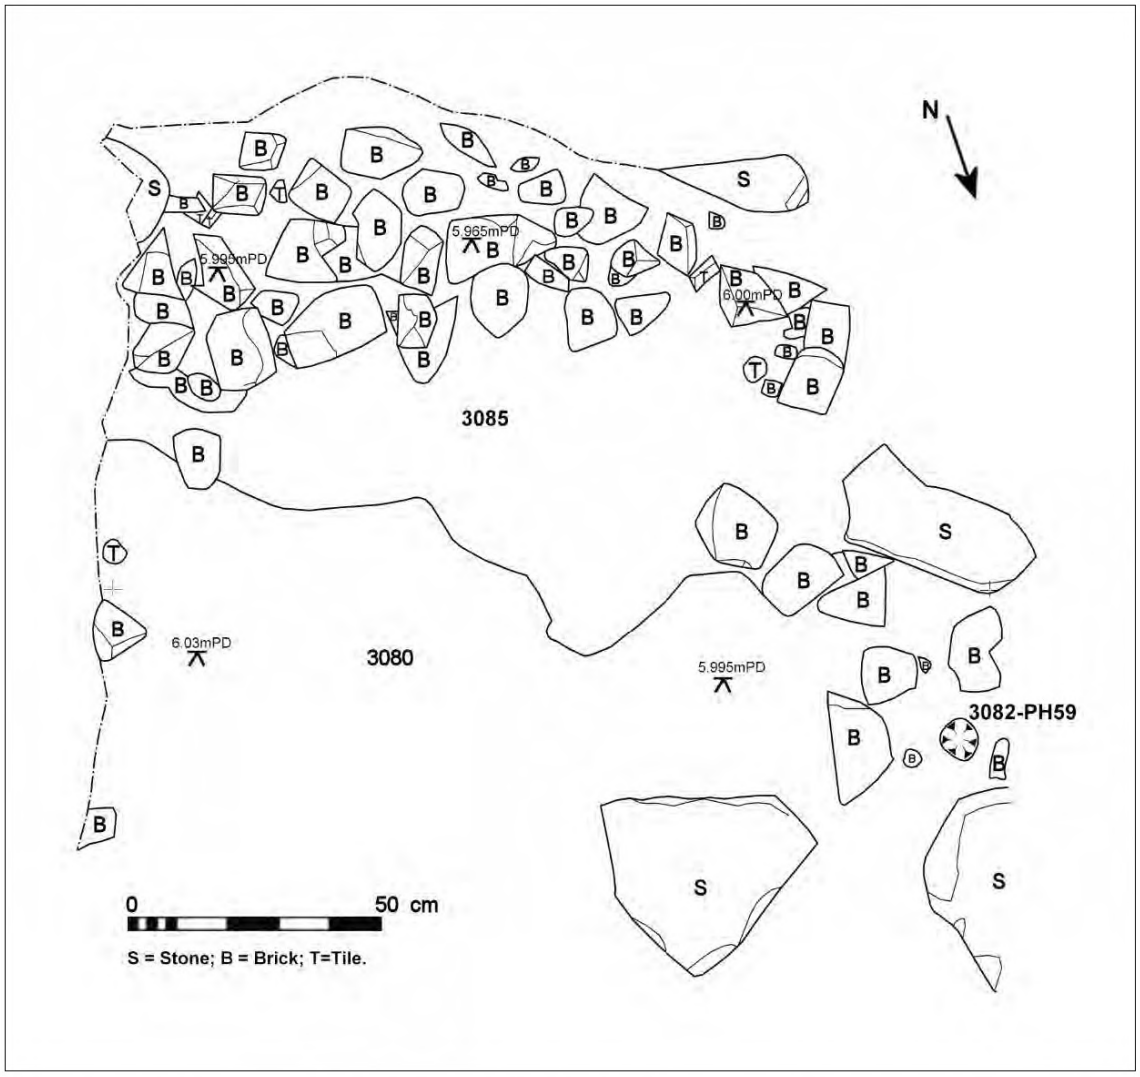
T3.C.6 Stone floor **[co.3019]** and soil **[co.3022]** between stones at the entrance to watch tower.



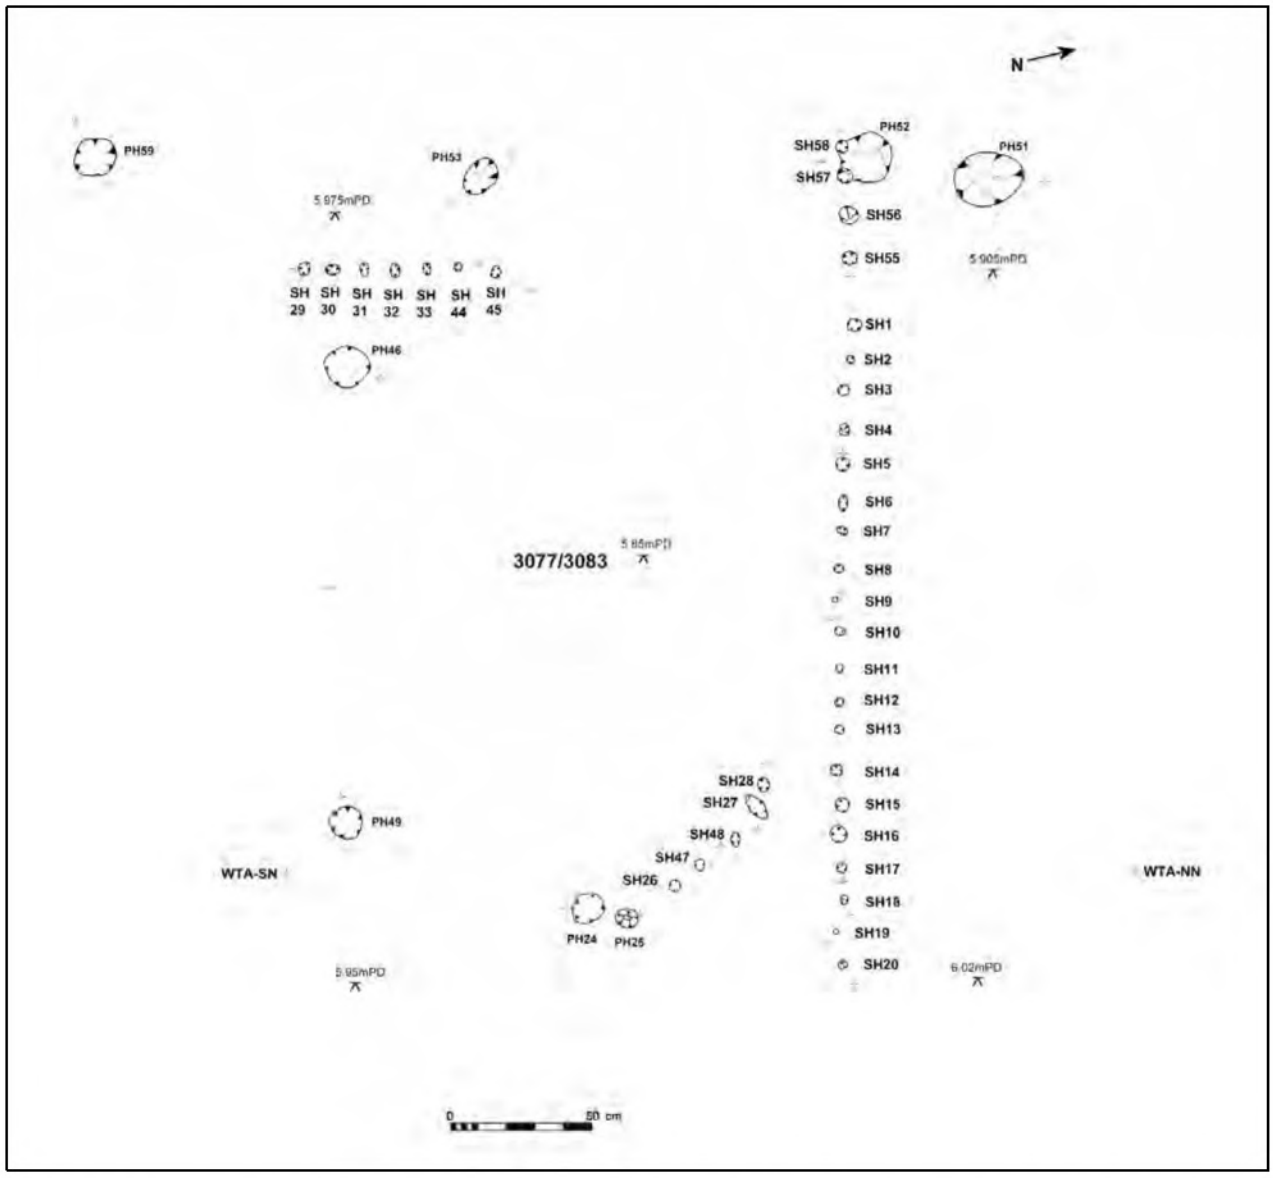
T3.C.7 Plan for stone drain [**co.3060**] and pot pit [**co.3065D**] containing pot [**co.3065**].



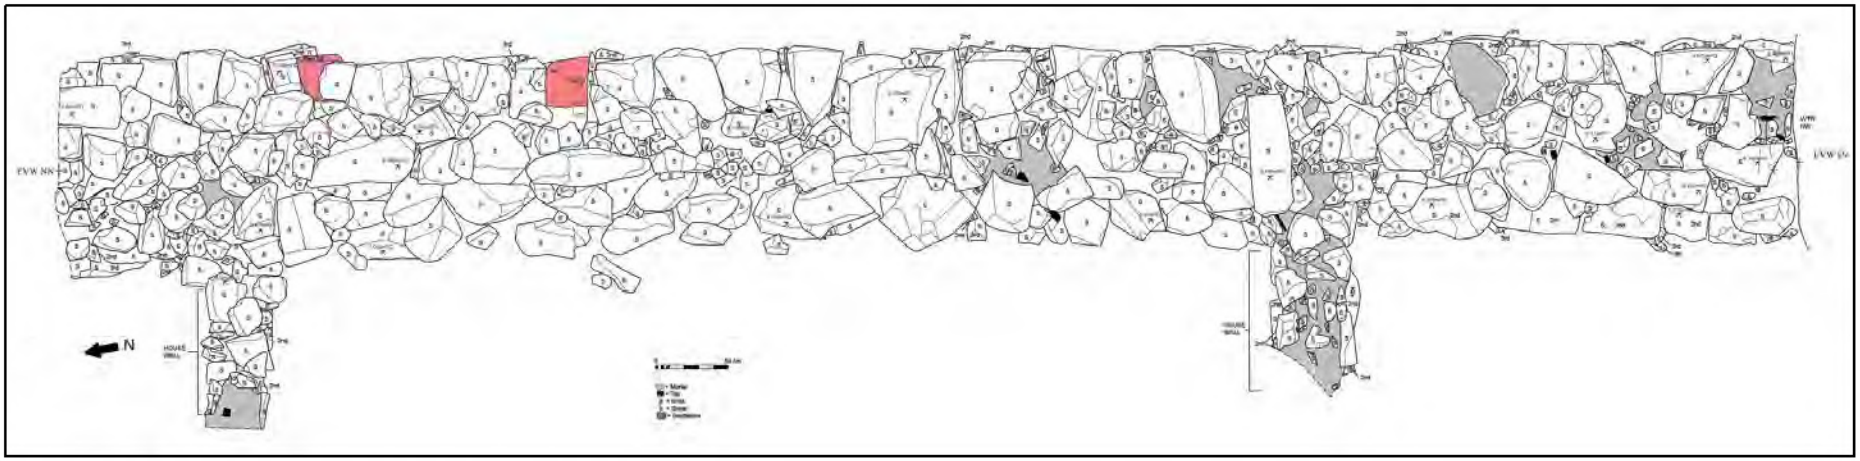
T3.C.8 Plan of stone drain [**co.3066**] and stone house walls [**co.3059W/S**] which connects to WTR .



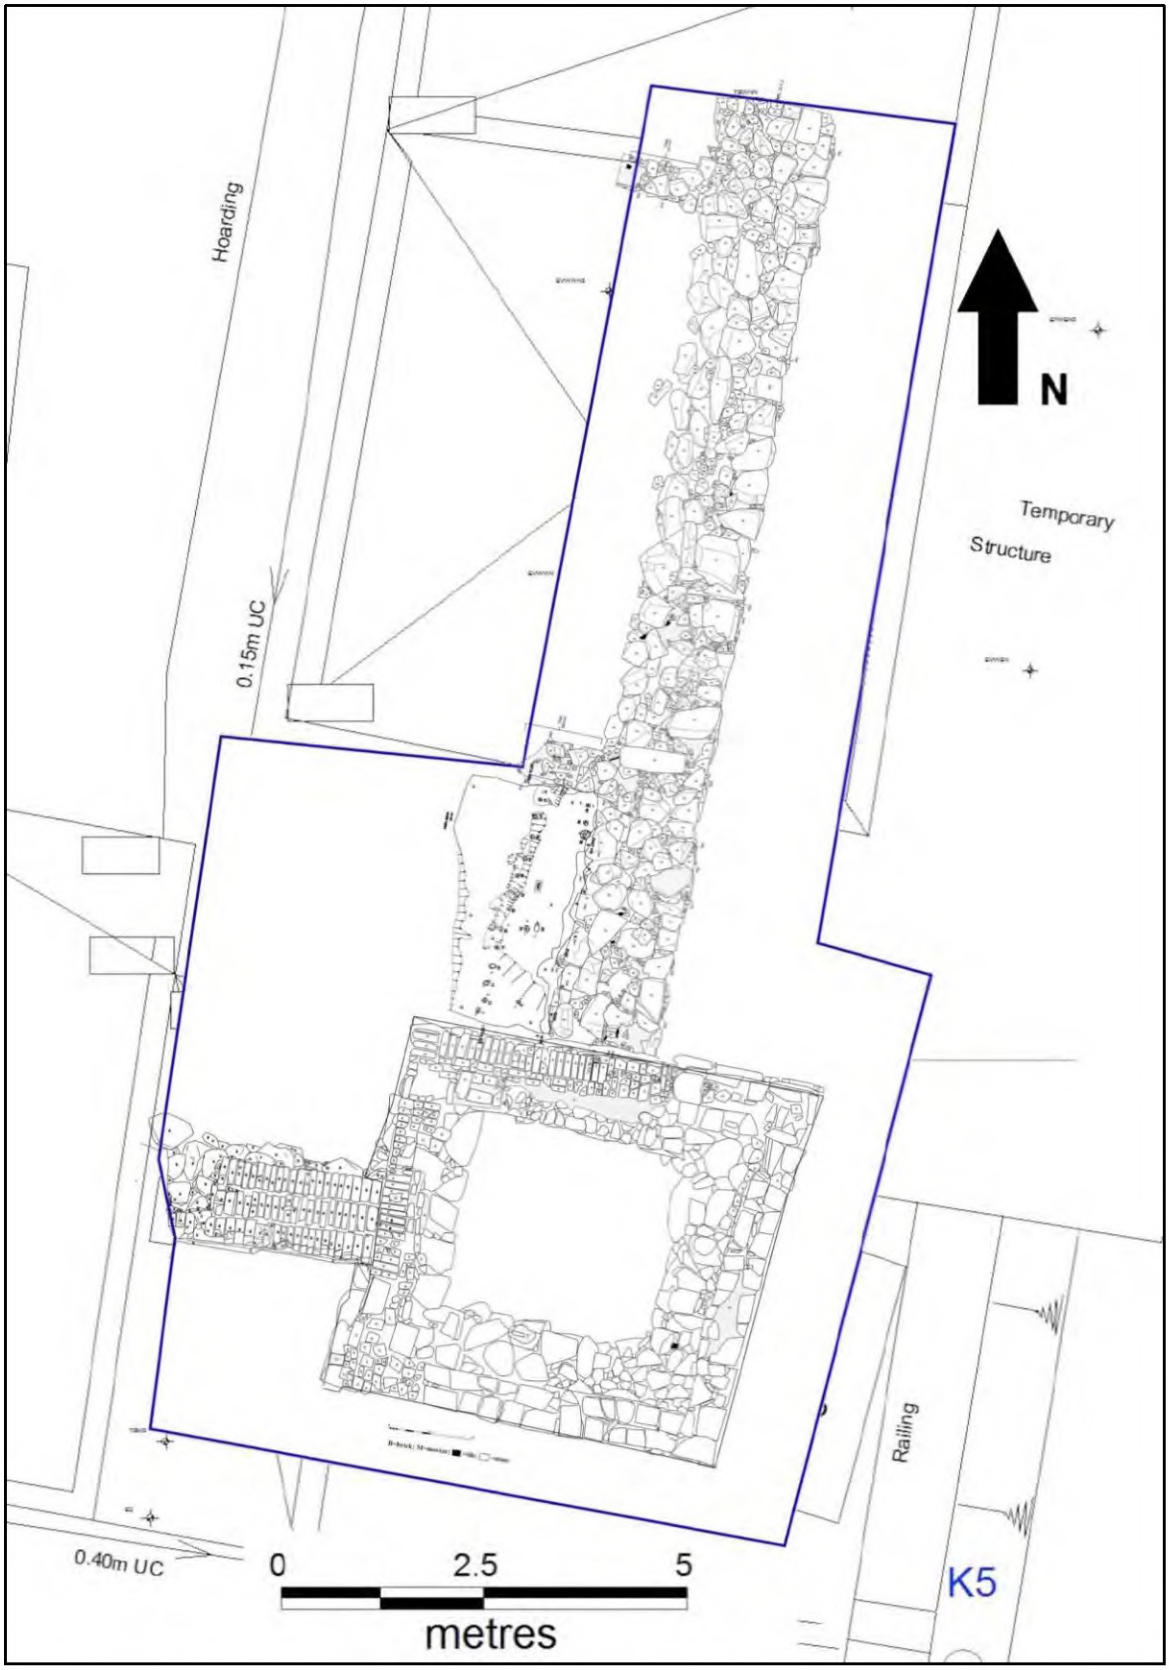
T3.C.9 Brick cluster [**co.3081**] on floor [**co.3085**], north of southern village wall and west of watch tower room.



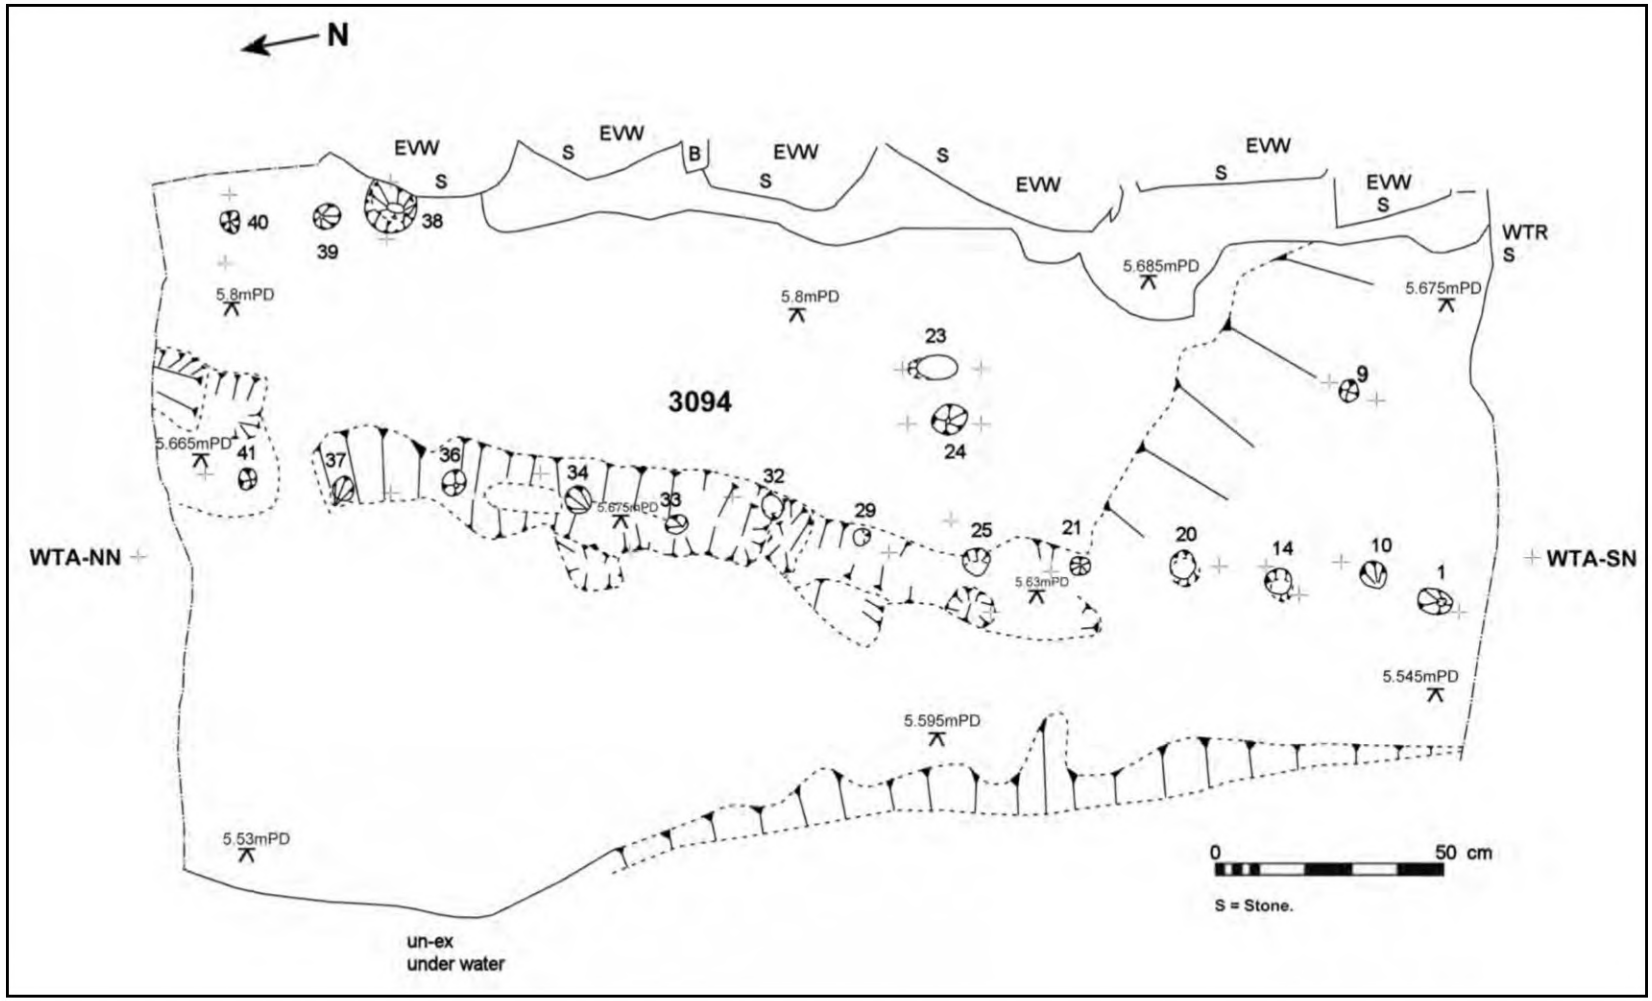
T3.C.10 Post-ex plan for postholes [**co.3082-PHs**] and stake hole alignments [**co.3082-SHs**] on floor [**co.3077/3083**] in watch tower area.



T3.C.11 Plan of eastern village wall [**co.3100**].

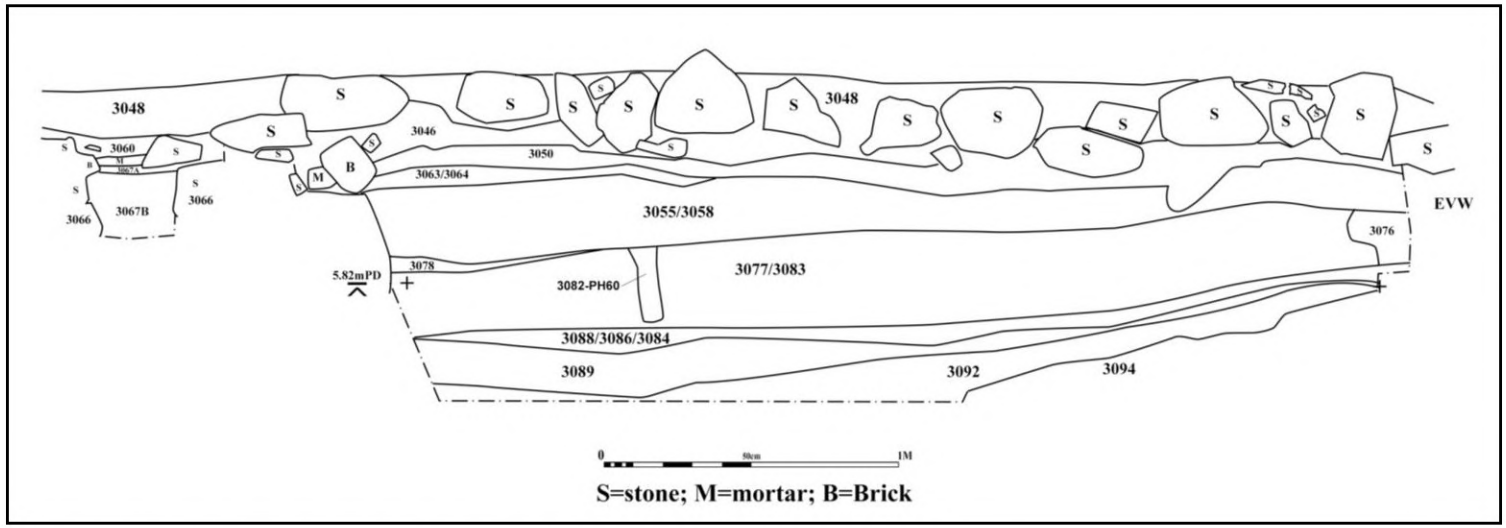


T3.C.12 Ground plan showing spatial relationship between stake hole alignment [**co.3093-SHs**] and posthole [**co.3093-PH38**] and the layout of watch tower room, east and south village walls.

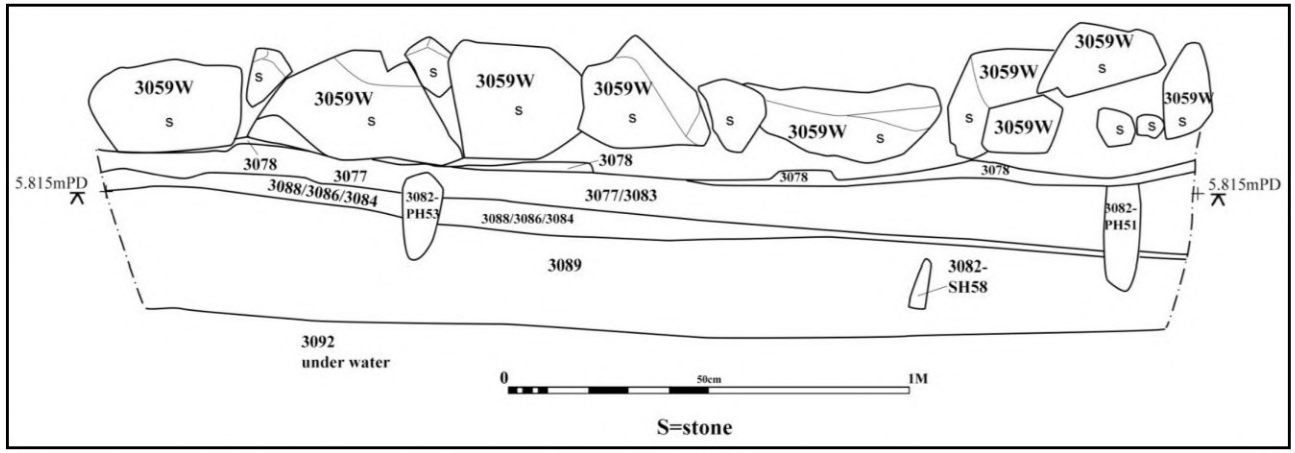


T3.C. 13 Post-ex plan for posthole **[co.3093-PH38]** and stake holes **[co.3093-SHs]** on **[co.3094]** at the east side of watch tower area

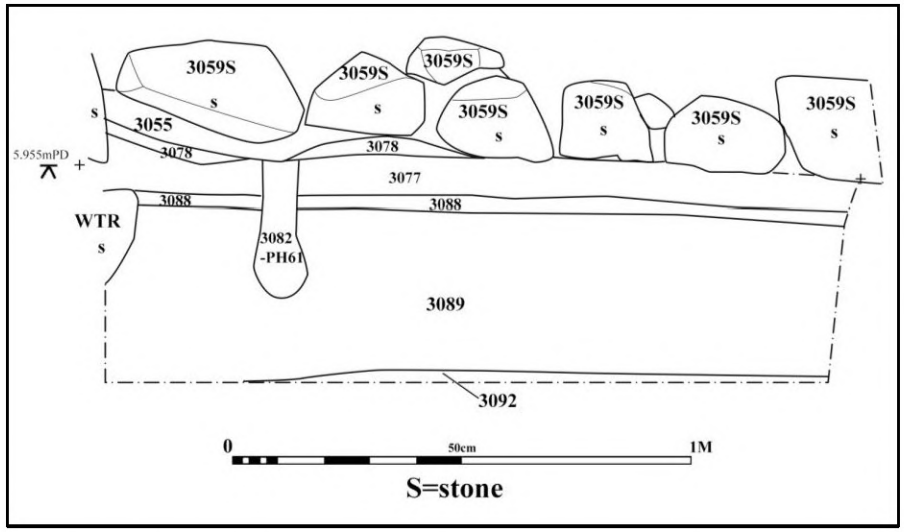
Stratigraphical sections - WTA



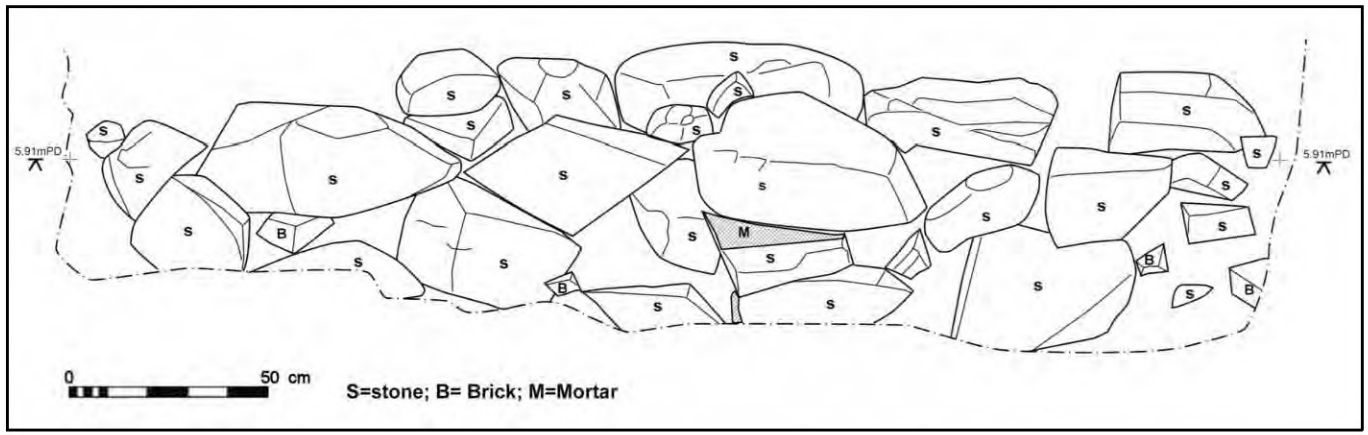
T3.C.14 South facing section of watch tower area.



T3.C.15 East facing section of watch tower area with the stone drain.

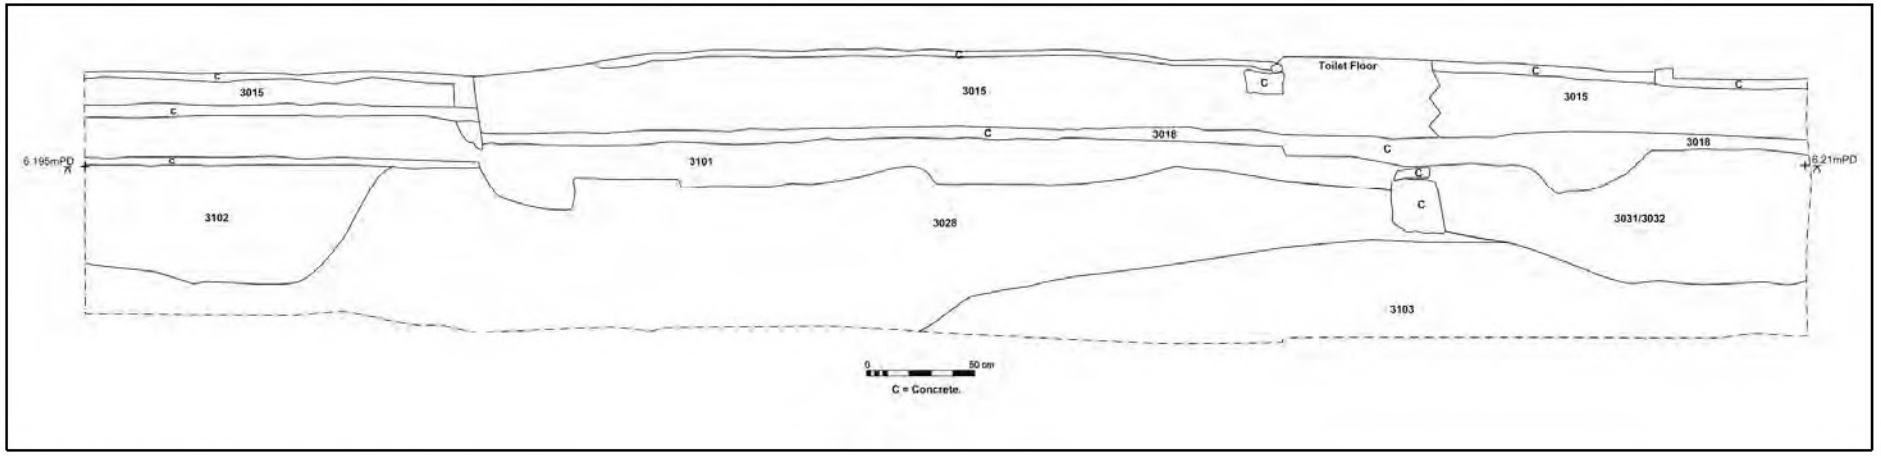


T3.C.16 North facing section of watch tower area to the west of the WTR and stone house wall.

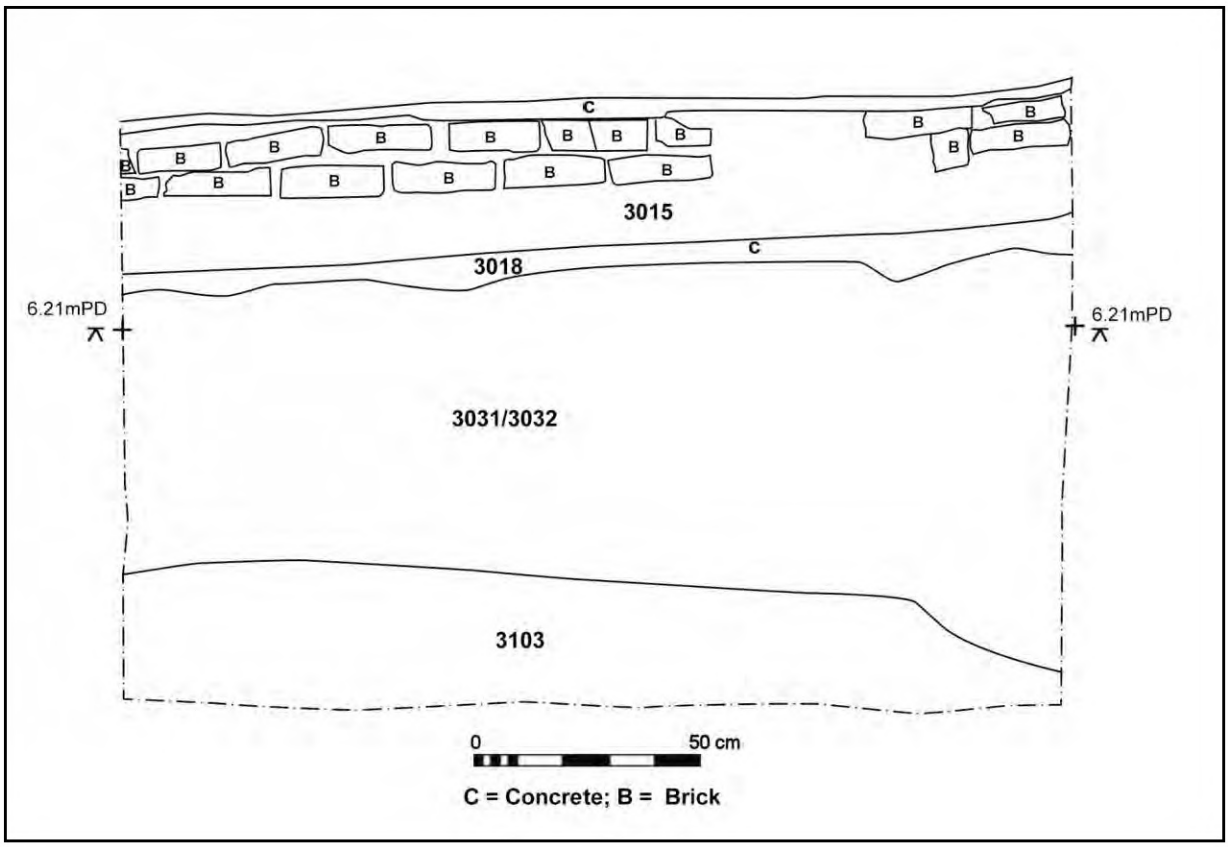


T3.C.17 West facing section (interior) of eastern village wall [**co.3100**] within the WTA.

Moat

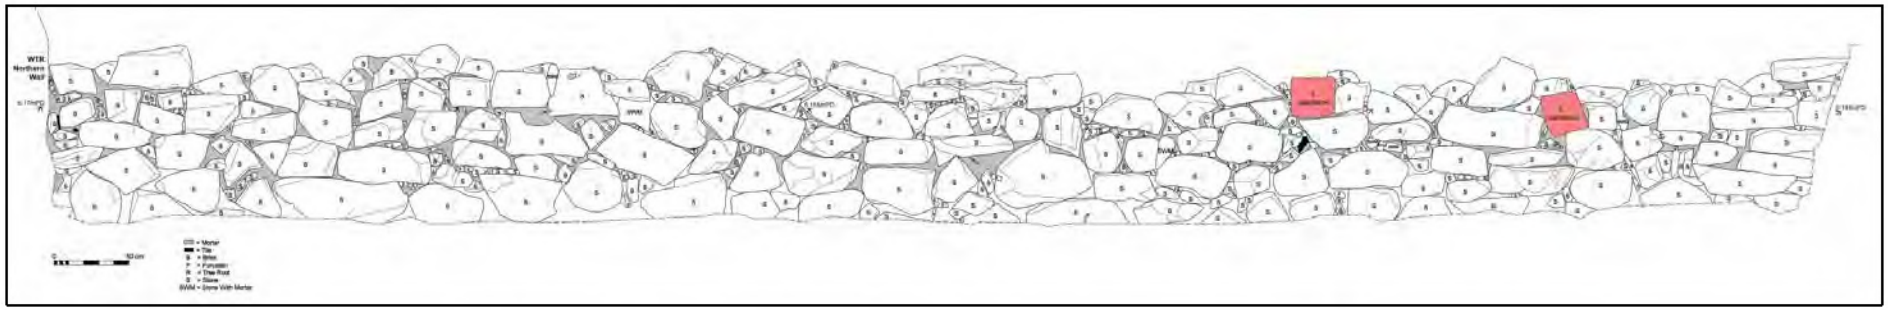


T3.C.18 North facing section of T3 south moat

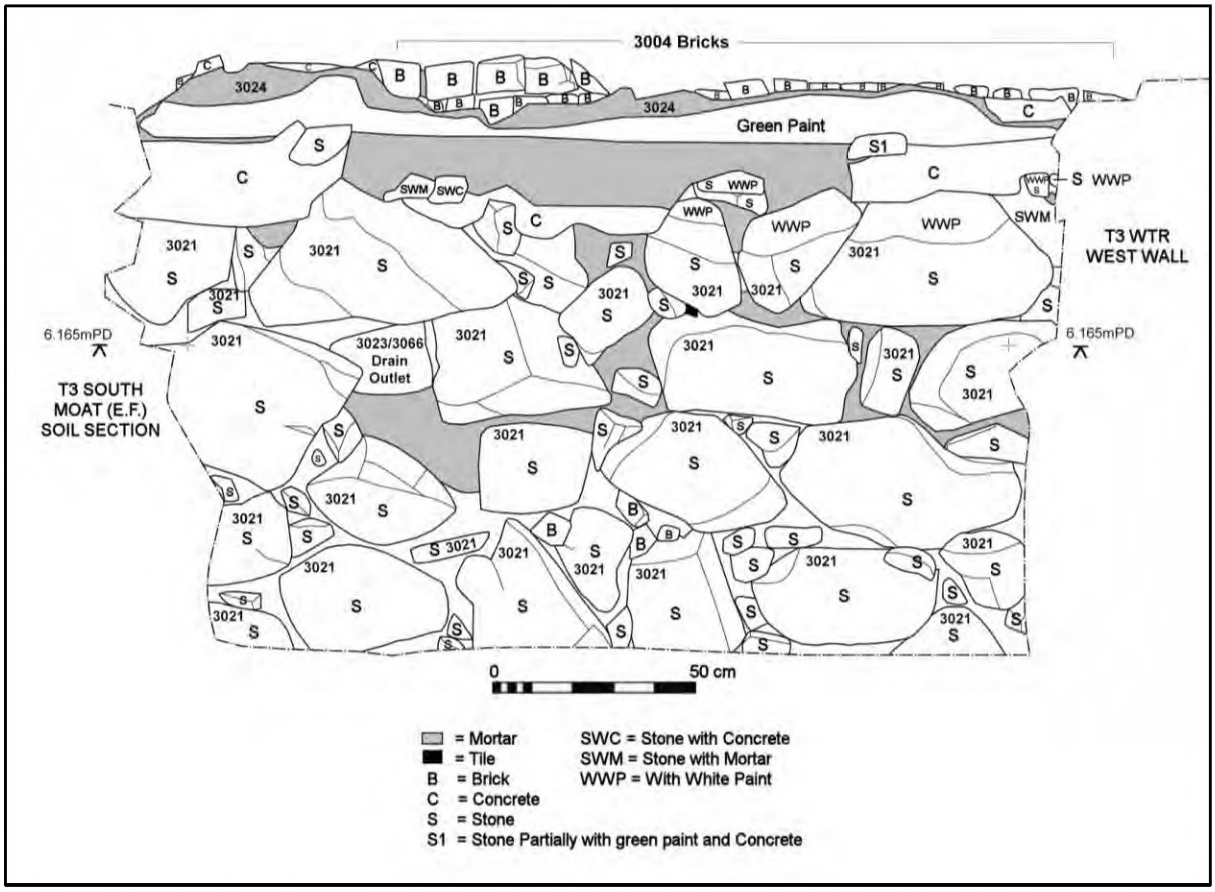


T3.C.19 East facing section of T3 south moat

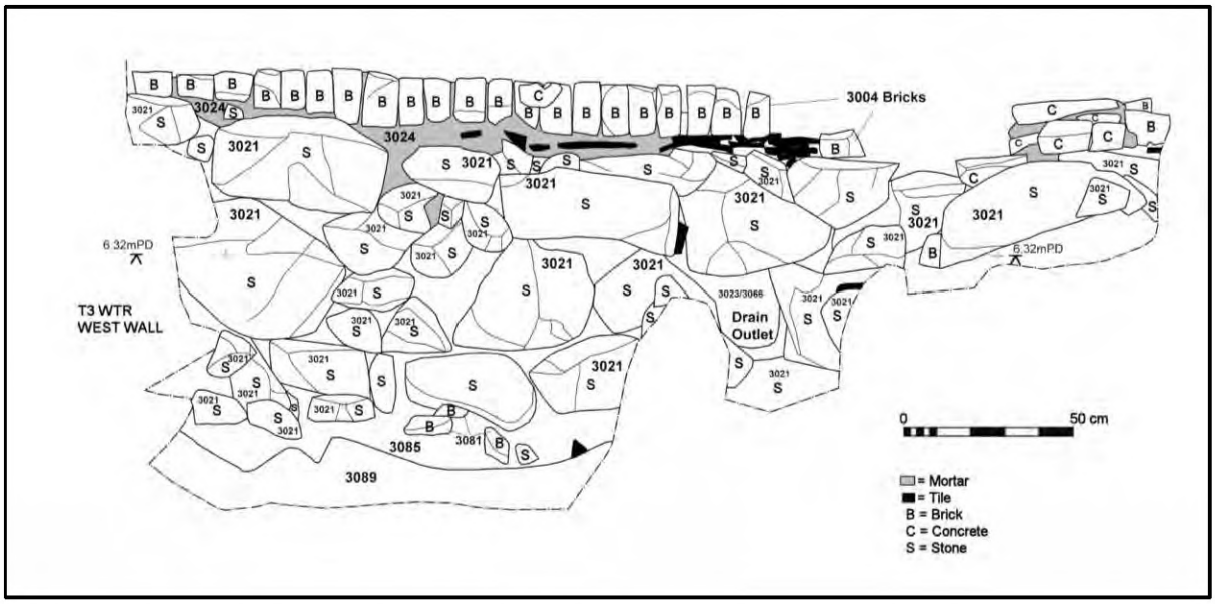
Structural profiles of village walls



T3.C.20 East facing section (exterior) of eastern village wall [**co.3100**].

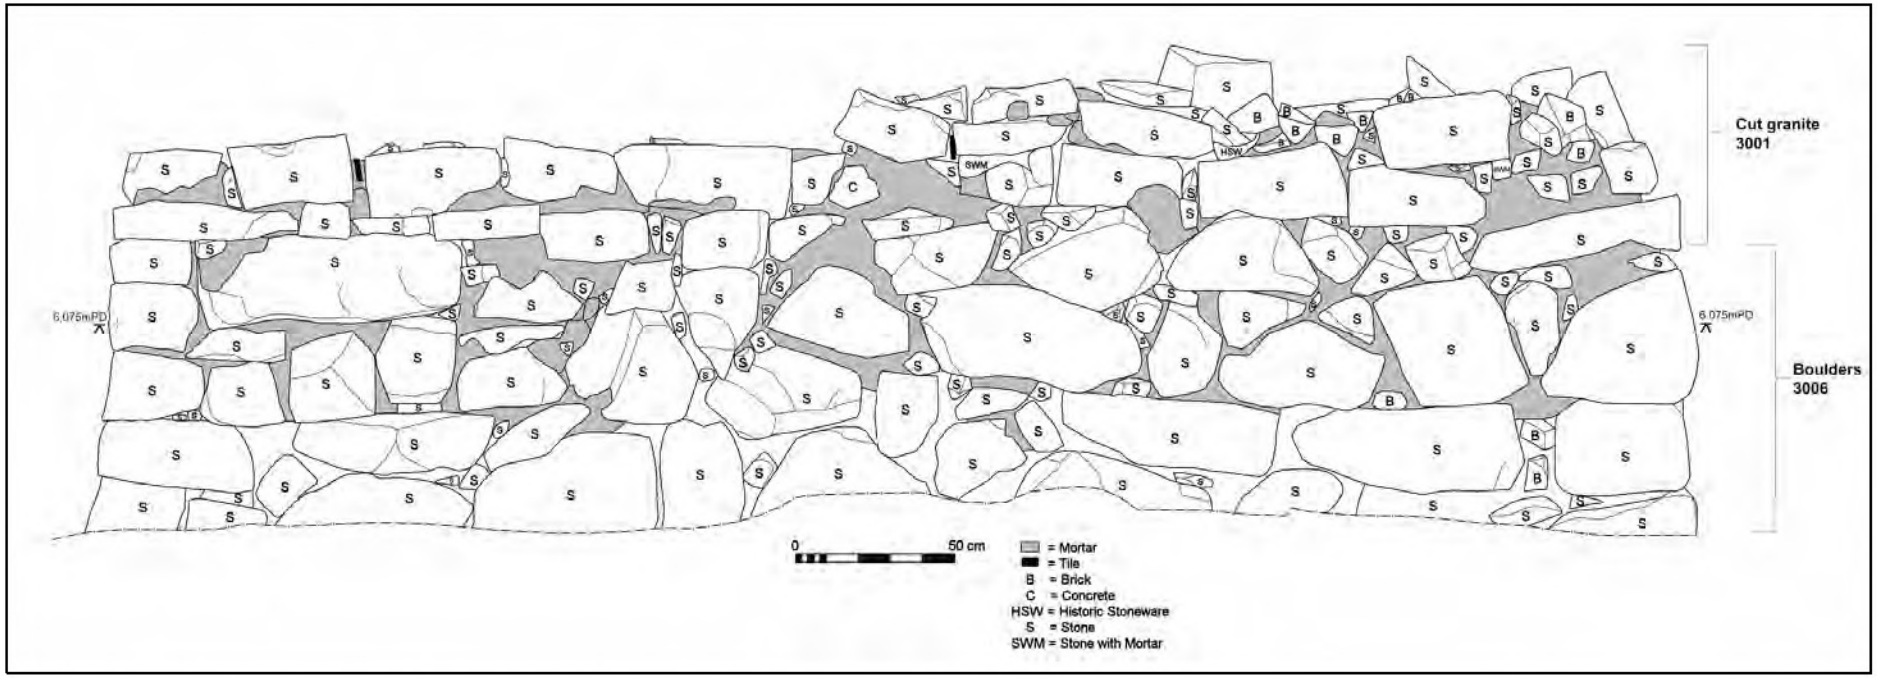


T3.C.21 South facing section (exterior) of southern village wall, showing [**co.3004, 3024, 3021, 3023/2066**].

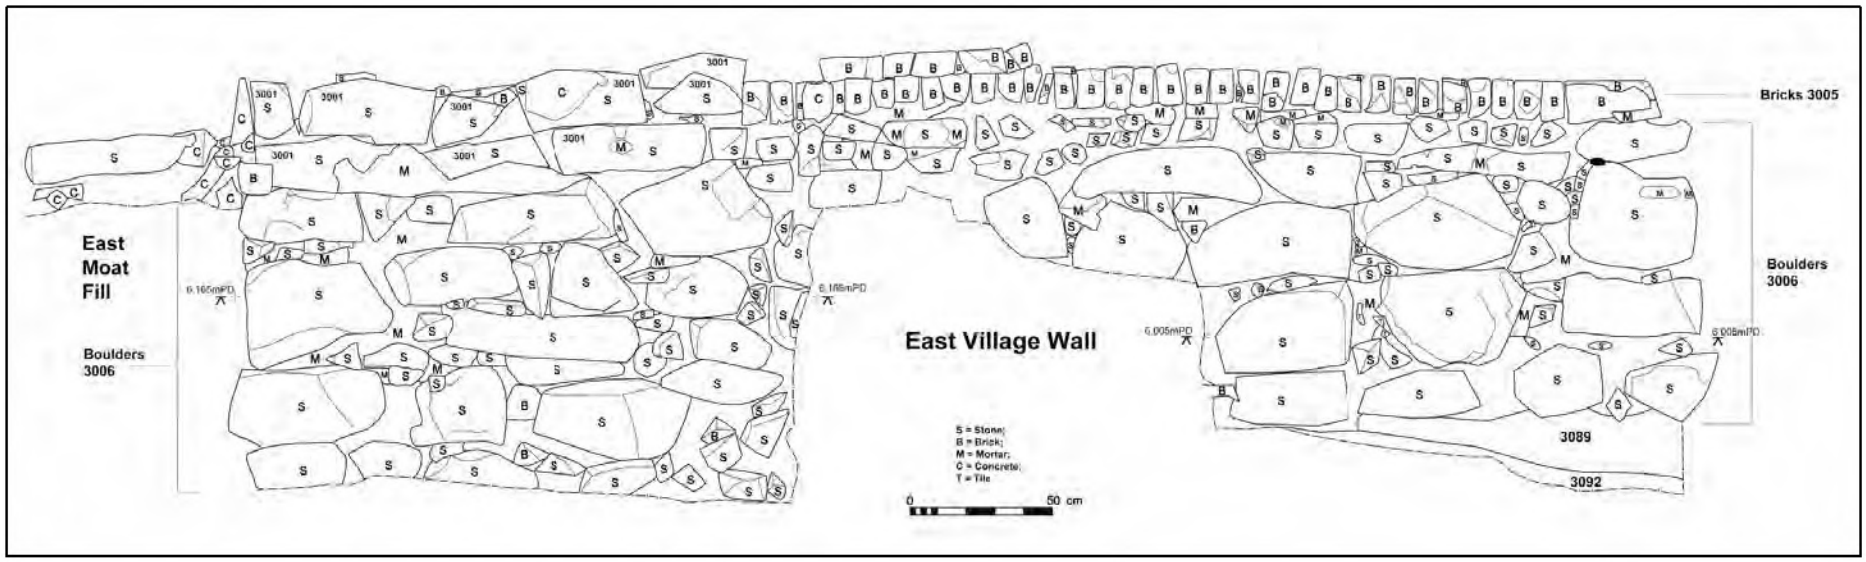


T3.C.22 North facing section (interior) of southern village wall showing [**co.3004, 3024, 3021, 3023/2066, 3081, 3085, 3089**].

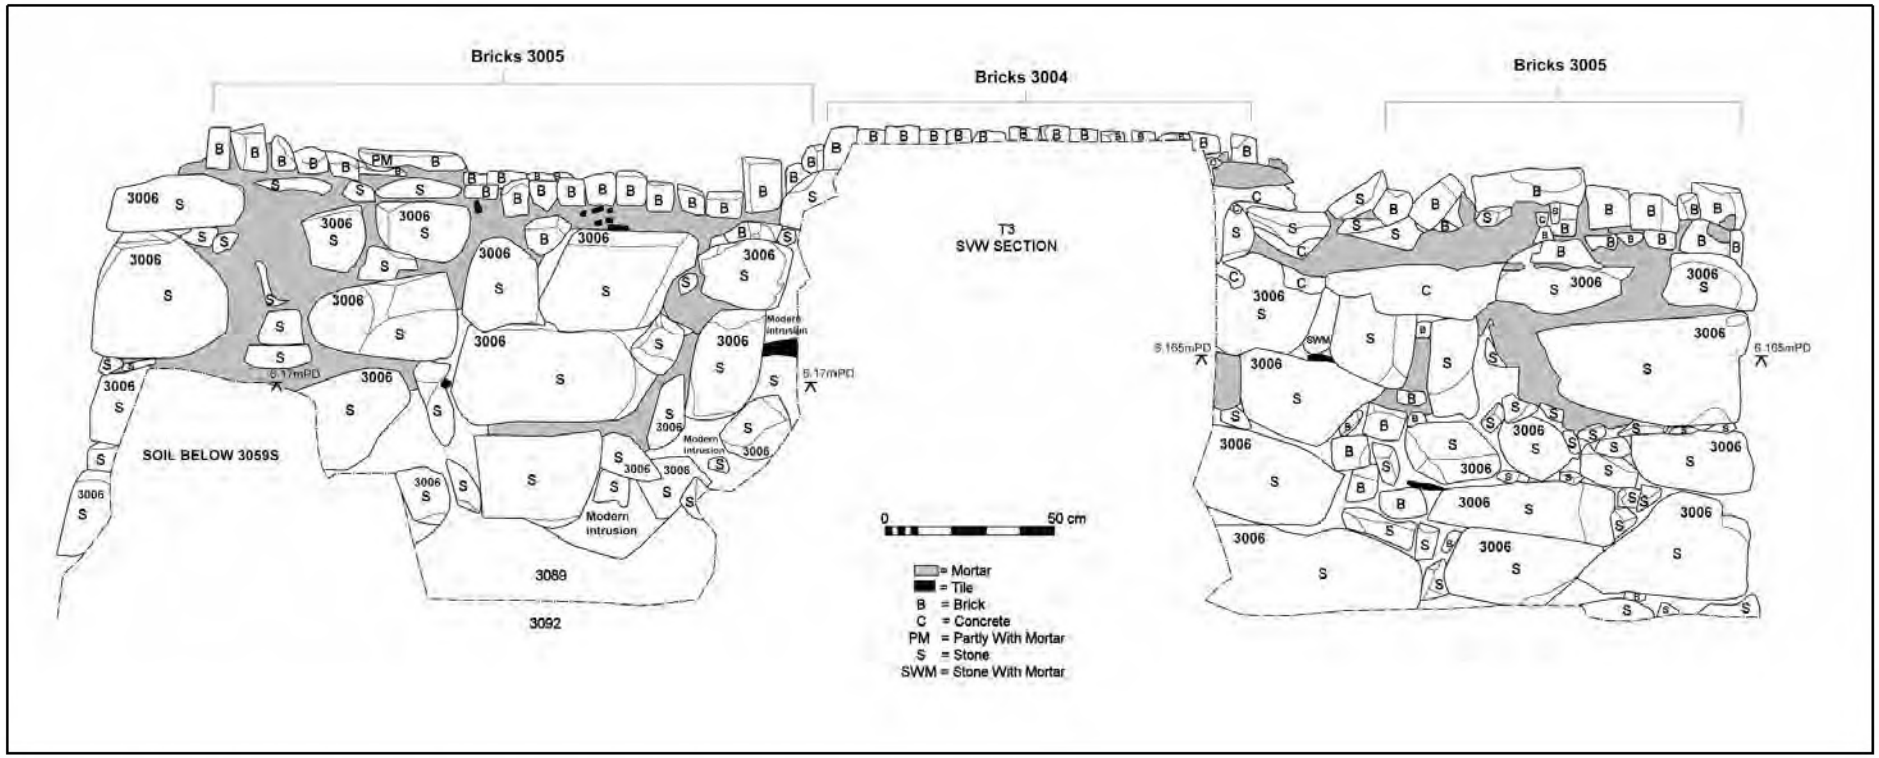
Watch tower room wall sections



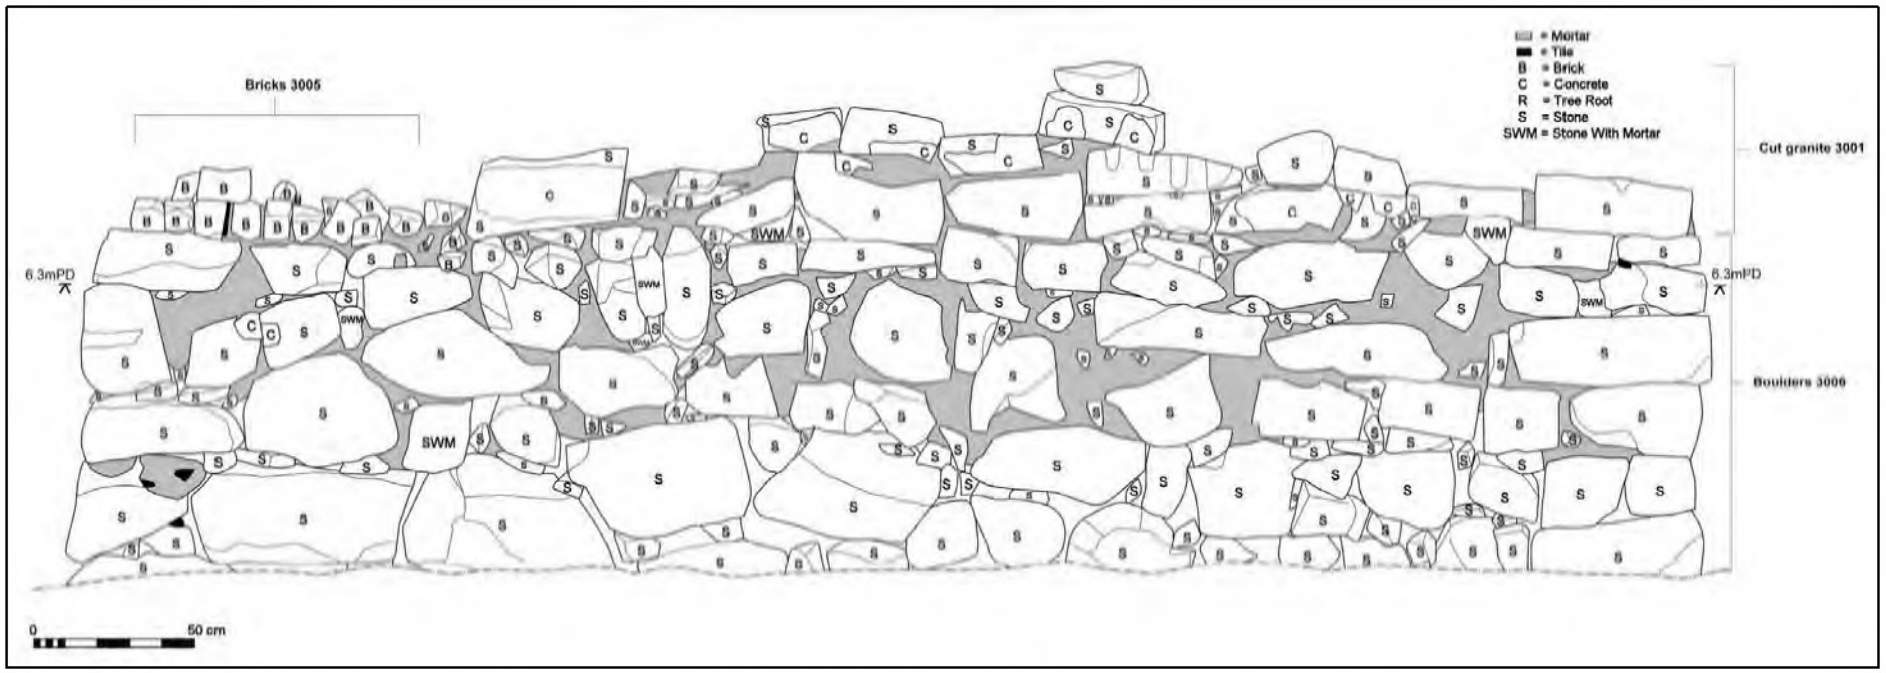
T3.C.23 East facing section (exterior) of eastern watch tower room wall.



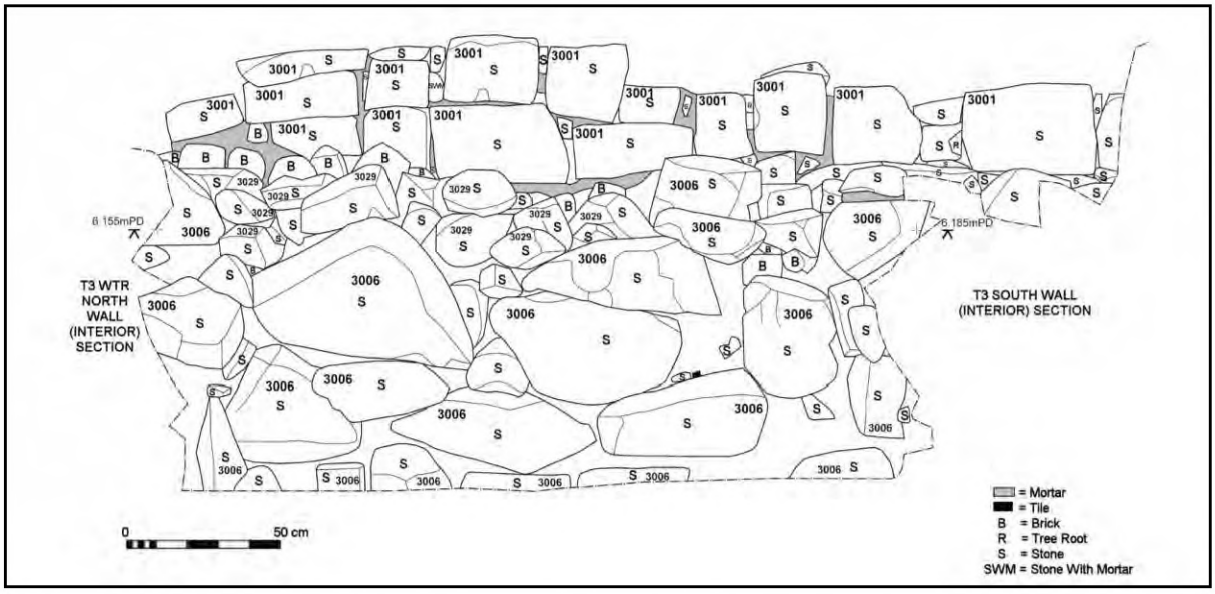
T3.C.24 North facing section (exterior) of northern watch tower room wall.



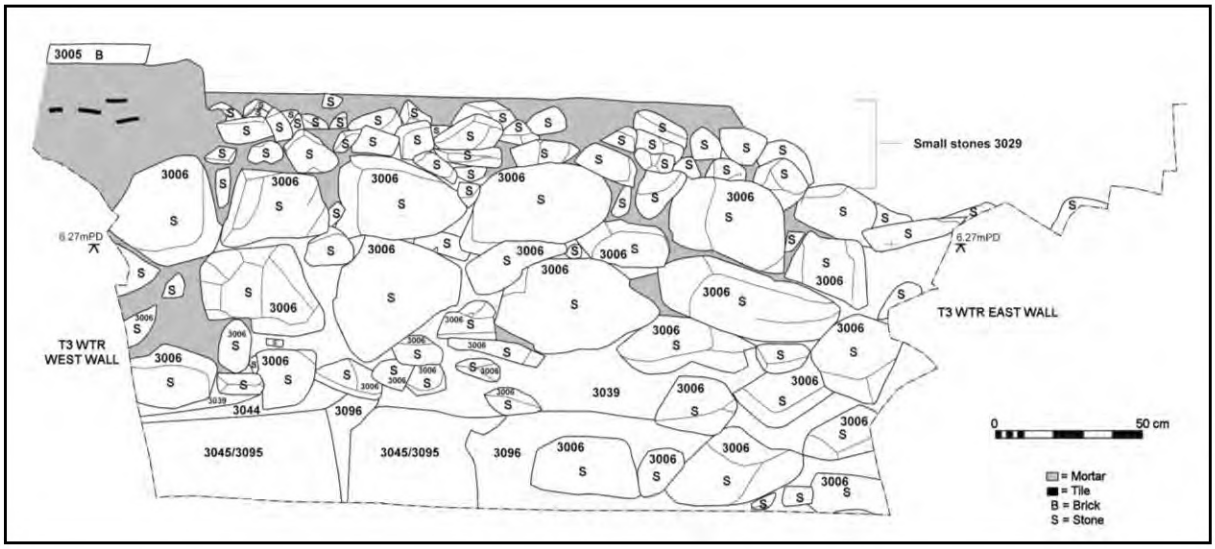
T3.C.25 West facing section of (exterior) of western watch tower room wall.



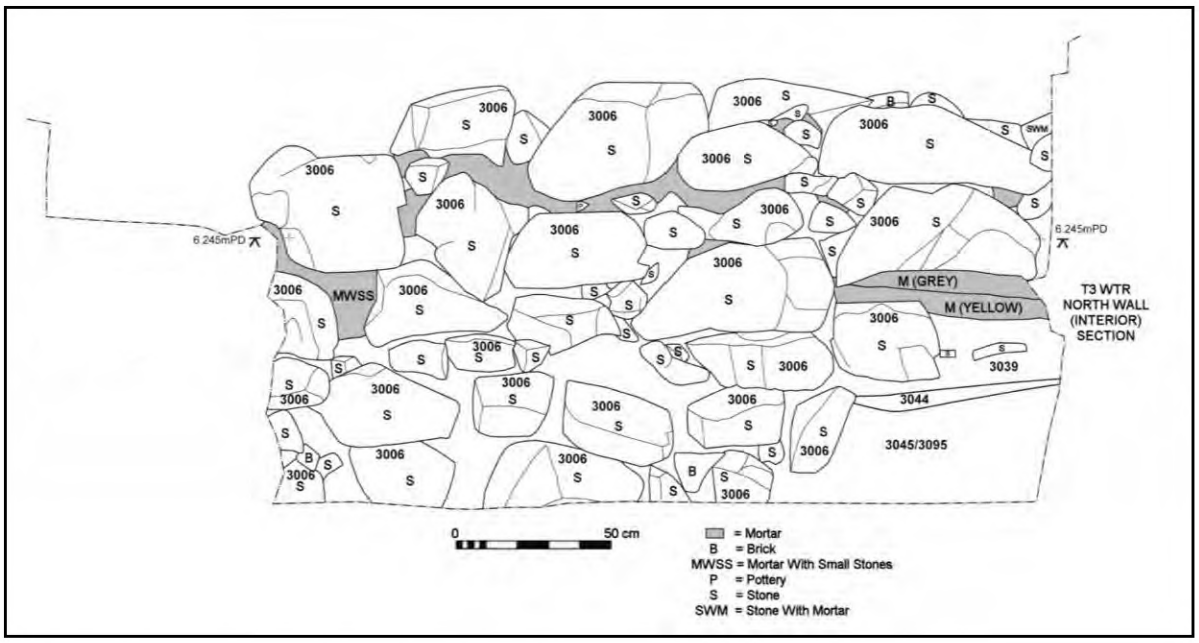
T3.C.26 South facing section (exterior) of southern watch tower room wall.



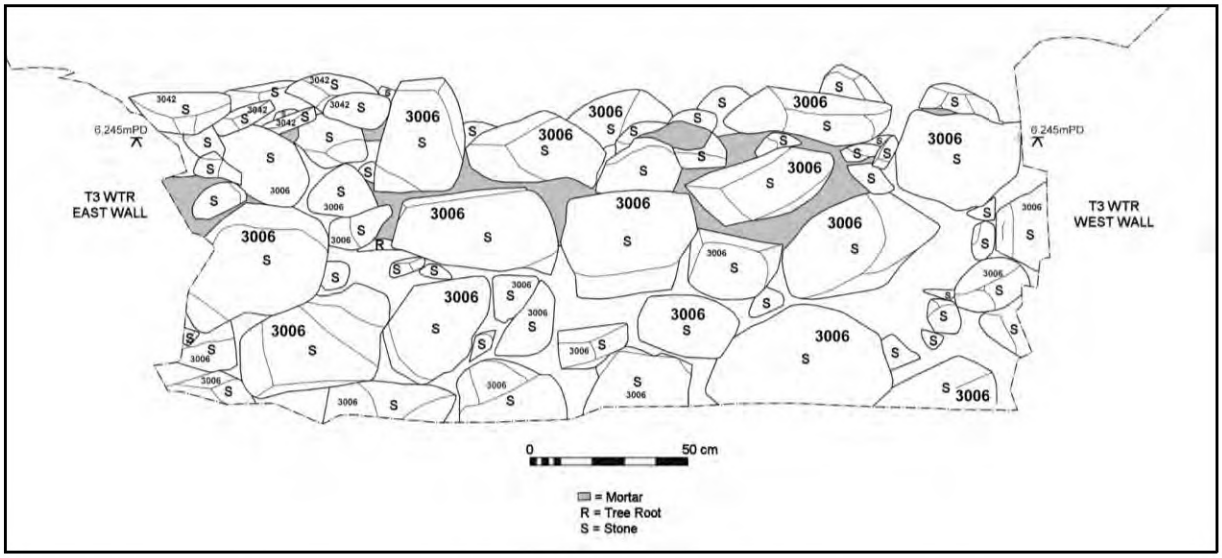
T3.C.27 West facing section (interior) of eastern watch tower room wall.



T3.C.28 South facing section (interior) of northern watch tower room wall.

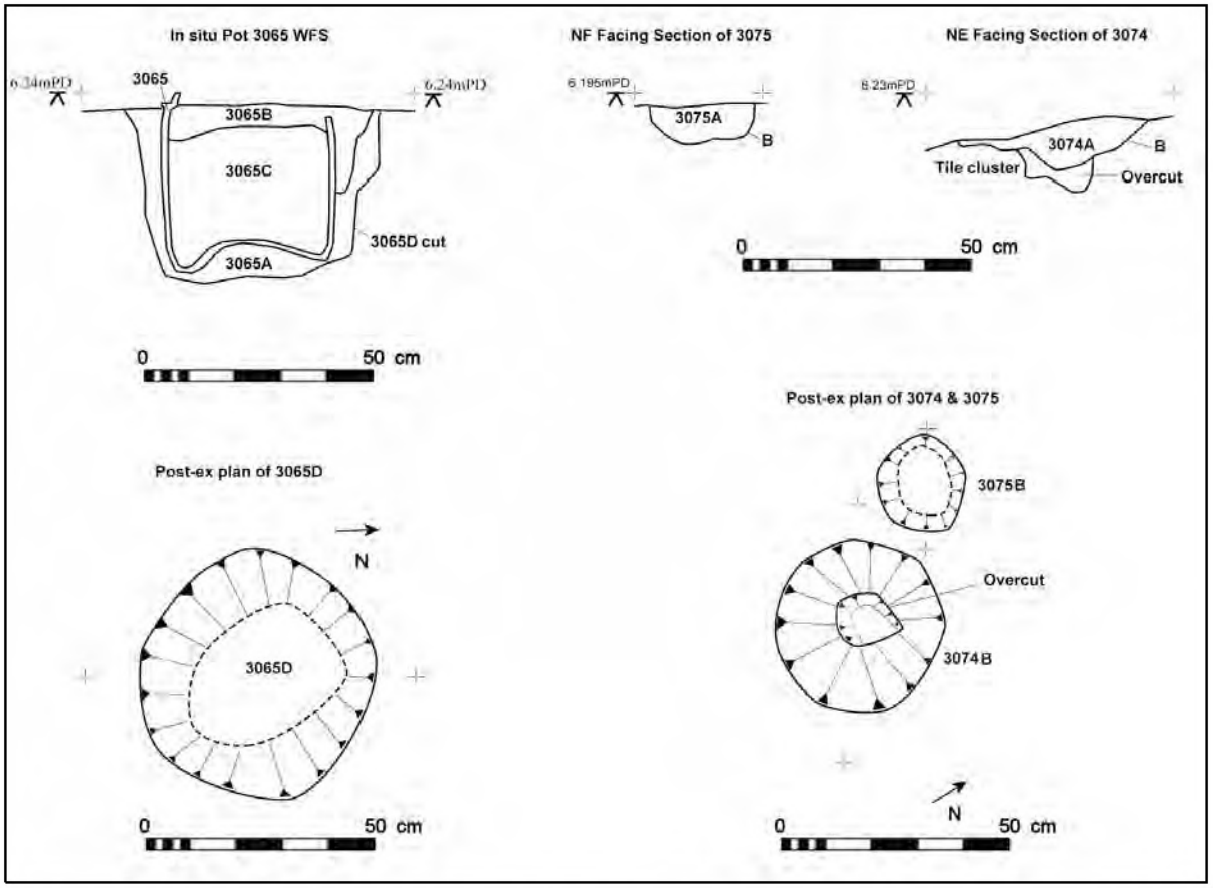


T3.C.29 East facing section (interior) of western watch tower room wall.

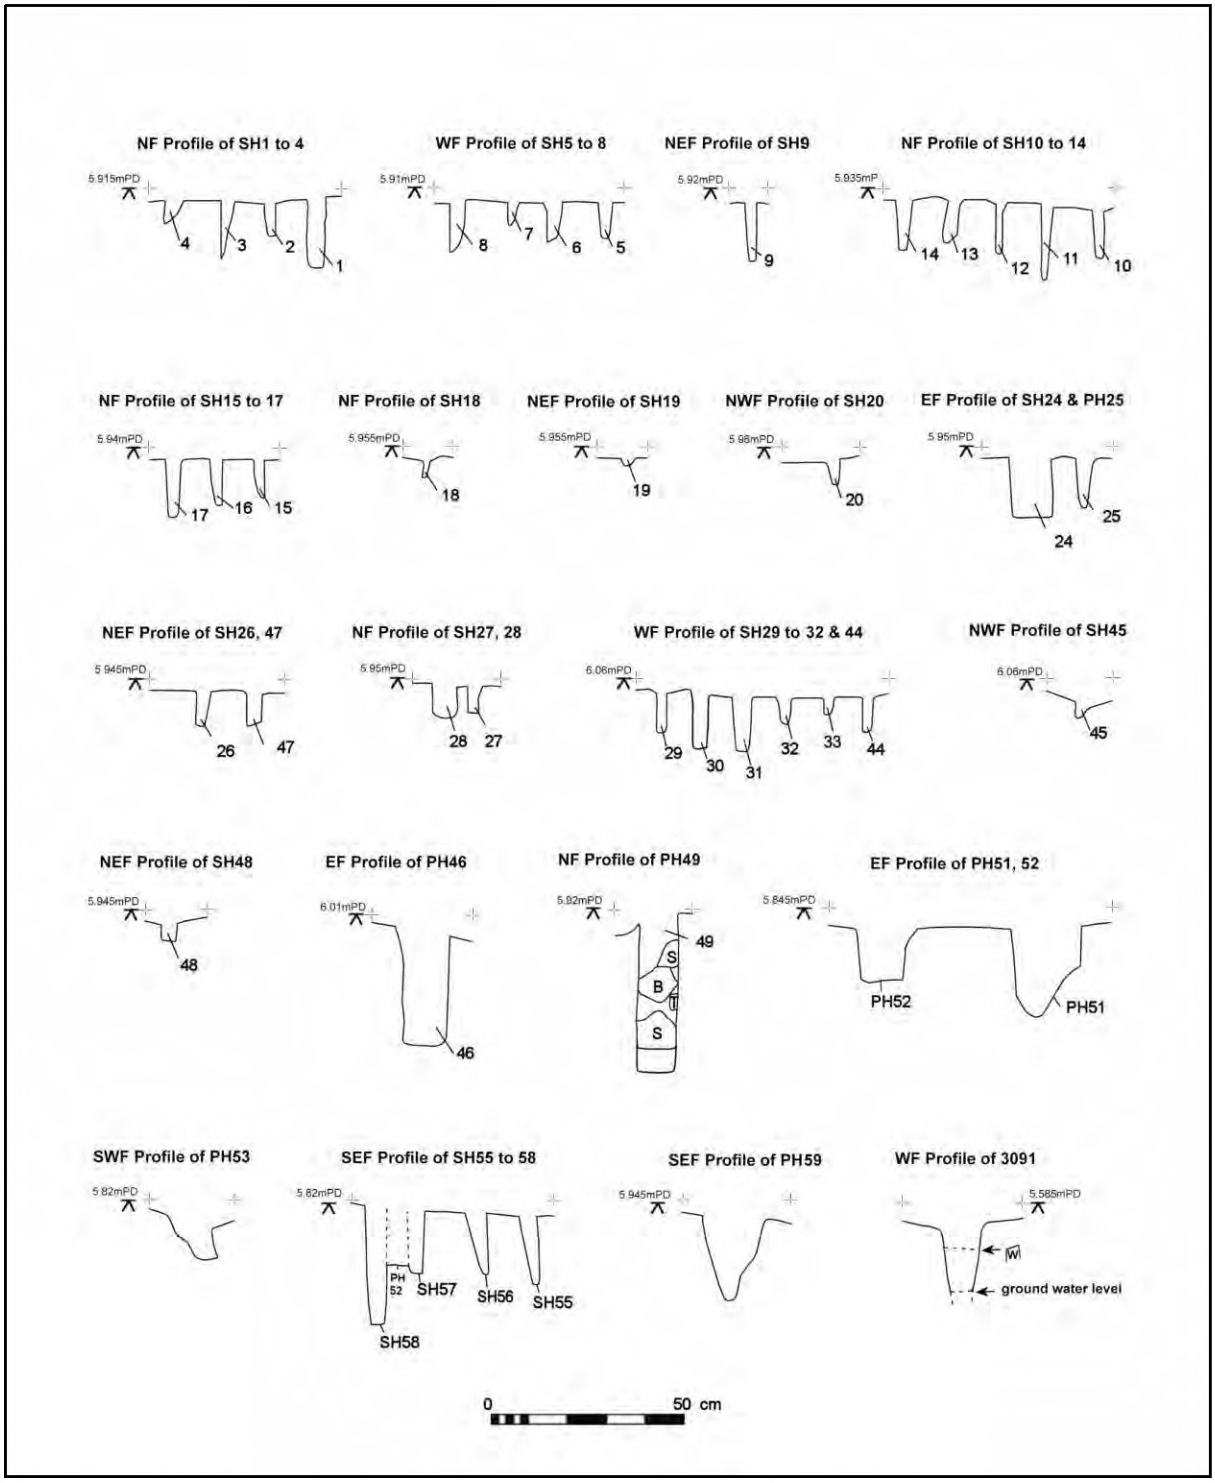


T3.C.30 North facing section (interior) of southern watch tower room wall.

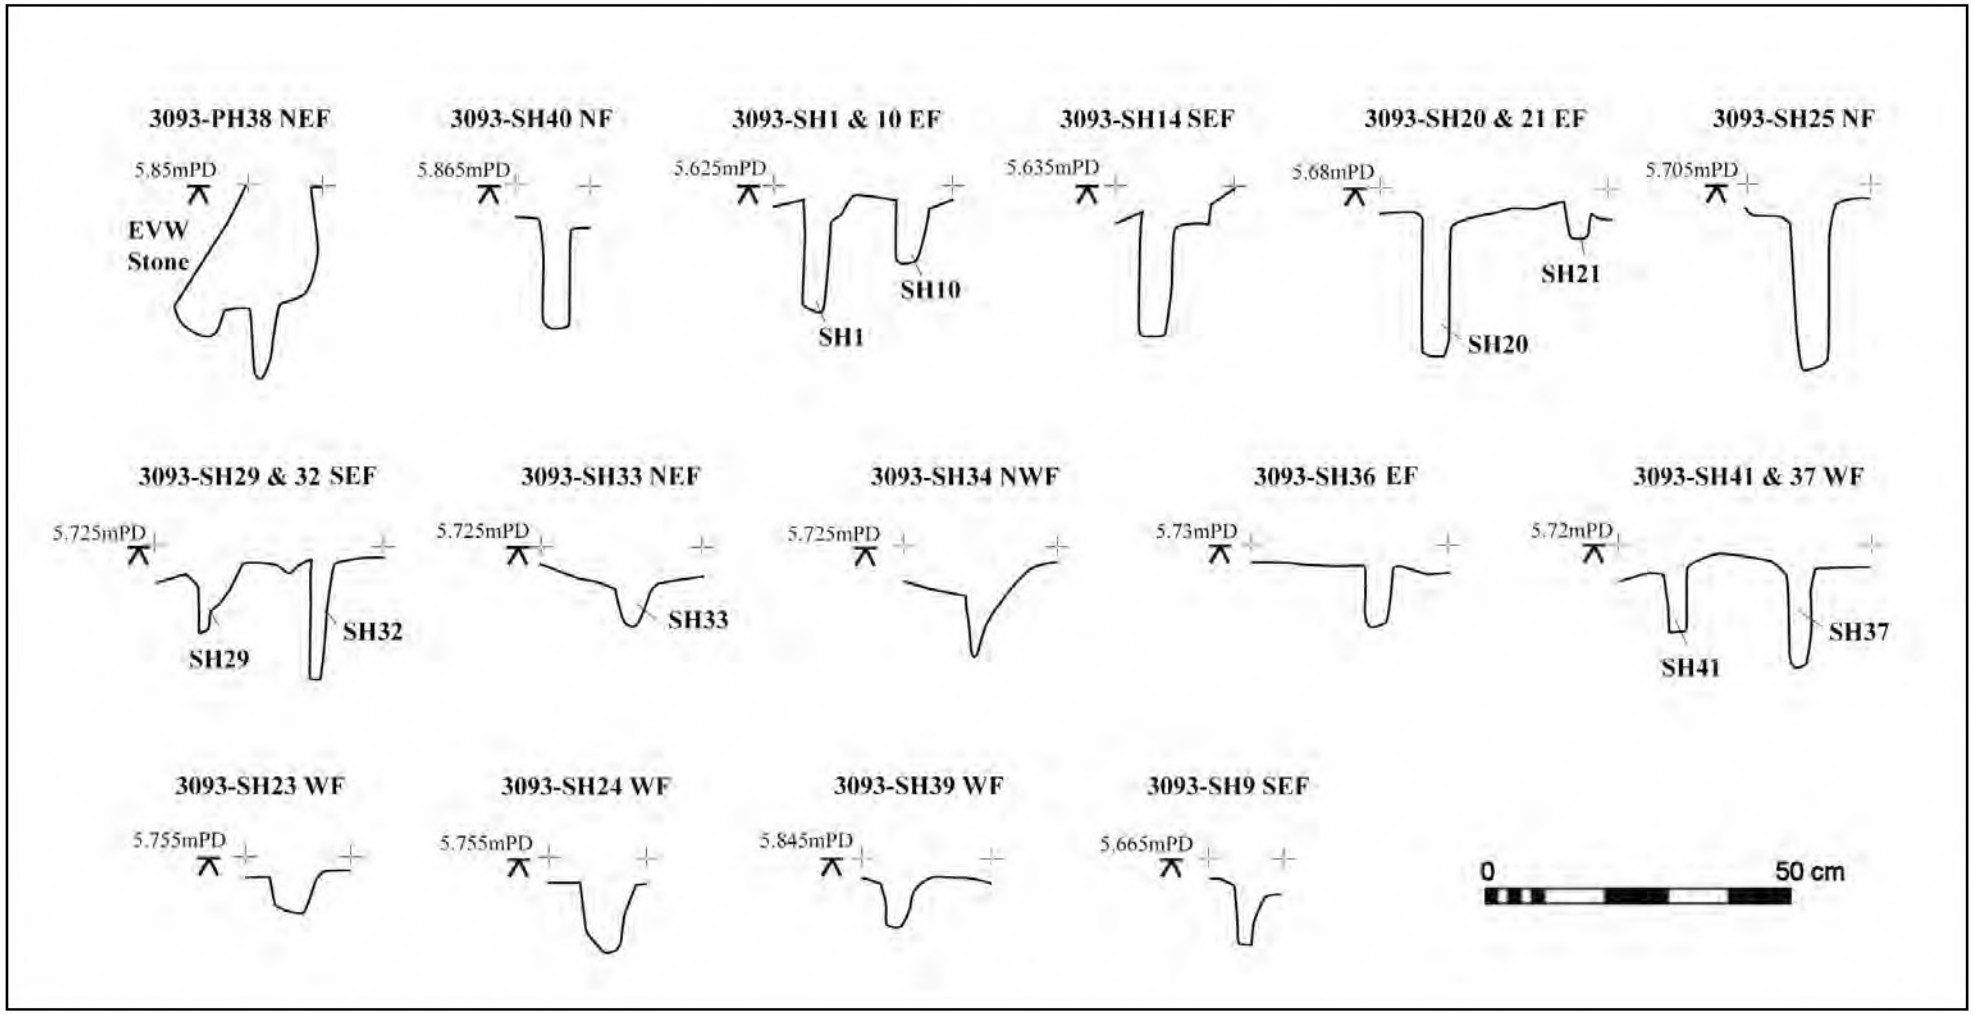
Profiles of pits, post and stake holes



T3.C.31 Profiles, section drawings and post-ex plans for pit features [**co.3065, 3074, 3075**]



T3.C.32 Profiles of **[co.3082-PHs]**, **[co.3082-SHs]** and **[co.3091]**.



T3.C.33 Profile drawings of [**co.3093-SHs, PH**]

T3.D Trench 3 photos

T3.D .1 View of eastern watch tower room wall showing granite cut blocks [**co.3001**] propped by bricks [**co.3020**], followed by small stones [**co.3029**] and large stones [**co.3006**] with large gaps filled by bricks; looking east.

T3.D.2 Stone pavement [**co.3003**]; looking north.

T3.D.3 View of brick alignments [**co.3004, 3005**], concrete floor [**co.3017**], and stone pavement [**co.3003**]; looking south.

T3.D.4 View showing bricks [**co.3005**] over stone foundation [**co.3006**] of north facing section (exterior), northern watch tower room wall; looking south.

T3.D.5 Pots [**co.3012**] surrounded by bricks and [**co.3014**] by a borehole; looking south.

T3.D.6 View of the inside of watch tower room in T3, showing pots [**co.3012**], a borehole at the centre and debris [**co.3030**] at southeast corner, dark yellowish brown fill [**co.3037**] at northwest side, strong brown fill [**co.3036**] in the middle, and [**co.3038**] along inside of eastern watch tower room; looking west.

T3.D.7 Stone drain [**co.3023/3047/3060**] with cement base and brick lining, south end covered by flat stone; looking north.

T3.D.8 View showing one fill **[co.3049/3051/3052]** caught on the west facing section of east moat; Note: in front is east village wall and stone pavement 1 **[co.3097]**; looking east.

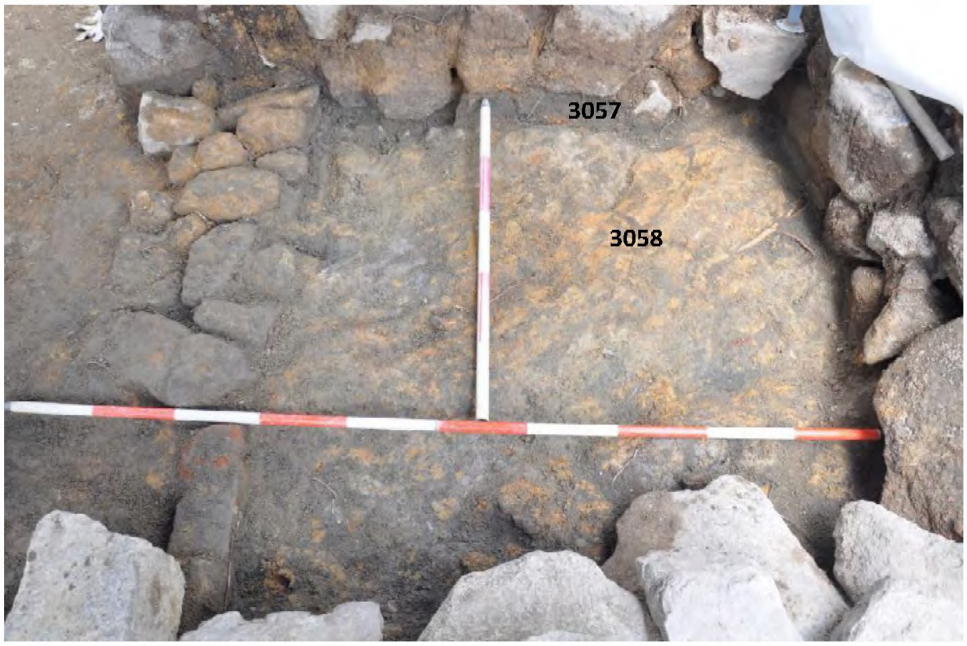
T3.D.9 View of part of east facing section of village wall interior area, showing red mortar **[co.3053]**, brownish yellow fill **[co.3073]** underneath and top of a firm fill **[co.3055]** in yellowish brown with patches of brown. Lower part of the photo also shows a yellowish brown fill **[co.3054]** on east village wall; looking west.

T3.D.10 Stone pavement [**co.3019**] leading to watch tower room, covering the area north of south village wall brick alignment [**co.3004**] and brick pavements [**co.3005**] on the north and west watch tower room walls; looking east.

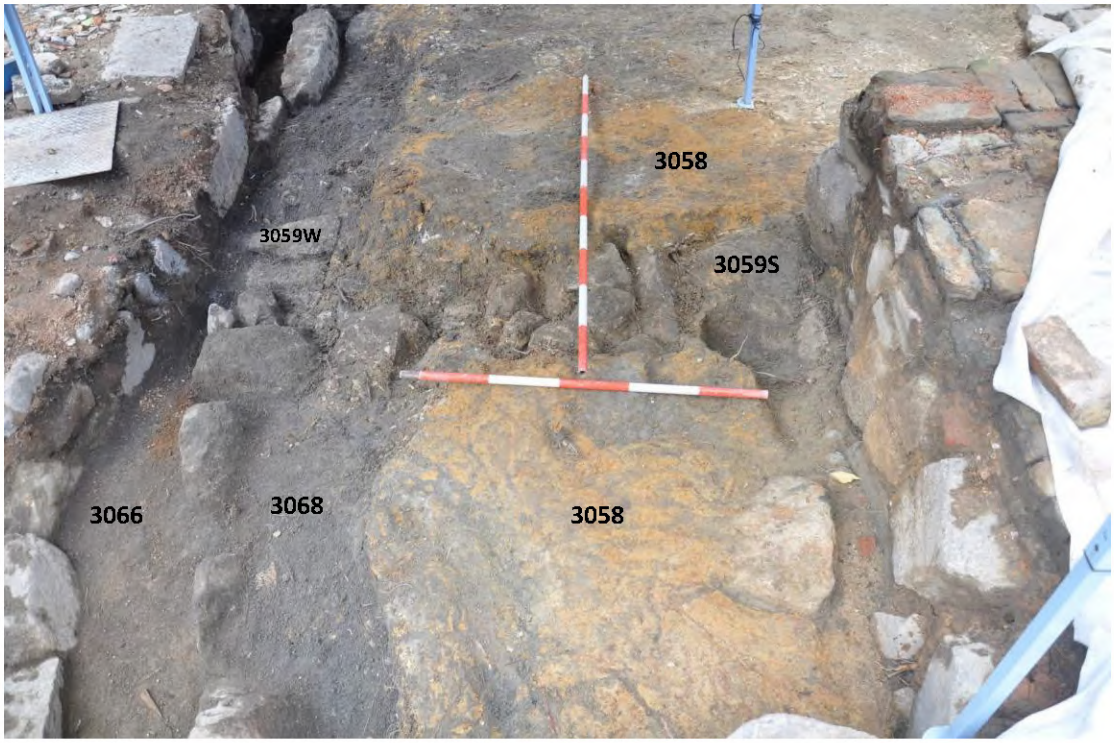
T3.D.11 View after removal of stone pavement [**co.3019**] and its levelling fill [**co.3022**] in the southwest corner of watch tower area, showing the top of [**co.3056**] in yellowish brown; looking east.

T3.D.12 View of top levelling fill [**co.3070**] covering the west and central side of watch tower area, including large yellowish white tile fragments; looking north.

T3.D.13 View of brick cluster [**co.3071/3072**] located at the east side of watch tower area, immediately north of watch tower and west of east village wall; looking south.



T3.D.14 View showing the top of compact floor [**co.3058**] in yellowish brown with patches of dark greyish brown at the southwest corner of watch tower area; also see a thin layer of dark greyish brown fill [**co.3057**] above [**co.3058**] caught on the exterior of watch tower room's western wall; looking east.

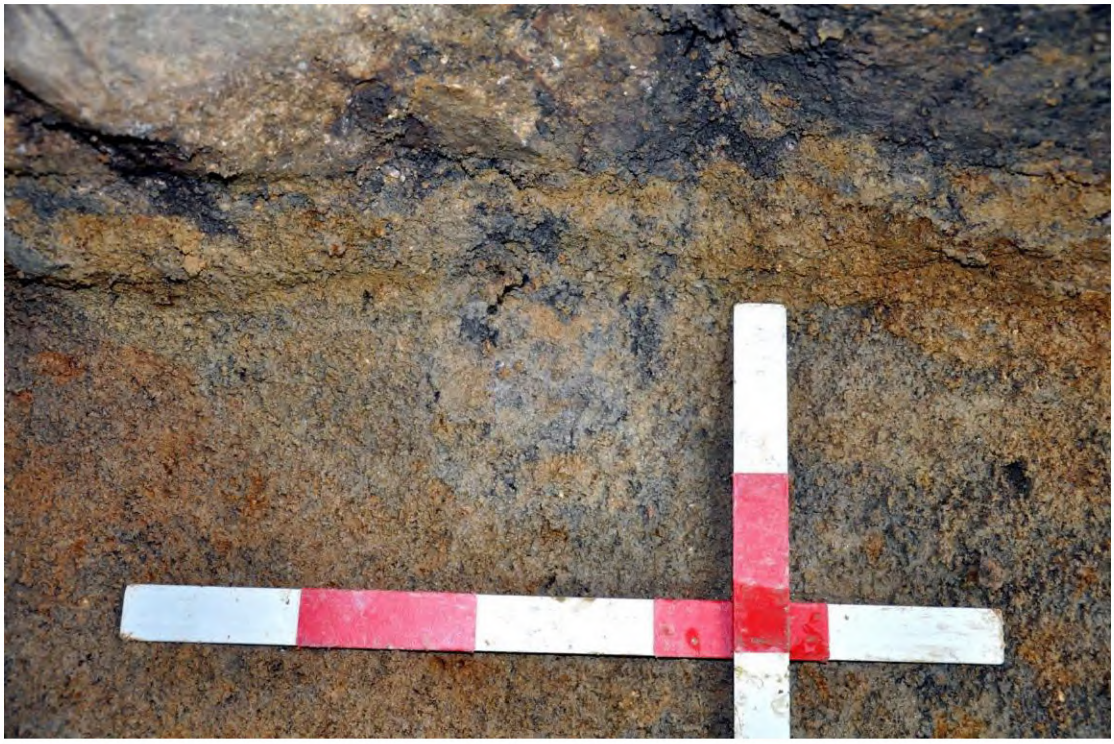


T3.D.15 View showing stone drain **[co.3066]** at west side, a very dark grey fill **[co.3068]** alongside the drain, upper stones of house wall **[co.3059W/S]**, and compact yellowish brown floor **[co.3058]** separated by **[co.3059W]**; looking north.

T3.D.16 levelling fills the grey sand **[co.3063]** and fill with tiny tile fragments **[co.3064]** covering **[co.3058]** in watch tower area; note: **stone pavement 3 [co.3099]** on the east side bordering east village wall, brick-lined stone drain **[co.3023/3047/3060]** on the west side and pot pit **[co.3065A/D]** next to the drain; looking south.

T3.D.17 View of **[co.3082-SHs/-PHs]** on compact floor **[co.3077/3080/3083/3085/3087]** in yellowish brown in watch tower area; note: watch tower room on the right and east village wall at lower part of the photo; looking west.

T3.D.18 View showing the northwest corner of T3 watch tower area, with pre-ex plan view of features **[co.3082-PH51]** (right), **[co.3082-PH52]** (left) and **[co.3082-SH55-58]**; looking west.



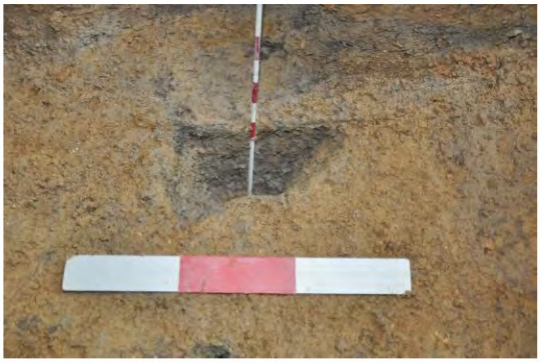
T3.D.19 Pre-ex plan view of **[co.3082-PH53]** at west-middle of T3 watch tower area; note; opening of the feature was caught on east facing section; looking west.

East facing section of **[co.3082-PH24]**

Post-ex view of **[co.3082-PH46]**; looking west

Post-ex view of **[co.3082-PH49]**; looking north

East facing section of **[co.3082-PH51]**

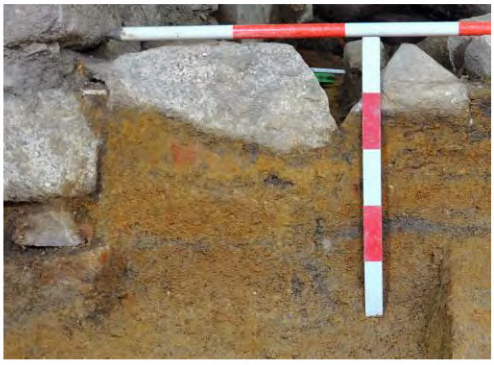


East facing section of [**co.3082-PH52**]

Post-ex view of [**co.3082-PH53**], looking west

South facing section of [**co.3082-PH59**]

South facing section of [**co.3082-PH60**]



North facing section of [**co.3082-PH61**]

Post-ex view of [**co.3093-PH38**], looking east

T3.D.20 Postholes found in watch tower area.

T3.D.21 Stake hole alignment [**co.3093-SHs**] and posthole [**co.3093-PH38**] on compact brownish yellow deposit [**co.3094**]; looking south.

T3.D.22 South facing section of T3 watch tower area; looking north.

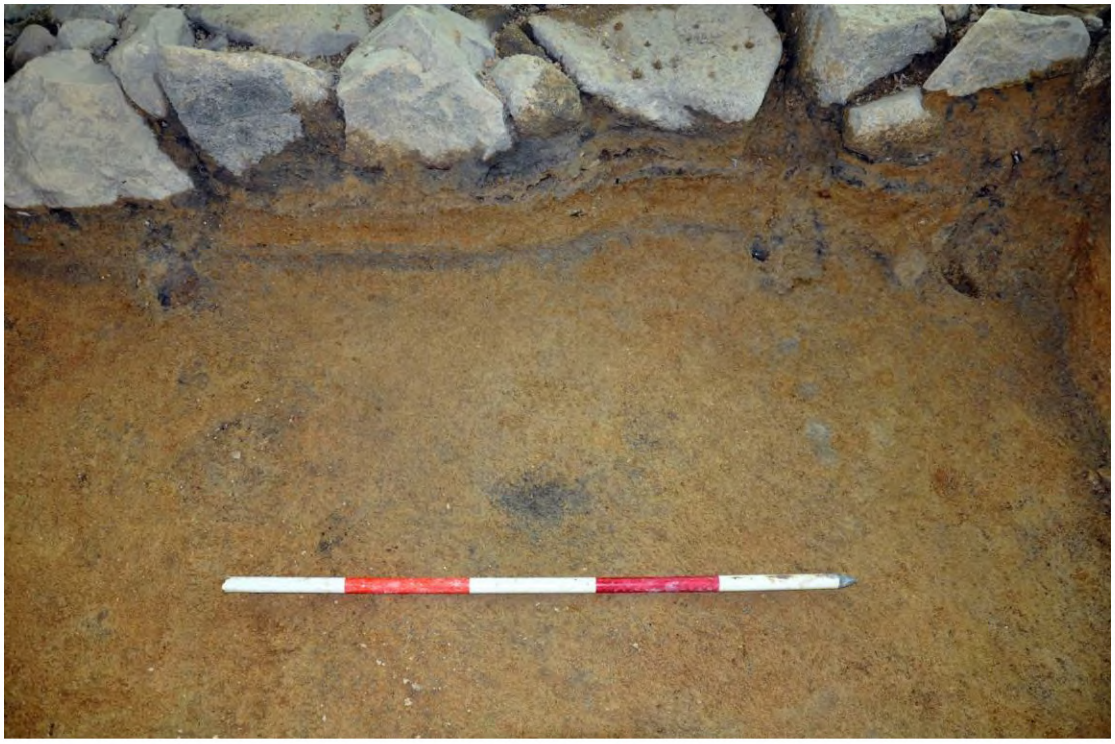
T3.D.23 West end 1.4m of south facing section of T3 watch tower area showing the profile of drain **[co.3066]**; looking north.

T3.D.24 East facing section of T3 watch tower area; looking west.

T3.D.25 North facing section of T3 watch tower area; note: exterior of watch tower room northern wall inside the village; looking south.

T3.D.26 West facing section of T3 watch tower area; looking east.

T3.D.27 View of a semi-circular patchy fill **[co.3090]** at east side of T3 watch tower area; looking west.



T3.D.28 Pre-ex plan view of possible posthole **[co.3091A/B]** (right above ranging pole) below **[co. 3084/3086/3088]** and cutting into **[co.3089]**; looking west.

T3.D.29 View of watch tower room western exterior wall inside the village; note: the right side shows interior of south village wall; looking east.

T3.D.30 View of watch tower room western exterior wall outside of the village; looking east.

T3.D.31a West side of watch tower room south wall exterior; looking north.

T3.D.31b Middle part of watch tower room south wall exterior; looking north.

T3.D.31c East side of watch tower room south wall exterior; looking north.

T3.D.32 Watch tower room east wall exterior; looking northwest.

T3.D.33 Watch tower room north wall exterior; looking south.

T3.D.34 Post-ex plan view of modern intrusions [**co.3096**] inside watch tower room; looking north.

T3.D.35 View of stone pavement 2 [**co.3098**] at south end of village wall interior; looking west.

T3.D.36 View of stone pavement 1 [**co.3097**] at north side of village wall interior; looking north.

T3.D.37 View of stone pavement 3 [**co.3099**] in watch tower area on top of east village wall; looking north.

T3.D.38 South village wall exterior with drain outlet of [**co.3023/3066**] under a triangular stone; looking north.

T3.D.39 L-shape concrete ledge [**co.3035**] attached to exteriors of south village wall and watch tower room western wall; note concrete under red brick on the left side was [**co.3018**].

T3.E Trench 3 artefact description

Trench 5 data

T5.A Context descriptions

5001: Top of trench is mix of topsoil and patches of compacted fill under concrete which has been removed prior to starting. The remaining traces consisted of dark yellowish brown (10 YR 4/4) slightly clayey SILT in north house and strong brown (7.5 YR 4/6) slightly gravelly silty CLAY in south house.

5002: Fill layer of dark yellowish brown (10 YR 4/4) slightly clayey, silty GRAVEL which consists of mainly tile fragments.

5003: A red in south house and grey in north house hard floor.

5004: Concrete covering in the lane.

5005: Eastern village wall; connecting to the EVW in T1 [1252].

5006: Residential house wall in south house.

5007: Residential house wall in north house.

5008: Strong brown (7.5 YR 5/6) very gravelly, silty CLAY fill under hard floor in north house.

5009: Yellowish red (5 YR 5/8) clayey GRAVEL fill with cobbles under concrete lane

5010: Dark brown (10 YR 3/3) slightly clayey and silty GRAVEL fill on top of flagstones in north west corner of south house.

5011: Red and blue brick feature sitting on pink mortar recorded in south house. Inside the possible drain area was a brown (7.5 YR 4/4) very slightly clayey, very sandy GRAVEL fill.

5012: Four floor stones in north west corner of the south house.

5013: Dark yellowish brown (10 YR 4/6) very gravelly, slightly silty CLAY Fill under hard floor [5003] in the south house.

5014: Strong brown (7.5 YR 5/8) very gravelly CLAY floor level in north house which was mainly recorded in the east of the house.

5015: Metal pipe and dark yellowish-brown (10 YR 4/4) gravelly CLAY fill along the south wall of the south house.

5016: Thin brown (10 YR 4/3) gravelly, slightly silty CLAY fill layer which covers patches west and on top of 5014 in east of north house.

5017: Brownish yellow (10 YR 6/6) gravelly, clayey SAND fill layer under [5013] in south house.

5018: Brown (10 YR 4/3) clayey, sandy GRAVEL fill in trench along the west stone house wall in north house.

5019: Strong brown (7.5 YR 5/8) gravelly, clayey SAND fill under [5014] and [5018] first noted in the north house but extends over most of the trench.

5020: Village ware brown glazed pot in the north house.

5021: Dark yellowish brown (10 YR 4/4) silty, clayey GRAVEL fill of pot in north house.

5022: Strong brown (7.5 YR 5/6) slightly gravelly CLAY fill below features in northwest of the south house.

5023: Dark greyish brown (10 YR 4/2) slightly sandy, clayey SILT fill below stone slabs in north west corner of the south house.

5024: Hard floor and brown (10 YR 4/3) slightly gravelly, clayey SAND fill in south house.

5025: Very dark greyish brown (10 YR 3/2) clayey SILT along the west and central wall of the south house.

5026: Darker floor and brown (10 YR 4/3) slightly gravelly, silty and clayey SAND fill in east of the south house.

5027: Large village ware pot in south house, previously recorded in 2016 AIA phase.

5028: Dark brown (10 YR 3/3) sandy and gravelly SILT fill with many small angular stones under concrete and pink leveller in lane.

5029: Dark yellowish brown (10 YR 4/6) very slightly gravelly, slightly sandy CLAY earth floor in northern west house.

5030: Concrete floor and leveller above [5029] along the west of the trench.

5031: Light olive brown (2.5 Y 5/4) slightly gravelly and silty CLAY fill or floor with angular stones under 5028 in the lane.

5032: GRAVEL fill in lane recorded along the east of the lane, possibly a drain.

5033: Yellowish red (5 YR 4/6) gravelly and sandy CLAY fill recorded in the centre of the west house.

5034: Olive brown (2.5 Y 4/3) gravelly and clayey SAND fill in north west house under [5029].

5035: Compact yellowish brown (10 YR 5/6) very gravelly CLAY fill in centre and north west houses.

5036: Dark yellowish brown (10 YR 4/4) slightly gravelly, sandy CLAY layer noticed mainly in the south of the west houses area, covering centre and south.

5037: Dark brown (10 YR 3/3) very sandy, slightly gravelly CLAY fill between stones and under modern house stones in west houses.

5038: Dark yellowish brown (10 YR 4/6) very slightly clayey, sandy GRAVEL layer mainly along the east of the trench.

5039: Alluvial layer very similar to [5070] excavated in south house.

5040: Very dark greyish brown (10 YR 3/2) sandy, clayey and silty SAND layer recorded under [5035] mainly in north and centre west houses.

5041: Yellowish brown (10 YR 4/6) gravelly CLAY layer recorded below [5009] and above [5028] mainly in the south of lane.

5042: Stake hole alignment for which individual context numbers were assigned ([5123-5151, 5153]).

5043: Stone drain surrounded by very dark greyish brown (10 YR 3/2) clayey GRAVEL fill.

5044: Brick drain excavated under stone drain within [5031].

5045: Black (10 YR 2/1) clayey SILT layer below [5031]. The layer is truncated by five postholes which are located along [5055].

5046: Brownish yellow (10 YR 6/8) sandy and clayey GRAVEL floor recorded in south end of the lane.

5047: Light yellowish brown (10 YR 6/4) clayey GRAVEL layer recorded under the brick drain.

5048: Black (10 YR 2/1) gravelly SILT fill noted below 5044 and possible same as [5045].

5049: Very dark grey (10 YR 3/1) slightly gravelly CLAY soil noted under [5018].

5050: Post hole #5 recorded in the south of the lane. Two fills were recorded: (1) Light brownish grey (10 YR 6/2) slightly clayey, sandy GRAVEL; (2) Brown (10 YR 5/3) slightly sandy, clayey GRAVEL.

5051: Post hole #4 recorded in lane. Two fills were recorded: (1) Yellowish brown (10 YR 5/4) sandy and clayey GRAVEL; (2) Strong brown (10 YR 5/8) clayey GRAVEL.

5052: Post hole #3 recorded in lane. Fill consisted of dark yellowish brown (10 YR 4/6) slightly clayey, sandy GRAVEL.

5053: Post hole #2 recorded in lane. Fill consisted of olive brown (2.5 Y 4/4) very slightly gravelly, sandy CLAY.

5054: Post hole #1 recorded in lane. Fill consisted of light brownish yellow (10 YR 6/4) clayey GRAVEL.

5055: Stone house wall recorded along the west of the trench below the modern house walls and with slightly different alignment. Oldest house alignment recorded in T5.

5056: Dark yellowish brown (10 YR 4/6) very clayey GRAVEL below clay layer below the brick drain.

5057: Dark yellowish brown (10 YR 4/6) to very dark greyish brown (10 YR 3/2) slightly gravelly, silty, clayey SAND fill of a ditch along [5055].

5058: Brown (7.5 YR 4/4) very clayey GRAVEL hardpan, which is top of 5018.

5059: Brown (10 YR 5/3) very slightly clayey and gravelly SAND with the odd cobble recorded below 5049.

5060: Strong brown (7.5 YR 4/6) slightly sandy, gravelly CLAY in southwest corner of west houses below orange 5036.

5061: Brown (10 YR 5/3) slightly gravelly SAND with lots of tiles below [5060].

5062: Very dark greyish brown (10 YR 5/2) very slightly gravelly, very clayey SAND along [5055], similar to 5018 but presents at an angle towards wall [5055].

5063: Dark brown (10 YR 3/3) slightly silty and gravelly SAND on top of [5061].

5064: Light brownish grey (10 YR 6/2) slightly gravelly SAND under [5063] in south end of lane.

5065: Grey (2.5 Y 5/1) very slightly silty, sandy and gravelly CLAY under [5064] which is likely same as [5049] and [5018].

5066: Very dark grey (10 YR 3/1) very slightly clayey, silty SAND with wood and charcoal recorded mainly along east facing section.

5067: Grey (10 YR 5/1) gravelly CLAY layer above [5070] and under [5018].

5068: Brown (10 YR 4/3) slightly clayey, gravelly SAND on top of [5067] in south west corner.

5069: Brownish yellow (10 YR 6/8) gravelly CLAY hard (orange) deposit along the east which presents as a floor and is located below [5019].

5070: Brown (10 YR 5/3) slightly clayey SAND layer which slightly covers the stake holes and is covered by the hard grey layer [5067].

5071: Yellowish brown (10 YR 5/6) very slightly clayey, slightly gravelly SAND patch recorded near the stake holes.

5072: Brown (10 YR 5/3) slightly clayey SAND. Same as [5070.

5073: Brown (10 YR 5/3) slightly clayey SAND. Same as [5070].

5074: Cancelled.

5075: Ditch recorded along the east facing section, which has a dark grey (2.5 Y 4/1) very slightly gravelly, silty SAND fill.

5076: Patch around borehole which has three fills. [5076] is the top fill which consists of very pale brown (10 YR 7/3) very slightly clayey, sandy GRAVEL.

5077: The second fill consists of dark yellowish brown (10 YR 4/4) sandy and clayey GRAVEL with charcoal flecks.

5078: The third fill is yellowish brown (10 YR 5/6) gravelly and clayey SAND.

5079: Cancelled.

5080: cancelled.

5081: Greyish brown (10 YR 5/2) slightly gravelly SAND layer recorded below [5070].

5082: Black (7.5 YR 2.5/1) very silty CLAY excavated below [5075] within the ditch along west of the trench.

5083: Light grey (10 YR 7/2) gravelly SAND patch within [5069]. Stones and a pounder stone were excavated from the patch.

5084: Very pale brown (10 YR 8/2) sandy GRAVEL lens noted in east facing section.

5085: Pit adjacent to the house wall of northern house on east facing section. The pit has a yellowish brown (10 YR 5/6) gravelly CLAY fill.

5086: West House wall in east facing section.

5087: Light grey (10 YR 7/1) sandy GRAVEL which is likely the same as [5084] noticed on east facing section.

5088: Yellowish brown (10 YR 5/8) gravelly CLAY fill in south west corner of the east facing section.

5089: Pit adjacent to the house wall of centre house on east facing section. The pit has a light yellowish brown (10 YR 6/4) slightly gravelly CLAY fill.

5090: House wall on east facing section

5091: Clay lenses inside [5070] west of [5069],

5092: Greyish brown (10 YR 5/2) slightly gravelly SAND which is under [5070] in west, remarkably similar to [5070].

5093: Light yellowish-brown (2.5 Y 6/3) gravelly SAND which is similar to [5070] but appears more yellow and is located along the stake holes.

5094: Light olive brown (2.5 Y 5/6) very sandy GRAVEL lens in [5093]; same as [5071].

5095: Greyish brown (10 YR 5/2) slightly clayey, gravelly SAND recorded below [5093/5094].

5096: Post hole within [5069]. The fill consisted of yellowish brown (10 YR 5/4) very clayey SAND.

5097: Post hole within [5069]. The fill consisted of yellowish brown (10 YR 5/4) very clayey SAND.

5098: Cancelled.

5099: Post hole recorded in sondage. The post hole has a fill of greyish brown slightly gravelly and sandy CLAY.

5100: Hard floor and sterile deposit. An auger test was conducted, and the following layers were recorded: 0-70: 70-100: Brownish yellow (10 YR 6/6) sandy/clayey GRAVEL; and 100+: Light grey (10 YR 7/1) gravelly/sandy CLAY.

5101: Post hole within [5100] with brown (10 YR 5/3) very clayey, gravelly SAND fill.

5102: Triangular shape post hole within [5100] with greyish brown (10 YR 5/2) very gravelly SAND fill.

5103: Post hole within [5100] with light yellowish brown (10 YR 6/4) slightly gravelly SAND fill.

5104: Post hole within [5100] with yellowish brown (10 YR 5/4) slightly clayey, gravelly SAND fill.

5105: Post hole within [5100] with greyish brown (10 YR 5/2) very gravelly SAND fill.

5106: Cancelled

5107: Post hole within [5100] with greyish brown (10 YR 6/4) gravelly and clayey SAND fill.

5108: Post hole within]5100] with greyish brown (10 YR 5/2) gravelly and clayey SAND fill.

5109: Post hole within [5100] with greyish brown slightly gravelly SAND fill.

5110: Post hole within [5100]. The post hole has two fills: 0-10 Greyish brown (10 YR 5/2) slightly clayey, gravelly SAND and 10+: brownish yellow very slightly gravelly, very clayey SAND.

5111: Post hole within [5100] with grey (10 YR 5/1) sandy CLAY fill.

5112: Cancelled

5113: Post hole within [5100] with light brownish grey (10 YR 6/2) gravelly SAND fill.

5114: Post hole within [5100] with very dark greyish brown (10 YR 3/2) slightly clayey, gravelly SAND fill.

5115: Post hole within [5100] with greyish brown (10 YR 5/2) slightly gravelly and sandy CLAY fill.

5116: Post hole within [5100] with greyish brown (10 YR 5/2) slightly gravelly and clayey SAND fill.

5117: Post hole within [5100] with grey (10 YR 5/1) very clayey SAND fill.

5118: Cancelled

5119: Post hole within [5100] with greyish brown (10 YR 5/2) slightly gravelly, clayey SAND fill.

5120: Post hole within [5100] with dark greyish brown (10 YR 4/2) slightly silty and gravelly SAND fill.

5121: Post hole within [5100] with greyish brown (10 YR 5/2) clayey SAND fill.

5122: Post hole within [5100] with brown (10 YR 5/3) clayey SAND fill.

5123: Stake hole in [5100]: T5-SH1 with light yellowish brown (10 YR 6/4) slightly gravelly SAND fill.

5124: Stake hole in [5100]: T5-SH2 with two fills: 0-2: yellowish brown (10 YR 5/6) very gravelly SAND and 2+: dark yellowish brown (10 YR 4/4) very gravelly SAND.

5125: Stake hole in [5100]: T5-SH3 with yellowish brown (10 YR 5/4) slightly clayey, gravelly SAND fill.

5126: Stake hole in [5100]: T5-SH4 with two fills: 0-5: light yellowish brown (10 YR 5/4) sandy GRAVEL and 5+: very dark greyish brown (10 YR 3/2) very silty SAND.

5127: Stake hole in [5100]: T5-SH5 with two fills: 0-7: brown (10 YR 4/3) slightly silty gravelly SAND and 7+: very dark brown (10 YR 2/2) silty SAND.

5128: Stake hole in [5100]: T5-SH6 with dark yellowish brown (10 YR 4/4) slightly silty SAND fill.

5129: Stake hole in [5100]: T5-SH7 with two fills: 0-12: dark yellowish brown (10 YR 4/4) slightly gravely/silty/clayey SAND and 12+: very dark brown (10 YR 2/2) very silty SAND.

5130: Stake hole in [5100]: T5-SH8 with two fills: 0-14: brown (10 YR 4/3) slightly clayey SAND and 14+: pale brown (10 YR 6/2) slightly clayey SAND.

5131: Stake hole in [5100]: T5-SH9 with two fills: 0-10: dark yellowish brown (10 YR 3/6) slightly silty, sandy GRAVEL and 10+: very dark greyish brown (10 YR 3/2) slightly gravelly, silty SAND.

5132: Stake hole in [5100]: T5-SH10 with two fills: 0-8: dark yellowish brown (10 YR 4/4) slightly clayey SAND and 8+: very dark greyish brown (10 YR 3/2) silty SAND.

5133: Stake hole in [5100]: T5-SH11 with three fills: 0-9: empty, 9-19: dark grey (10 YR 4/1) gravelly/silty SAND and 19+: very dark greyish brown (10 YR 3/2) very silty SAND.

5134: Stake hole in [5100]: T5-SH12 with two fills: 0-7: empty and 7+: very dark greyish brown (10 YR 3/2) gravelly/silty SAND.

5135: Stake hole in [5100]: T5-SH13 with brown (10 YR 5/3) slightly clayey, gravelly SAND fill.

5136: Stake hole in [5100]: T5-SH14 with brown (10 YR 5/3) slightly clayey and gravelly SAND fill.

5137: Stake hole in [5100]: T5-SH15 with brown (10 YR 5/3) slightly gravely, silty SAND fill.

5138: Stake hole in [5100]: T5-SH16 with two fills: 0-2: brown (10 YR 5/3) silty SAND and 2+: very dark greyish brown (10 YR 3/2) silty SAND.

5139: Stake hole in [5100]: T5-SH17 with greyish brown (10 YR 5/2) gravelly SAND fill.

5140: Stake hole in [5100]: T5-SH18 with greyish brown (10 YR 5/2) slightly gravelly, clayey SAND fill.

5141: Stake hole in [5100]: T5-SH19 with two fills: 0-5: yellowish brown (10 YR 5/4) slightly sandy GRAVEL and 5+: light brownish grey (10 YR 6/2) gravelly SAND

5142: Stake hole T5-SH20: Cancelled

5142: Stake hole in [5100]: T5-SH21 with yellowish brown (10 YR 5/4) clayey SAND fill.

5143: Stake hole in [5100]: T5-SH22 with brown (10 YR 5/3) clayey SAND fill.

5144: Stake hole in [5100]: T5-SH23 with light yellowish brown (10 YR 6/4) sandy GRAVEL fill.

5145: Stake hole in [5100]: T5-SH24 with two fills: 0-12: brown (10 YR 4/3) slightly gravelly, silty SAND and 12+ : black (10 YR 2/1) silty and sandy CLAY.

5146: Stake hole in [5100]: T5-SH25 with yellowish brown (10 YR 5/4) clayey SAND fill.

5147: Stake hole in [5100]: T5-SH26 with yellowish brown (10 YR 5/4) slightly sandy GRAVEL fill.

5148: Stake hole in 5100]: T5-SH27 with very dark greyish brown (10 YR 3/2) clayey and silty SAND fill.

5149: Stake hole in [5100]: T5-SH28 with light yellowish brown (10 YR 6/4) gravelly SAND fill.

5150: Stake hole in [5100]: T5-SH29 with very dark greyish brown (10 YR 3/2) sandy and silty CLAY fill.

5151: Stake hole in [5100]: T5-SH30 with very pale brown (10 YR 8/2) SAND fill.

5152: Cancelled.

5153: Stake hole in [5100]: T5-SH32 with two fills: 0 -6: yellowish brown (10 YR 5/6) gravelly SAND and 6+: very dark brown (10 YR 2/2) slightly gravelly, silty SAND.

5154: Stake hole in [5100]: T5-SH33 with two fills: 0-12: brown (10 YR 4/3) very slightly gravelly, slightly SAND and 12+: very dark greyish brown (10 YR 3/2) clayey/silty SAND.

5155: Residential house wall in west house.

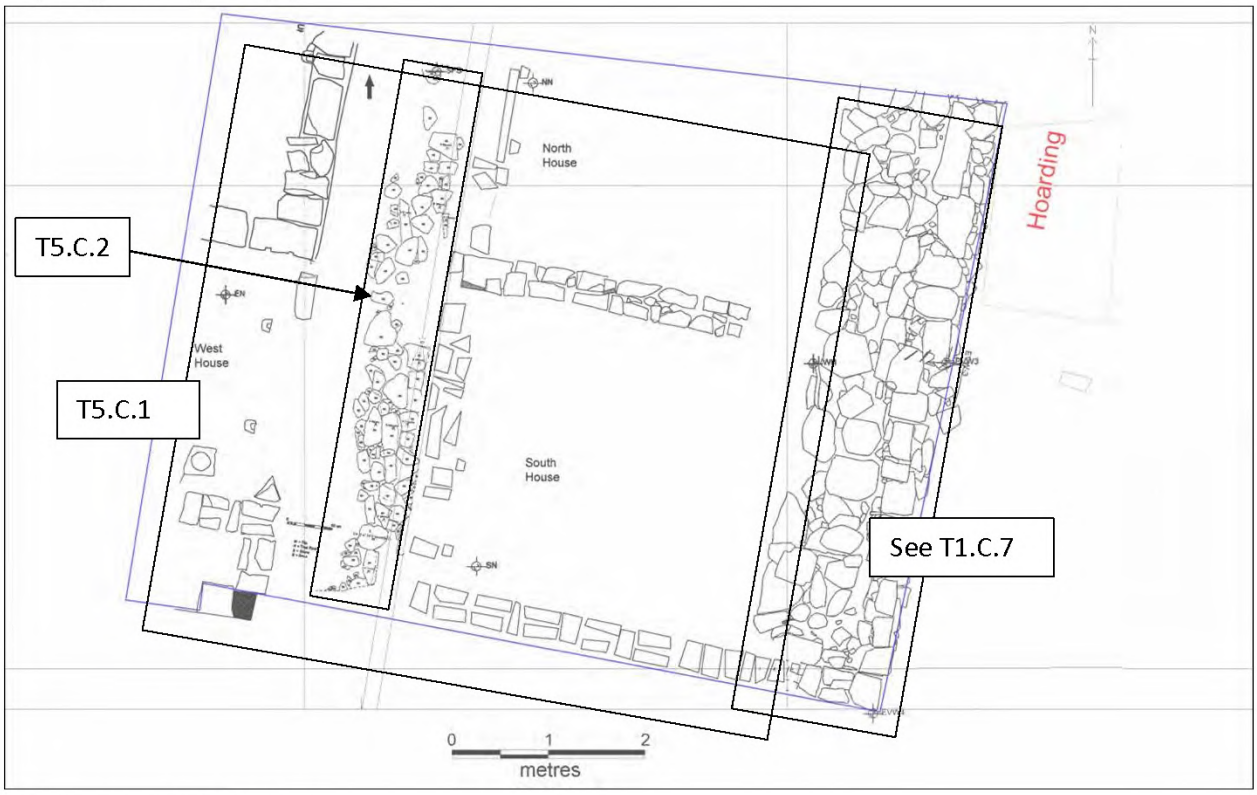
* Finds presented with category/fabric code, for further information please see ***Annex A and B Trench artefact description***

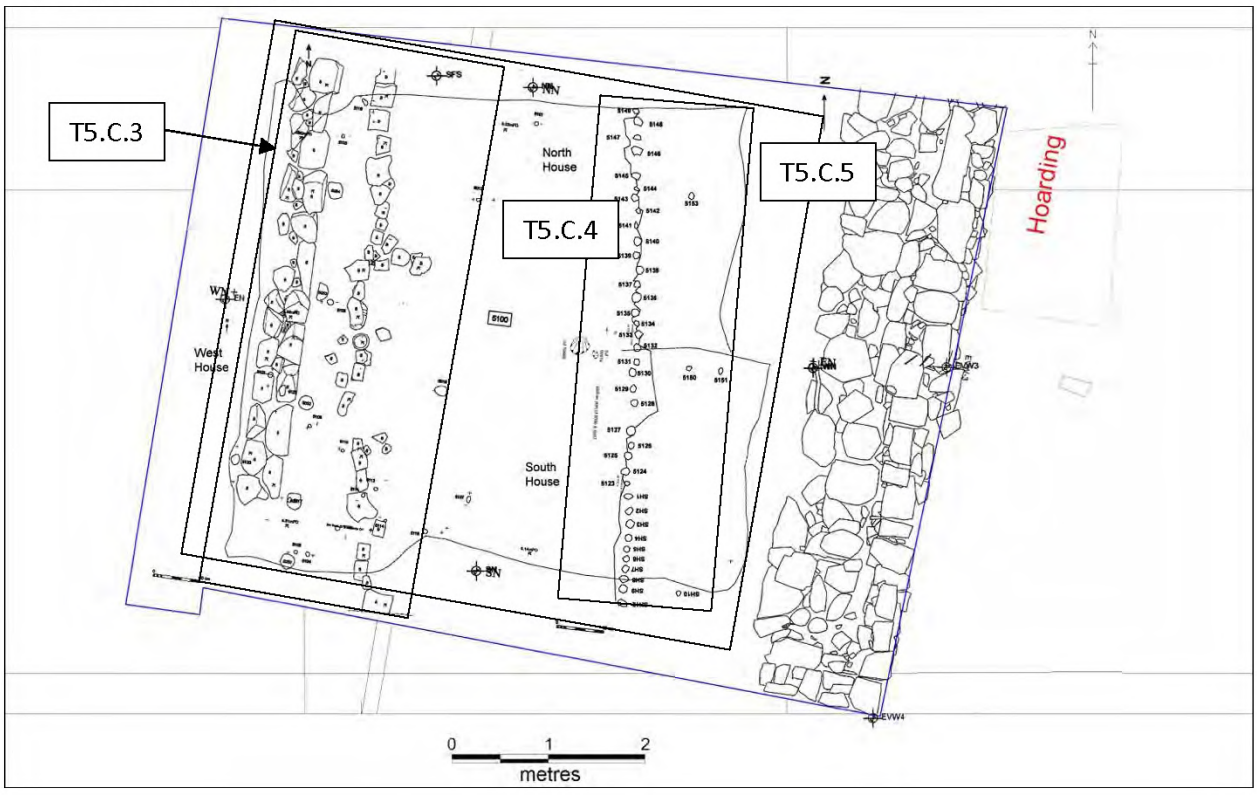
*Proposed dating based on stratigraphy, diagnostic artefacts, TL-dating and historical information.

T5.C Trench 5 drawings

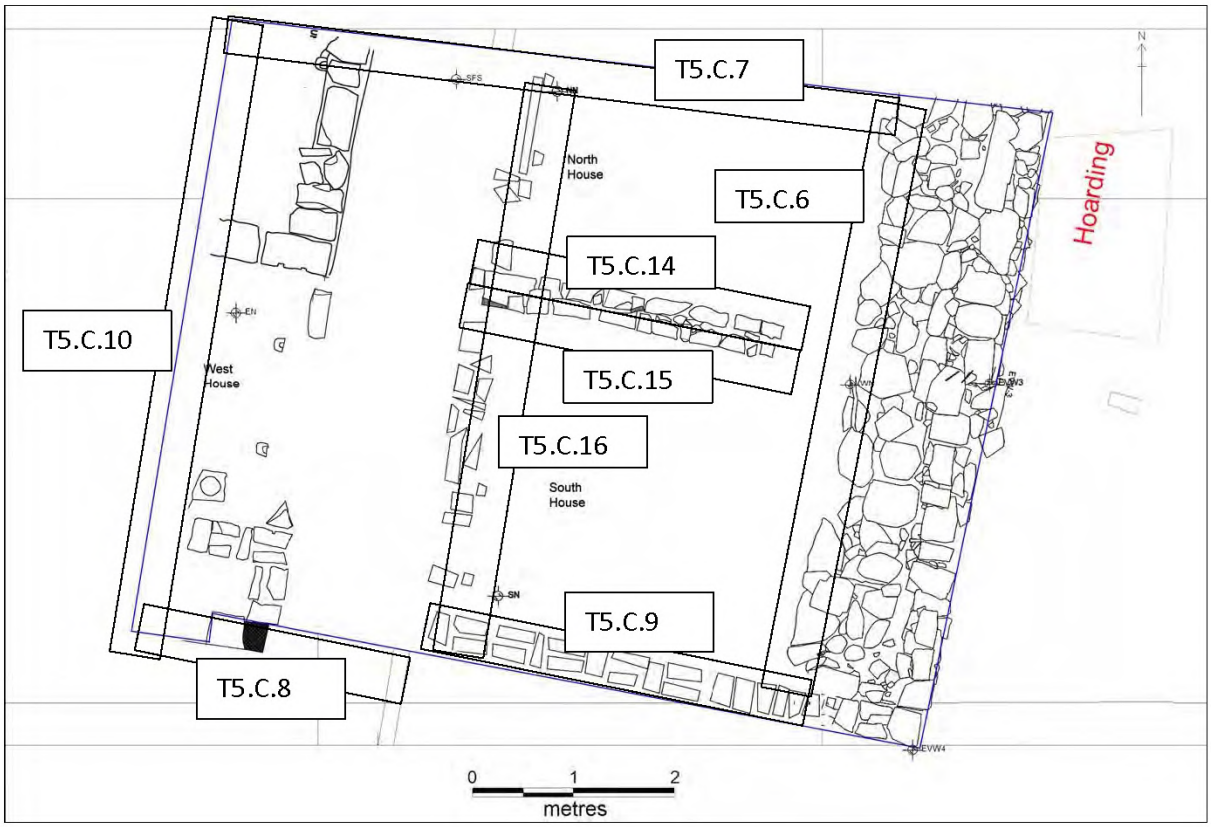
Key to ground plans (1):



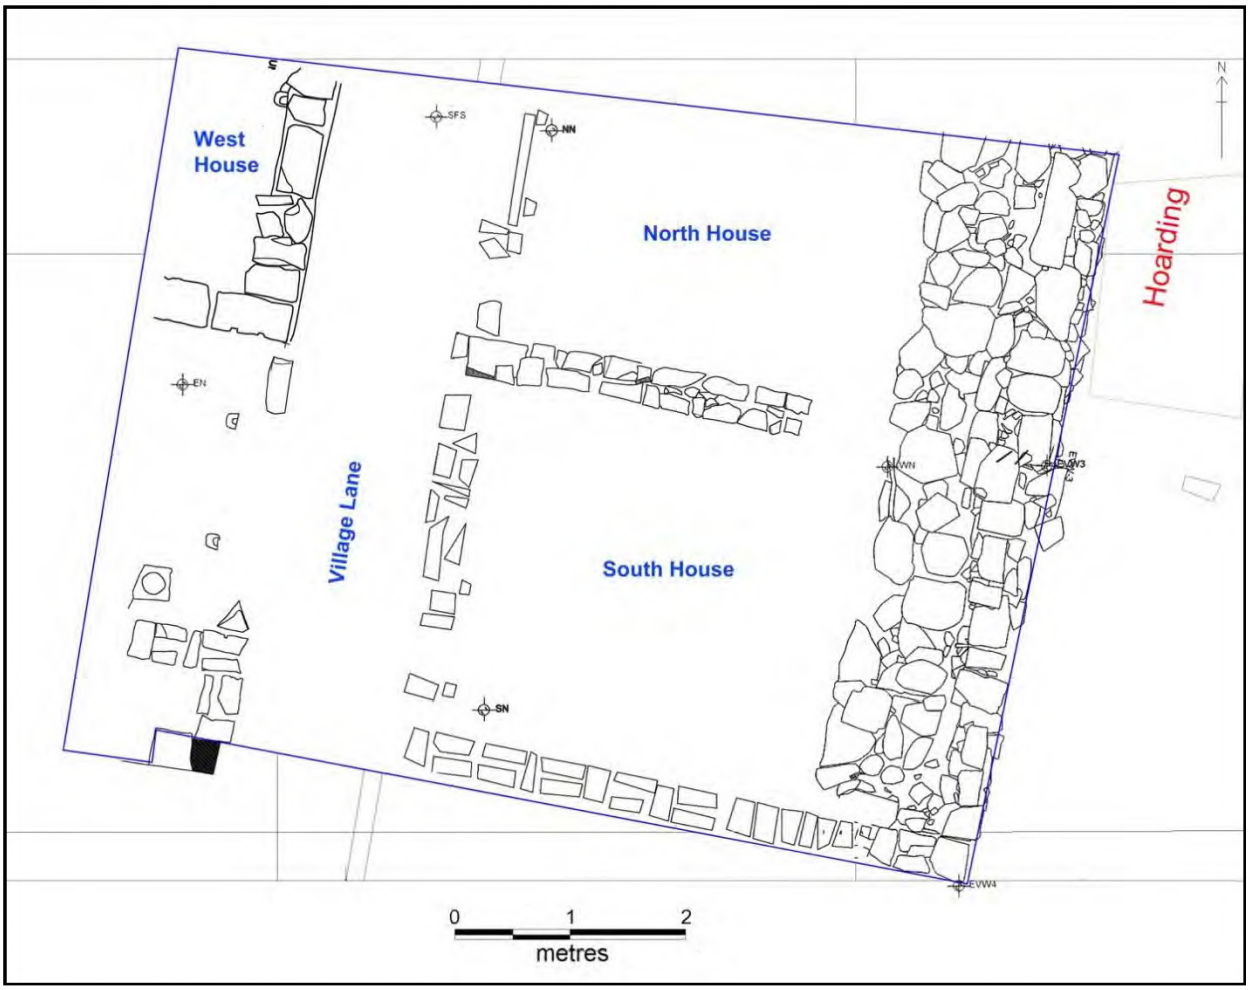
Key to ground plans (2):



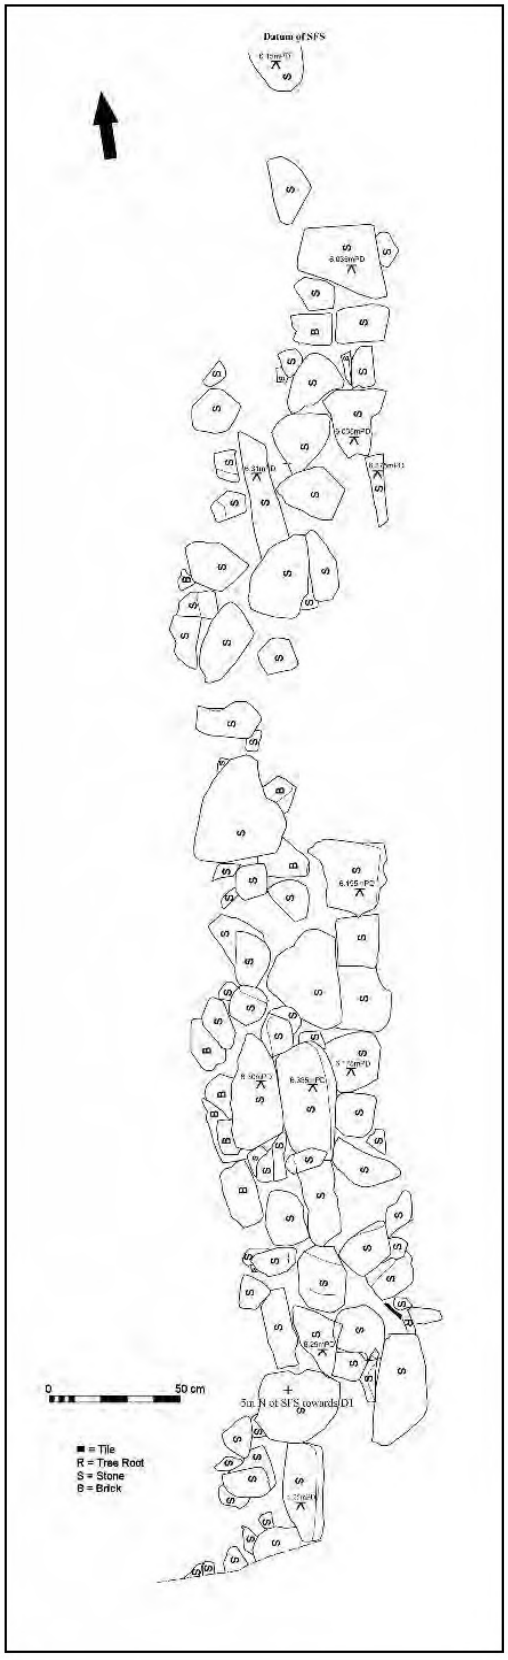
Key to Sections:



Ground plans of house lay-outs and features

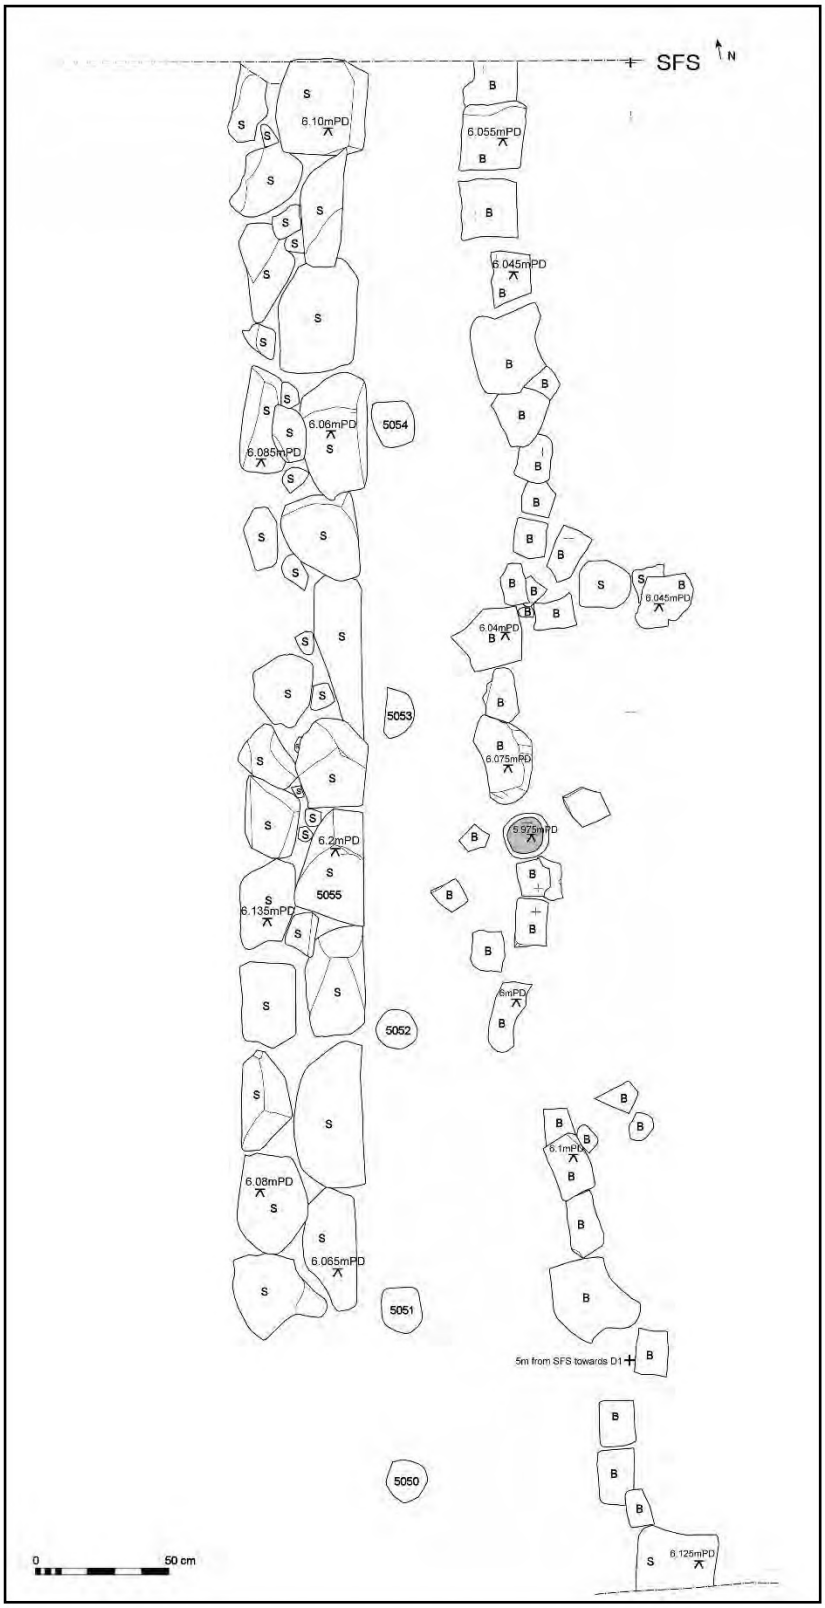


T5.C.1 Ground plan showing recent lay out of West Houses [**Co.5155**], North House [**Co.5007**] and South House [**Co.5006**] and village lane.

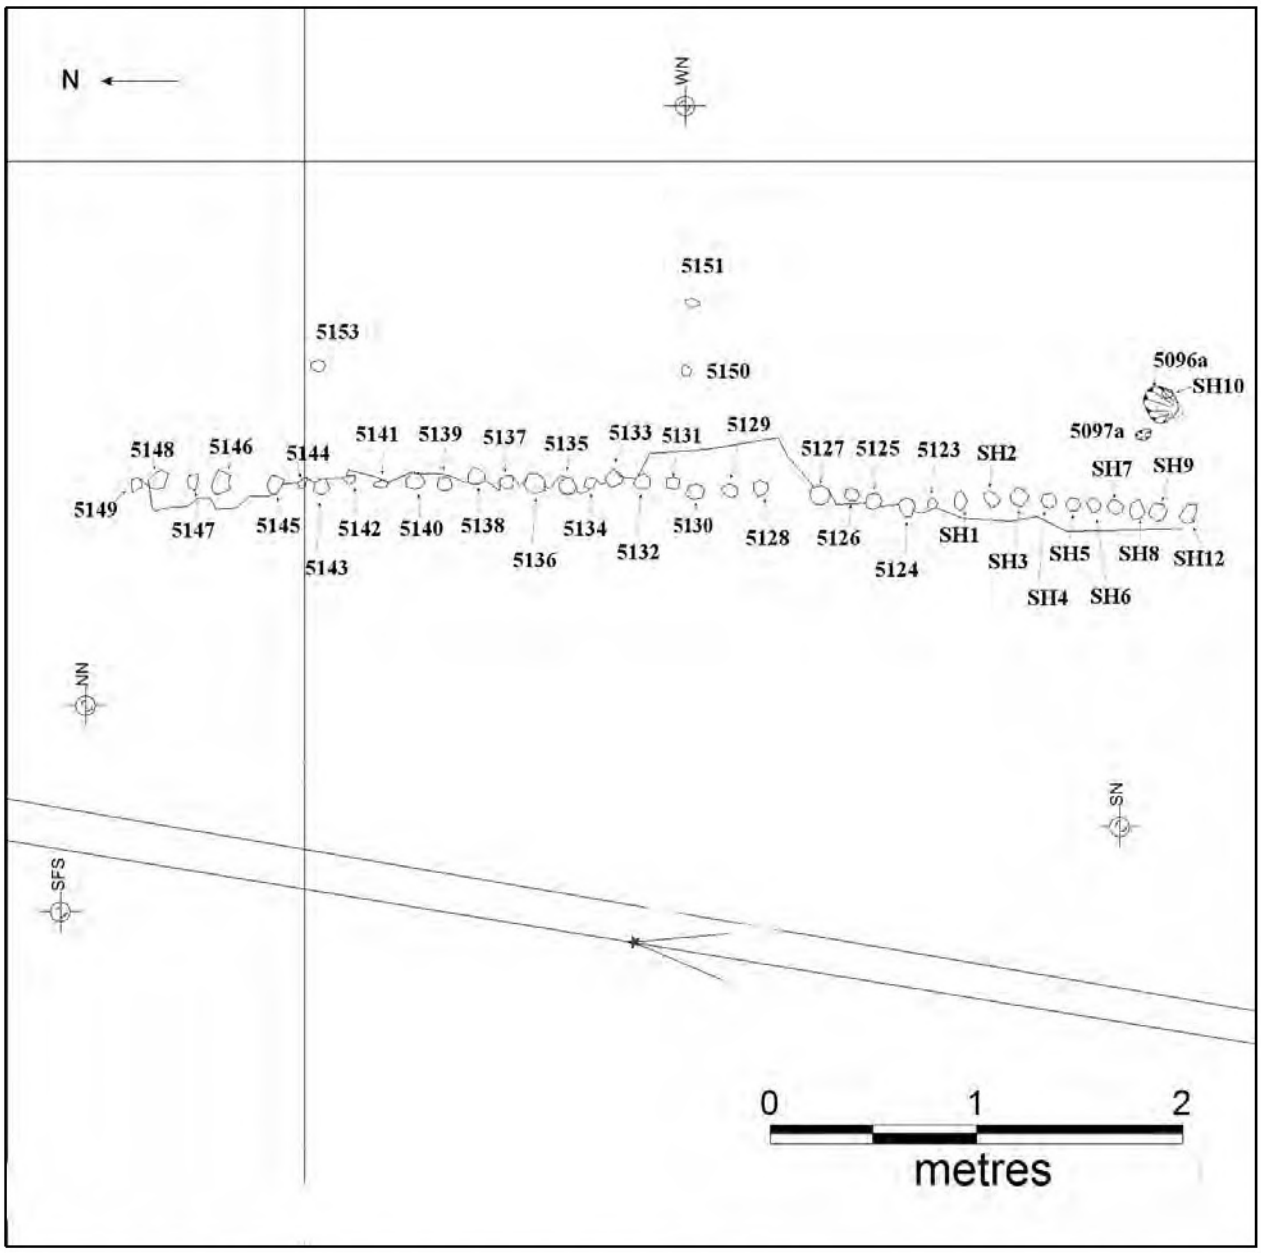


T5.C.2

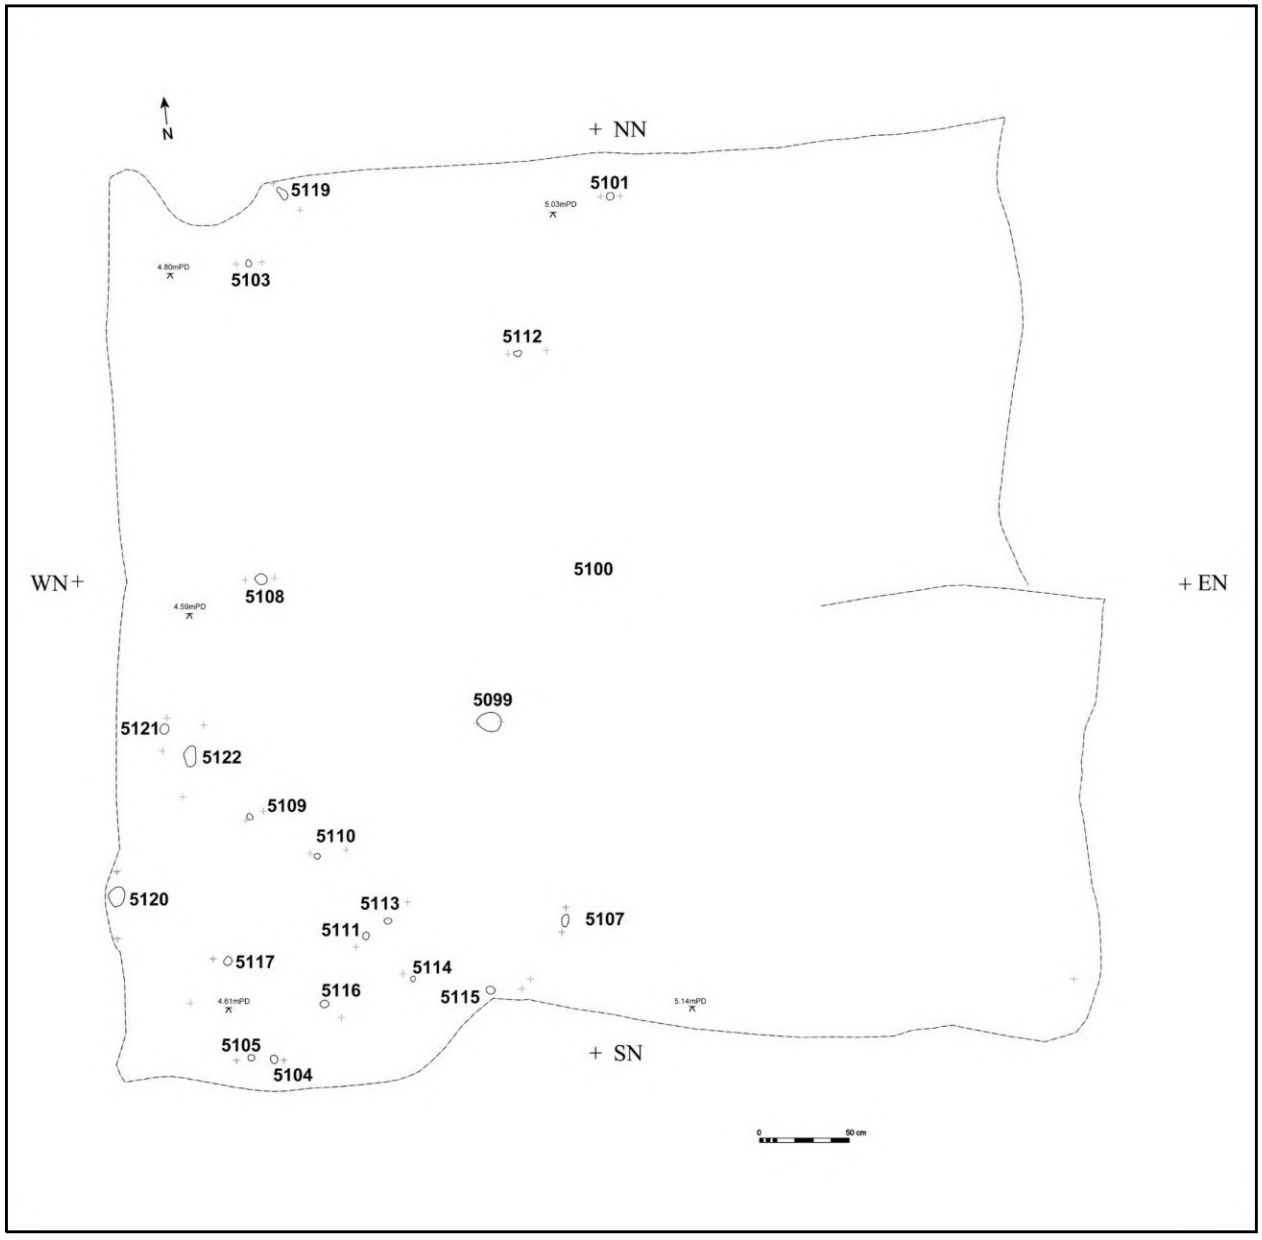
Along North and South House 'west wall in lane: stone drain [**co.5043**]



T5.C.3 Ground plan of brick drain [**co. 5044**], post holes [**co.5050-5054**] and house stone alignment [**co.5055**].

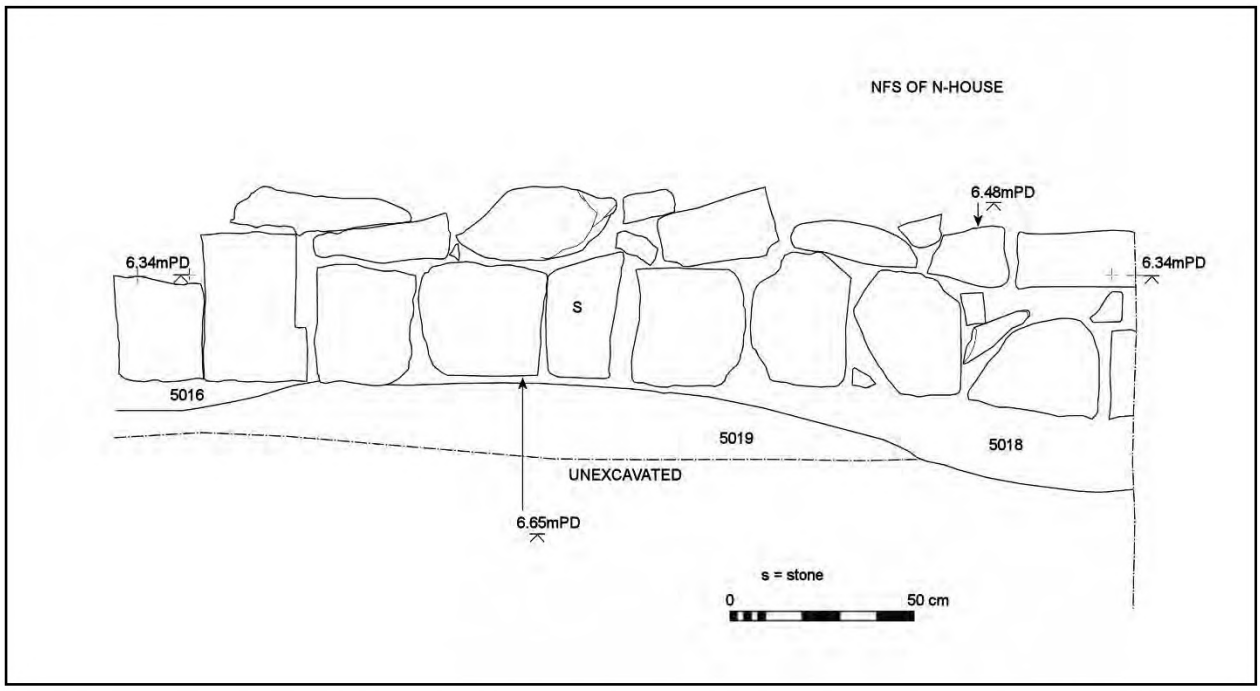


T5.C.4 Stake hole alignment [**co.5042**] with row of stake holes [**co. 5123-5149**] and [**SH1-9, 12**]; latter excavated in 2016 AIA Phase, and stake hole within [**co.5069**] [**co. 5150, 5151, 5153, 5096a, 5097a**]

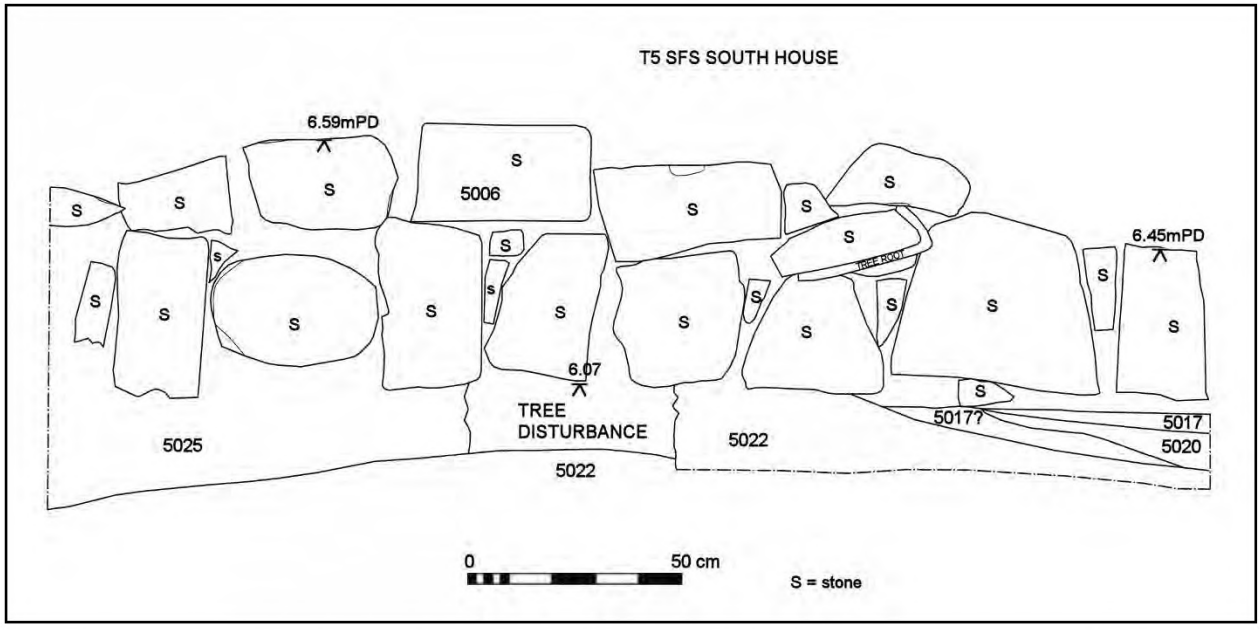


T5.C.5 Plan showing recorded stake holes **[co. 5099, 5101, 5103-5105, 5107--5117, 5119-5122]** cutting into **[co.5100]**.

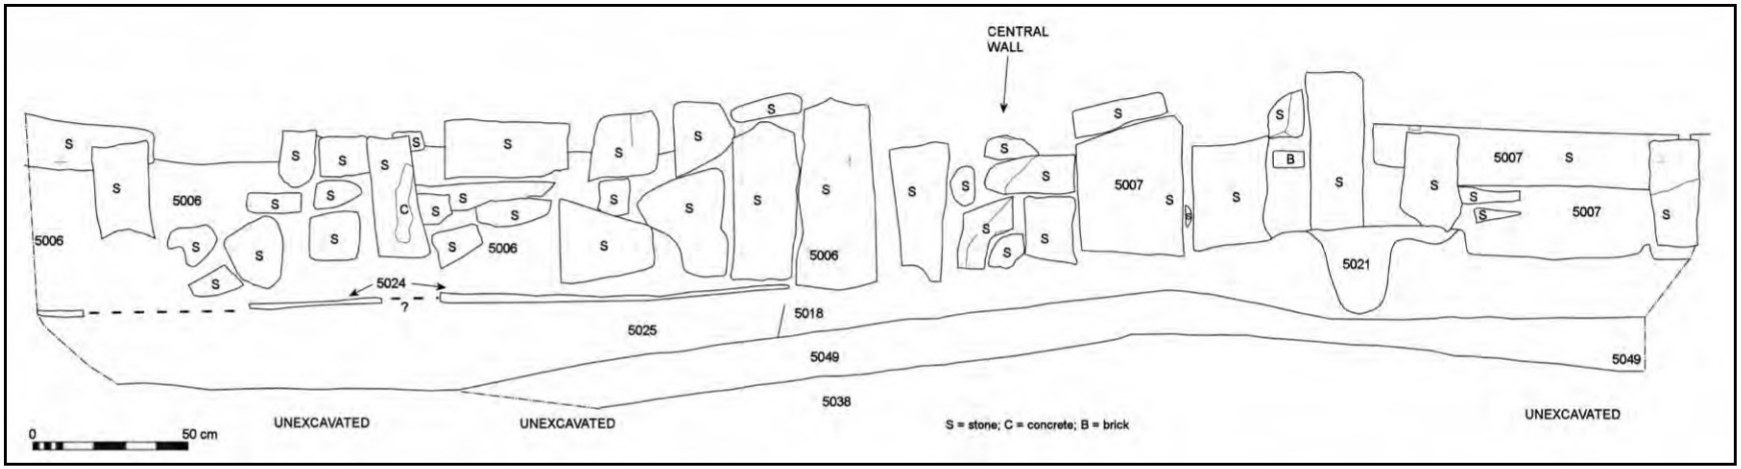
Wall Sections



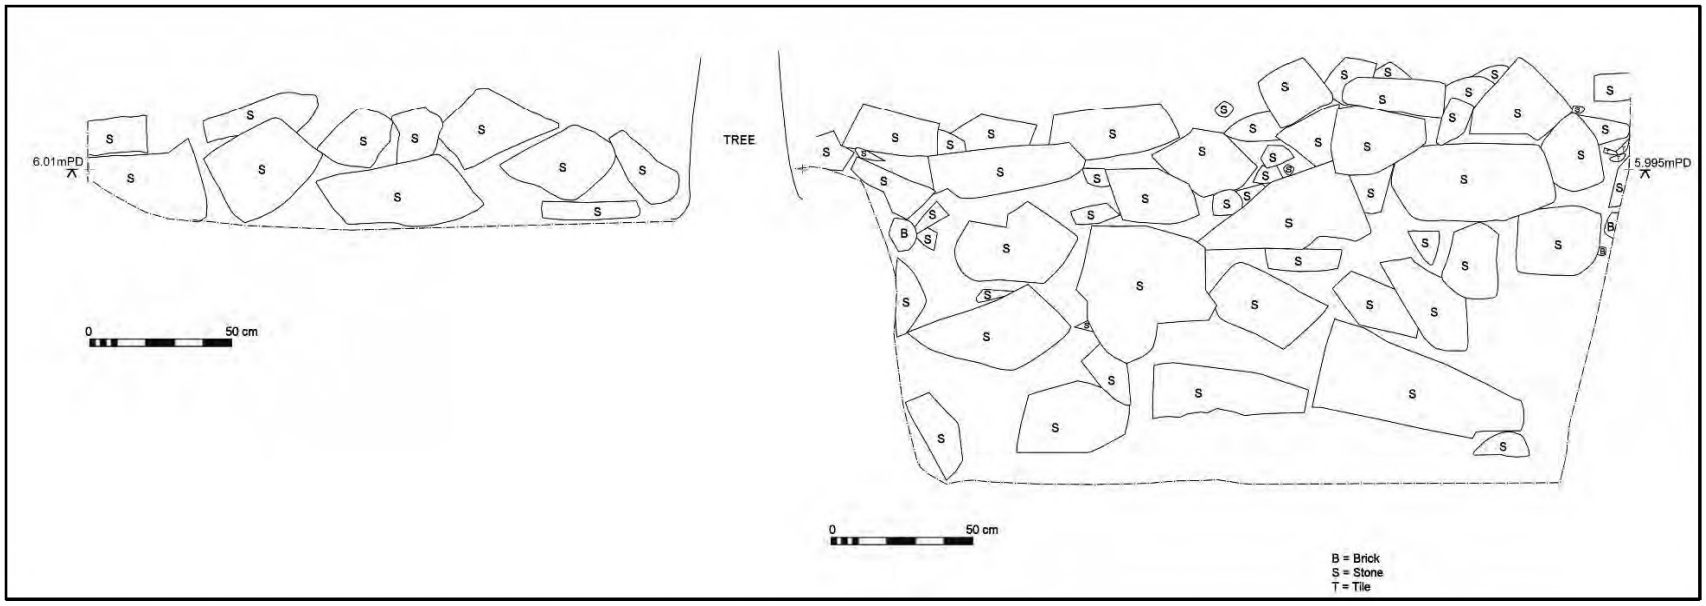
T5.C.6 North facing section of north house southern wall (central wall) [**co.5007**].



T5.C.7 South facing section of South House northern wall (central wall) [**co.5006**].

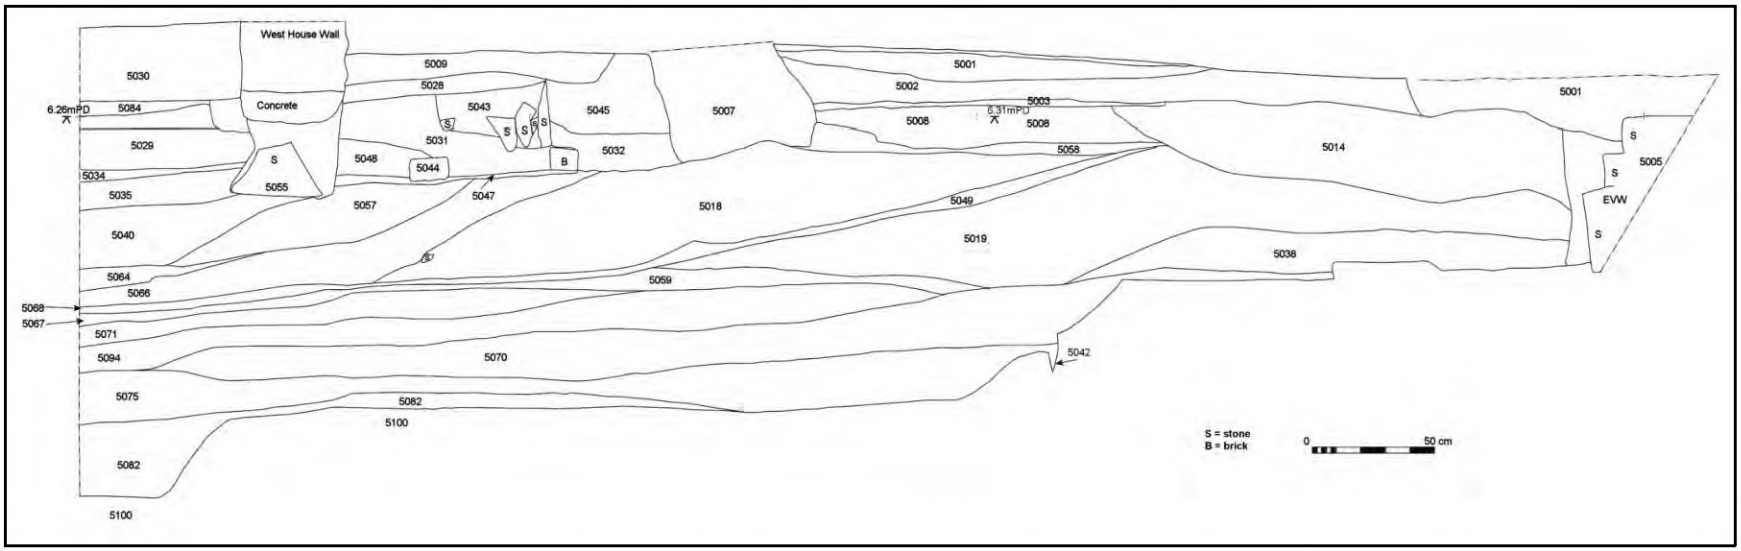


T5.C.8 East facing section of South House [**co.5006**] and North House [**co.5007**].

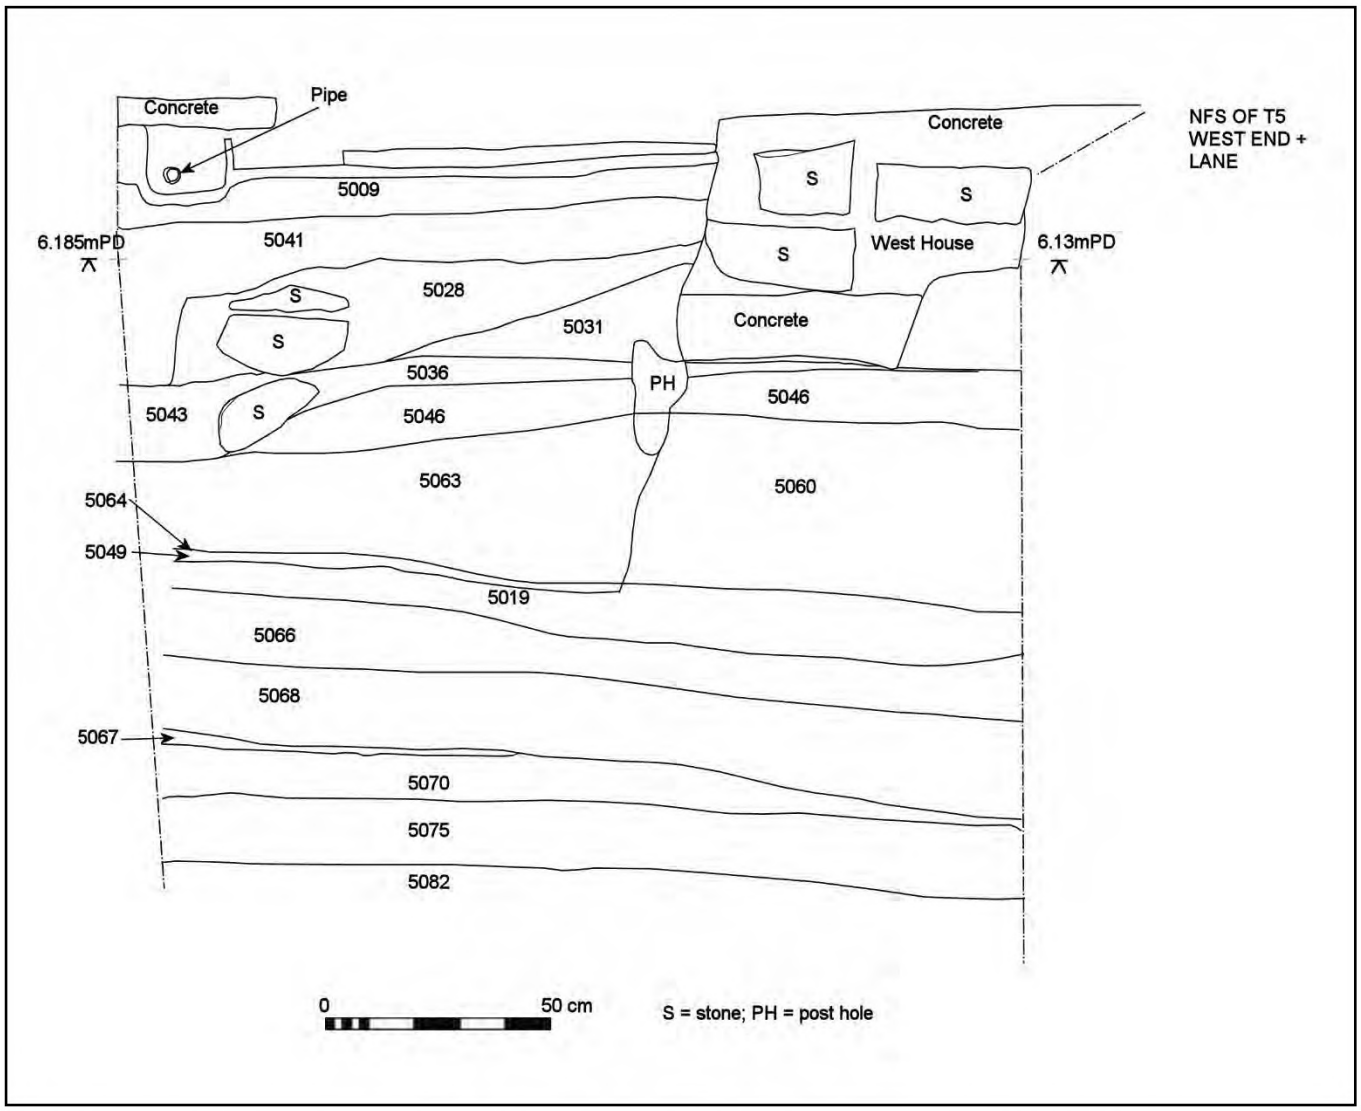


T5.C.9 West facing section of Trench 5 showing the interior of eastern village wall [**co.5005**].

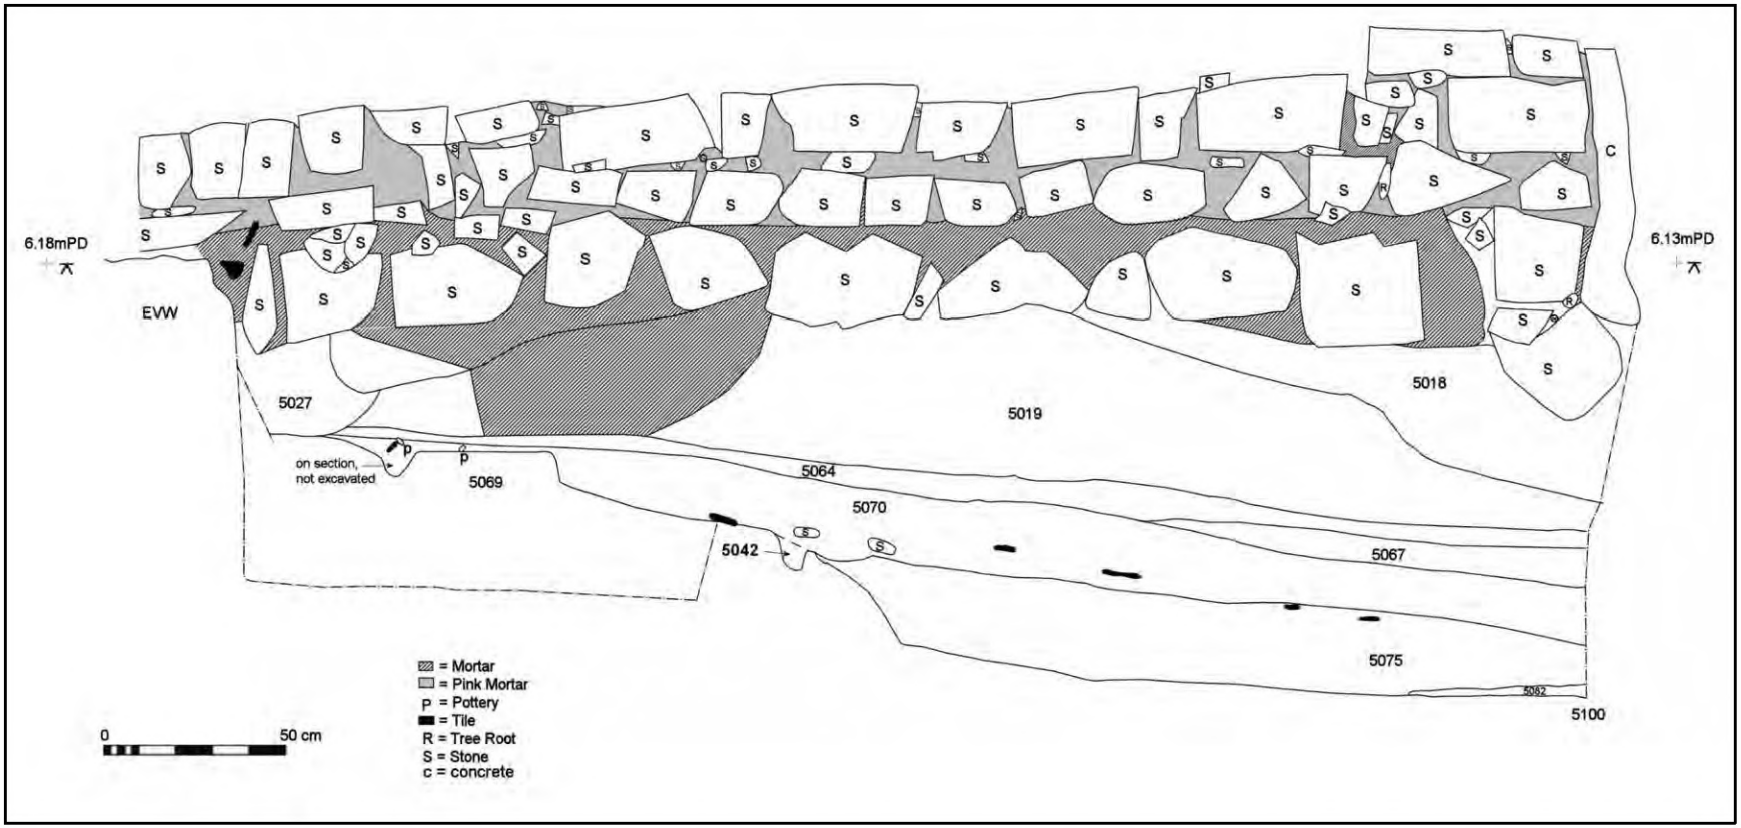
Stratigraphy of the trench



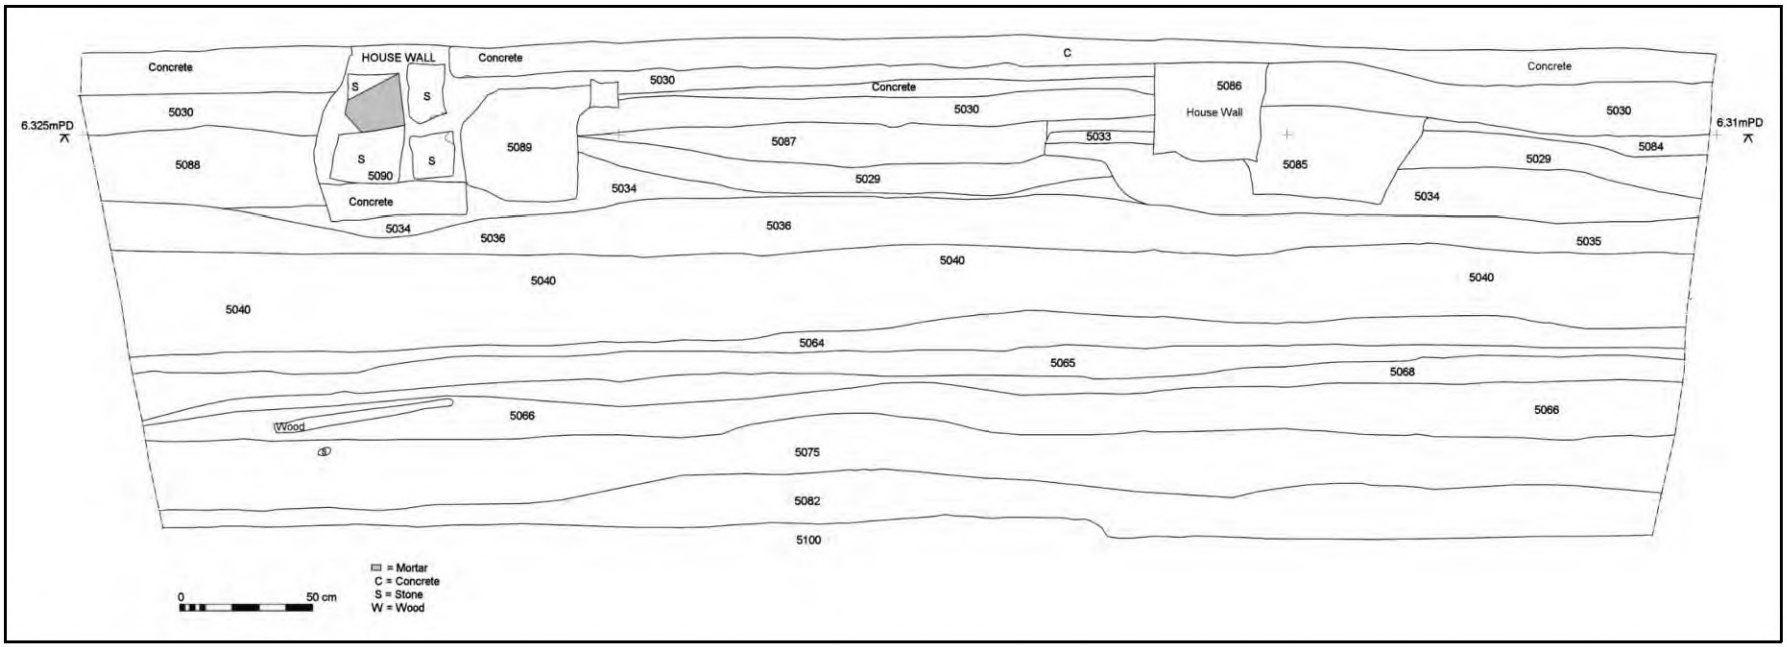
T5.C.10 South facing section of Trench 5 showing contexts: **5001, 5002, 5003, 5005, 5007, 5008, 5009, 5014, 5018, 5019, 5028, 5029, 5030, 5031, 5032, 5034, 5035, 5038, 5040, 5042** (Stake holes), **5043** (stone drain), **5044** (brick drain), **5045, 5047, 5048, 5049, 5055** (house wall), **5057, 5058, 5059, 5064, 5066, 5067, 5068, 5070, 5071, 5075, 5082, 5084, 5094, 5100**.



T5.C.11 North facing section (West) of Trench 5 showing contexts: **5082, 5075, 5070, 5067, 5068, 5066, 5019, 5049, 5064, 5060, 5063, 5046, 5036, 5043, 5031, 5041, 5028, 5009**.

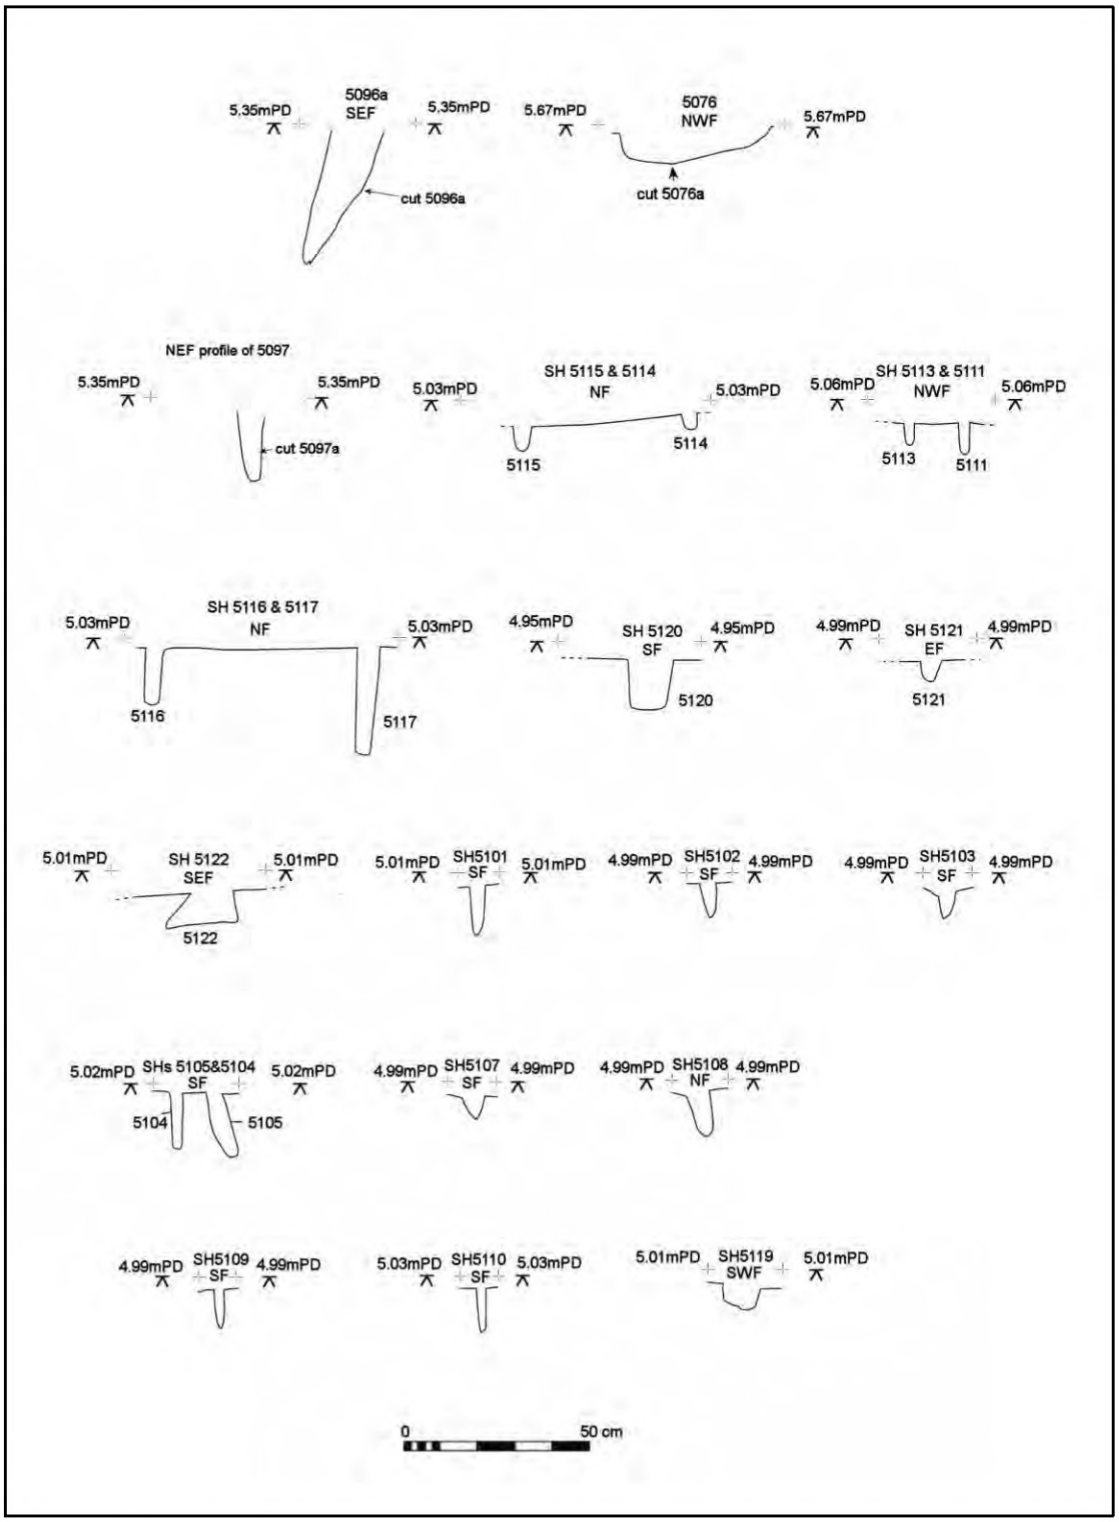


T5.C.12 North facing section (East) of Trench 5 showing contexts: **5018, 5019, 5027, 5042, 5064, 5067, 5069, 5070, 5075, 5082, 5100.**

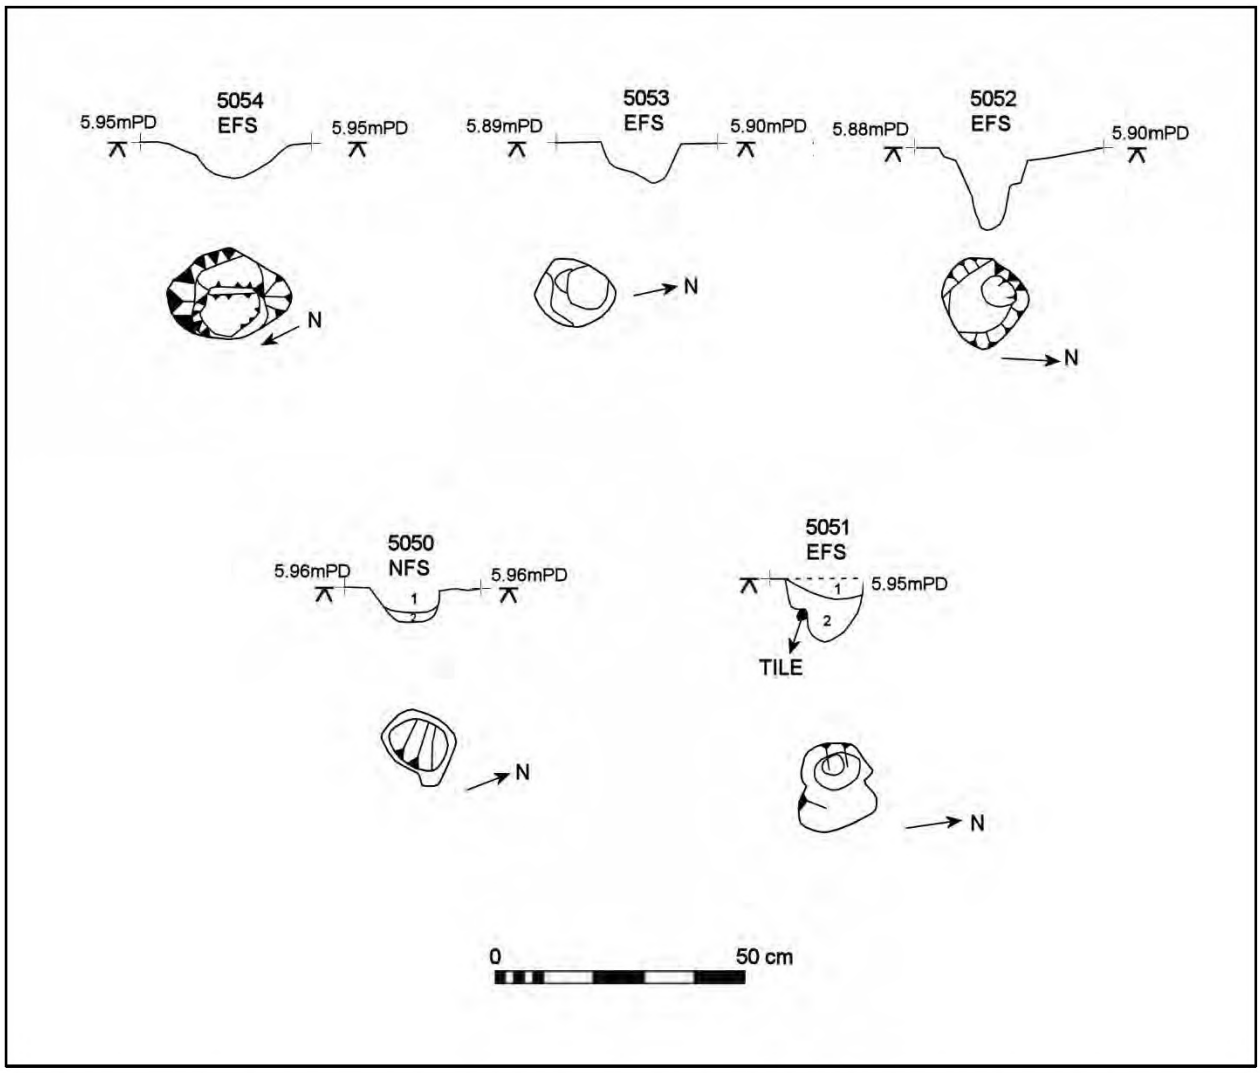


T5.C.13 East facing section of Trench 5 showing contexts: **5100, 5082, 5075, 5066, 5065, 5064, 5040, 5036, 5034, 5068, 5035, 5029, 5030, 5033, 5090, 5089, 5087, 5088, 5086, 5085, 5084.**

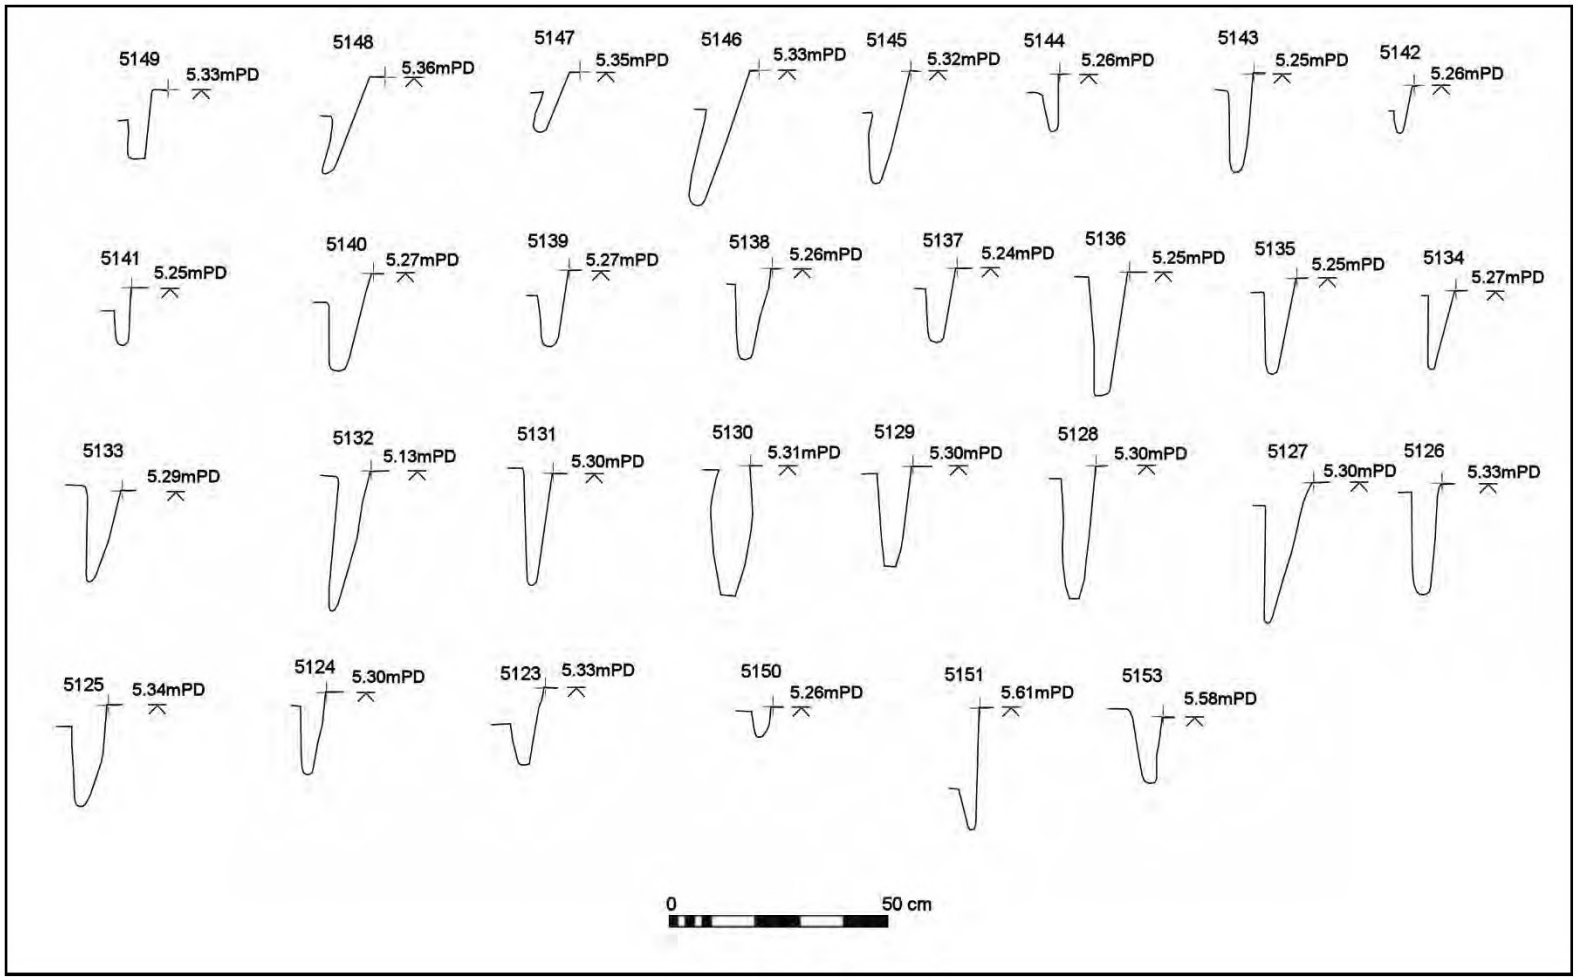
Post and stake hole profiles



T5.C.14 Profiles of stake holes [**co. 5096, 5076, 5097, 5115, 5114, 5113, 5111, 5116, 5117, 5120, 5121, 5122, 5101, 5102, 5103, 5104, 5105, 5107, 5108, 5109, 5110, 5119**].

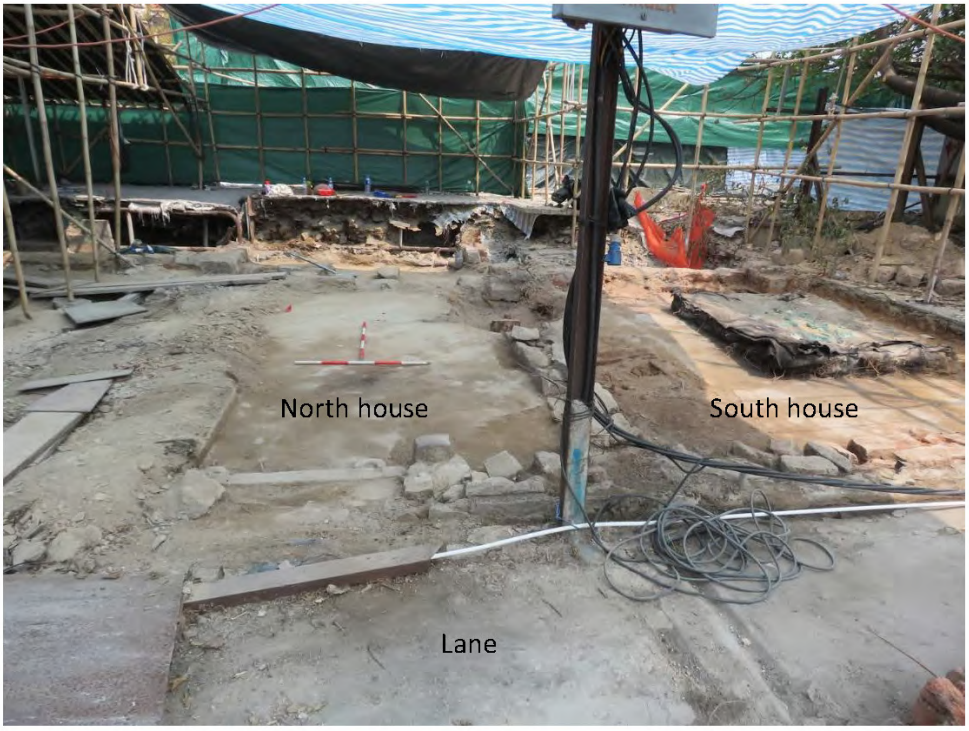


T5.C.15 Profiles and post-ex plans of postholes [**co.5054, 5053, 5052, 5050, 5051**] along stone wall [**co.5055**] in the lane.



T5.C.16 North facing profiles of row of stake holes [**co.5042**] with individual holes [**co.5123 to 5151, 5153**] within [**co.5100**].

T5.D Trench 5 photos



T5.D.1 View of both North House and South House after initial clearance of upper layer, looking east.

T5.D.2

View of brick feature [**co.5011**] and four stone slabs [**co.5012**] in northwest corner of South House, looking east.

T5.D.3 View of south facing section of brick feature [**co.5011**] sitting on top of fill [**co.5023**] and pink mortar, looking north.

T5.D.4 View of pot [**co.5020**] cutting into fill [**co.5018**] in North House, looking west.

T5.D.5 View of east facing house wall **[co.5007]** section in north house with vessel **[co.5020]**, looking west.

T5.D.6 East facing elevations of North and South House walls **[co.5007, 5006]**, looking west.

T5.D.7 View of modern house foundation [**co.5155**] of the southern house within West Houses, looking west.

T5.D.8

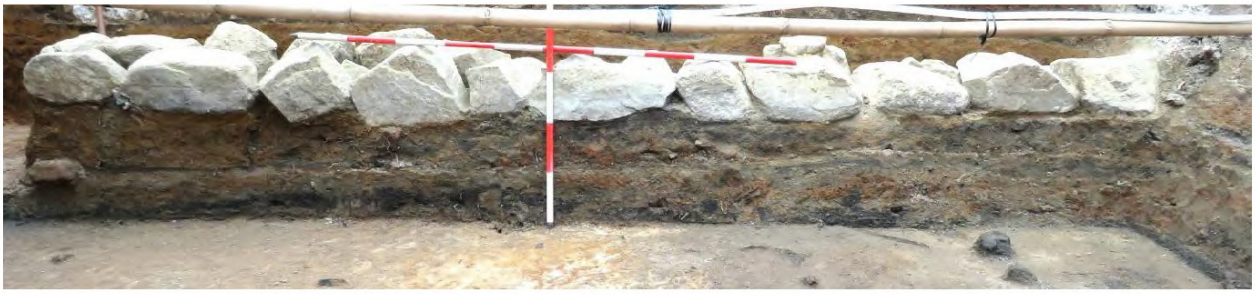
View of modern house foundation [**co.5155**] of the central and northern house within West Houses, looking south.

T5.D.9 Stone drain **[co.5043]** along modern house alignment **[co.5006/5007]** within the Lane. Stone wall **[co.5055]** is appearing below the modern west house walls; looking north.

T5.D.10 Possible brick lined drain [**co.5044**] within lane area; looking north. The stone wall to the left represents the oldest residential house wall recorded within T5 [**co. 5055**].

T5.D.11 Five postholes [**co.5050-5054**] recorded within dark fill deposits [**co. 5045/5048**] along the west house stone wall [**co.5055**]; looking south.

T5.D.12 Close up views of some of the wood fragments recovered from [**co.5049**], looking west.



T5.D.13 East facing section below [**co.5055**] with some wood fragments visible in front, looking west.

T5.D.14 View of 'ditch' [**co.5075** on top and **co.5082** below] along the western end of the trench, looking south.

T5.D.15 View of [**co.5042**], a line of 37 stake holes [**co. 5123-5149, 5050-5051, 5053, SH1-9, SH12**], looking north.

T5.D.16 View of possible postholes and stake holes [**co.5099, 5104-5105, 5107-5111, 5113-5117, 5120-5122**] identified in the south-western part of T5 cutting into [**co.5100**], looking north.

T5.D.17 East Facing Section of T5.

T5.D.18 South Facing Section of T5.

T5.D.19 North Facing Section of T5.

T5.D.20 West Facing Section of T5.

T5		5066	TIM	WOD										1	6		Flat and narrow wood strip; with slight sand crust; one flat side is possibly shaped; possibly burned; L: 8.6, W:1.8, Max T: 0.7cm;	100-9000 to 100-9003
T5		5066	TIM	WOD										1	3		Small flat wood strip with a tapering end; possibly shaped on one flat side and to the tip; L: 4.5, W:1.5, Max T: 0.5cm;	100-9000 to 100-9003
T5		5066	TIM	WOD										1	2		Thin and flat wood strip with a concave outline; one end slightly thicker, the other thins out; cuts on side edges, 1 flat side with polished finishing close to thin edge; thin edge appears in curve shape; L: 5, W:2.5, Max T: 0.8cm;	100-9000 to 100-9003
T5		5066	TIM	WOD										1	1		Short wood piece with parallel edges and shaped facets; cross-section in triangular form; L: 3, W:0.5, Max T: 0.7cm;	100-9000 to 100-9003
T5		5066	TIM	WOD										1	7		Y-shaped wood branch with a possible short cross-cut to one end; L: 4.7, W:2.6, Max T: 2cm;	100-9000 to 100-9003
T5		5066	TIM	WOD										1	49		Irregular wood block, elongated in shape, with certain width; one end potentially tapering, with a slopping cut towards the tip on relatively flat side; with sign of burning; L: 11, W:4.6, Max T: 2.1cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	7		Triangular wood piece; 1 flat side, 2 possibly shaped edges, blunt end possibly cut, with partial broken/ cracked surface; L: 3.7, W:2.6, Max T: 1.4cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	4		Triangular flat wood piece; a possible cut to the tip; 1 edge is possibly shaped; L: 5.2, W:3.2, Max T: 0.8cm;	100-9020 to 100-9022

T5		5066	TIM	WOD										1	6		Elongated and rectangular wood piece; one end is diagonally cut, the other end incomplete; 4 shaped sides; possibly a broken wooden nail; L: 5.6, W:1.5, Max T: 1.1cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	7		Elongated triangular wood piece with a possible tapering end; 3 possible worked sides; blunt end incomplete; possibly burned; L: 5, W:1.8, Max T: 1.8cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	9		Long wood twig with a twist in the middle; one end possibly cut; with sign of burning; max DIA 1.1cm; L: 12cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	5		Straight wood twig with a cut to one end; with trace of remaining tree bark; possibly burned; L: 4.8, W:0.9, Max T: 0.9cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	4		Wood twig with both ends worked; one end is cut across the twig, the other end diagonally thinned; thinned end with possible sign of burning; L: 6.4, W:1, Max T: 0.7cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	3		Elongated wood piece; with a cut end and a worked side; the other end incomplete; L: 5.5, W:1.5, Max T: 1cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	1		Small elongated wood piece; with a flat side; one end is possibly worked the other end incomplete; L: 4.1, W:1.2, Max T: 0.6cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	1		Sub-triangular wood chip; with one smooth side and a diagonally thinned end on the rough side; L: 4.4, W:1.2, Max T: 0.2cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	1		Tiny wood fragment; with one possible shaped side; L: 3, W:1, Max T: 0.7cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	3		Small and roughly flat wood piece; with possibly shaped mark on one flat side; one end possibly cut; the other end incomplete; L: 3.4, W:2.2, Max T: 0.8cm;	100-9020 to 100-9022
T5		5066	TIM	WOD										1	28		Regular quadrilateral with a chip in one of the corners, cut on all sides, possible part of a bigger structure. L: 8.2, W:5.9, Max T: 1.2cm;	102-9899 to 102-9905

T5		5066	TIM	WOD										1	11		Regular quadrilateral with a chip in one end all sides seem cut and a hollow out in one side; L: 8.2, W:3.6, Max T: 0.6cm;	102-9907 to 102-9913
T5		5066	TIM	WOD										1	5		Irregular quadrilateral with a thinned edge which is blunt, all sides have ben cute, and one is curved; L: 6.4, W:2.2, Max T: 0.6cm;	102-9915 to 102-9928
T5		5066	TIM	WOD										1	35		Regular elongated quadrilateral, curvature along the sides leading towards a potential tip. All sides are cleanly cut and possibly part of a wooden foundation structure. L: 10.8, W:2.9, Max T: 1.8cm;	102-9929 to 102-9934
T5		5066	TIM	WOD										1	37		Irregular triangle, charred all over, fragmented and splinted around the body; L: 8.9, W:5, Max T: 2.1cm;	102-9936 to 102-9941
T5		5066	TIM	WOD										1	16		Elongated quadrilateral fragment, cut on 3 sides had broken on the last. Charred and smoothed into rounded edges; L: 10.4, W:2.1, Max T: 1.1cm;	102-9950 to 102-9957
T5		5066	TIM	WOD										1	6		Irregular pentagon fragment, with cut edges and splintered at one end, smooth and charred exterior; L: 5.7, W:2.1, Max T: 0.9cm;	102-9943 to 102-9948
T5		5066	TIM	WOD										1	3		Irregular pentagon, very thin and charred, flat and chipped in one corner; L: 5.3, W:2.4, Max T: 0.4cm;	102-9962 to 102-9967
T5		5066	TIM	WOD										1	5		Irregular quadrilateral with a ridge running along one side. Both ends are fractured and splintered; L: 5.4, W:1.9, Max T: 0.9cm;	102-9968 to 102-9973
T5		5066	TIM	WOD										1	2		Irregular pentagon with what seems like half a through hole on the edge. L: 4.5, W:1.8, Max T: 0.7cm;	102-9975 to 102-9980
T5		5066	TIM	WOD										1	4		Irregular quadrilateral, very rough and splintered on most edges, but clearly cut. L: 3.5, W:2.3, Max T: 0.6cm;	102-9982 to 102-9990
T5		5066	TIM	SED										1	2		Broken seed, charred at the tip	102-9993 to 103-0008
T5		5066	TIM	WOD										1	2		Bamboo shoot, rounded shape, splintered one end and rounded at the other. L: 4.7, W:1.3, Max T: 0.8cm;	103-0010 to 103-0034
T5		5066	TIM	WOD										1	4		Irregular quadrilateral with a chipped corner, smooth and L: 6.2, W:1.9, Max T: 0.6cm;	103-0038 to 103-0049

T5		5066	TIM	WOD										1	4		irregular quadrilateral with a ridge on one side. Cut sides and slight charring; L: 5.5, W:2, Max T: 0.7cm;	103-0051 to 103-0062
T5		5066	TIM	WOD										1	6		Regular quadrilateral rounded and rough, slight discoloration and charring; L: 2.8, W:2.3, Max T: 2cm;	103-0063 to 103-0071
T5		5066	TIM	WOD										1	4		Regular quadrilateral with a chip in one end all sides seem cut and a hollow out in one side; L: 5.8, W:2.3, Max T: 1.1cm;	103-0035 to 103-0037
T5		5066	TIM	WOD										1	5		Irregular triangle, thinned to one side made of bamboo; L: 6.1, W:2.5, Max T: 0.7cm;	103-0073 to 103-0079
T5		5066	TIM	WOD										1	3		Elongated quadrilateral rough and charred, curved on one side. L: 7, W:1.4, Max T: 0.7cm;	103-0081 to 103-0087
T5		5066	TIM	SEDs										1	3		Fragment of a seed	103-0089 to 103-0097
T5		5066	TIM	SEDs										1	1		Small and fragmented, it is hollowed out	103-0099 to 103-0110
T5		5066	TIM	SEDs										2	<1		The outer casing of two seeds	103-0112 to 103-0117
T5		5066	TIM	SEDs										1	<1		Tip of a seed fragment	103-0119 to 103-0124
T5		5066	TIM	twigs										21	25		Twigs of different sizes	103-0125 to 103-0134
T5		5066	TIM	WOD										1	5		Elongated fragment. Rough on one side and smooth on the other side. L: 5.1, W:1.5, Max T: 1.2cm;	103-0136 to 103-0141
T5		5066	TIM	WOD										1	2		Thin fragment, smooth and curved in on one side; L: 4.7, W:2.8, Max T: 0.5cm;	102-9958 to 102-9960
T5		5066	TIM	WOD										1	2		Thin wooden stick; L: 5.6, W:0.7, Max T: 0.6cm;	103-0198 to 103-0203
T5		5066	TIM	WOD										11	10		One smooth side	103-0151 to 103-0159
T5		5066	TIM	WOD										5	12		Irregular triangular	103-0161 to 103-0166
T5		5066	TIM	WOD										14	26		Flat thin wooden fragments	103-0168 to 103-0173
T5		5066	TIM	WOD										6	10		Irregular quadrilateral	103-0175 to 103-0182

T5		5066	TIM	WOD										52	37		Small identifiable pieces	103-0184 to 103-0196
T5		5066	TIM	WOD										1	369		Large wooden plank, cut on both sides; L: 29, W:8.9, Max T: 1.2cm;	103-1014 to 103-1021
T5		5066	TIM	WOD										1	15		Circular wooden object with a hole in the centre; L: 3.4, W:1.2, Max T: 1.2cm;	103-1046 to 103-1056
T5		5066	TIM	WOD										1	36		Irregular pentagon with splinters reminiscent of a fragment from a wooden plank; L: 11.1, W:6.5, Max T: 1cm;	103-1059 to 103-1064
T5		5066	TIM	WOD										1	24		Irregular pentagon with splinters reminiscent of a fragment from a wooden plank; L: 7, W:6.1, Max T: 1cm;	103-1065 to 103-1070

T5		5067	TIM	WOD										1	151		Two sections; bulbous area on top, flattened area on bottom, cleanly cut one side, other side with deep grooves, rounded top; L: 16.6, W:4.8, Max T: 3.9cm;	100-7879 to 100-7900
T5		5067	TIM	WOD										1	41		Long, square-is, splintered ends, hole through top section; L: 10.9, W:2.5, Max T: 1.4cm;	100-7963 to 100-7979
T5		5067	TIM	WOD										1	9		Long, seemingly sharpened on one end, blunt on the other; L: 11.6, W:1.1, Max T: 1.5cm;	100-7980 to 100-7994
T5		5067	TIM	WOD										2	3		Small wood chips, flat sides and splintered ends, square shaped	100-7995 to 100-8001
T5		5067	TIM	SED										1	6		Seed L: 2.4, W:2.7, Max T: 1.8cm;	100-8002 to 100-8006
T5		5067	TIM	SED										1	6		Seed; L: 3, W:1.6, Max T: 2.3cm;	100-8007 to 100-8014
T5		5067	TIM	WOD										1	100		L-shaped wood; handle part is about 6cm long, 2.5cm wide, Max. Thickness 1.5cm, triangular-sectioned, with rounded end; main part is sub-rectangular shaped with one rounded-edge, one side is polished (partially missing)L: 15.8, W:6.2, Max T: 2.3cm;	100-9014 to 100-9017

T5		5067	TIM	WOD										1	32		Triangular-shaped with tapering end; triangular-sectioned (tip of one edge missing); all side polished; pointed tip intact with sign of burning; end missing; possibly used as some kind of a stake point; L: 9.5, W:3.8, Max T: 1.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	12		Sub-rectangular shaped flat piece of wood; both side flat, one slightly concaved; with one complete polished edge, other edge is rough and incomplete; both ends missing; L: 5.5, W:3.2, Max T: 0.7cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	9		Elongated wooden object with a burnt tip; tapering end diagonally shaped; originally triangular-sectioned (one tip of an edge is partially broken); possibly a wooden nail; L: 8.5, W:2.7, Max T: 0.7cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	7		Elongated wooden object with a burnt tip; the other end was cut diagonally; both side sharpened straight; L: 7, W:1.3, Max T: 0.9cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	2		Broken tip of a possible wooden nail; tapering end with sign of burning; end broken; L: 5.8, W:1.2, Max T: 0.9cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	3		Elongated wooden object with a burnt and rounded tip; one flat facet; end missing; possibly a wooden nail; L: 9.3, W:1, Max T: 0.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	6		A flat piece of wood fragment with an intact curvy edge; side of edge is polished; both side flat; L: 4.3, W:3.2, Max T: 0.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	8		Elongated wooden object with one tapering end; tip of end is partially burnt; one slightly flattened side; end missing; possibly used as a nail; L: 7.8, W:1.8, Max T: 0.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	5		A piece of flat wooden fragment with one flat facet; both ends missing; L: 4.2, W:2.5, Max T: 0.5cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	15		Elongated piece of wood; slightly wedged section; one flat side; one edge is polished; both ends missing; L: 9, W:2.6, Max T: 0.8cm;	100-9014 to 100-9017

T5		5067	TIM	WOD										1	1		Small elongated piece of wood with one burnt end; the other end has a diagonal cut; triangular-sectioned; possibly a wooden nail; L: 5.5, W:1.1, Max T: 0.9cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	3		Twig with cut branch; stub is about 0.7cm long; one facet is sharpened flat; L: 5.8, W:1.5, Max T: 0.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	6		Wooden stick with one possible diagonally cut end; L: 7.4, DIA 1.2cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	2		Small rectangular fragment, partially cut to create an L-shaped section; all side polished; one end has a diagonal cut; possibly used as a wedge L: 3.8, W:1.4, Max T: 0.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	1		Small twig with one flat facet; both ends missing; L: 3.9, W:1, Max T: 0.7cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	7		End fragment of a possible stake; sign of burning; tapering end is slightly broken; L: 4.8, W:1.6, Max T: 1.3cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	2		Small piece of wood; trapezoid-sectioned; one end is thicker; tapering end missing; all sides polished; possibly used as a wedge; L: 3.4, W:1.3, Max T: 0.8cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	6		Small fragment with diameter 2cm; both ends missing; small possible cut in one end; L: 2.2, DIA 2cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	19		Elongated piece of wood with signs of burning; most broken; one possible flat edge; L: 9.1, W:2.3, Max T: 2.4	100-9014 to 100-9017
T5		5067	TIM	WOD										1	5		Broken fragment; 2 polished facets; with sign of burning; L: 4.2, W:2, Max T: 1.5cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	1		Small flat wood fragment; one end cut; the other end missing; L: 3, W:2.7, Max T: 0.9cm;	100-9014 to 100-9017
T5		5067	TIM	WOD										1	15		Wedge-sectioned fragment with curvy end; one flat side; in poor condition; L: 7.6, W:3.8, Max T: 1cm;	100-9163 to 100-9165
T5		5067	TIM	WOD										1	1		Triangular-sectioned; both ends missing; 3 sides polished; possibly mid-section of a wooden nail; L: 5, W:1.7, Max T: 0.9cm;	100-9163 to 100-9165

T5		5067	TIM	WOD										1	11		Charred wood; hook-shaped fragment; one end missing; tapering end is complete; L: 7, W:2, Max T: 1.7cm;	100-9163 to 100-9165
T5		5067	TIM	WOD										1	4		Small piece of flat wood with one smooth edge and one tapering edge; both ends missing; possibly used as a wedge; L: 4.6, W:2.2, Max T: 0.6cm;	100-9163 to 100-9165
T5		5067	TIM	WOD										1	44		Wooden stick with scraping sign; L: 29.2, DIA 1.4 to 1.5cm;	DSC_0002 to DSC_0015
T5		5067	TIM	SED										3	10		Seeds of the same species;	101-9623 to 101-9628
T5		5067	TIM	SED										1	1		Seed fragment;	101-9630 to 101-9638
T5		5067	TIM	WOD										45	97		Cylindrical wooden fragments	101-9655 to 101-9667
T5		5067	TIM	SED										1	6		Seed; L: 2.2, W:1.3, Max T: 1.2cm;	101-9673 to 101-9689
T5		5067	TIM	SED										1	5		Seed; L: 1.9, W:2.6, Max T: 1.9cm;	101-9690 to 101-9695
T5		5067	TIM	WOD										1	19		Burned wooden fragment, slightly flattened, curved with a deep grove on the other edge, an edge is thinned; L: 7.3, W:3.1, Max T: 1.9cm;	101-9697 to 101-9702
T5		5067	TIM	WOD										1	8		Elongated irregular quadrilateral wooden fragment, cut on both sides, and thinned to one edge; L: 10, W:1.3, Max T: 0.7cm;	101-9704 to 101-9709
T5		5067	TIM	WOD										1	6		Irregular quadrilateral wooden fragment. Thinned to one side, both sides are smooth cut; L: 5.2, W:2.2, Max T: 0.6cm;	101-9710 to 101-9715
T5		5067	TIM	WOD										1	2		Elongated irregular quadrilateral, shallow hollow out on one end; L: 4.7, W:1.5, Max T: 0.2cm;	101-9717 to 101-9723
T5		5067	TIM	WOD										1	2		Irregular triangle, cut on one end, thinned on the other side, all round smooth edges; L: 4, W:1.5, Max T: 0.6cm;	101-9724 to 101-9730
T5		5067	TIM	WOD										1	3		Irregular triangle wooden fragment, rough edges with clear signs of splintering, charred on all sides; L: 4.9, W:2.1, Max T: 0.4cm;	101-9732 to 101-9737

T5		5067	TIM	WOD										1	2		Elongated wooden chip, charred ends and a long ridge on a side L: 6.6, W:1, Max T: 0.2cm;	101-9739 to 101-9745
T5		5067	TIM	WOD										1	4		Irregular quadrilateral wooden fragment, slight thinning to one side, charred on one edge; L: 3, W:2.4, Max T: 0.5cm;	101-9747 to 101-9754
T5		5067	TIM	WOD										1	2		Irregular sub-triangle, one edge is thinned with blunt edges, mostly charred wood appearance; L: 3, W:1.2, Max T: 0.1cm;	101-9756 to 101-9763
T5		5067	TIM	WOD										1	2		Indentation running down the middle, the shape itself is a semi-circular prism; L: 2.9, W:1.3, Max T: 0.5cm;	101-9764 to 101-9771
T5		5067	TIM	WOD										1	<1		Irregular quadrilateral wooden fragment, cut on one side, smooth on one edge apart from one, thinned and pointed; L: 4.1, W:1.6, Max T: 0.4cm;	101-9773 to 101-9791

T5		5070	TIM	charred WOD										1	19		Rectangular to square shaped wood block; charred; cut on 5 sides; 2 sides broken; little unburned core left; L: 4, W:3.7, Max T: 1.9cm;	100-8986 to 100-8987
T5		5070	TIM	charred WOD										5	41		Joiners; charred wood fragments with sand crust; possibly worked, with flat sides;	100-8986 to 100-8987
T5		5070	TIM	WOD										1	90		A triangular wood piece with a blunt side and a sharp tip; 1 side bulged the other flat; charred on 2 edges, cut marks on charred surface; possibly a stake point; L: 9.3, W:6.5, Max T: 4.6cm;	100-8988 to 100-8996
T5		5070	TIM	WOD										1	76		Long wood block / plank; with 3 surviving worked flat sides; both ends incomplete; a concave groove in the middle of a long side; L: 20.6, W:4, Max T: 1.4cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	227		Elongated and triangular wood block; with both blunt and tapering ends chopped; fell marks on body; with surviving tree bark; L: 11, W:8, Max T: 5.8cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	71		Rectangular elongated wood fragment, thinned towards one side, and splintered at both ends; L: 18.3, W:4, Max T: 1.3cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	15		Irregular triangular shaped, possibly one curved edge; L: 4.4, W:3, Max T: 1cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	9		Elongated irregular triangle, blackened on one end, one side has a ridge embedded in it; L: 9.5, W:1.1, Max T: 0.9cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	15		Irregular quadrilateral, remnants of a cut edge on both sides, slightly charred; L: 7.8, W:3, Max T: 4cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	10		Irregular elongated quadrilateral, thinned on one side, with cut ends; L: 6.9, W:2.2, Max T: 1cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	11		Irregular elongated quadrilateral, splintered on one end, cut on the other end; L: 9, W:2.2, Max T: 0.8cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	8		Cylindrical regular wooden stick that has been cut diagonally on one side, and charred black; L: 5.2, W:1.6, Max T: 1.4cm;	100-9049 to 100-9054

T5		5070	TIM	WOD										1	23		Irregular hexagon shape, forked end with one broken prong, minimal charring, possibly a wedge; L: 11.4, W:3.6, Max T: 0.7cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	2		Irregular wooden fragment, broken at both ends, and charred; L: 6, W:0.6, Max T: 0.4cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	1		Charred broken wooden piece, splintered at both ends; L: 3.8, W:0.9, Max T: 0.3cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	4		Irregular wooden chip, quadrilateral, severely splintered at one end and charred all over; L: 2.8, W:2.8, Max T: 0.7cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	1		Charred wooden chip, cut ends and wet consistency; L: 4.6, W:0.6, Max T: 0.7cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										1	1		Irregular quadrilateral, splintered end and a cut end; L: 3, W:1, Max T: 0.5cm;	100-9049 to 100-9054
T5		5070	TIM	WOD										6	5		Small charred wooden chips	100-9049 to 100-9054
T5		5070	TIM	WOD										1	232		Wooden block fragment; one polished edge; the other edge has a natural groove; signs of 2 small square slots still visible on one edge (each measure 0.8 x 0.5); L: 18.9, W:7.4, Max T: 3.8cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	16		Elongated piece of wood with sub-squared section and tapering end; sign of shaping; another end is missing; possibly used as a wooden nail; L: 13.9, W:1.3, Max T: 1.2cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	12		Flat piece of wood with curvy end; sign of burning around the curvy end; another end is missing; L: 7.2, W:3.4, Max T: 0.8cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	15		Elongated piece of wood; tip and one edge show signs of burning; 4 sides polished; possible wooden nail; L: 13, W:1.6, Max T: 1cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	8		Elongated piece of wood with one tapering end and opposite end with diagonal cut; sign of shaping; possible wooden nail; L: 11.2, W:1.5, Max T: 0.8cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	5		Small piece of rectangular-shaped wood; one end missing; the other end has a diagonal cut; one side shows sign of	100-9170 to 9177 and 100-9230 to 9256

																	burning; possible end section of a wooden nail; L: 4.7, W:1.7, Max T: 1cm;	
T5		5070	TIM	WOD										1	3		Small piece of elongated wood with tapering end; signs of shaping; diagonal cut at the other end; triangular sectioned; possible wooden nail; L: 6.8, W:1.3, Max T: 0.7cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	2		Small piece of elongated wood with tapering end; signs of shaping; diagonal cut at the other end; tip and one edge show signs of burning; possible wooden nail; L: 4.3, W:1, Max T: 0.5cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	3		Small piece of elongated wood with tapering end; opposite end with a diagonal cut; signs of burning at tip and along one edge; possible wooden nail; L: 4.9, W:1.2, Max T: 0.5cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	1		Small piece of elongated wood with one end missing; another end has a diagonal cut; one flat side; sign of burning; L: 3.7, W:1.4, Max T: 0.3cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	7		Rectangular shaped with a slightly tapering end, which shows sign of burning; triangular-sectioned; another end missing; possible nail; L: 5.2, W:1.9, Max T: 0.7cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	1		Small piece of elongated wood with tapering end; 2 flat facets; possible nail; L: 3.5, W:1, Max T: 0.5cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	9		Wedge-sectioned fragment with tapering end; opposite end with diagonal cut; signs of burning on both end; possible nail; L: 5.3, W:2.8, Max T: 1.5cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	10		Small chunk of charred wood; sub-rectangular sectioned; one polished edge; L: 4.4, W:2.7, Max T: 1.3cm;	100-9178 to 100-9180100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	1		Small end fragment of a possible nail; trapezoid-sectioned; tip shows sign of burning, another end missing; one polished edge; possible nail; L: 2.5, W:1, Max T: 0.8cm;	100-9170 to 9177 and 100-9230 to 9256

T5		5070	TIM	WOD										1	1		Small end fragment of a possible nail; shows sign of burning; another end missing; 2 polished facets; possible nail; L: 2.8, W:0.8, Max T: 0.8cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	2		Broken fragment of a flat wood; polished edge; L: 2.7, W:2.4, Max T: 0.5cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	1		Small charred fragment of a possible strap end'; sub-triangular sectioned; bottom side is flat and polished; 'hook' measures 1.5cm long with all sides polished; L: 2.6, W:2.4, Max T: 0.6cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	1		Small fragment with hook; possibly part of some sort of strap end? L: 3, W:1, Max T: 0.6cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	11		Triangular-shaped; irregular surface; possible signs of shaping; L: 4.5, W:3.5, Max T: 1.4cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	11		Irregular-shaped; partially covered with iron pan; small part of it shows sign of polishing; L: 3.5, W:2.5, Max T: 3cm;	100-9170 to 9177 and 100-9230 to 9256
T5		5070	TIM	WOD										1	15		Broken fragment of a rectangular block; square-sectioned; both ends missing; all side polished; a 0.5cm DIA perforated holes along one edge; L: 8.7, W:2, Max T: 1.4cm;	100-9193 to 100-9216 and 100-9257 to 100-9267
T5		5070	TIM	WOD										1	23		Fragment of a rectangular block; square sectioned; both ends and one facet missing; two 0.5cm DIA holes along one edge (only half-way perforated through the block)L: 8.6, W:2.8, Max T: 1.1cm;	100-9217 to 100-9228 and 100-9257 to 100-9267
T5		5070	TIM	WOD										1	9		Elongated fragment; signs of shaping; 4 polished facets; one end with diagonal cut; possible nail; L: 9.6, W:1.4, Max T: 0.6cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	8		Rectangular shaped; flat; one curvy end with signs of burning; another end missing; one polished flat edge; possible nail; L: 6, W:2.2, Max T: 0.6cm;	100-9181 to 100-9184

T5		5070	TIM	WOD										1	10		Elongated fragment with tapering end; another end missing; 3 facets; tip shows sign of burning; possible nail; L: 6.5, W:1.5, Max T: 1.4cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	1		Small end fragment of a possible nail; sign of shaping; sub-triangular sectioned; possible tip of a wooden nail; L: 3.4, W:0.8, Max T: 0.5cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	2		Small piece of flat wood; both ends missing; 2 flat facets; L: 4.5, W:1.5, Max T: 0.4cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	5		Elongated fragment with slightly tapering end; another end missing; 3 surviving polished facets; one side shows signs of burning; possible nail; L: 5.3, W:1.5, Max T: 0.6cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	3		Elongated fragment with tapering end; another end has diagonal cut; 3 flat facets; possible nail; L: 6.4, W:1.6, Max T: 0.4cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	3		Small square-sectioned fragment; 4 flat facets; in very poor condition; L: 2, W:1.6, Max T: 1.6cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	2		Small broken fragment with one end cut diagonally; 2 surviving facets; possible broken fragment of a nail? L: 3.7, W:1.4, Max T: 0.8cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	30		Elongated fragment; 3 partially survived flat facets; broken rectangular slot on one edge (5.4 x 0.7)L: 13.8, W:3, Max T: 2cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	48		Triangular-sectioned fragment with two tilting and tapering ends; sings of shaping; one facet shows sign of burning; L: 13.5, W:3, Max T: 3cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	29		Elongated fragment with tapering end; another end missing; tip with partially shows signs of burning; possible nail; L: 14.5, W:3.7, Max T: 2.2cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	74		Elongated block with sub-square section; 4 facets; a 0.5cm DIA hole on one facet (opposite side with attached rust); hole possibly for nail; L: 14.4, W:3.6, Max T: 2.5cm;	100-9181 to 100-9184

T5		5070	TIM	WOD										1	19		Elongated fragment with tapering end; another end has a diagonal cut; 3 flat facets; broken rectangular slot (1.2 x 0.6) along the broken edge; L: 13.2, W:2.7, Max T: 0.8cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	1		Small fragment; sub-square shaped; one flat facet; poor condition; L: 2.2, W:1.8, Max T: 0.4cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	11		Broken fragment; triangular sectioned; 3 facets; L: 8.3, W:2.4, Max T: 1.8cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	5		Elongated fragment; tapering end; another end missing; 4 facets; possible nail; L: 6.3, W:1.6, Max T: 0.4cm;	100-9181 to 100-9184
T5		5070	TIM	WOD										1	125		Elongated block with sub-square section; 7cm of one end is narrower (1.8 x 3.5), tip missing, 2 surviving flat facets; the thicker end has 3 flat surfaces, including the flat end; a 2.2 x 2.1 rectangular perforation in the middle of the block; L: 15.5, W:4.4, Max T: 4cm;	100-9185 to 100-9192 and 100-9181 to 100-9184

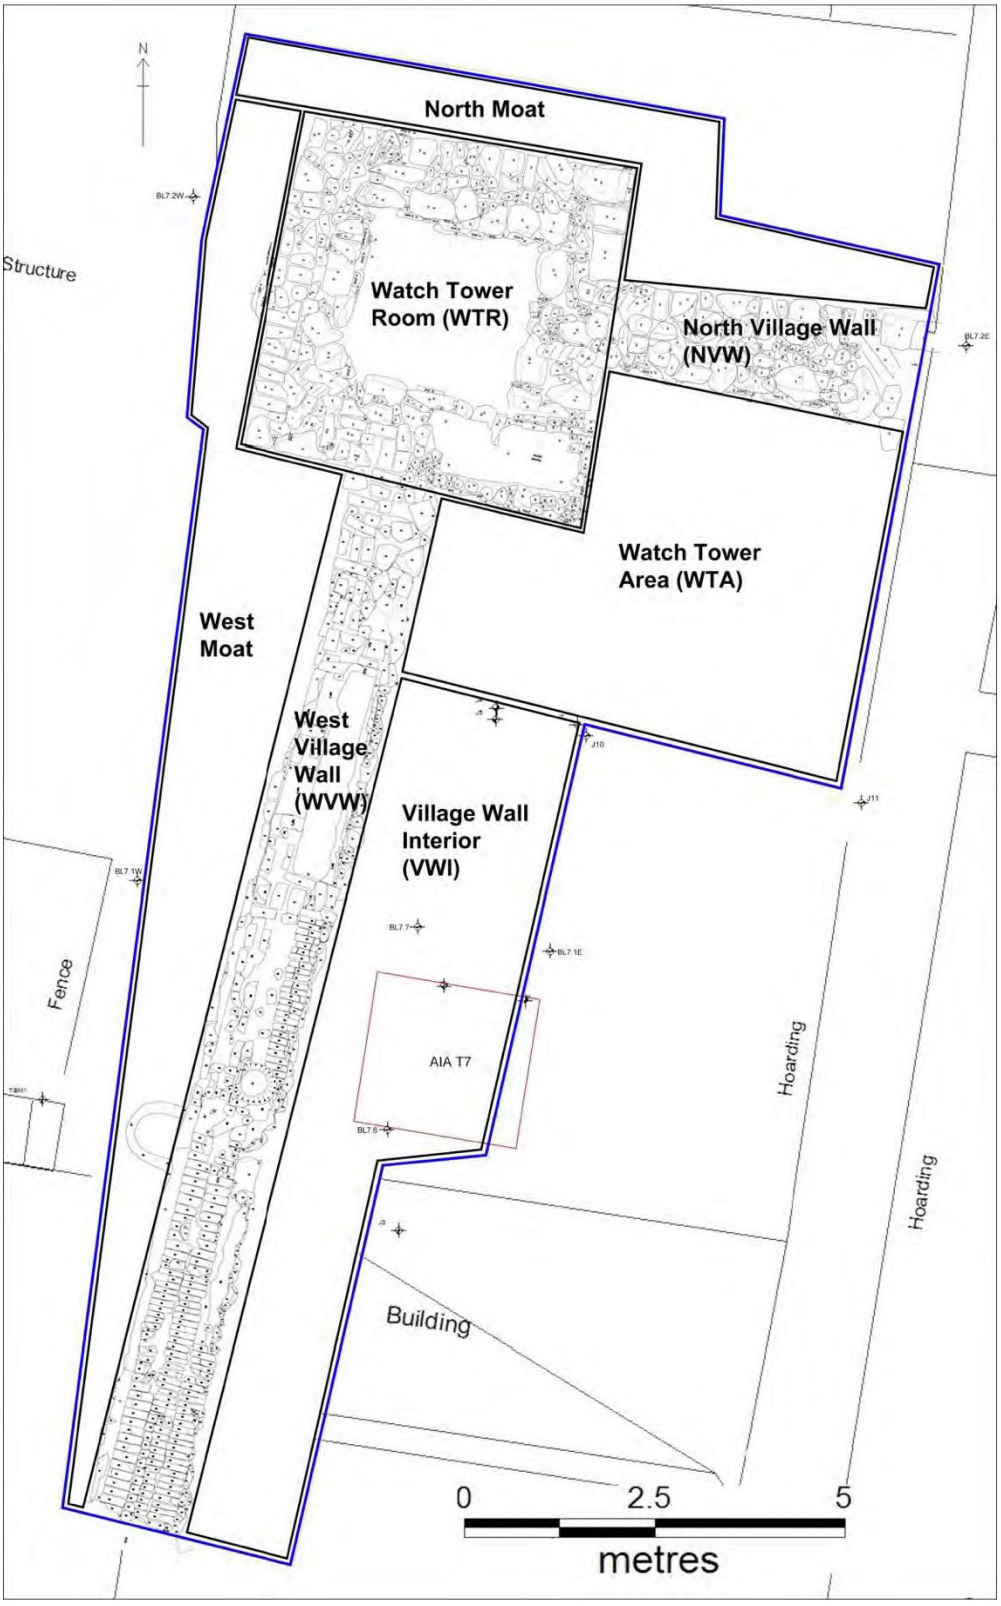
Trench 7 data



T7.A Context descriptions

7001: Topsoil and fill on surface of western moat area.

7002: Concrete floor and walls within western moat area.

7003: Drain and floor within moat area.

7004: Blue brick wall on top of stone western village wall.

7005: Floor and leveller within the interior of the village at southern end of trench excavations.

7006: Concrete floor under [7002] in western moat area at same level as [7003].

7007: Strong brown (7.5YR5/8) CLAY gravelly, slightly sandy fill under drain along western village wall inside the moat area.

7008: Dark yellowish brown (10YR4/6) very gravelly CLAY fill under a concrete floor along western village wall inside the moat area.

7009: Dark yellowish brown (10YR 3/4) very gravelly SILT fill with roots which is located at the top of moat area.

7010: Yellowish brown (10YR5/8) gravelly CLAY fill which represents the top of the moat at the north end of the western moat.

7011: Very dark brown (10YR2/2) SILT topsoil fill inside the watch tower area (WTA).

7012: Village ware pot within moat. The pot has bricks around the top with a dark yellowish brown (10YR4/4) clayey GRAVEL fill.

7013: Stone house, threshold and walls which are located within the moat and the interior village. The trench excavated in 2016 AIA phase is located within this structure.

7014: Stone structure located in moat. Its function is unknown, stone walls sit on concrete base.

7015: Dark yellowish brown (10YR3/4) slightly silty and sandy CLAY fill above hard floor with finds in WTA.

7016: Tiled floor, concrete, and pink leveller of house located north of the 2016 AIA phase excavated trench.

7017: Trench along western village wall in [7015] which is filled by a dark yellowish brown (10YR 4/4) gravelly CLAY.

7018: Series of black and red floors in the WTA and VWI.

7019: Mixed fills and multiple upper modern disturbed floors layers in WTA.

7020: Hard surface with pressed finds on surface which consists of dark yellowish brown (10YR 4/6) gravelly and sandy CLAY below 7018 in VWI. Similar to floor [7109] in WTA.

7021: Possible post hole or small pit with stone within [7020] and filled by black (10YR 2/1) slightly gravelly and clayey SILT.

7022: Very dark greyish brown (10YR 3/2) slightly clayey SILT under floor levels of [7019] in WTA.

7023: Strong brown (7.5YR 5/6) very gravelly and sandy CLAY under [7022] and situated at base of stone house walls in VWI.

7024: Very dark brown (10YR 2/2) SILT topsoil.

7025: Strong brown (7.5YR 5/6) very sandy CLAY situated above [7042].

7026: Village ware pots (a and b; one on top of other) located adjacent to [7012] in moat.

7027: Dark yellowish brown (10YR 4/6) slightly gravelly and sandy CLAY fill below [7009/7010] within the moat.

7028: Dark yellowish brown (10YR 4/6) very gravelly and slightly sandy CLAY fill just below modern stone walls of the WTR.

7029: Modern granite cut block wall on top and at the northern end of western village wall connecting to the WTR.

7030: Broken mortar floor along western village wall which consisted of yellowish brown (10YR 5/4) very clayey GRAVEL.

7031: Third spit in western moat consisting of dark yellowish brown (10YR 4/6) gravelly and sandy CLAY. The layer is similar to [7027].

7032: Concrete drain with brick support recorded in moat to the west of the watch tower room.

7033: Dark greyish brown (2.5Y 4/2) slightly clayey, gravelly SILT fill within room 1 inside the WTR.

7034: Dark yellowish brown (10YR 4/4) clayey GRAVEL fill below the concrete drain [7032].

7035: Very dark grey (2.5Y 3/1) very slightly clayey, very gravelly SILT fill around and below layer of stones inside WTR [7037].

7036: Dark greyish brown (10YR 4/3) slightly gravelly and silty CLAY fill around and below layer of stones inside WTR [7038].

7037: Stone floor in WTR. Stones are drawn with [7029].

7038: Further stones in WTR situated below [7037], can be interpreted as floor or stones in leveller for [7037].

7039/7059/7060: Dark greyish brown (10YR 4/2) slightly gravelly and silty, sandy CLAY and dark greyish brown (10YR 4/2) very slightly sandy CLAY. Black fill at bottom of excavation of the moat. [7039] is below [7034], but same as context [7059/7060].

7040: Pit in south corner of village interior area immediately north of the 2016 AIA trench; equivalent to [714] identified in AIA excavation. Pit has a dark brown (10YR 3/3) gravelly and sandy CLAY fill.

7040a: cut for [7040]; equivalent to [714a] identified in the AIA excavation.

7041: Stone wall, its trench cut and fill which consisted of strong brown (7.5 YR 5/8) slightly gravelly CLAY. Recorded within the interior village north of 2016 AIA trench.

7042: Trench cut for decommissioned wall previously recorded in 2016 AIA trench. Fill of trench was a dark yellowish brown (10YR 4/4) sandy/gravelly, slightly silty clay.

7043: Yellowish red (5YR 5/6) very slightly sandy CLAY; below [7042] in VWI; cut by various potential stake holes; equivalent to 7066.

7044: Trench cut and brown (7.5YR 4/4) slightly gravelly CLAY fill recorded in VWI.

7045: Brown (10YR 5/3) slightly gravelly, sandy CLAY fill in north moat.

7046: Dark yellowish brown (10YR 4/6) sandy, slightly gravelly CLAY fill in north moat.

7047: Dark yellowish brown (10YR 4/4) slightly gravelly CLAY fill recorded at the southwest end of western moat.

7048: Dark greyish brown (10YR 4/2) very slightly sandy, slightly gravelly CLAY fill in north moat.

7049: Greyish brown (2.5 Y 5/2) very slightly sandy CLAY fill at the south end of western moat.

7050: Post hole in [7043] with brown (7.5YR 4/4) slightly gravelly, very slightly sandy CLAY fill.

7051: Post hole in [7043] with brown (7.5 YR 5/4) slightly gravelly CLAY fill.

7052: Post hole in [7043] with brown (7.5YR 5/4) slightly sandy, very slightly gravelly CLAY fill.

7053: Post hole in [7043] with brown (7.5YR 5/4) slightly gravelly CLAY fill.

7054: Cancelled

7055: Post hole overall depth of 11cm with three fills: 0-2cm 7055b: very firm yellowish brown (10YR 6/4) gravelly SAND; 2-7cm 7055c: firm dark brown (10YR 3/3) very slightly gravely, very sandy CLAY; +7cm 7055d: firm brown (7.5YR 5/4) sandy CLAY interior village wall area north of 2016 AIA trench; cut into [7025].

7056: Ditch feature in VWI. 7056a: Cut for ditch in VWI; filled by [7056b to f].

7056b: Lens of brownish yellow (10YR 6/8) Slightly gravelly SAND over ditch [7058] in interior village wall area north of 2016 AIA trench.

7056c: Reddish brown (7.5YR 6/6) gravelly SAND lens of sand in ditch interior village wall area north of 2016 AIA trench

7056d: Strong brown (7.5YR 5/8) gravelly SAND lens of sand in ditch interior village wall area north of 2016 AIA trench.

7056e: Light yellowish brown (10YR 6/6) slightly gravelly SAND lens of sand in ditch interior village wall area north of 2016 AIA trench.

7055f: Yellowish brown (10YR 5/8) very slightly clayey SAND lens of sand in ditch interior village wall area north of 2016 AIA trench.

7057: Post hole with brown (7.5YR 5/4) slightly gravelly and sandy CLAY fill recorded in interior village wall area north of 2016 AIA trench.

7058: Ditch feature in interior village wall area north of 2016 AIA trench with yellowish brown (10YR 5/6) very sandy, slightly gravelly CLAY fill. 7058a: cut for [7058].

7059/7060: See [7039] above.

7061: Grey (5Y5/1) sandy and gravely, slightly silty CLAY fill in and around leveller with stones [7038] inside WTR.

7062: Yellowish brown (10YR 5/8) sandy CLAY fill recorded inside the structure in the moat.

7063: Dark yellowish brown (10YR 4/6) sandy GRAVEL recorded inside the northern house in interior village wall (VWI).

7064: Olive brown (2.5Y4/3) sandy CLAY which appears as a mottled grey orange under [7061].

7065: Yellowish brown (10YR 5/6) sandy CLAY which is recorded over [7223/7042] in VWI.

7066: Identified below [7065], same as [7043].

7067: Brownish yellow (10YR 6/) gravelly, sandy CLAY. The orange hard layer was excavated under [7064] inside WTR.

7068: Dark greyish brown (10YR 4/2) very silty CLAY layer in north house in interior village wall.

7069: Hard black floors with red and yellow fills gravelly CLAY recorded in south house in interior village wall.

7070: Stone floor with dark yellowish brown (10YR 4/4) very slightly gravelly CLAY fill recorded in south house in interior village wall.

7071: Yellowish brown (10YR 5/6) clayey and sandy GRAVEL recorded in both north and south houses in interior village wall.

7072: Brownish yellow (10YR 6/6) gravelly CLAY with finds, which appeared as mottled orange in the WTA.

7073: Very dark brown (10YR 2/2) thin slightly gravelly, silty CLAY layer in WTA.

7074: Dark yellowish brown (10YR 3/4) gravelly CLAY with finds recorded at the level of the wall brick mortar in WTA.

7075: Brown (10YR 4/3) slightly gravelly, sandy CLAY fill recorded in trench along WVW in WTA. Context above [7097].

7076: Dark yellowish brown (10YR 4/6) slightly clayey and sandy GRAVEL fill recorded within modern walls on top of western village wall.

7077: Brownish yellow (10YR 6/6) very slightly gravelly, sandy CLAY fill in trench [7079].

7078: Brownish yellow (10YR 6/6) clayey SAND fill in trench [7079].

7079: Trench feature recorded in WTA parallel to western village wall and truncates [7072].

7080: Dark grey (2.5 Y 4/1) sandy and gravelly CLAY fill with plastic identified in southwest corner of WTR.

7081: Greyish brown (2.5Y 5/2) slightly sandy, gravelly CLAY recorded along north below [7067] within the WTR.

7082: Brownish yellow (10YR 6/) very slightly gravelly, clayey SAND with finds recorded in WTR.

7083: Yellowish brown (10YR 5/8) very slightly sandy CLAY; stake hole cutting into [7043]; within the interior village wall. [7083a]: cut for [7083].

7084: Yellowish brown (7.5YR 5/8) silty/sandy/gravelly CLAY; equivalent to [727] identified in the AIA excavation above [734]. [7084a]: cut for sub-rectangular feature located next to the village wall in VWI; filled by [7084] (727) and cut into [736a].

7085: Brown (10YR 5/3) slightly sandy, very slightly gravelly, CLAY fill in north moat.

7086: Brown (7.5YR 4/4) slightly sandy CLAY; stake hole cutting into [7043] in VWI. [7086a]: cut for [7086].

7087: Brown (7.5YR 4/4) very sandy CLAY; stake hole cutting into [7043]; within the south house in interior village wall. [7087a]: cut for [7087].

7088: Yellowish brown (10YR 5/6) slightly gravelly SAND; stake hole cutting into [7043]; within the south house in interior village wall. [7088a]: cut for [7088].

7089: Yellowish brown (10YR 5/4) gravelly SAND; stake hole cutting into [7043]; within the south house in interior village wall. [7089a]: cut for [7089].

7090: Strong brown (7.5Y5/6) very slightly sandy CLAY; stake hole cutting into [7043]; within the south house in interior village wall. [7090a]: cut for [7090].

7091: Cancelled

7092: Brown (7.5YR 5/4) very slightly sandy CLAY; stake hole cutting into [7043]; within the south house in interior village wall. 7092a: cut for [7092].

7093: Sterile strong brown (7.5YR 5/6) slightly gravelly CLAY.

7094: cancelled

7095: Strong brown (7.5YR 5/6) very sandy CLAY with patches mixed brown (7.5 YR 5/4) very slightly sandy CLAY. It can be considered the same as [7105].

7096: Post hole with dark yellowish brown (10YR 4/6) very slightly gravelly CLAY fill located within the VWI.

7097: Dark greyish brown (10YR 4/2) very clayey and sandy GRAVEL along interior of western village wall below [7075].

7098: Red (10YR 5/8) gravelly SAND leveller recorded in VWI.

7099: Post hole and brown (7.5YR 5/4) very slightly sandy CLAY fill recorded in VWI. 7099a: cut for [7099].

7100: Two-tiered leveller, with a top of reddish yellow (7.5YR 6/6) gravelly, sandy CLAY and bottom of brown (7.5YR 5/4) very slightly sandy, slightly gravelly CLAY recorded in VWI.

7101: Dark yellowish brown (10YR 4/6) very sandy CLAY recorded in VWI. 7101a: cut for [7101].

7102: Yellowish brown (10YR 5/6) sandy CLAY recorded in VWI. 7102a: cut for [7102].

7103: modern stone foundation wall in VWI. 7103a: Trench cut for stone wall in VWI.

7103b: Light reddish brown (5YR 6/4) very slightly clayey, very sandy GRAVEL fill recorded on west facing section in VWI.

7103c: Brown (7.5YR 5/4) gravelly SAND; fill for concrete and stone foundation [7103/7103a] in VWI.

7104: Strong brown (7.5YR 5/6) very gravelly SAND recorded in VWI.

7105: Strong brown (7.5 YR 5/8) slightly sandy/clayey, silty gravel; above [7222] in VWI; equivalent to [736a = 736] identified in the AIA excavation.

7106: Modern stone house wall between WTA and VWI.

7107: Post hole which truncates [7079].

7108: A series of modern layers recorded on top of [7072] in WTA, including yellowish red (5YR 4/6) very slightly gravelly, silty CLAY, very dark grey (10YR 3/1) very slightly gravelly, silty CLAY and dark yellowish brown (10YR 4/6) very slightly sandy CLAY.

7109: Brownish yellow (10YR 6/8) very sandy CLAY floor in WTA.

7110: Stake hole with very dark grey (10YR 3/1) silty, slightly sandy fill in [7109] recorded in the WTA.

7111: Stake hole and very dark greyish brown (10YR 3/2) sandy CLAY fill in [7109] recorded in the WTA.

7112: Stake hole and dark brown (10YR 3/3) slightly gravelly CLAY fill in [7109] recorded in the WTA.

7113: Stake hole and very dark brown (10YR 2/2) sandy CLAY fill in [7109] recorded in the WTA.

7114: Dark yellowish brown (10YR 6/4) gravelly SAND layer under [7109] within WTA.

7115: Very dark greyish brown (10YR 3/2) fill located under [7109] within WTA.

7116: Stone floor inside houses in WTA.

7117: East house wall in WTA.

7118: North house wall in WTA.

7119: Northern village wall.

7120: Dark yellowish brown (10YR 4/6) silty, gravelly CLAY fill recorded in north house above and around the stone floor [7116].

7121: Very dark greyish brown (2.5Y 3/2) slightly gravelly, clayey SILT fill recorded in north house above and around the stone floor [7122].

7122: Stone floor or leveller under [7116] in WTA.

7123: Ditch recorded in WTA and which connected to ditch [7058] in VWI.

7124: Post hole and dark yellowish brown (10YR 4/4) slightly gravelly CLAY fill recorded under stone house wall in WTA.

7125: Large post hole with black (10YR 2/1) sandy and silty CLAY fill recorded in WTA.

7126: Pit and yellowish brown (10YR 5/4) slightly sandy and gravelly CLAY fill recorded in the southwest corner of WTA.

7127: Pit and yellowish red (5YR 3/8) clayey GRAVEL fill recorded in the south of WTA.

7128: Post hole and dark yellowish brown (10YR 4/6) gravelly CLAY fill in WTA.

7129: Post hole and dark yellowish brown (10YR 4/4) CLAY/SAND fill in WTA.

7130: Post hole and yellowish brown (10YR 5/6) gravelly, sandy CLAY fill in WTA.

7131: Cancelled.

7132: Yellowish brown (10YR 5/6) gravelly, clayey SAND fill over ditch [7123] in WTA and 7132a] which has same fill within a pit truncating [7132] so assumed contemporaneous.

7133: Yellowish brown (10YR 5/4) sandy CLAY recorded under [7118] in WTA.

7134: Very pale brown (10YR 7/4) slightly gravelly and clayey SAND with occasional cobble ditch fill in WTA.

7135: Post hole and dark yellowish brown (10YR 4/6) sandy CLAY fill, located under [7118/7133] in WTA.

7136: Post hole and dark yellowish brown (10YR 4/4) gravelly and sandy CLAY fill, located under [7118/7133] within south of WTA.

7137: Post hole and dark yellowish brown (10YR 4/4) gravelly and sandy CLAY fill, located under [7118/7133] within west of WTA.

7138: Post hole and dark yellowish brown (10YR 4/6) very slightly sandy and gravelly CLAY fill, located under [7118/7133] within centre of WTA.

7139: Post hole and dark yellowish brown (10YR 4/6) slightly sandy, gravelly CLAY fill, located under [7118/7133] within east of WTA.

7140: Post hole and yellowish brown (10YR 5/8) gravelly CLAY fill in WTA.

7141: Post hole and dark yellowish brown (10YR 4/6) sandy CLAY fill recorded within WTA.

7142: Posthole with two fills: 0-7cm: Dark yellowish brown (10YR 4/6) very slightly gravelly CLAY and +7cm: yellowish brown (10YR 5/4) slightly gravelly SAND/CLAY fill recorded within WTA.

7143: Posthole with two fills: 0-5cm: yellowish brown (10YR 5/8) gravelly CLAY and +5cm: yellowish brown (10YR 5/3) very slightly gravelly sandy, CLAY recorded within WTA.

7144: Post hole and olive brown (2.5YR 4/3) very slightly gravelly, sandy CLAY fill recorded within WTA.

7145: Post hole and yellowish brown (10YR 5/4) slightly gravelly CLAY fill recorded within WTA.

7146: Post hole and dark yellowish brown (10YR 4/6) slightly gravelly, sandy CLAY fill recorded within WTA.

7147: Post hole and dark yellowish brown (10YR 4/6) very slightly gravelly, sandy CLAY fill recorded within WTA.

7148: Post hole and light olive brown (2.5Y 5/3) slightly sandy and gravely CLAY fill recorded within WTA.

7149: Post hole and brown (10YR 5/3) slightly gravelly SAND fill recorded within WTA.

7150: Post hole and dark grey (10YR 4/1) slightly sandy, gravelly CLAY fill recorded within WTA.

7151: Post hole and greyish brown (10YR 5/2) very gravelly, sandy CLAY fill recorded within WTA.

7152: Post hole and greyish brown (2.5Y 5/2) slightly sandy CLAY fill recorded within WTA.

7153: Post hole and light olive brown (2.5Y 5/3) sandy, gravelly CLAY fill recorded within WTA.

7154: Post hole and two fills: 0-9cm: dark greyish brown (2.5Y 4/2) very slightly gravelly, sandy CLAY and 9 to 23cm: dark greyish brown (10YR 4/2) sandy CLAY recorded within WTA.

7155: Olive brown (2.5Y 4/4) GRAVEL/SAND fill below [7122].

7156: Post hole with two fills: 0-3cm: Light olive brown (2.5YR 5/4) clayey SAND and +3cm: light yellowish brown (10YR 6/4) very slightly gravelly, slightly clayey SAND.

7157: Light yellowish brown (10YR 6/4) very slightly clayey SAND/GRAVEL under [7122].

7158: Cut with two toned fill, including yellowish brown (10YR 5/6) very clayey SAND and dark greyish brown (10YR 4/2) clay bands in northeast corner of WTR.

7159: Greyish brown (10YR 5/2) clayey and gravelly SAND situated below gravel [7157 and 7122] bottom.

7160: Post hole with dark yellowish brown (10YR 4/4) slightly clayey, sandy GRAVEL fill in [7072].

7161: Post hole with dark yellowish brown (10YR 4/4) very slightly gravelly, sandy CLAY in [7072].

7162: Ditch with similar fill on the north and south sides of ditch [7126N/S].

7162N: Light olive brown (2.5Y 5/3) slightly clayey SAND ditch fill.

7162S: Light olive brown (2.5Y 5/4) slightly clayey SAND ditch fill.

7163: Cancelled.

7164: Post hole and yellowish brown (10YR 5/6) sandy CLAY fill which cut into [7134].

7165: Stake hole with very pale brown (10YR 7/4) very slightly clayey SAND fill which cuts into [7134].

7166: Brownish yellow (10YR 6/8) very slightly gravelly and clayey SAND fill in ditch.

7167: Hard floor of yellowish brown (10YR 5/8) very slightly gravelly, sandy CLAY fill with finds in north house in WTA.

7168: Grey (2.5Y 5/1) slightly gravelly, sandy CLAY layer/patch recorded within [7167].

7169: Greyish brown (10YR 5/2) sandy, slightly silty CLAY within [7167].

7170: Dark olive brown (2.5 Y 3/3) slightly gravelly, sandy CLAY/SILT fill recorded along the northern village wall. Fill layer included plastic.

7171: Post hole and yellowish brown (10YR 5/8) slightly sandy CLAY fill in [7074].

7172: Post hole and yellowish brown (10YR 5/4) sandy, gravelly CLAY fill in [7074].

7173: Post hole and yellowish brown (10YR 5/6) very clayey, slightly gravelly SAND fill in [7074].

7174: Post hole and strong brown (7.5YR 5/8) slightly gravelly, sandy CLAY fill in [7074].

7175: Post hole and yellowish brown (10YR 5/8) slightly gravelly, sandy CLAY fill in [7074].

7176: Post hole and strong brown (7.5YR 5/8) slightly sandy and gravelly CLAY fill in [7074].

7177: Post hole and brown (10YR 5/3) slightly gravelly and sandy CLAY fill in [7074].

7178: Post hole and dark yellowish brown (10YR 4/6) sandy CLAY fill in [7074].

7179: Post hole and yellowish brown (10YR 5/8) slightly gravelly CLAY fill in [7074].

7180: Post hole and Dark yellowish brown (10YR 4/6) gravelly CLAY fill in [7074].

7181: Post hole and Yellowish brown (10YR 5/8) slightly sandy and gravelly CLAY fill in [7074].

7182: Post hole and Strong brown (7.5YR 5/6) very slightly sandy, gravelly CLAY fill in [7074].

7183: Post hole and Brownish yellow (10YR 5/8) sandy CLAY fill in [7074].

7184: Post hole and Brown (10YR 5/3) slightly gravelly, sandy CLAY fill in [7074].

7185: Post hole and strong brown (7.5YR 5/6) very slightly gravelly, slightly sandy CLAY fill in [7074].

7186: Post hole and yellowish brown (10YR 5/6) slightly gravelly, clayey SAND fill in [7074].

7187: Post hole and strong brown (7.5YR 5/6) slightly gravelly CLAY fill in [7074].

7188: Cancelled.

7189: Post hole with yellowish brown (10YR 5/8) sandy CLAY fill in [7074].

7190: Post hole with dark yellowish brown (10YR 4/6) gravelly CLAY fill in [7074].

7191: Light brownish grey (2.5Y 6/2) SAND along the wall in WTR.

7192: Yellowish brown (10YR 5/4) sandy and gravelly CLAY along the western village wall.

7193: Post hole with dark yellowish brown (10YR 3/6) sandy and gravelly CLAY in [7074].

7194: Post hole with brownish yellow (10YR 6/8) slightly gravelly, sandy CLAY in [7074].

7195: Very dark greyish brown (10YR 3/2) slightly gravelly, silty CLAY fill in trench along northern village wall.

7196: Yellowish brown (10YR 5/6) slightly sandy, gravelly CLAY along western village wall. This was recorded as [727] in 2016 AIA phase.

7197: Light brownish grey (10YR 6/2) very sandy CLAY along western village wall. This was recorded as [734] in 2016 AIA phase.

7198: Very pale brown (10YR 7/4) SAND along the western village wall. Same as [7221].

7199: Yellowish brown (10YR 5/4) very gravelly CLAY fill of [7200] in the moat.

7200: Drain feature in moat feature.

7201: Stake hole with yellowish brown (10YR 5/6-5/8) slightly gravelly CLAY fill (H1) cutting into [7074].

7202: Stake hole with brownish yellow (10YR 6/8) very slightly gravelly CLAY fill (H2) cutting into [7074].

7203: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H3) cutting into [7074].

7204: Stake hole with brownish yellowish (10YR 6/6) very slightly gravelly and sandy CLAY fill (H5) cutting into [7074].

7205: Stake hole with brownish yellow (10YR 6/6) slightly gravelly, sandy CLAY fill (H6) cutting into [7074].

7206: Stake hole with light yellowish brown (10YR 6/4) slightly sandy CLAY fill (H8) cutting into [7074].

7207: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H9) cutting into [7074].

7208: Stake hole with yellowish brown (10YR 5/6) very slightly gravelly CLAY fill (H10) cutting into [7074].

7209: Stake hole with light yellowish brown (10YR 6/4) very slightly sandy CLAY fill (H11) cutting into [7074].

7210: Stake hole with yellowish brown (10YR 5/6) slightly gravelly CLAY fill (H12) cutting into [7074].

7211: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H13) cutting into [7074].

7212: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H14) cutting into [7074].

7213: Stake hole with brownish yellow (10YR 6/6) very slightly gravelly CLAY fill (H15) cutting into [7074].

7214: Stake hole with yellowish brown (10YR 5/6) slightly sandy CLAY fill (H17) cutting into [7074].

7215: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H18) cutting into [7074].

7216: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H19) cutting into [7074].

7217: Stake hole with yellowish brown (10YR 5/6) slightly sandy and gravelly CLAY fill (H20) cutting into [7074].

7218: Western village wall.

7219: Northern village wall; same as context [7119].

7220: Very pale brown (10YR 7/4) SAND in interior north west corner of northern village wall and WTR corner.

7221: Pale brown (10YR 6/3) gravelly SAND along western village wall. Same as [7198].

7222: Grey CLAY at end of excavation along west facing section of the VWI.

7223-1: Stake hole within/below [7222] with following fills: 0-21cm: light grey (10YR 7/2) slightly sandy CLAY, 21-35cm: dark grey (2.5Y 4/1) slightly sandy CLAY wet and organic, 35-42cm: grey (2.5Y 6/1) sandy and gravelly CLAY.

7223-2: Stake hole within/below [7222] with (0-8cm) very dark grey (GLEY1 3/N) very slightly sandy CLAY fill.

7223-3: Stake hole within/below [7222] with (0-7cm) black GLEY1 25/N silty, clayey CLAY fill.

7223-4: Stake hole within/below [7222] with (0-18cm) light brownish grey 2.5Y 6/2 very slightly gravelly CLAY fill.

7223-5: Stake hole within/below [7222] with (0-20cm) light brownish grey 2.5Y 6/2 very slightly sandy CLAY fill.

7223-6: Stake hole within/below [7222] with (0-26cm) light brownish grey (2.5Y 6/2) very slightly sandy CLAY fill.

7223-7: Stake hole within/below [7222] with following fills: 0-29cm: light brownish grey (2.5Y 6/2) sandy and gravelly CLAY and 29-31cm: very dark grey (GLEY1 3/N) sandy, clayey GRAVEL.

7223-8: Stake hole within/below [7222] with very dark grey (GLEY1 3/N) GRAVEL fill.

7223-9: Stake hole within/below [7222] with very dark grey (GLEY1 3/N) GRAVEL fill.

7223-10: Stake hole within/below [7222] with grey (2.5Y 6/1) sandy, gravelly CLAY fill.

7223-11: Stake hole within/below [7222] with light brownish grey (2.5Y 6/2) sandy, gravelly CLAY fill.

7223-12: Stake hole within/below [7222] with light yellowish brown (2.5 Y 6/3) slightly sandy CLAY fill.

7223-13: Stake hole within/below [7222] with (0-25cm) light brownish grey (10YR 6/2) very slightly gravelly, sandy CLAY fill.

7223-14: Stake hole within/below [7222] with (0-25cm) light brownish grey (2.5Y 6/2) very sandy CLAY fill.

7223-15: Stake hole within/below [7222] with (0-13cm) light brownish grey (2.5Y 6/2) sandy, clayey GRAVEL fill.

7223-16: Stake hole within/below [7222] with (0-29cm) yellowish brown (10YR 5/6) sandy gravelly CLAY fill.

7223-17: Stake hole within/below [7222] with (0-21cm) light yellowish brown (2.5Y 6/3) sandy CLAY fill.

7223-18: Stake hole within/below [7222] with (0-21cm) light yellowish brown (2.5Y 6/3) sandy CLAY fill.

7224: Small pit cuts into [7225] in VWI; brownish yellow (10YR 6/6) slightly gravelly and slightly sandy SILT. 7224a: cut for [7224].

7225: Small pit cuts into [7041/7043] in VWI; yellowish brown (10YR 5/8) slightly gravelly and slightly sandy SILT. 7225a: cut for [7225].

7226: Light brownish grey (2.5 Y 5/2) slightly sandy silt; leveller cut by [7040] in VWI.

7227: Stake hole in southeast corner of WTR truncates [7237]. Post hole has light brownish grey (2.5Y 6/2) SAND fill.

7228: Stake hole in southeast corner of WTR truncates [7237]. Post hole has very dark grey (2.5Y 3/1) SAND fill.

7229: Stake hole in southeast corner of WTR truncates [7237]. Post hole has dark grey (2.5Y 5/1) SAND fill.

7230: Stake hole in southeast corner of WTR truncates [7237]. Post hole has inner and outer fills of inner fill: light brownish grey (2.5Y 6/2) SAND and outer fill: grey (2.5Y 5/1) SAND fill.

7231: Stake hole in southeast corner of WTR truncates [7237]. Post hole has grey (2.5Y 6/1) SAND fill.

7232: Stake hole in southeast corner of WTR truncates [7237]. Post hole has pale yellow (2.5Y 7/3) SAND fill.

7233: Stake hole in southeast corner of WTR truncates [7237]. Post hole has light brownish grey (2.5Y 6/2) SAND fill.

7234: Stake hole in southeast corner of WTR truncates [7237]. Post hole has grey (2.5Y 5/1) SAND fill.

7235: Stake hole in southeast corner of WTR truncates [7237]. Post hole has light brownish grey (2.5Y 6/2) SAND fill.

7236: Stake hole in southeast corner of WTR truncates [7237]. Post hole has Grey 2.5Y 5/1 SAND fill.

7237: Light yellowish brown (10YR 6/4) SAND fill cut by [7227] to [7236] inside the WTR.

7238: Very pale brown (10YR 7/3) SAND fill recorded below [7028] first identified at north west corner of WTR.

7239: Pale yellow (2.5Y 7/3) SAND fill recorded below [7238]. It is a possible transitional layer between 7238/7240 and contained no finds.

7240: Light brownish grey (2.5Y 5/2) SAND with patches of yellowish brown (10YR 5/6) SAND below [7239] contains frequent findings.

7241: Greyish brown (2.5Y 5/2) slightly clayey SAND, below [7240] within WTR with exception of southeast corner.

7242: Dark grey (2.5 Y 4/1) very slightly sandy CLAY located below [7241].

7243: Light yellowish brown (2.5Y 6/3) SAND, appears the same as [7237] and is located below [7242] and [7237].

7244: Stake hole with brownish yellow (10YR 6/6) very slightly sandy CLAY fill (H21) cutting into [7074] in WTA.

7245 (SH6): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7245a: cut for [7245].

7246 (SH7): Strong brown (7.5 YR 4/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7246a: cut for [7246].

7247 (SH8): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7247a: cut for [7247].

7248 (SH9): Brown (7.5 YR 5/4) clayey SAND; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7248a: cut for [7248].

7249 (SH10): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7249a: cut for [7249].

7250 (SH11): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7250a: cut for [7250].

7251 (SH12): Strong brown (7.5 YR 5/8) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7251a: cut for [7251].

7252 (SH13): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7252a: cut for [725]2.

7253 (SH14): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7253a: cut for [7253].

7254 (SH15): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7254a: cut for [7254].

7255 (SH16): Strong brown (7.5 YR 5/8) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7255a: cut for [7255].

7256 (SH17): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7256a: cut for [7256].

7257 (SH18): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7257a: cut for [7257].

7258 (SH19): Strong brown (7.5 YR 5/8) very slightly sandy CLAY; fill of inner circle of stake hole (cut 7258a) identified on top of [co.7043/7093] in the northern part of VWI. 7258a: cut for stake hole, filled by 7258 and 7258b.

7258b: Strong brown (7.5 YR 5/6) very slightly sandy CLAY; fill of outer circle of stake hole (cut 7258a) identified on top of [co.7043/7093] in the northern part of VWI.

7259 (SH20): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7259a: cut for [7259].

7260 (SH21): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7260a: cut for [7260].

7261 (SH22): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7261a: cut for [7261].

7262 (SH23): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7262a: cut for [7262].

7263 (SH24): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; upper fill of stake hole (cut 7263a) identified on top of [co.7043/7093] in the northern part of VWI. 7263a: cut for [7263].

7263b: Brown (7.5 YR 5/4) slightly sandy CLAY, slightly burnt; middle fill of stake hole [7263a] identified on top of [co.7043/7093] in the northern part of VWI.

7263c: Strong brown (7.5 YR 5/6) clayey silt; lower fill of stake hole [7263a] identified on top of [co.7043/7093] in the northern part of VWI.

7264 (SH25): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7264a: cut for [7264].

7265 (SH26): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7265a: cut for [7265].

7266 (SH27): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7266a: cut for [7266].

7267 (SH28): Strong brown (7.5 YR 5/8) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7267a: cut for [7267].

7268 (SH29): Strong brown (7.5 YR 4/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7268a: cut for [7268].

7269 (SH30): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7269a: cut for [7269].

7270 (SH31): Brown (7.5 YR 5/4) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7270a: cut for [7270].

7271 (SH5): Strong brown (7.5 YR 5/8) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7271a: cut for [7244].

7272 (SH33): Strong brown (7.5 YR 5/6) very slightly sandy CLAY; stake hole identified on top of [co.7043/7093] in the northern part of VWI. 7272a: cut for [7244].

7273: WTR stone walls consisted of large boulders.

7274: Mortar base for brick wall

7275: Exterior brick wall along south east of watch tower room.

7276: Recent stone house wall located in VWI close to 2016 AIA excavation (north)

7277: Recent stone house wall located between VWI and WTA.

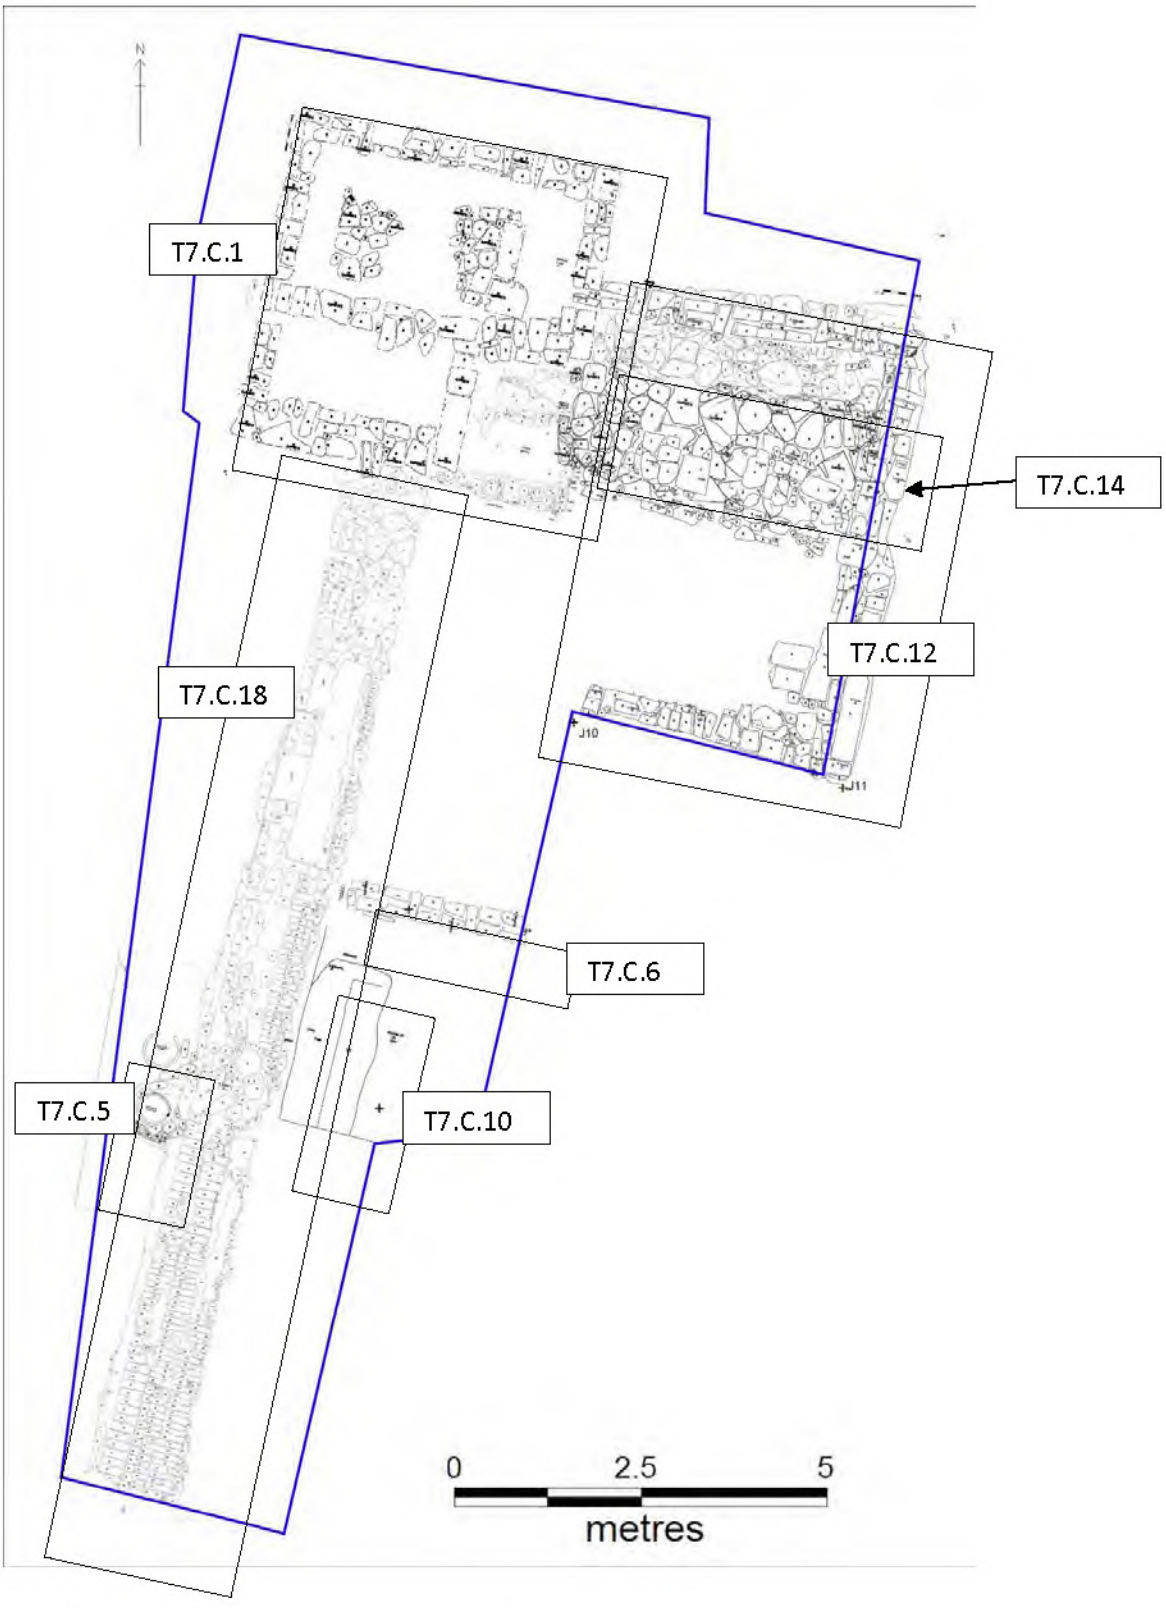
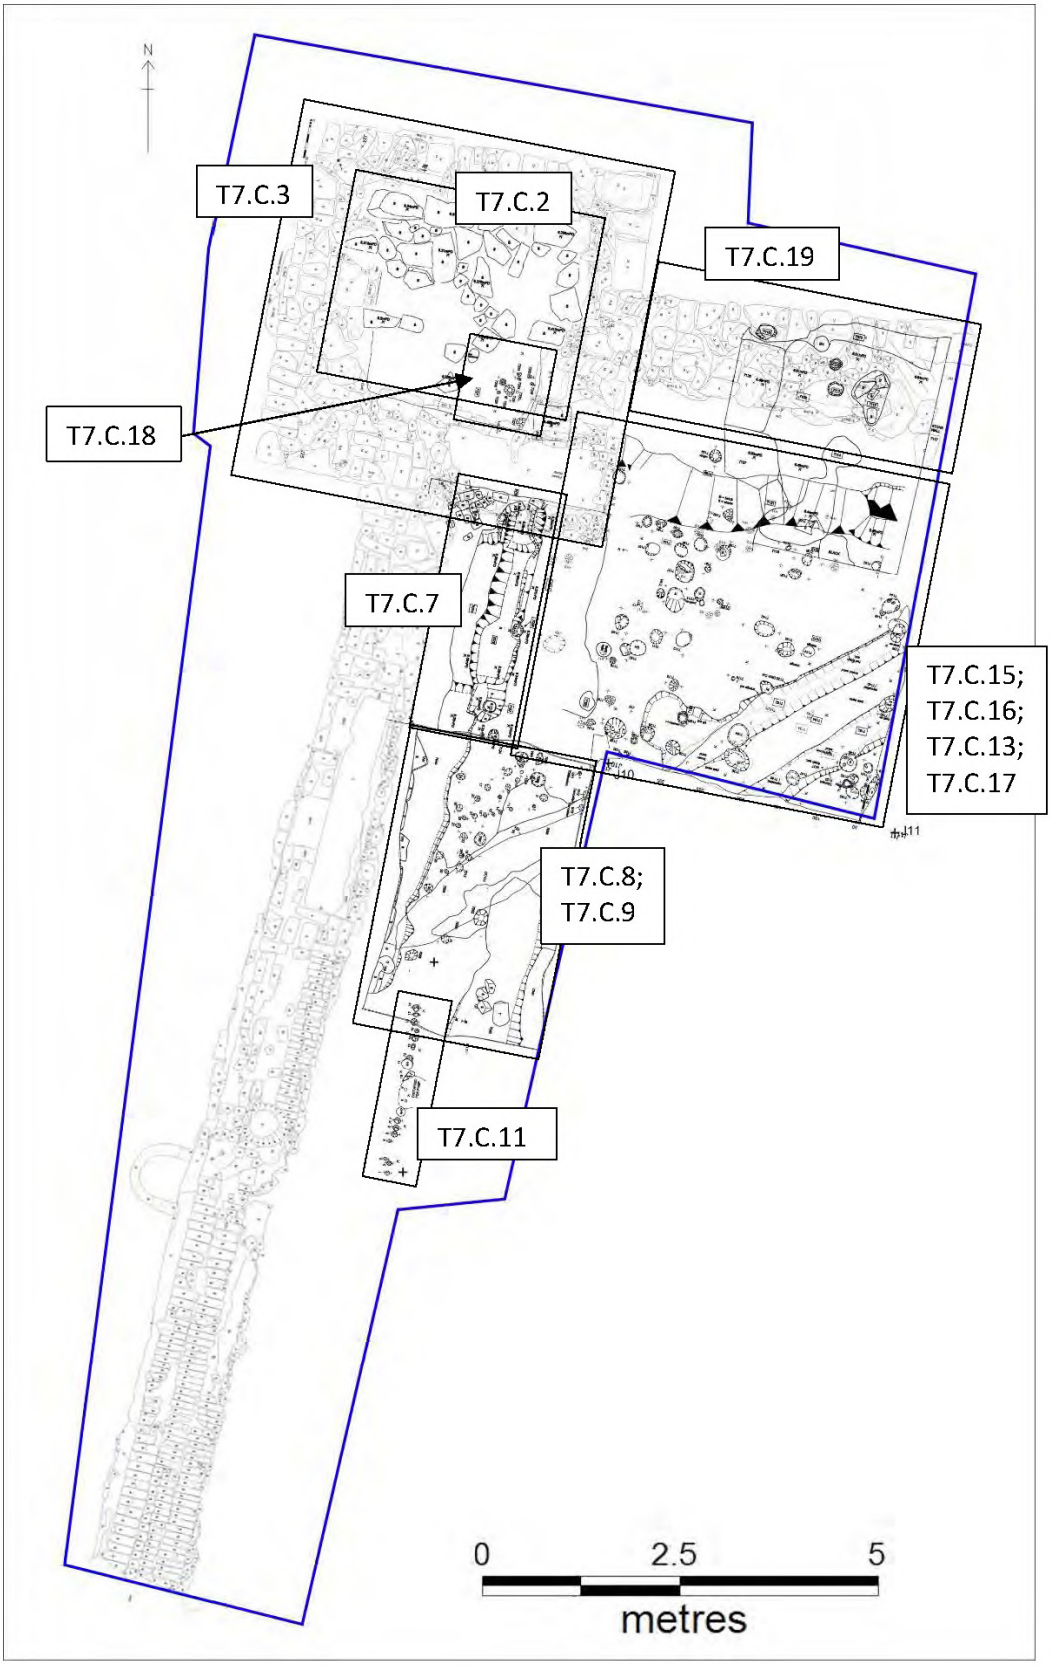
**Proposed dating based on stratigraphy, diagnostic artefacts, TL-dating and historical information.

T7.C Trench 7 drawings

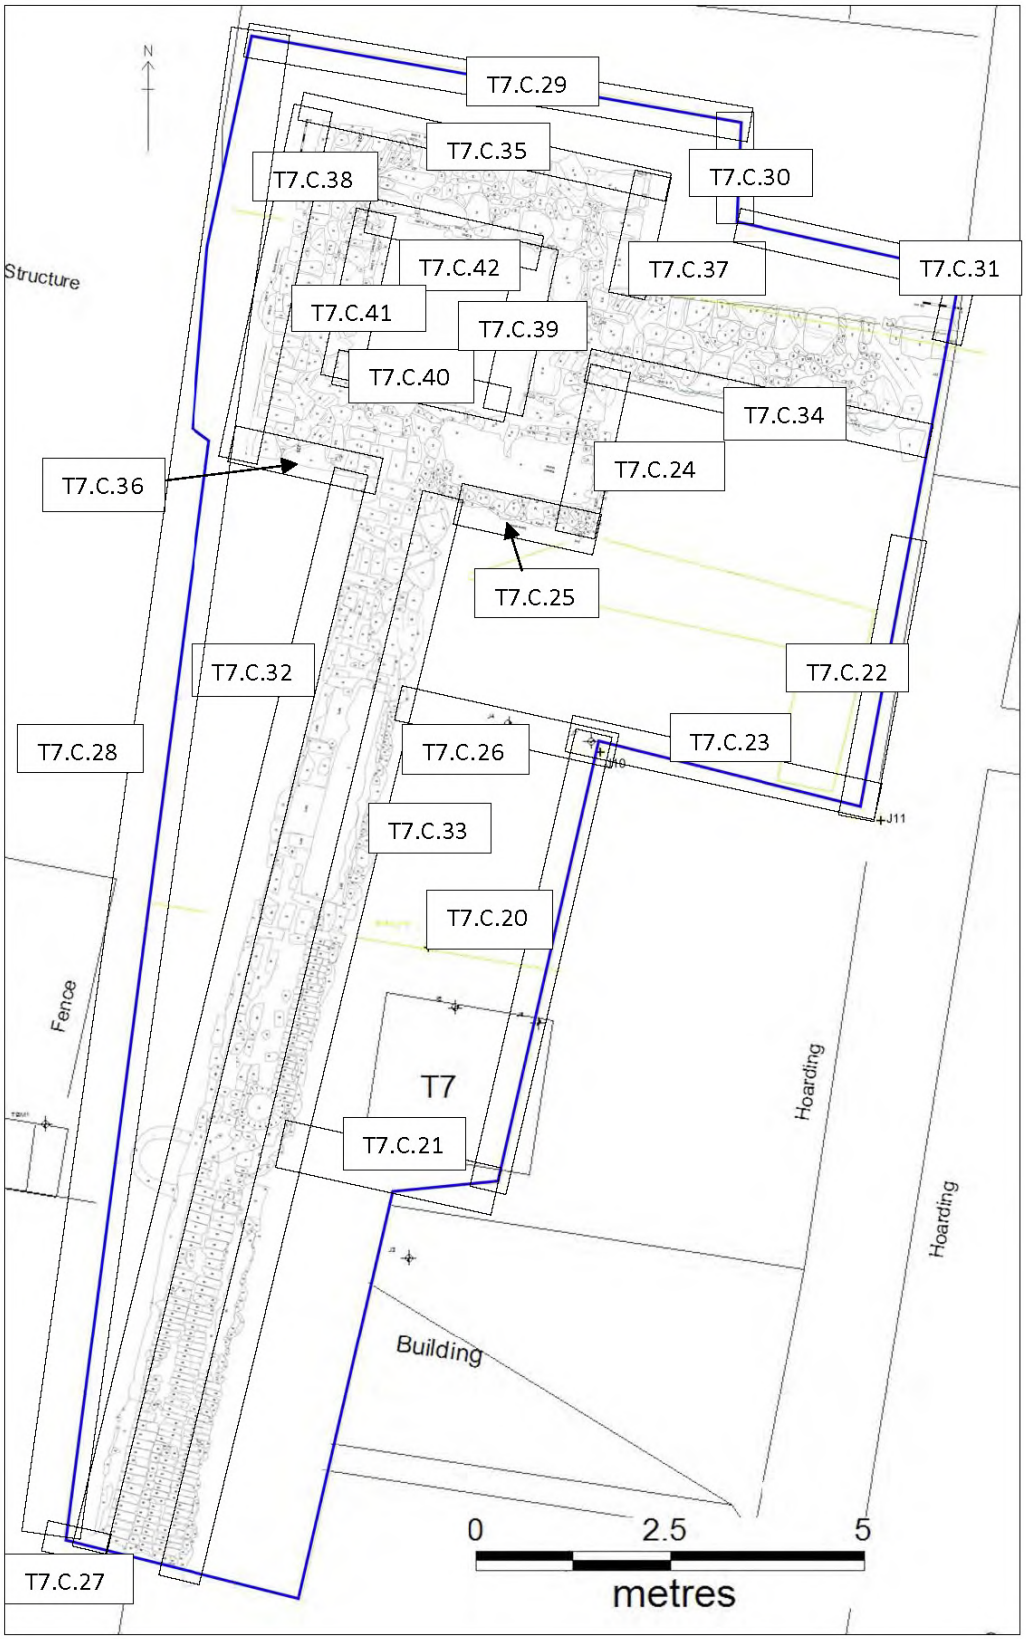
Key to ground plans (1)



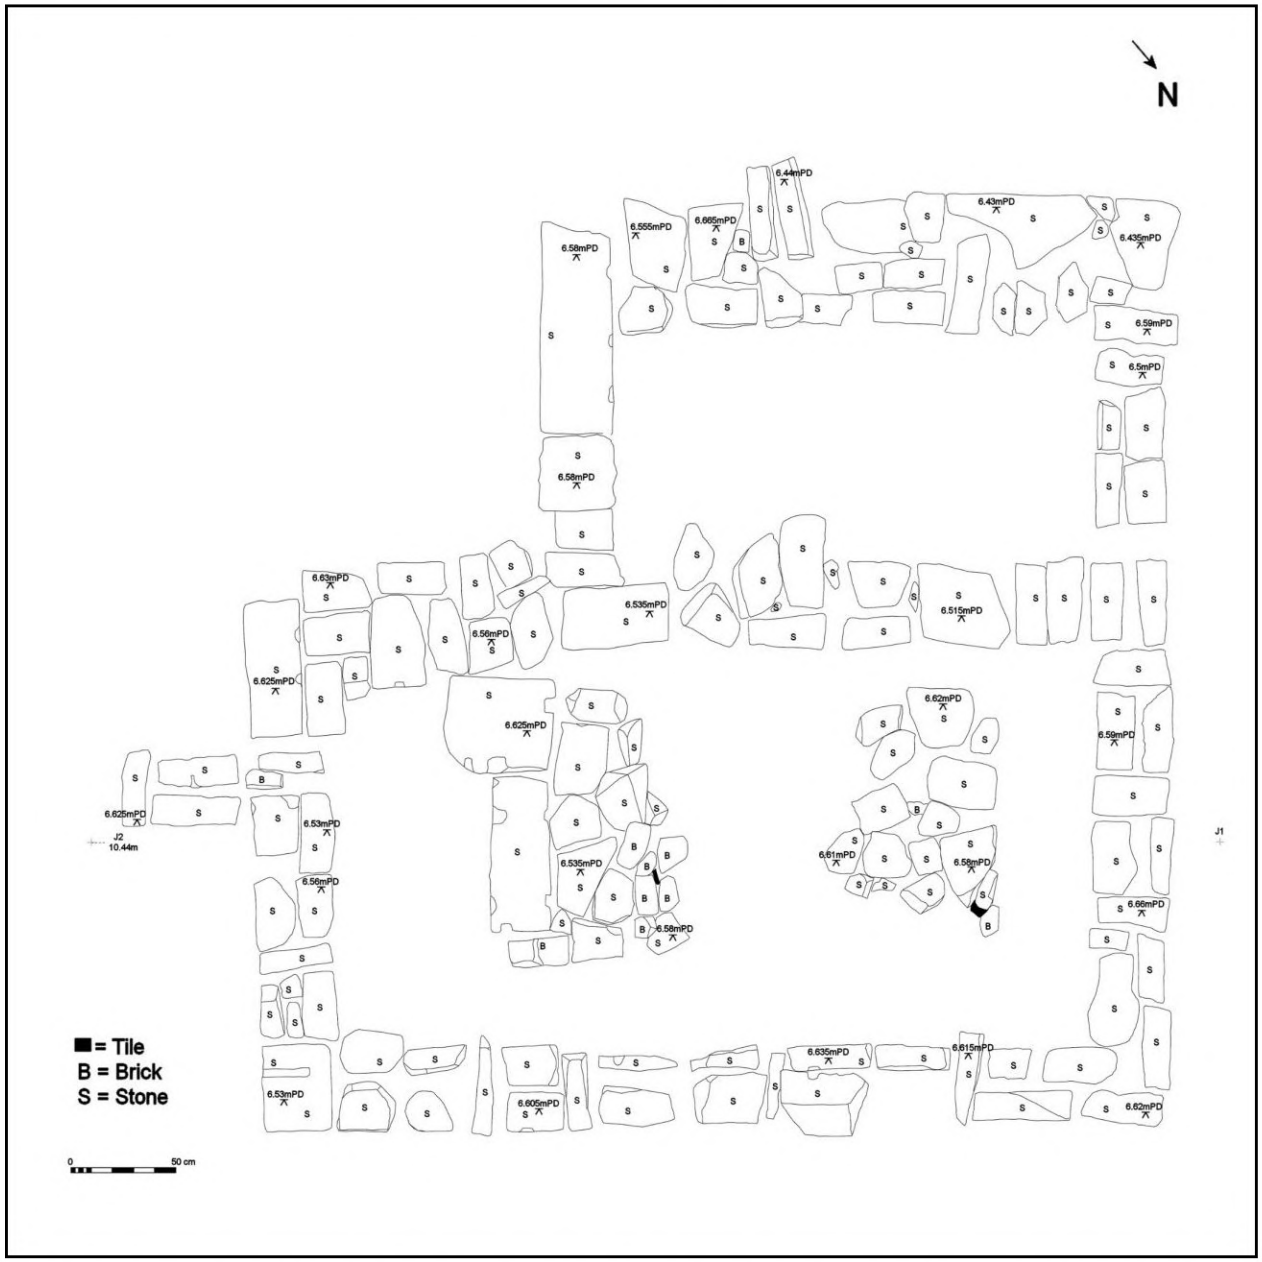
Key to ground plans (2):



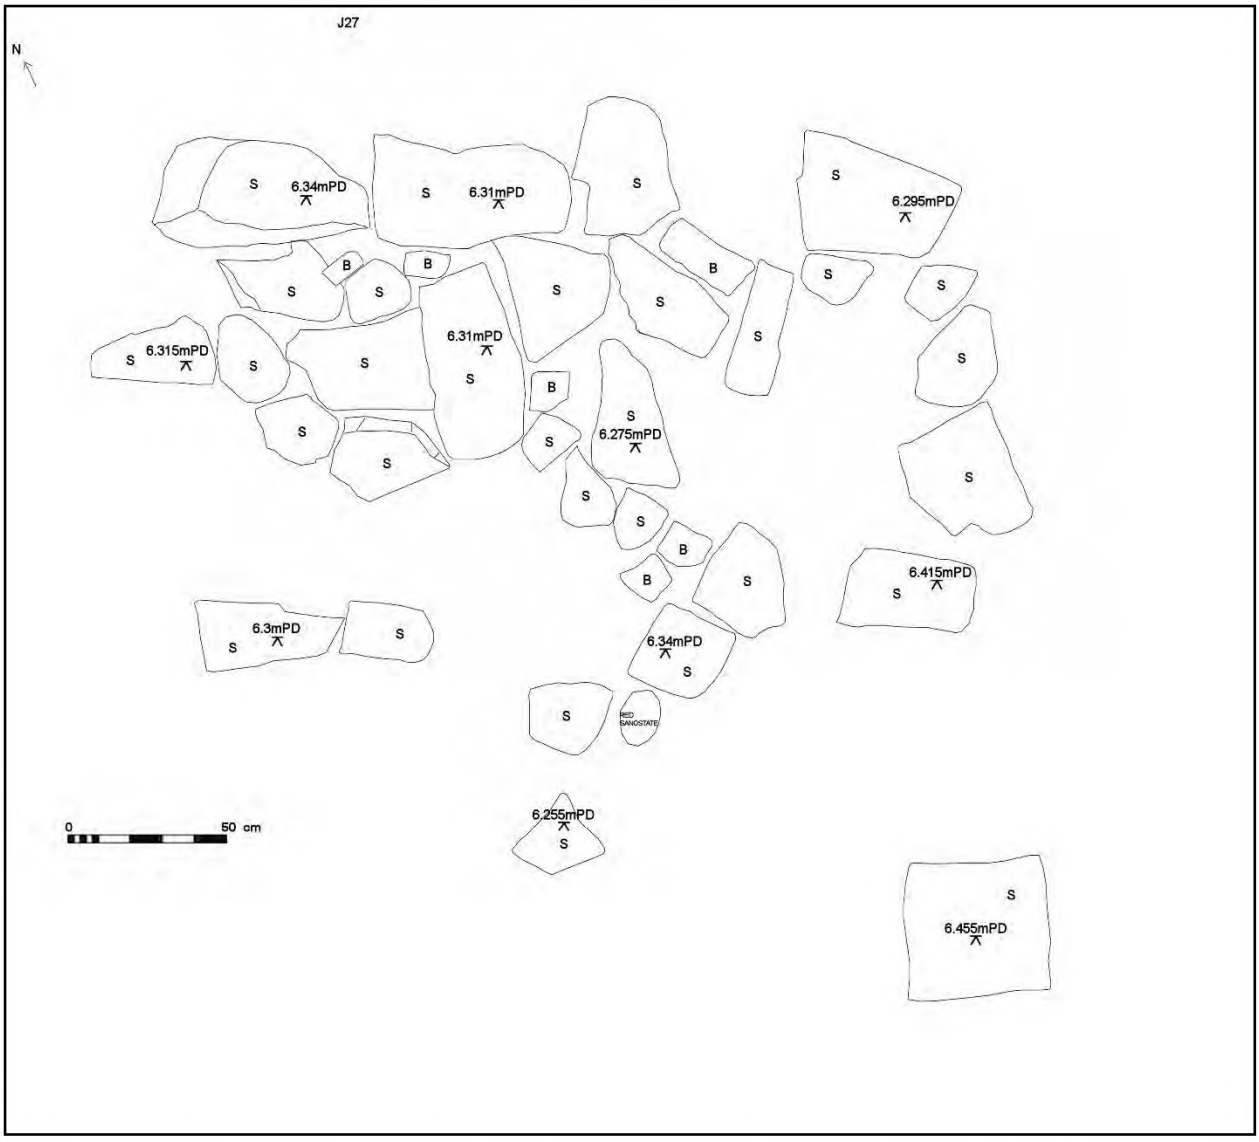
Key to section drawings (1)



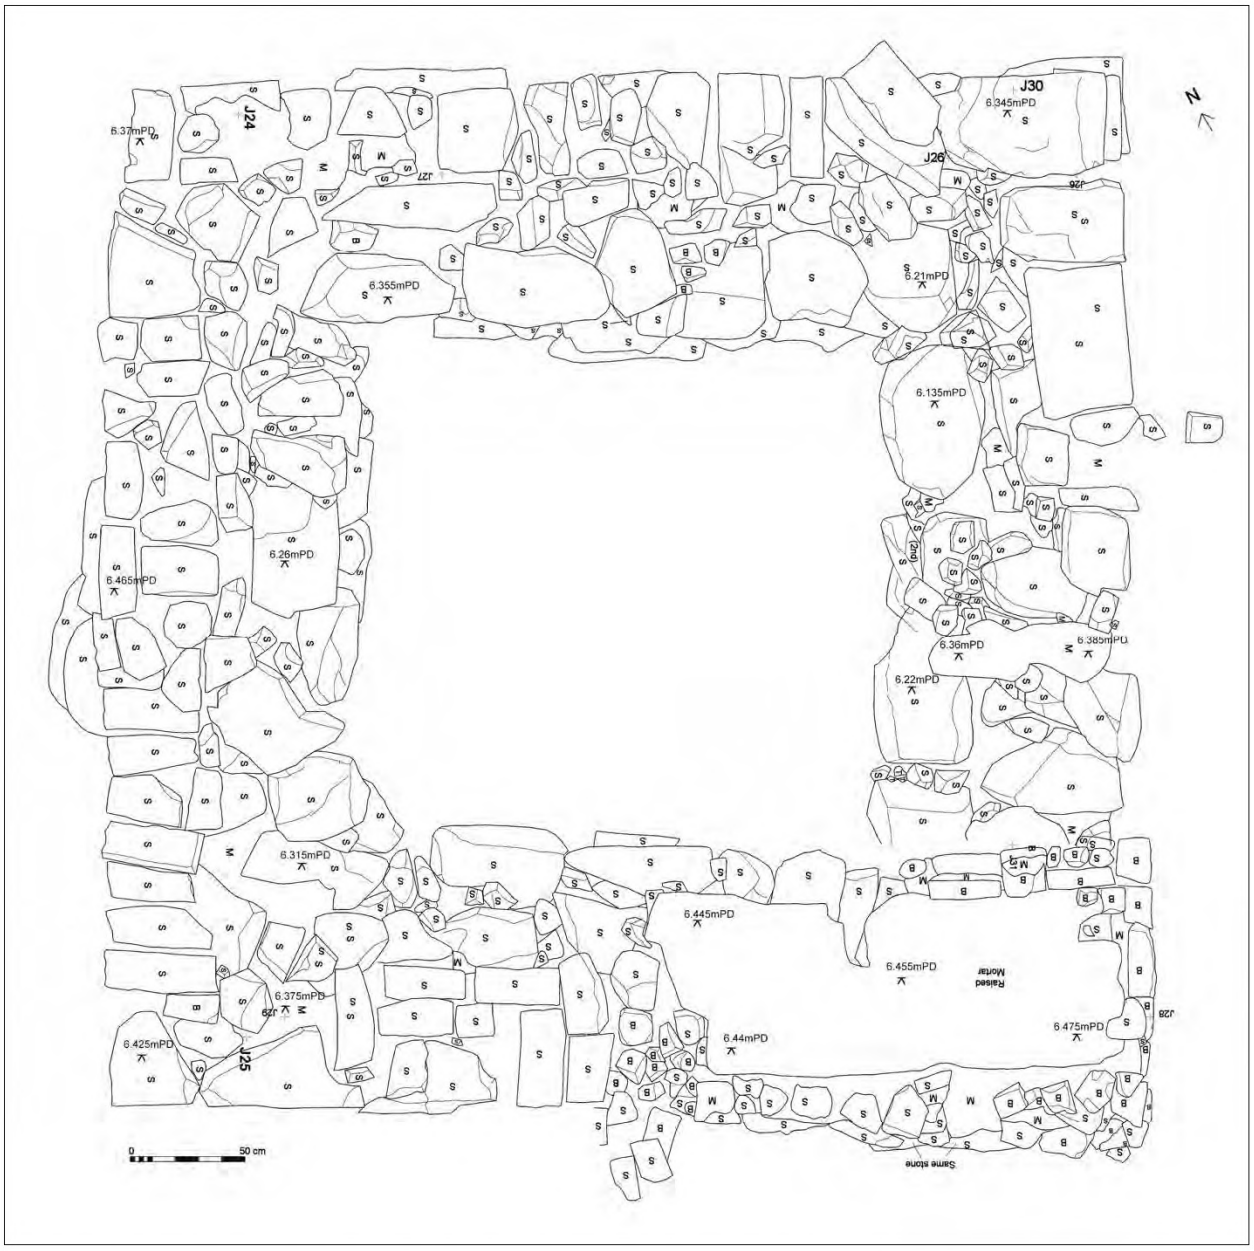
Ground Plans of and within the watch tower room (WTR)



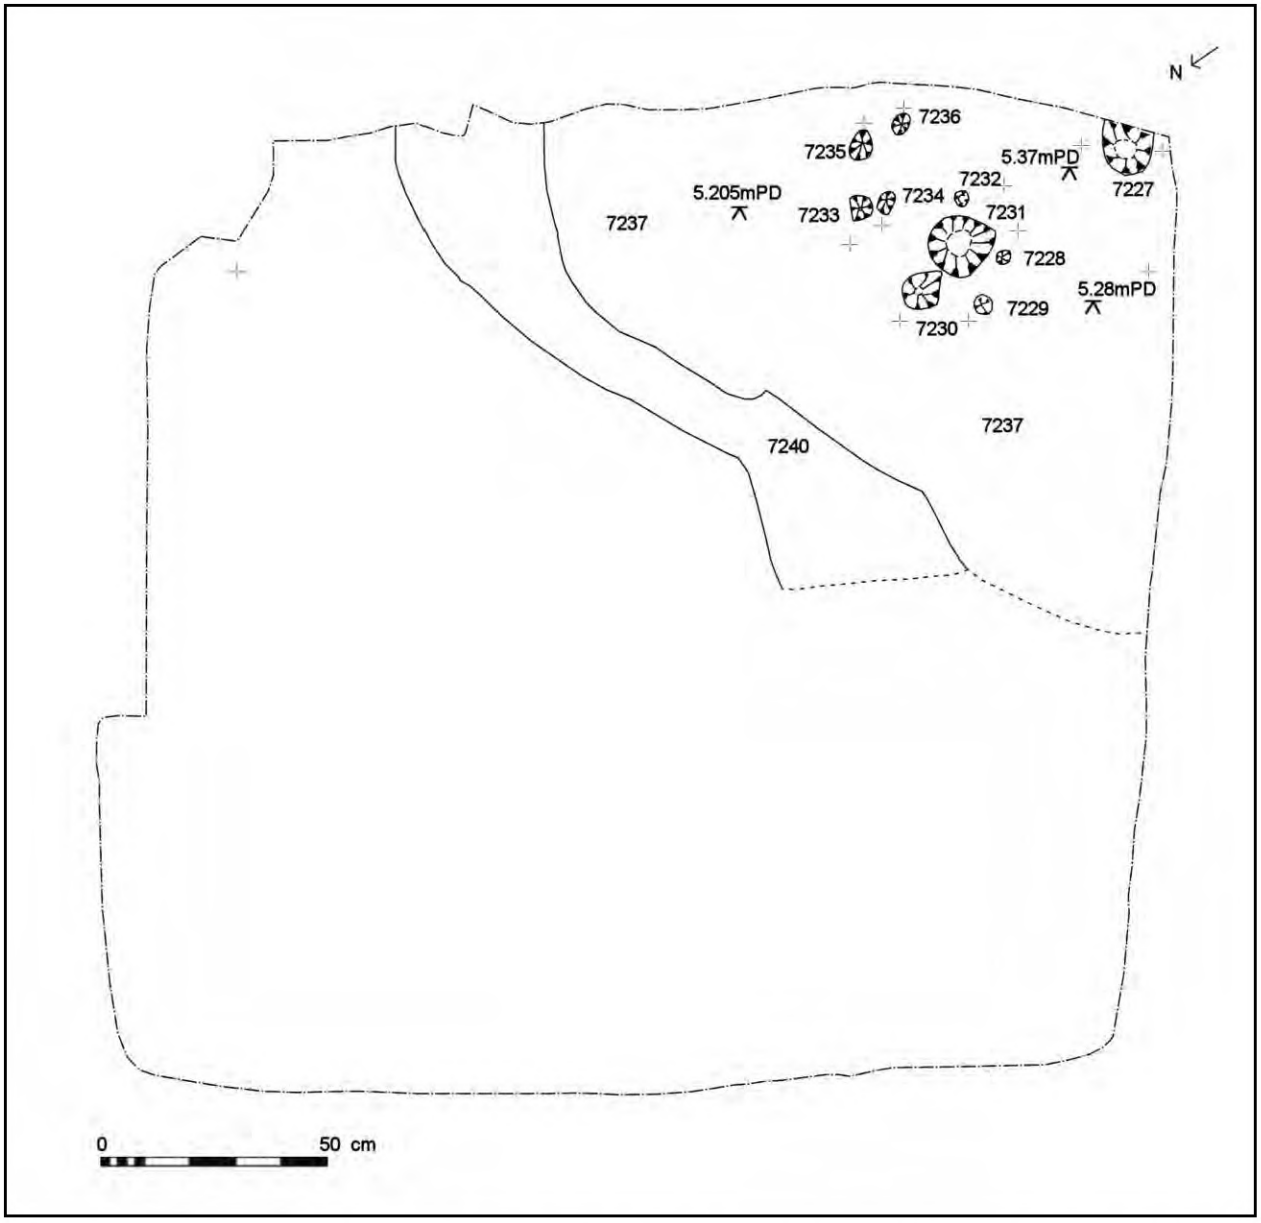
T7.C.1 Ground plan of modern wall on top of watch tower room lay-out and partial stone floor inside [**co.7037**].



T7.C.2 Ground plan of second stone floor or leveller within the WTR [**co.7038**].

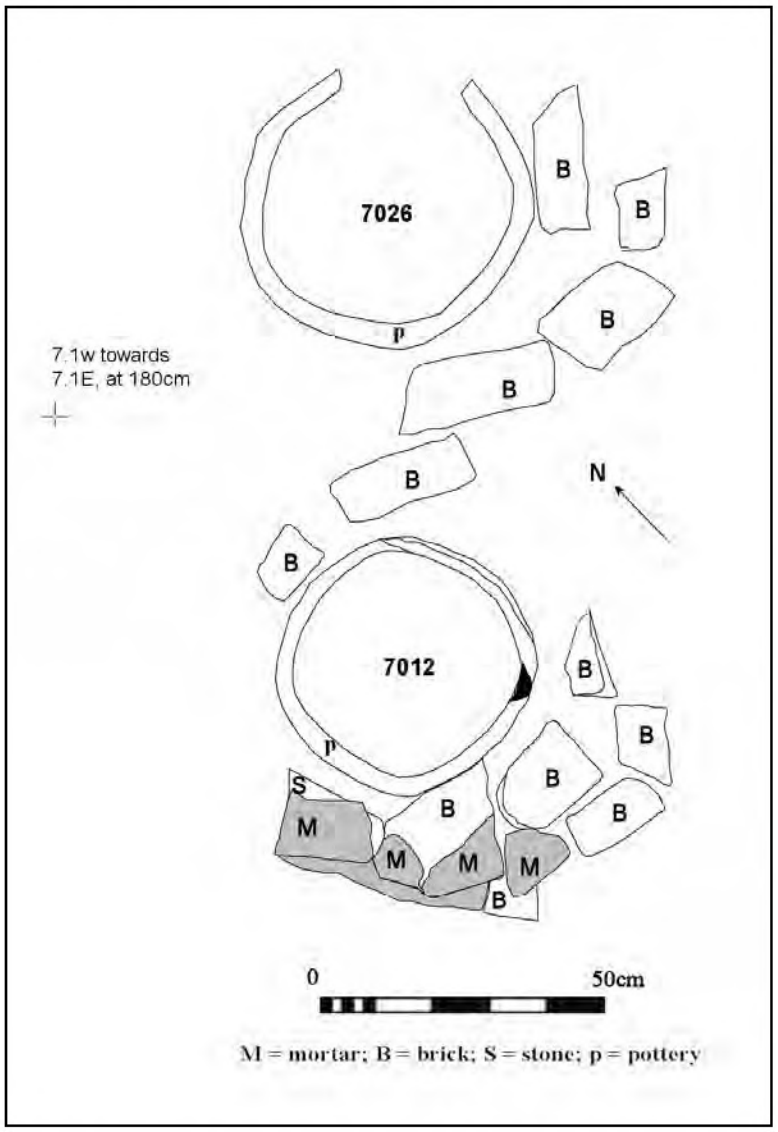


T7.C.3 Ground plan of watch tower room stone walls [**co.7273**] .and showing mortar brick wall base in southeast of southern wall [**co.7274**].

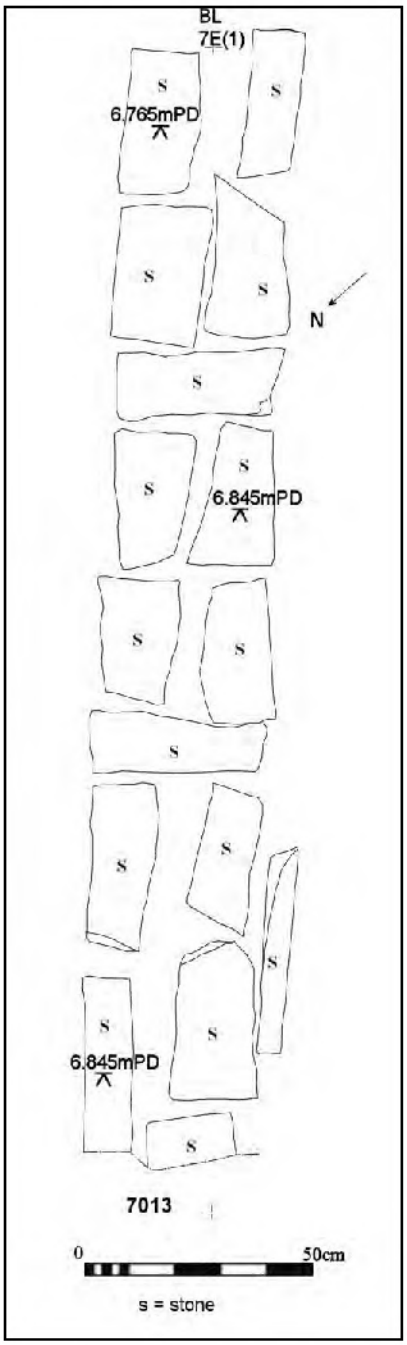


T7.C.4 Plan showing fill **[co.7240]** and stake holes/postholes **[co.7227 to 7236]** cutting into **[co.7237]** within WTR.

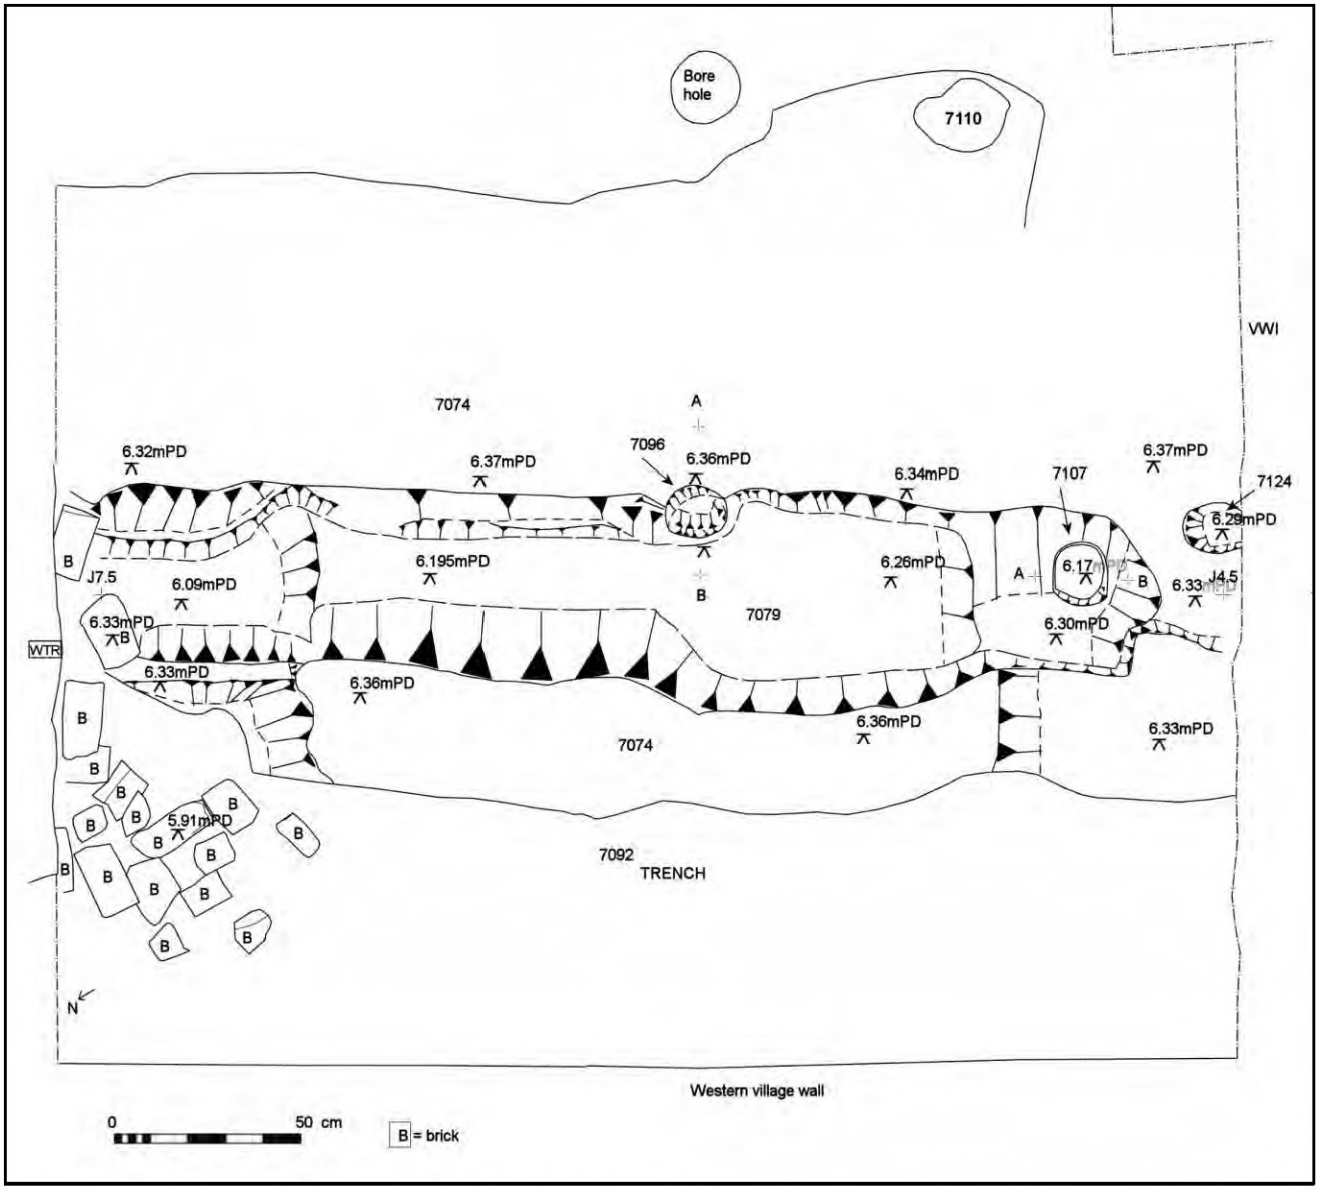
Ground plan of features along the western village wall (VWI/WTA)



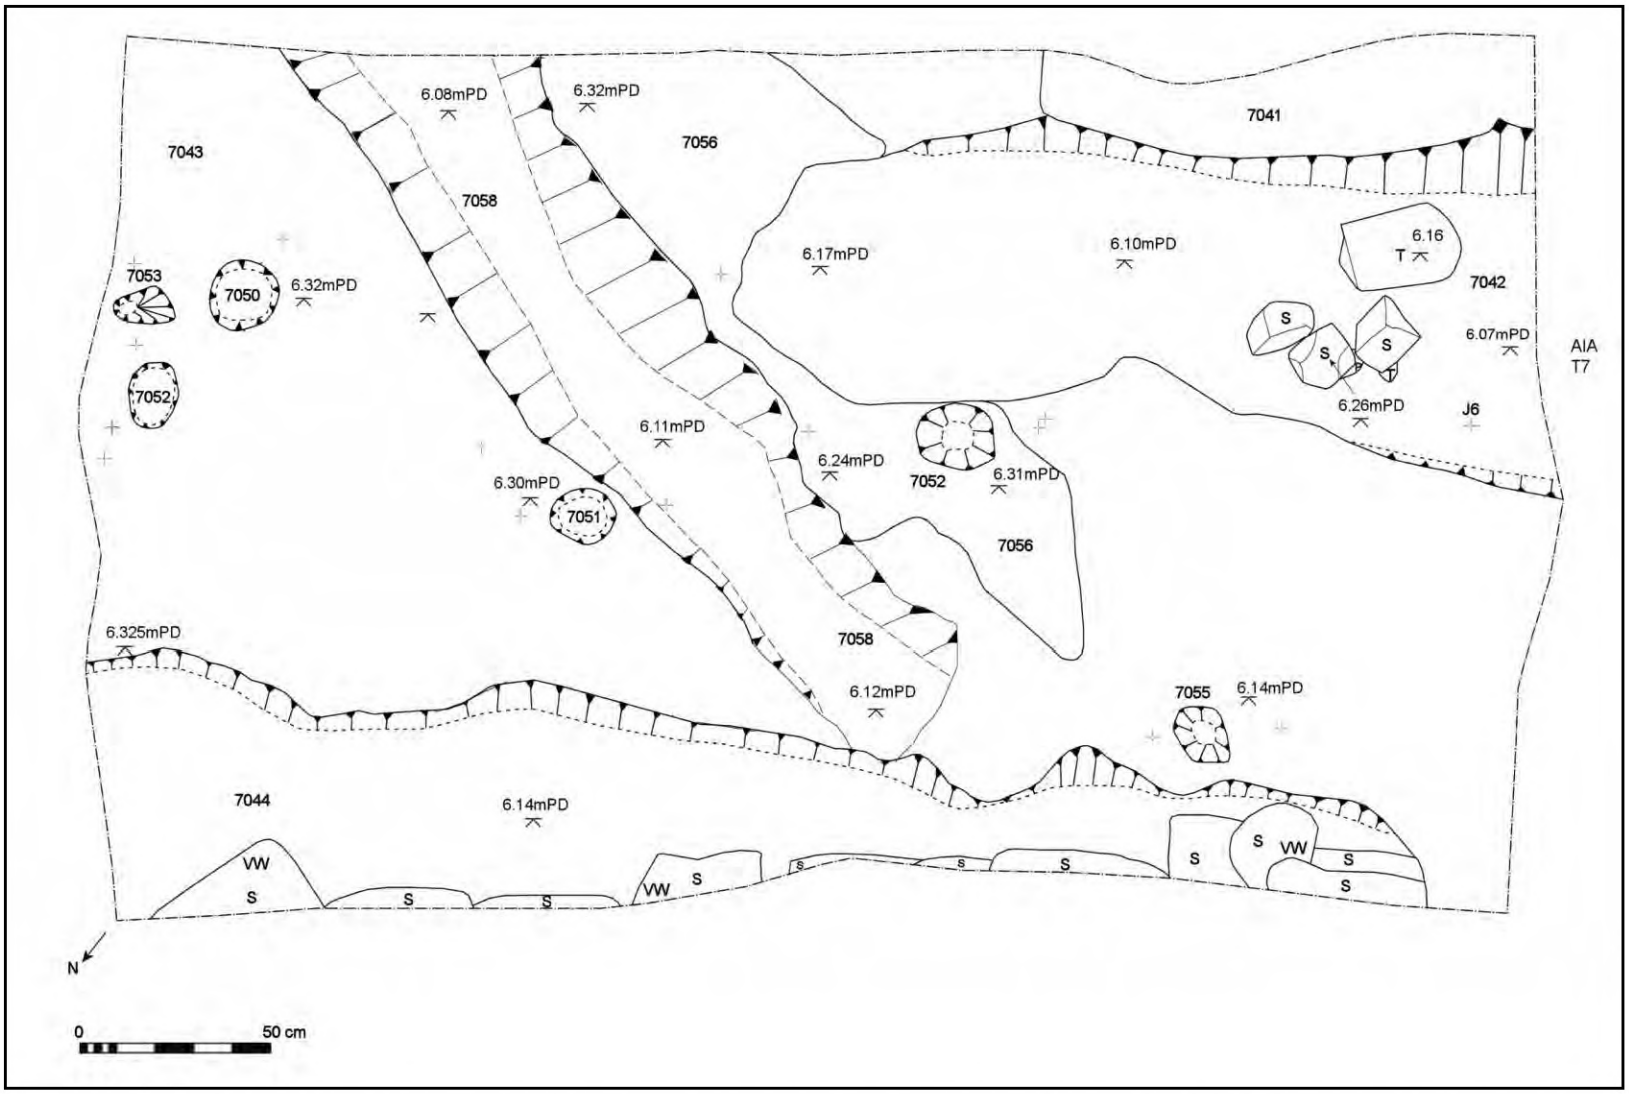
T7.C.5 Upper plan of two pots [**co.7012** and **7026**] on exterior of village within west moat.



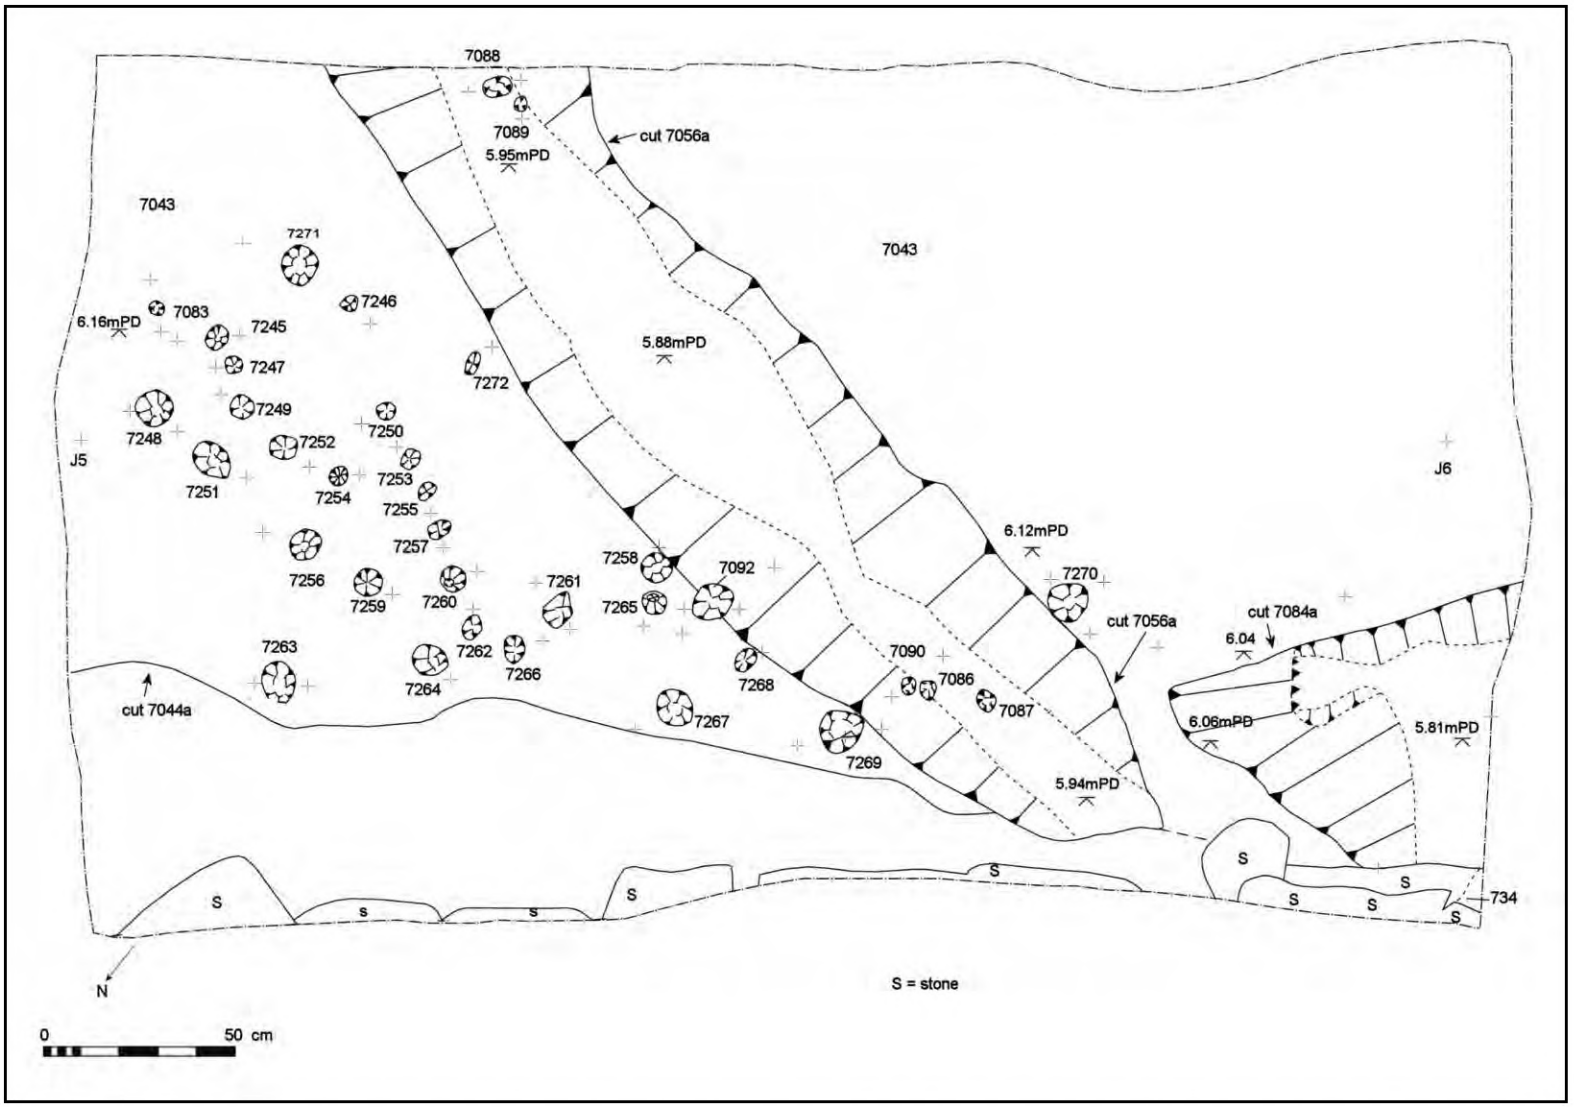
T7.C.6 Ground plan of stone wall [**co.7276**] part of [**co.7013**] in VWI.



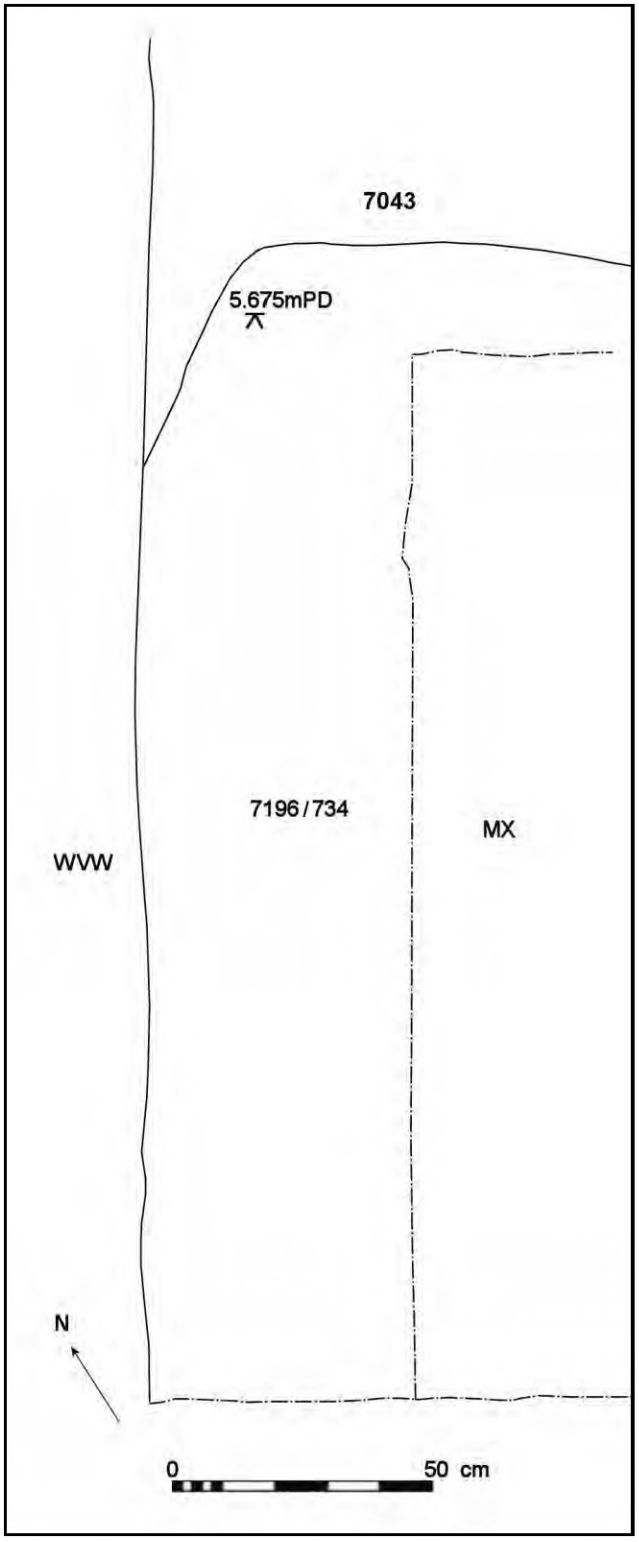
T7.C.7 Plan showing elongated features **[co.7079** and **co.7097]** cutting into **[co.7074]**, and postholes **[co.7110, 7107, 7096, 7124]** in WTA.



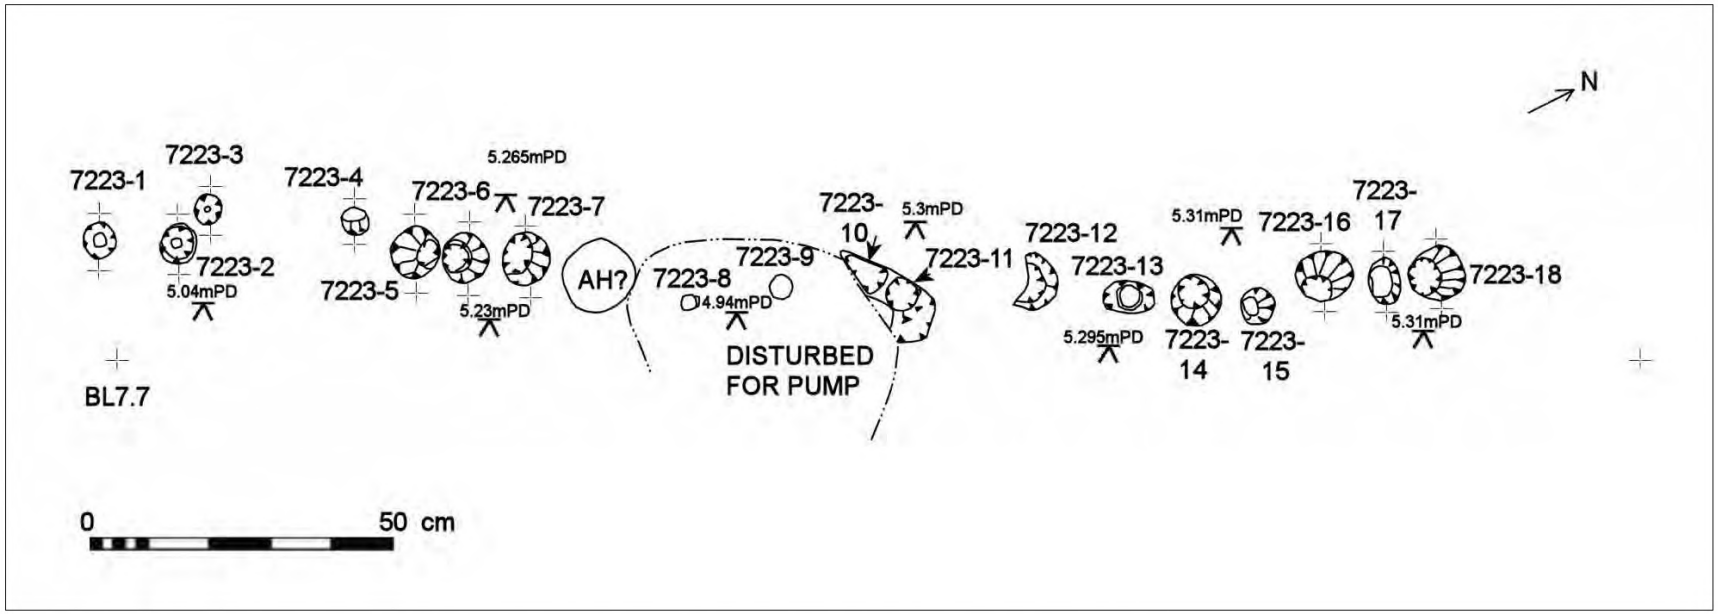
T7.C.8 Multi-phase plan showing elongated features 'removed wall trench'[**co.7042/7042a**], trench along western village wall [**co.7044/7044a**], top of ditch [**7058/7058a, 7056/7056a**] and postholes [**co.7053/7053a, 7050/7050a, 7052/7052a, 7051/7051a**] within [**co.7043**] and postholes [**co. 7055/7055a, 7057/7057a**] within [**co.7056**] in VWI.



T7.C.9 Multi-phase plan showing elongated features: a ditch **[co.7056/7056a]** and trench along western village wall **[7044a/7044]**, pit feature **[co.7084/7084a]**, and stake holes cutting into **[co.7043/7093]** in VWI.

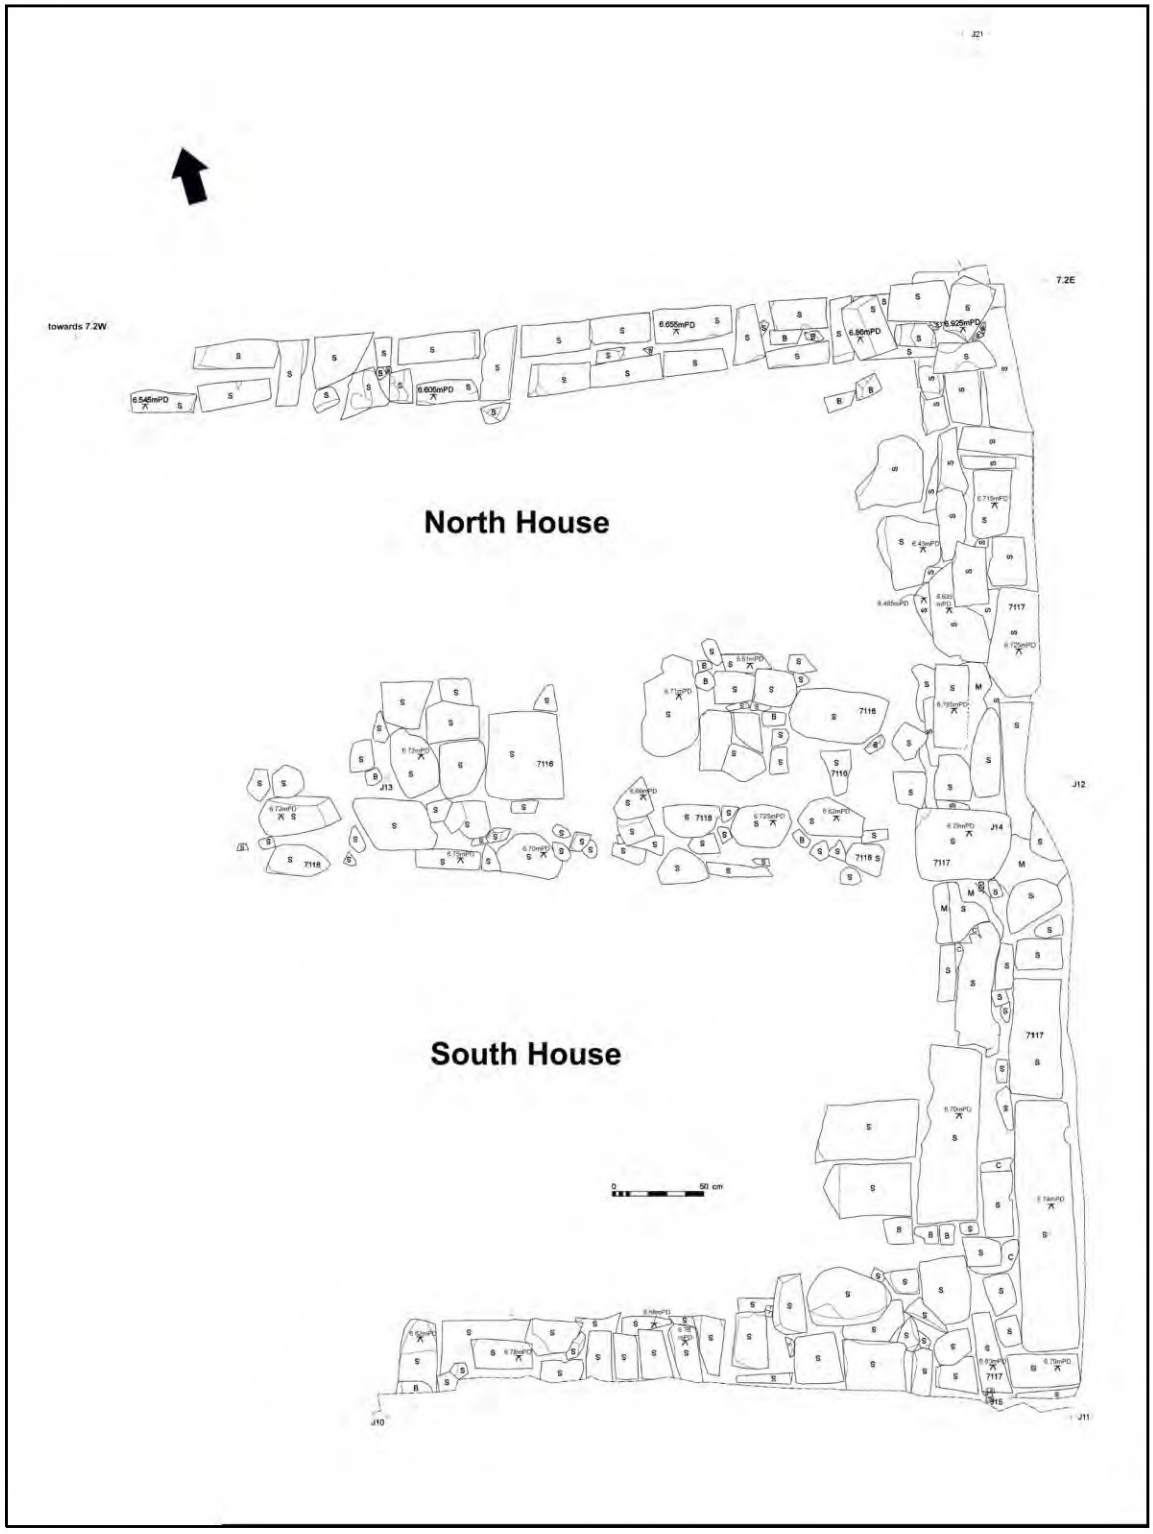


T7.C.10 Plan showing layer [**co.7196**] along western village wall truncating [**co.7043**] in WTA. MX is previously excavated area 2016 AIA phase.

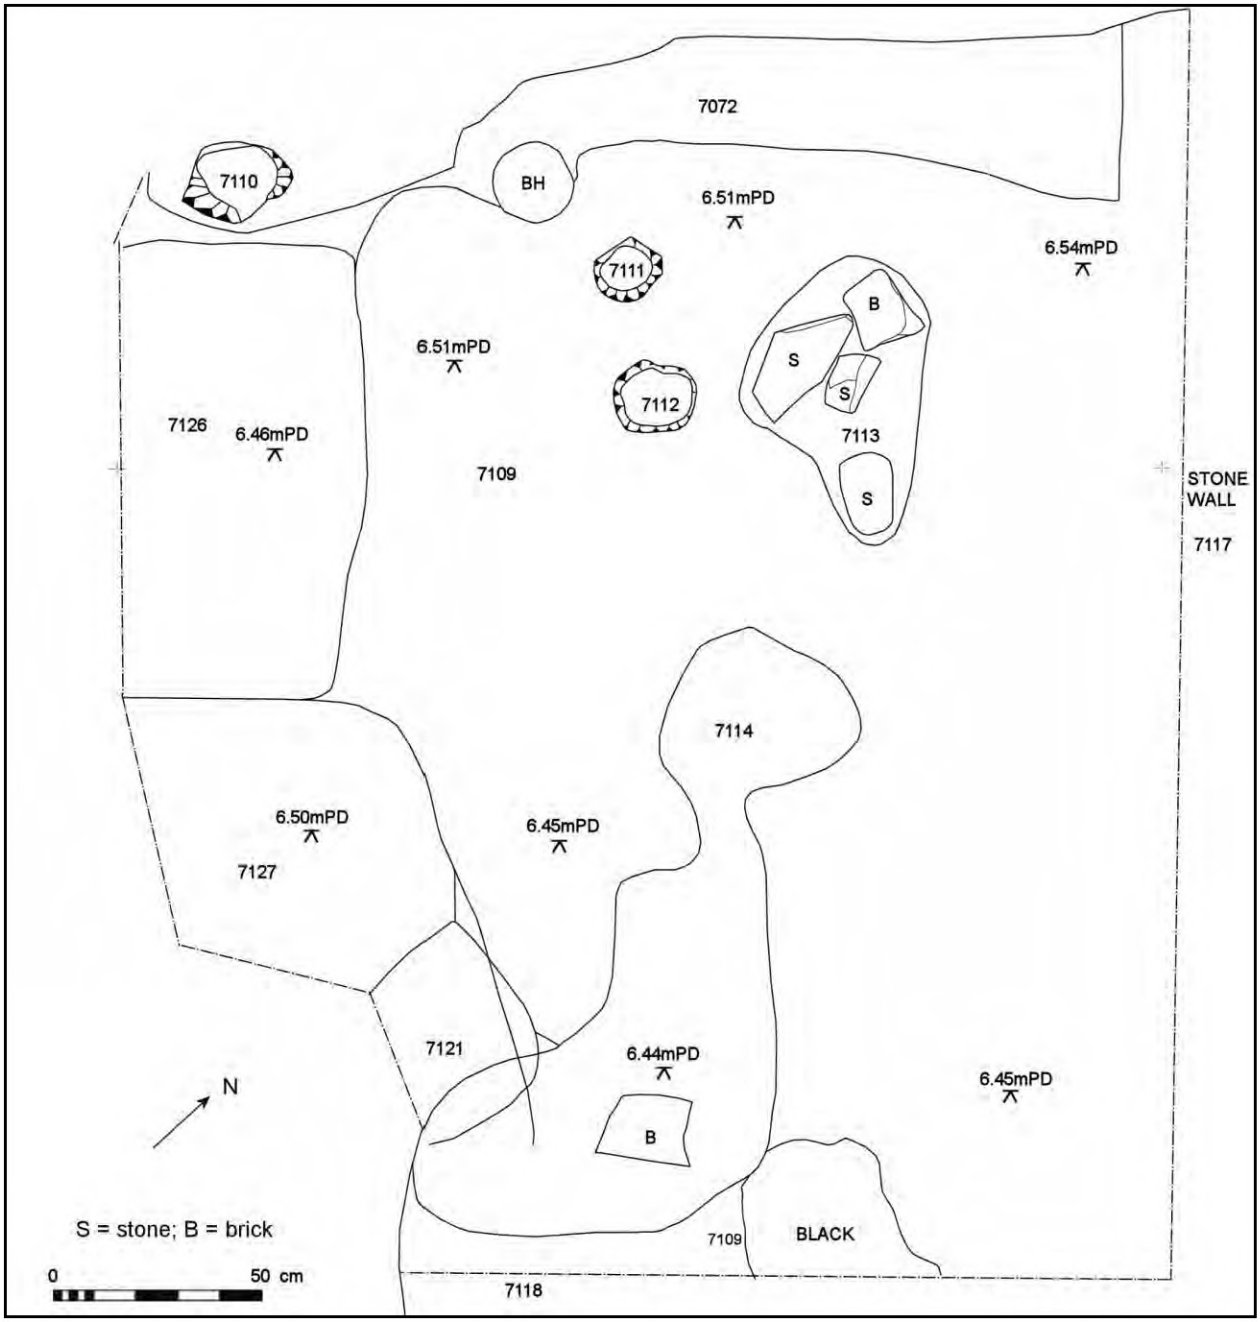


T7.C.11 Post-ex plan of stake holes [**co.7223-1 to 18**] within/below [**co.7222**] in WTA.

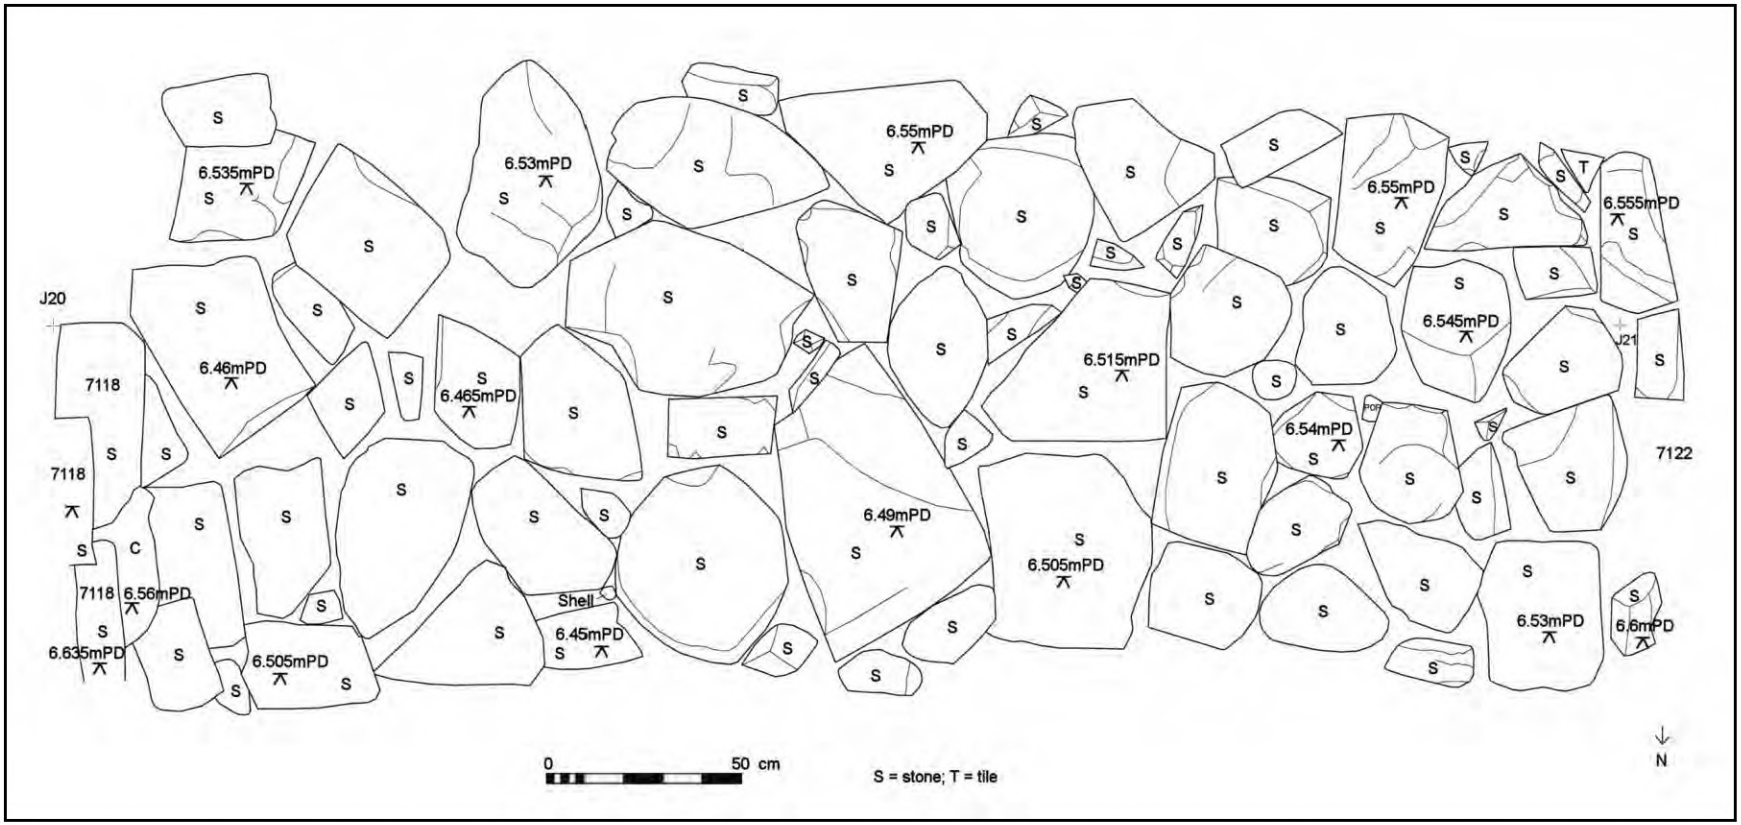
Ground plan of features within the watch tower area (WTA)



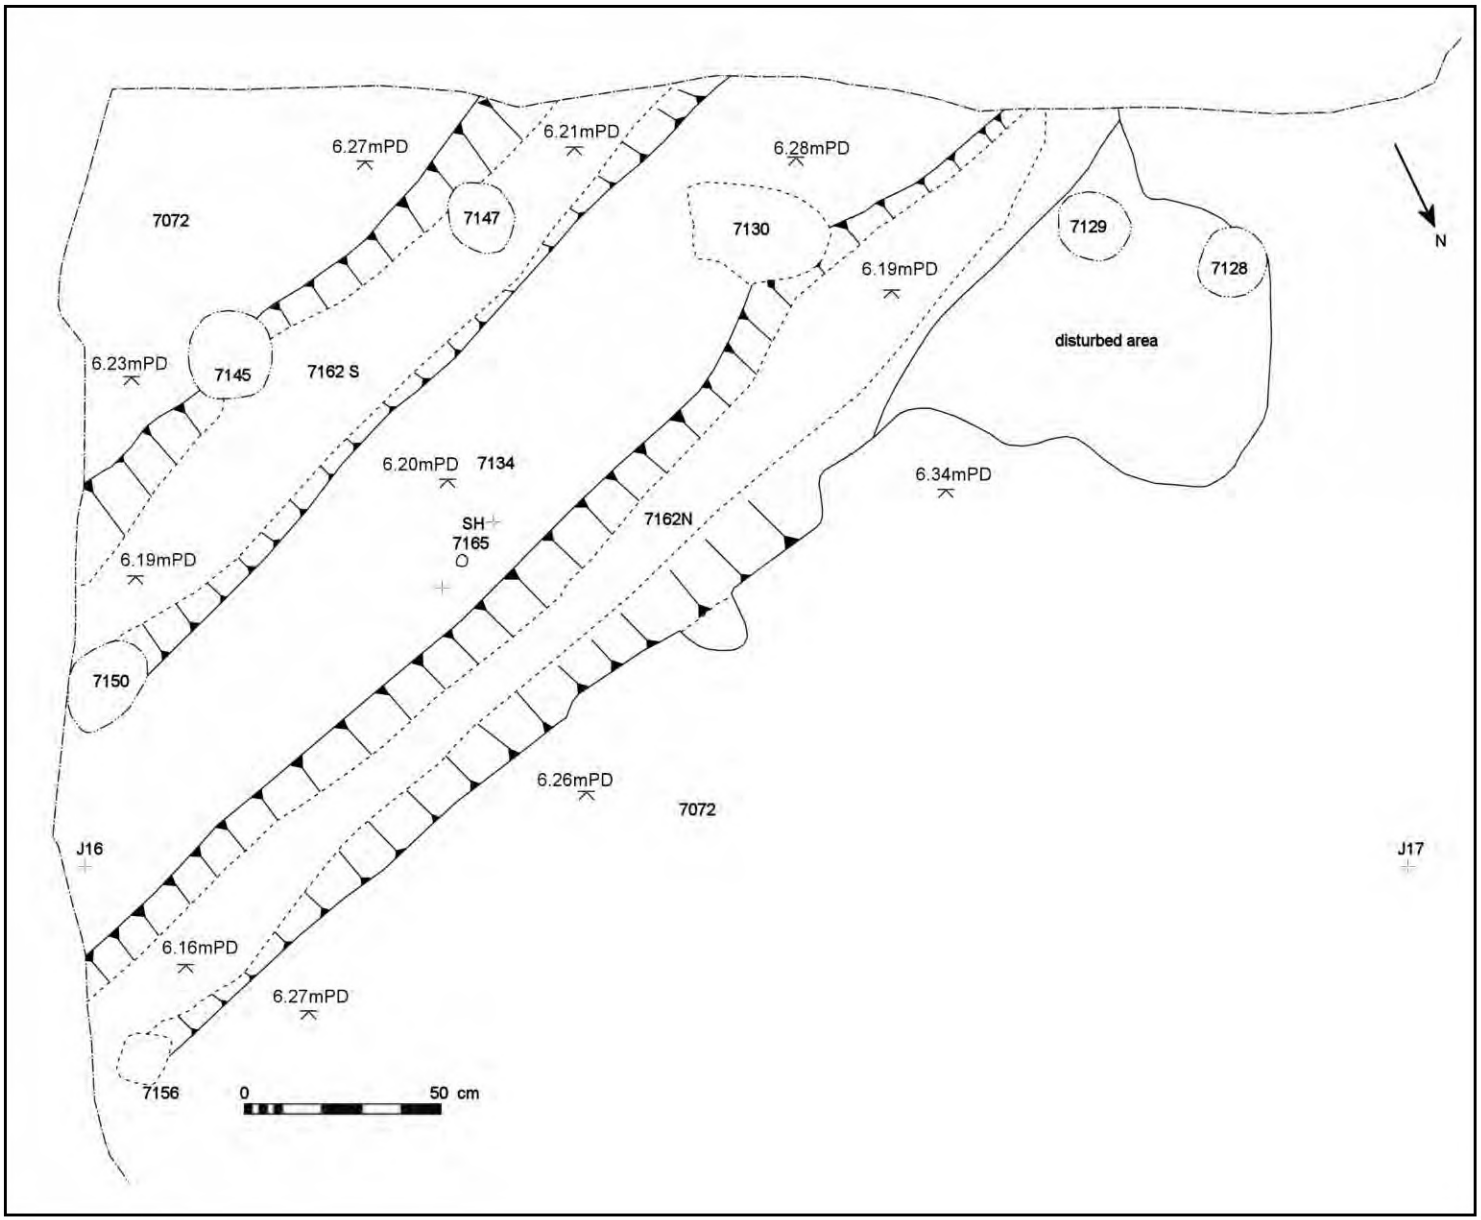
T7.C.12 Plan of recent stone house walls in WTA **[7116-7118]**.



T7.C.13 Plan showing pit features [**co.7126, 7127**], stone walls [**co.7117, 7118**], clay floor [**co.7109**], postholes [**co.7110-7113**], fill [**co.7121**] and layers [**co.7072, 7114**] in southern house in WTA.

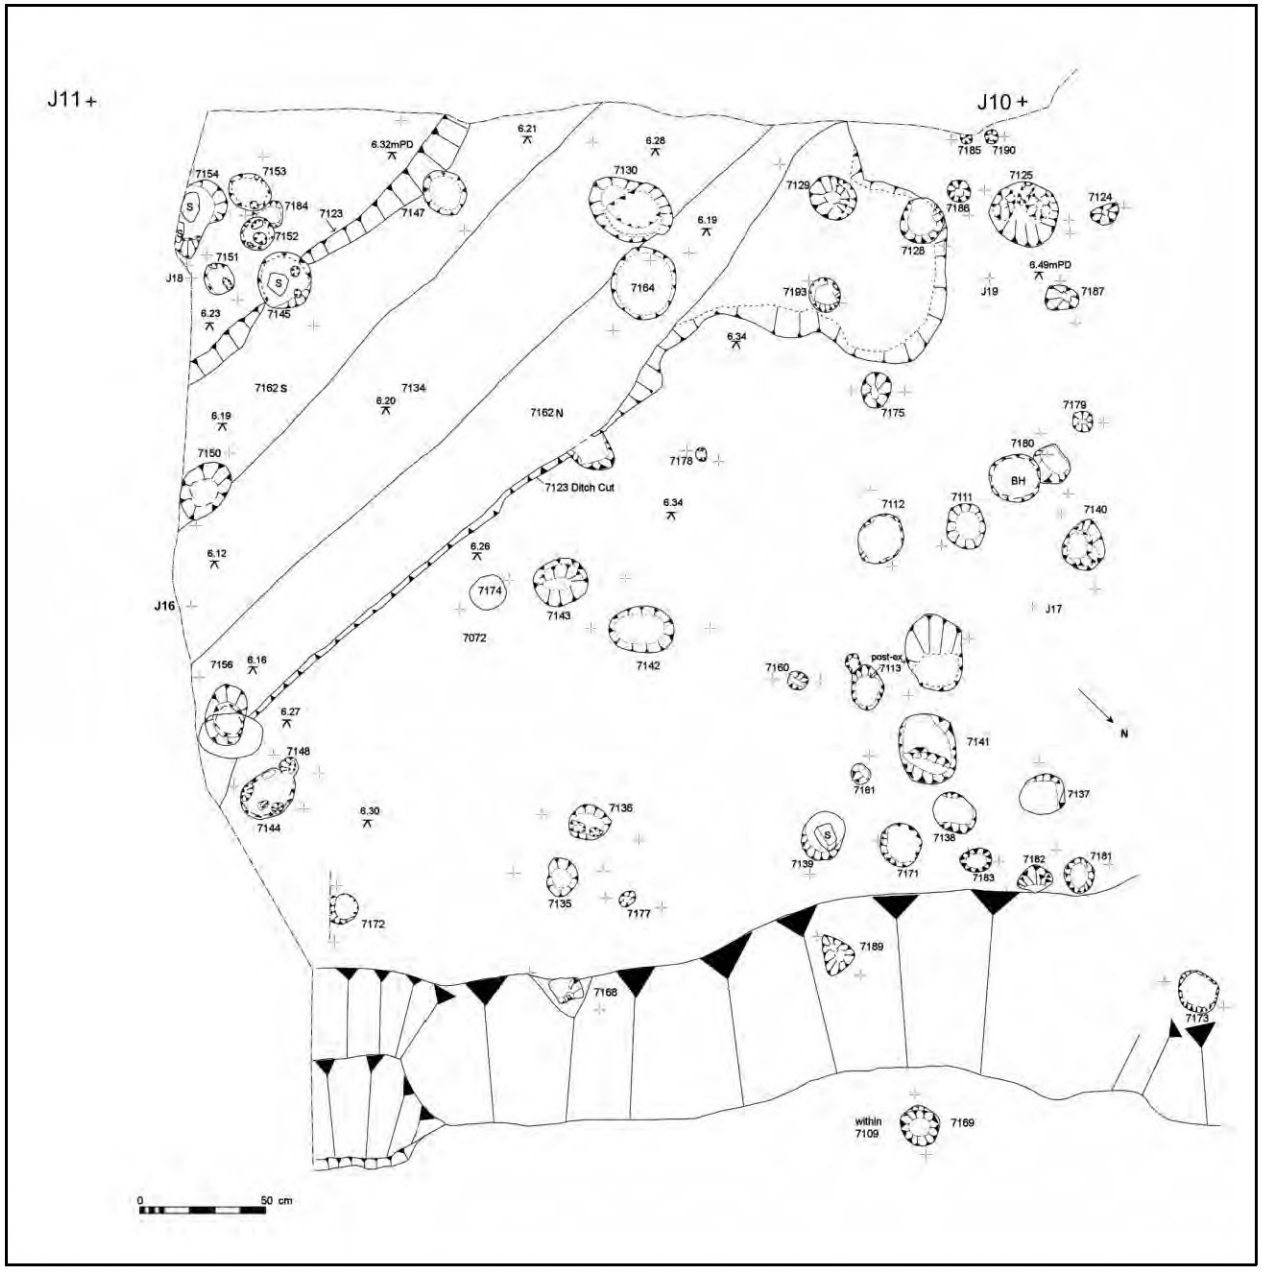


T7.C.14 Ground plan showing stone floor **[co.7122]** at entrance to the watch tower room within North House **[co.7118]** in WTA.

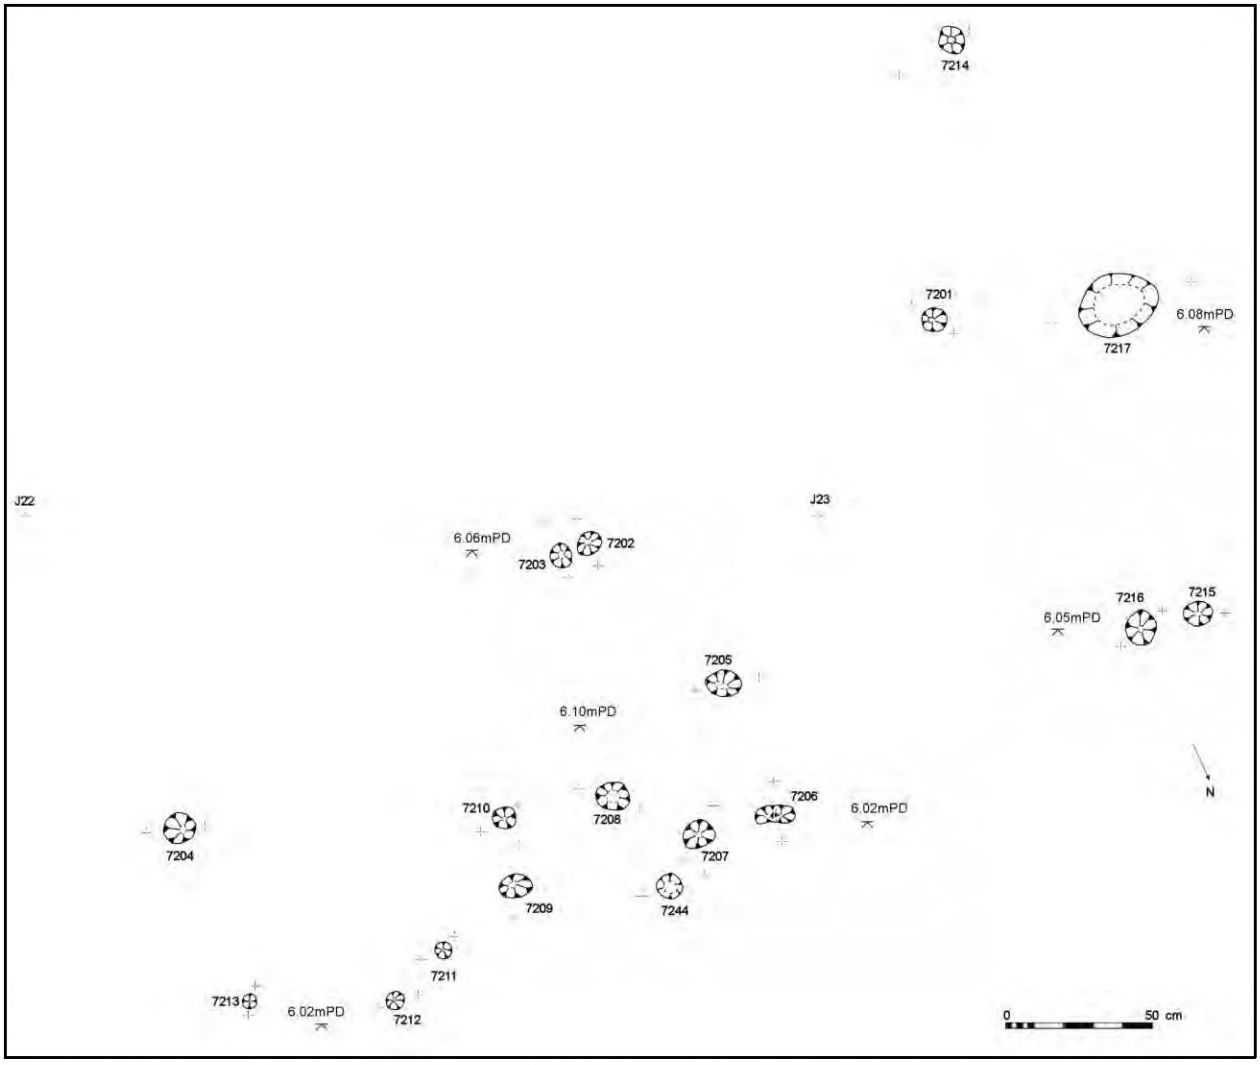


T7.C.15

Plan showing ditch features **[co.7162N, 7162S, 7134]** cutting into **[co.7072]** in with some postholes **[co.7145, 7147, 7130, 7150, 7129 and 7128]**, stake hole **[co.7165]** within ditch features.

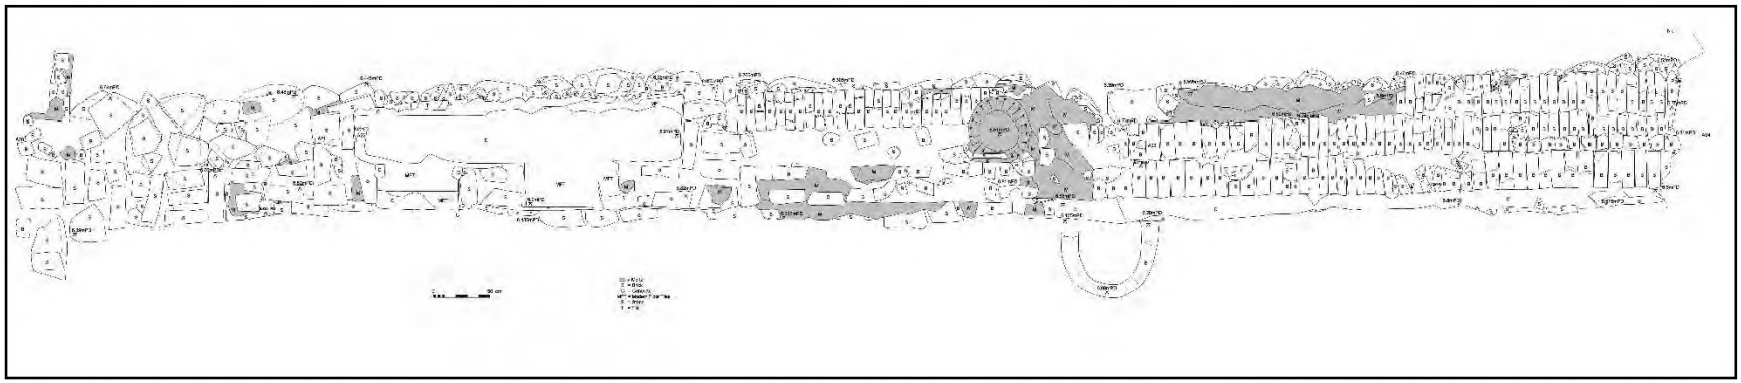


T7.C.16 Post excavation plan within WTA showing ditch features **[co.7162N, 7162S, 7134, 7123]** and postholes and stake holes on various levels (top to bottom): **[co.7111-7113, 7124]** within floor **[co.7109]**, **[co. 7168/7169]** within floor **[co.7167]**, **[co. 7125, 7135-7154/7160-7161]** within top of orange deposit **[co.7072]** and **[co.7130, 7148, 7171-7190/7193-7194]** within orange deposit **[co.7074]**, **[co.7164]** cuts into ditch fill of **[co.7134]**.

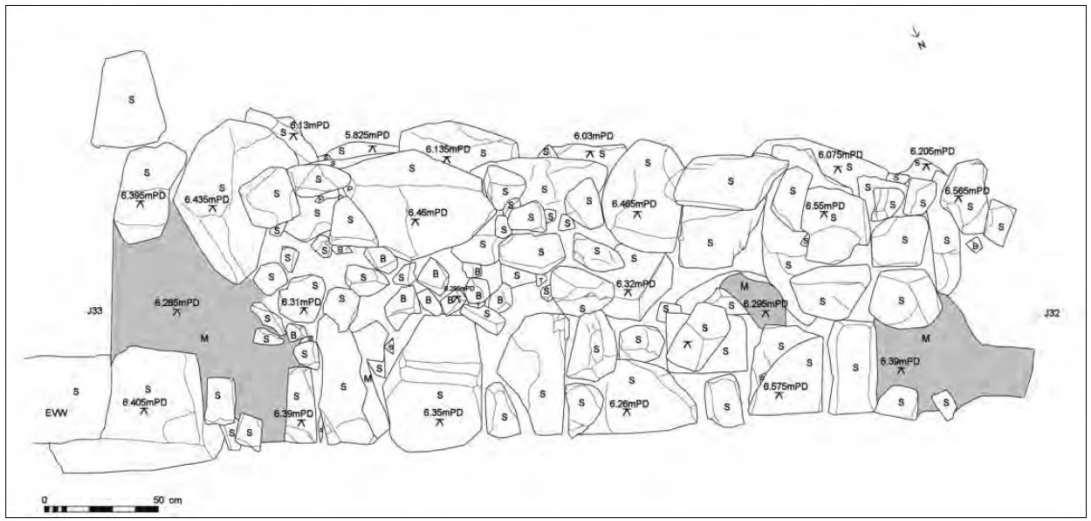


T7.C.17 Post-ex plan of stake holes **[co.7201 to 7217, 7244]** cutting into **[co.7074]** in WTA; corresponds to T7.D.36.

Ground plan of western and northern village walls

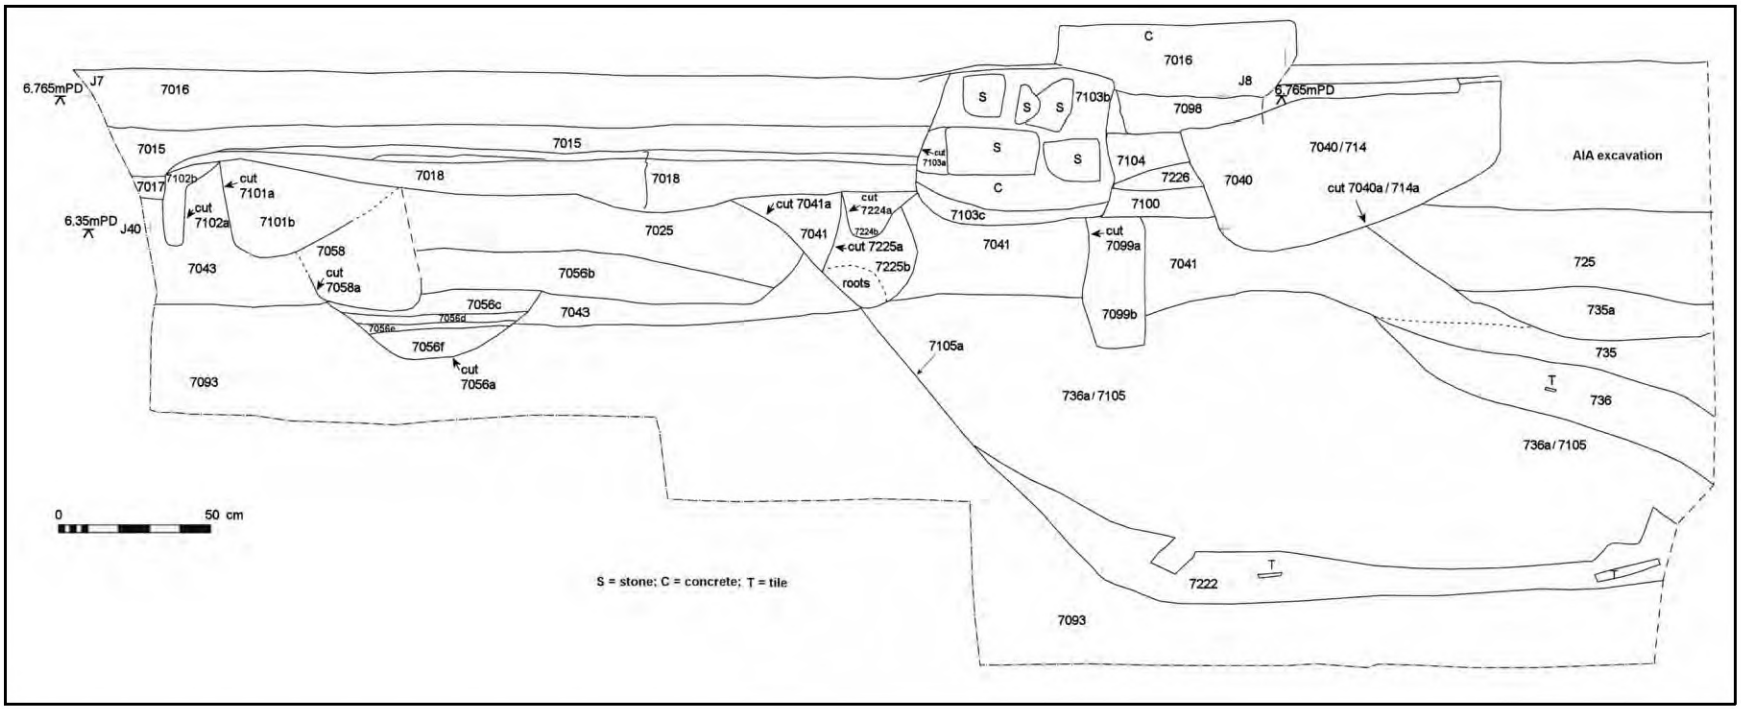


T7.C.18 Ground plan of Western Village Wall; showing blue bricks [**co.7004**], more recent cut granite blocks [**co.7029**] and stone wall boulders [**co.7218**] below.

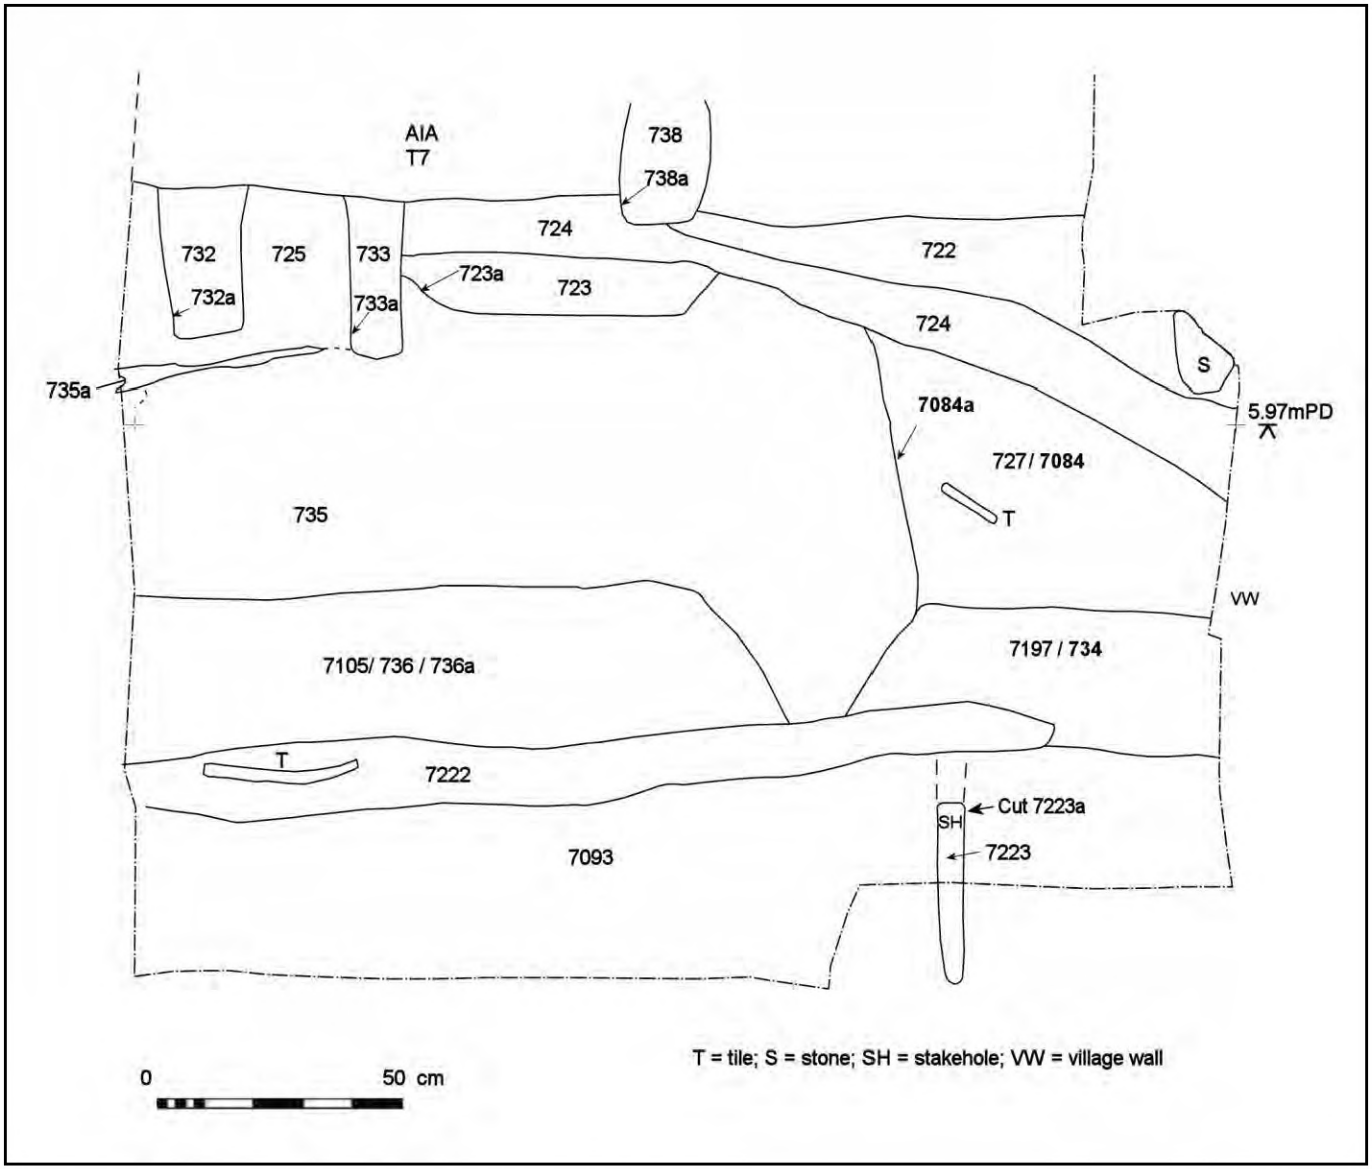


T7.C.19 Plan of northern village wall [**co.7119/7219**].

Stratigraphy Drawings: soil section in VWI

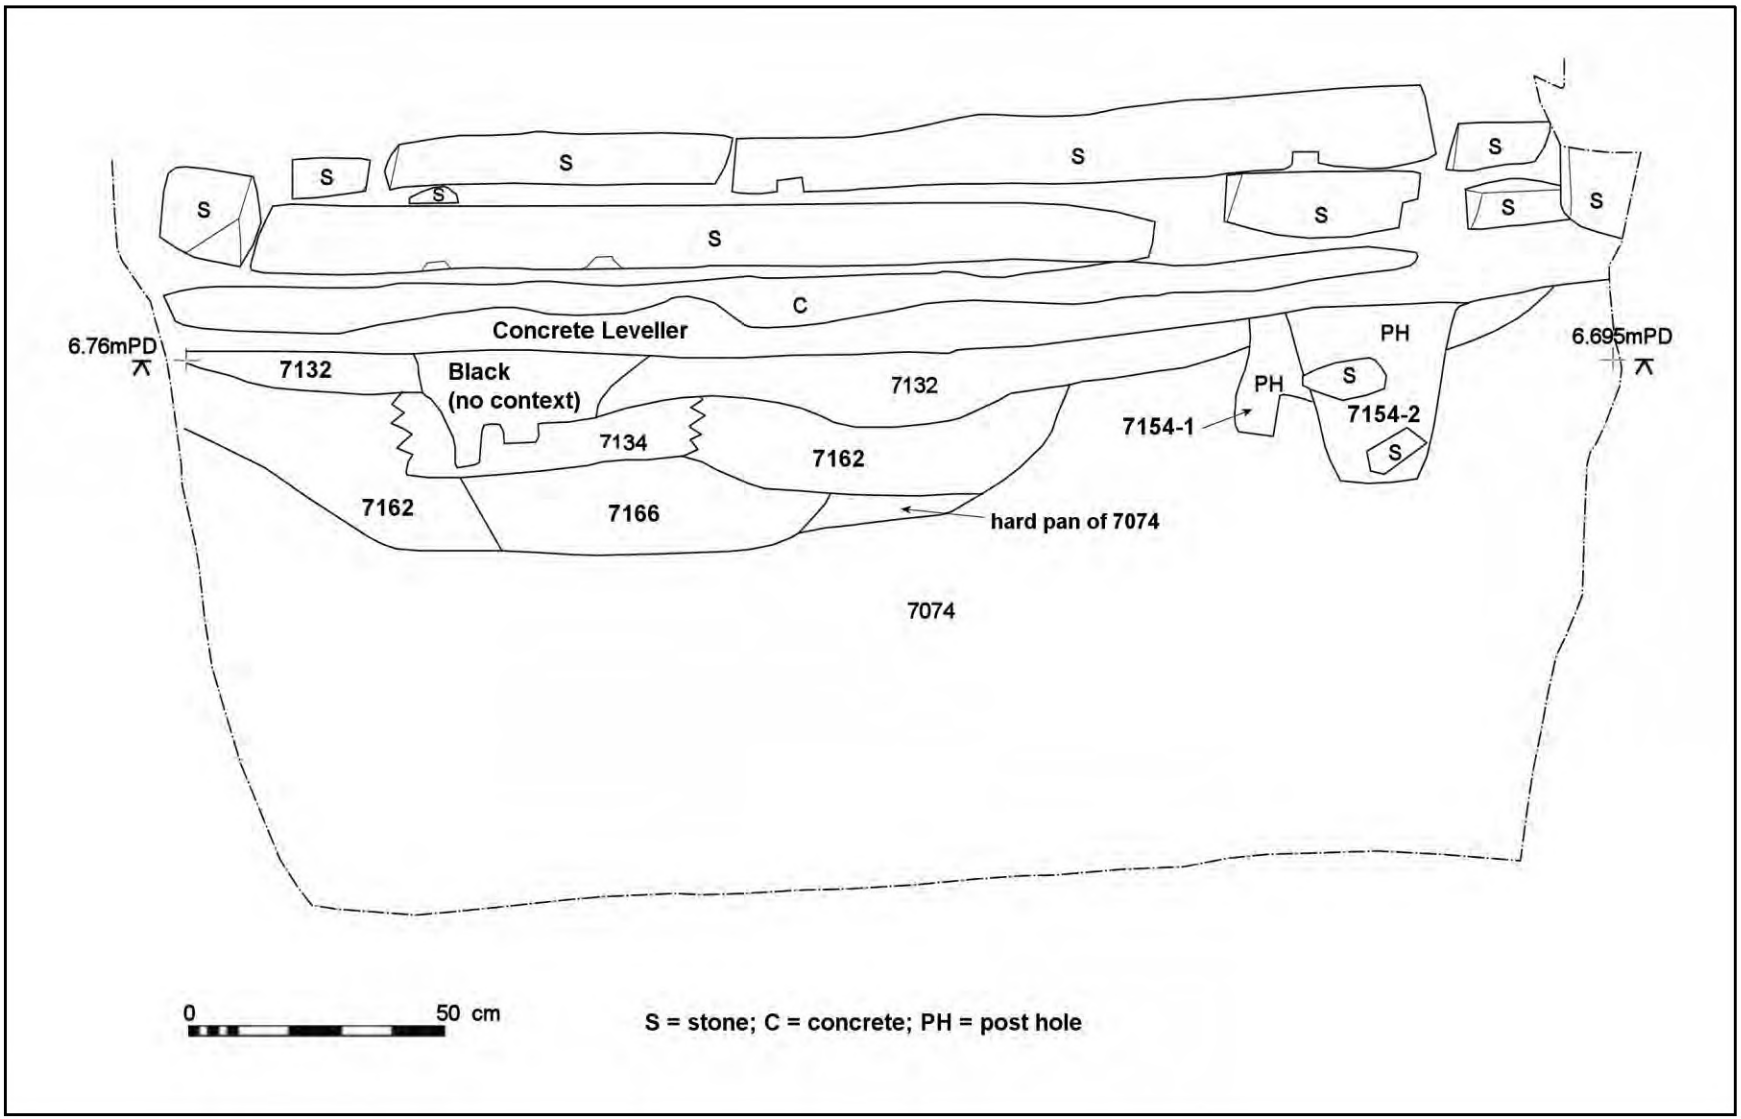


T7.C.20 West facing section of VWI connecting to 2016 AIA T7 excavation

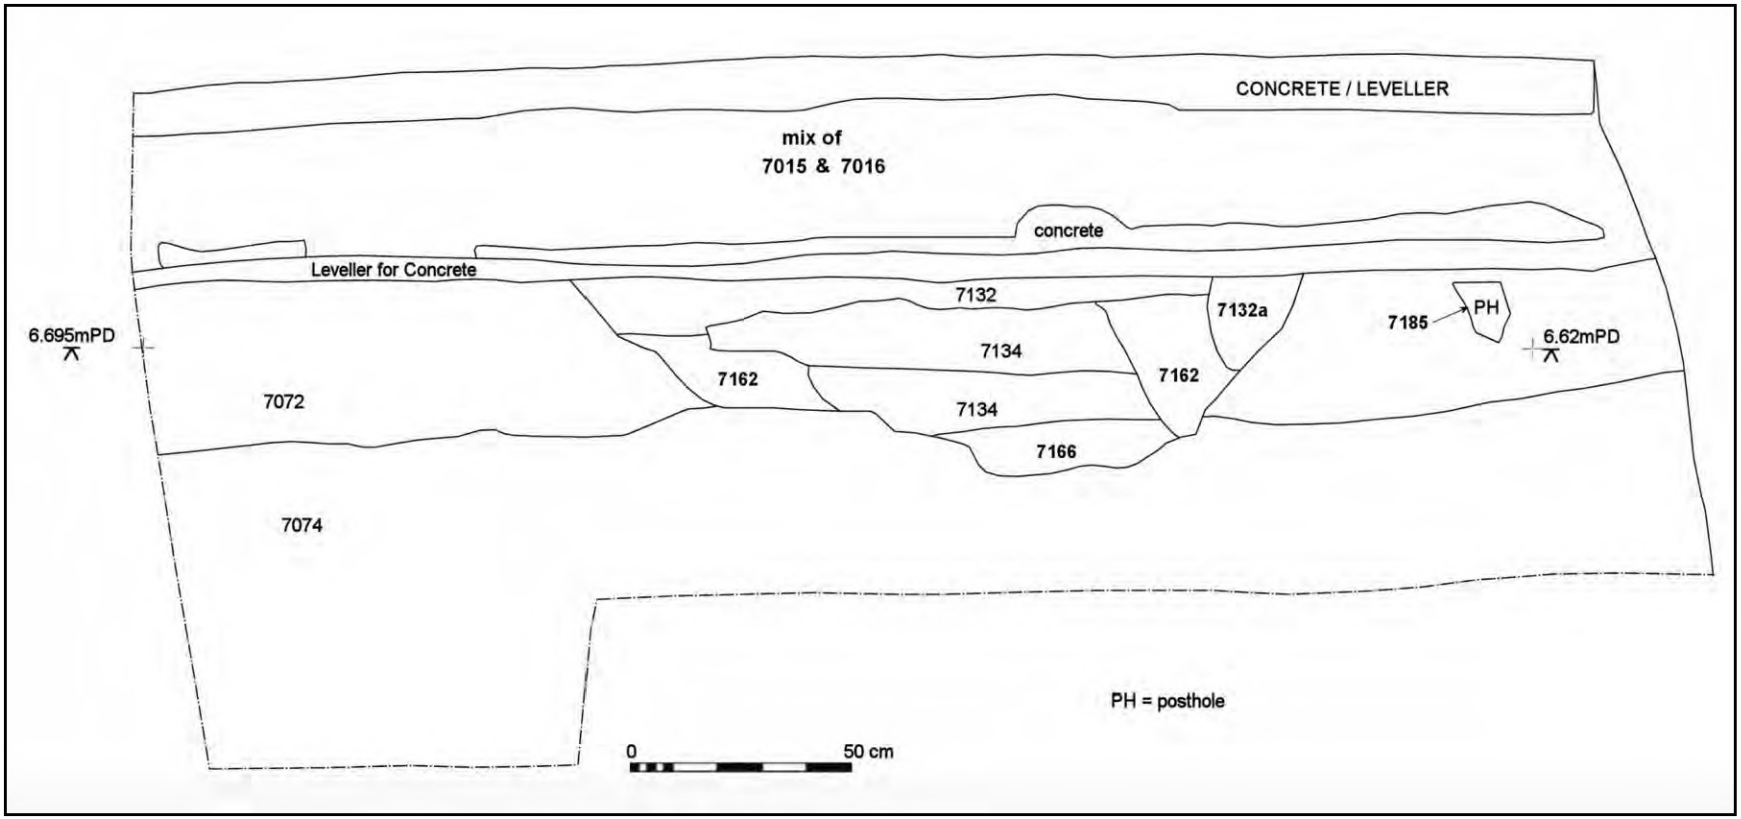


T7.C.21 North facing section of VWI adjacent to western village wall (mostly recorded during 2016 AIA excavation).

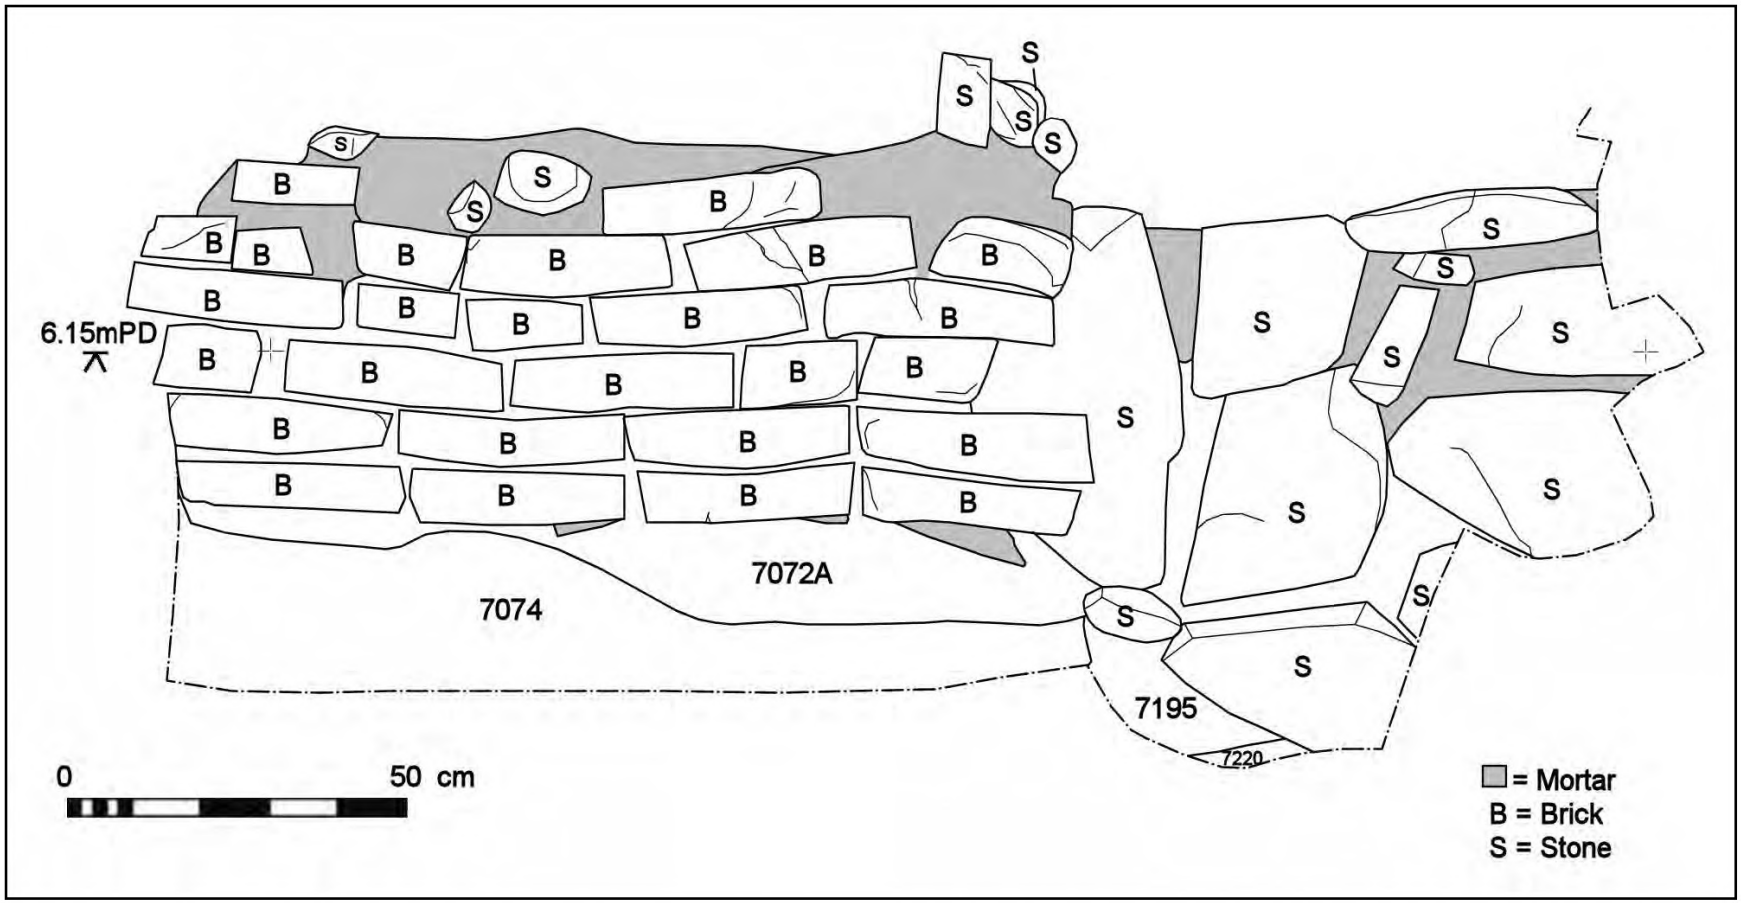
Soil and structural section in WTA



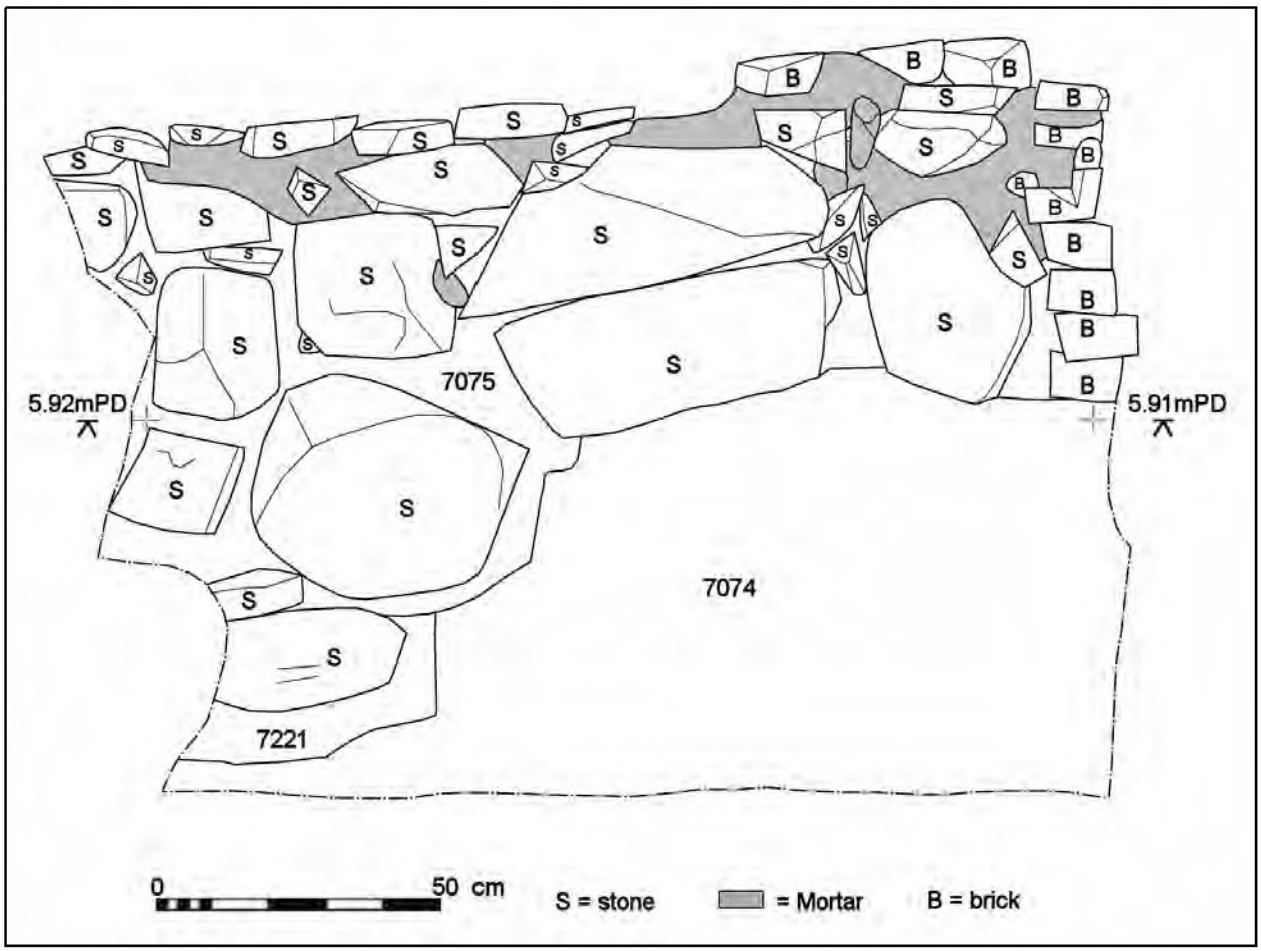
T7.C.22 West facing section of WTA



T7.C.23 North facing section of WTA.

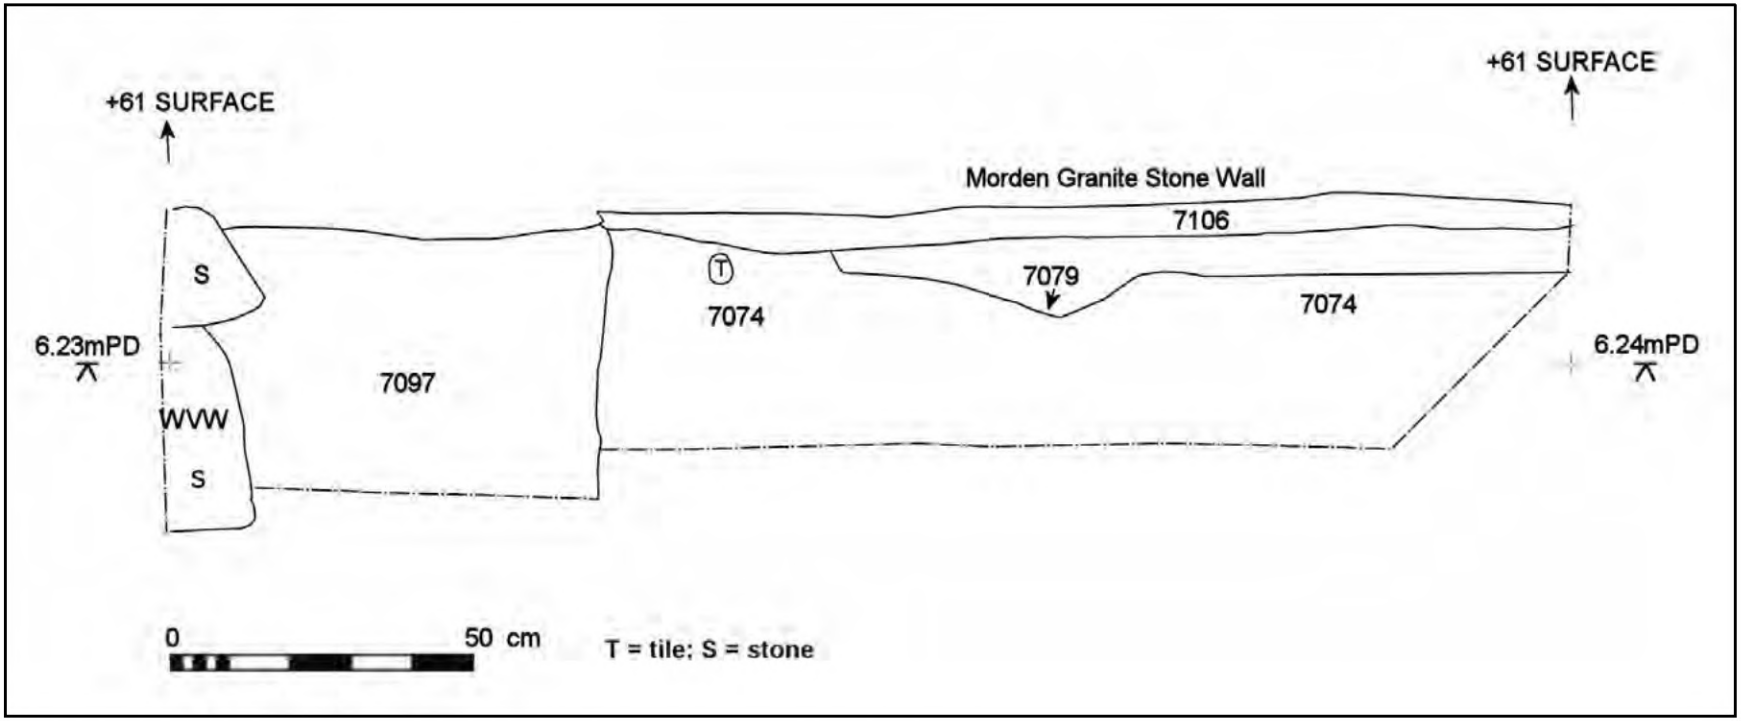


T7.C.24 East facing section of WTR eastern wall exterior brick section [**co.7275**] and stone wall [**co.7273**].

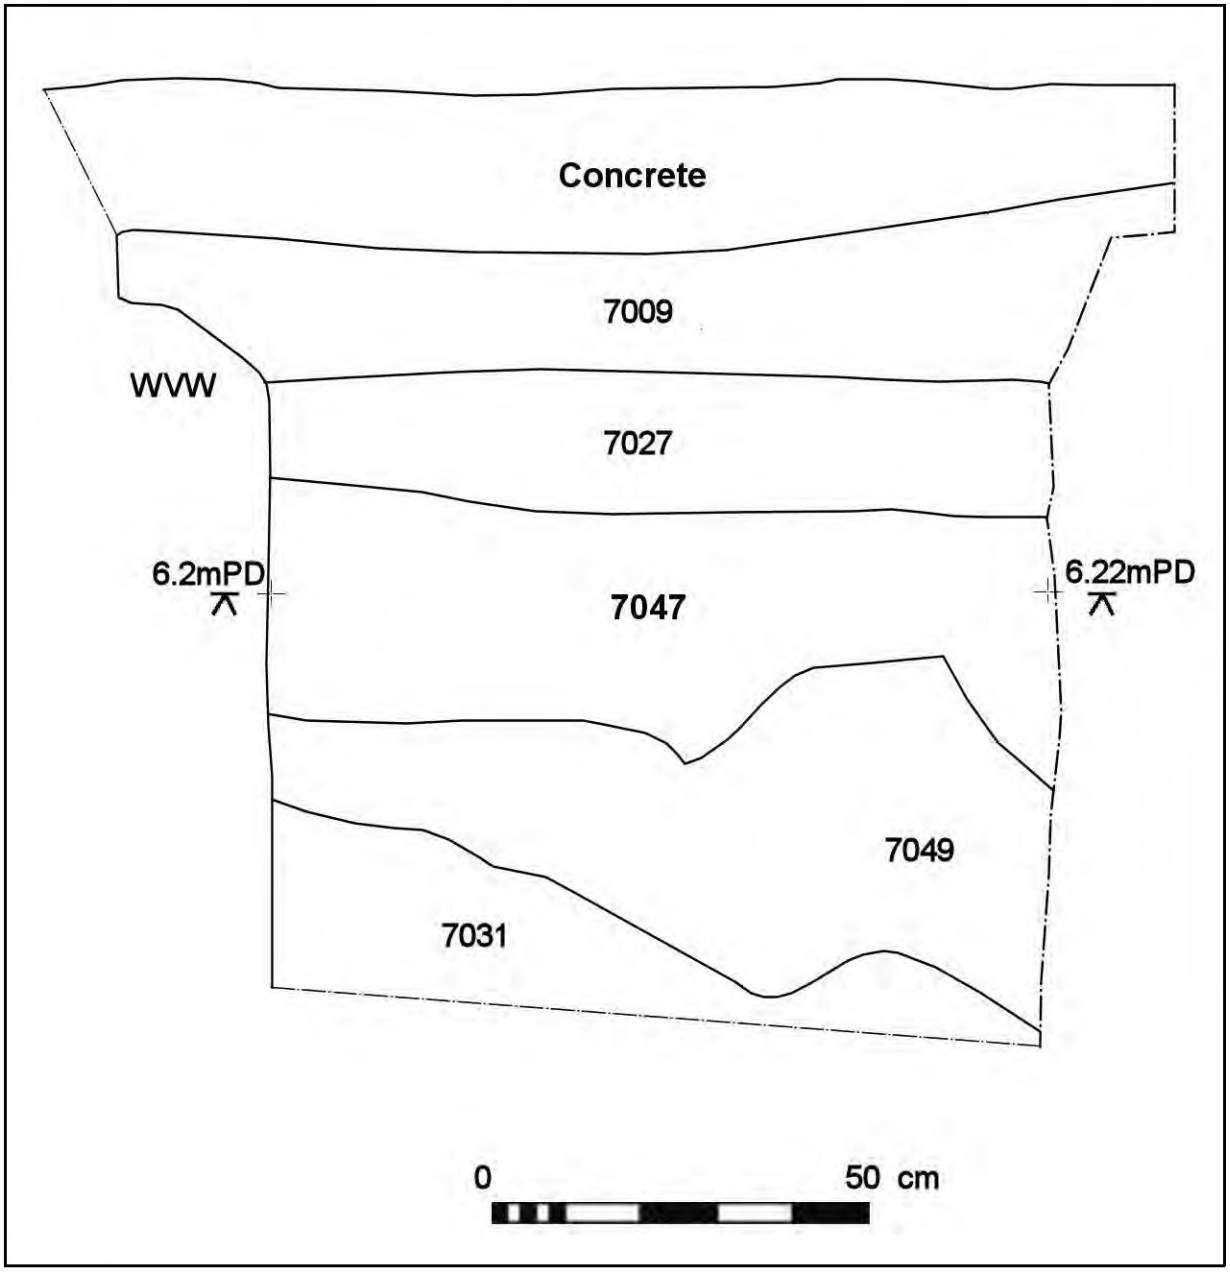


T7.C.25 South facing section of WTR southern wall exterior [**co.7273**], including side profile of brick [**co.7275**].

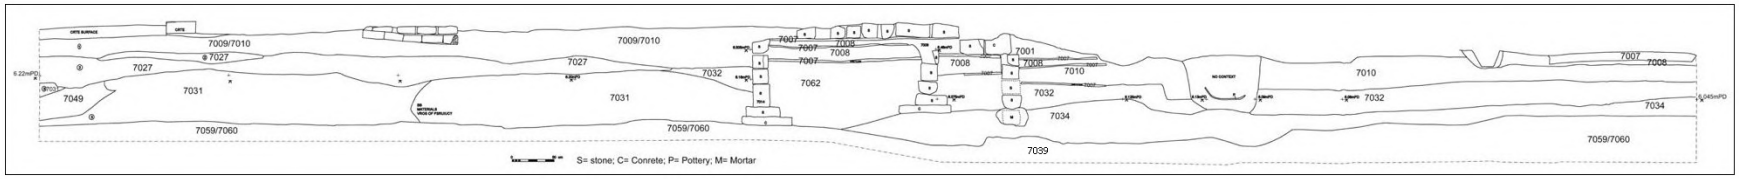
Western and northern moat sections



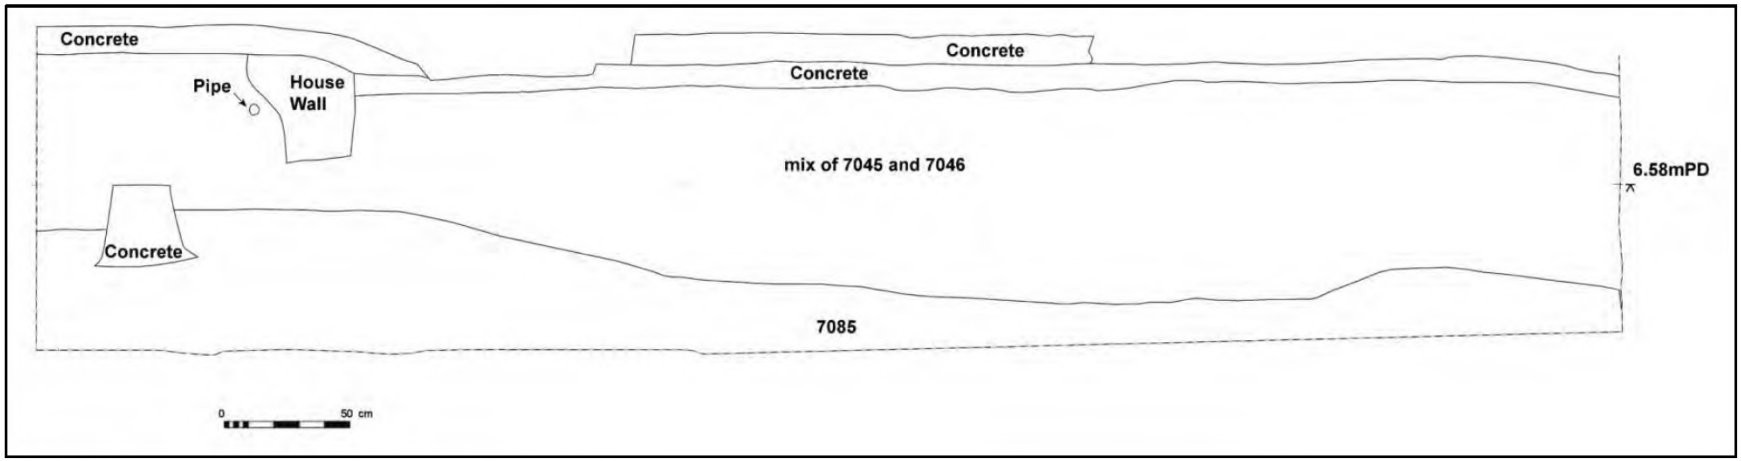
T7.C.26 South facing section of VWI below house stone wall [**co.7277**].



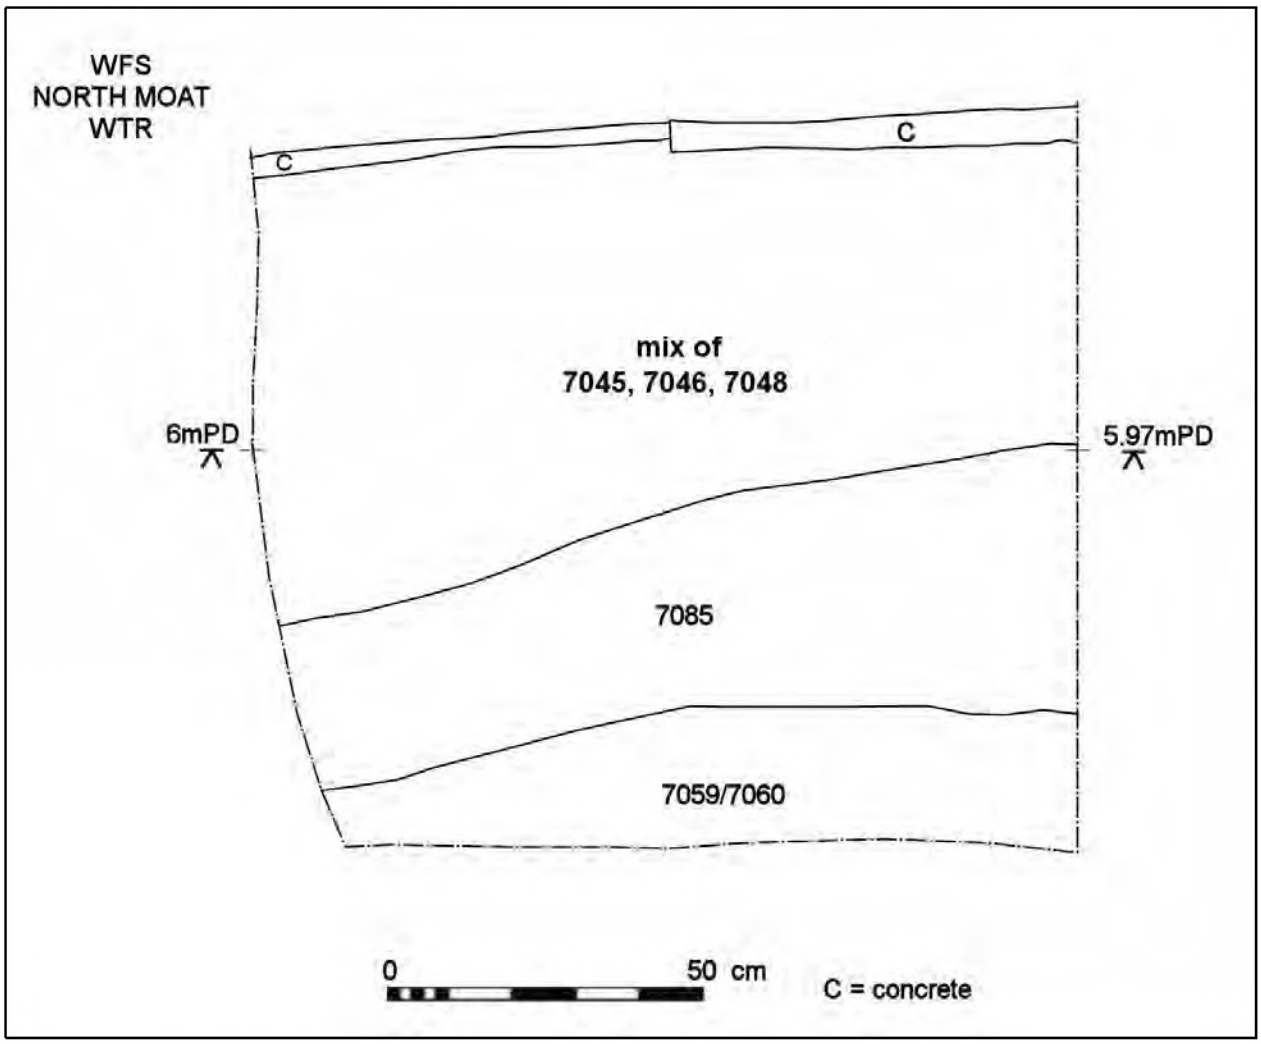
T7.C.27 North facing section of western moat.



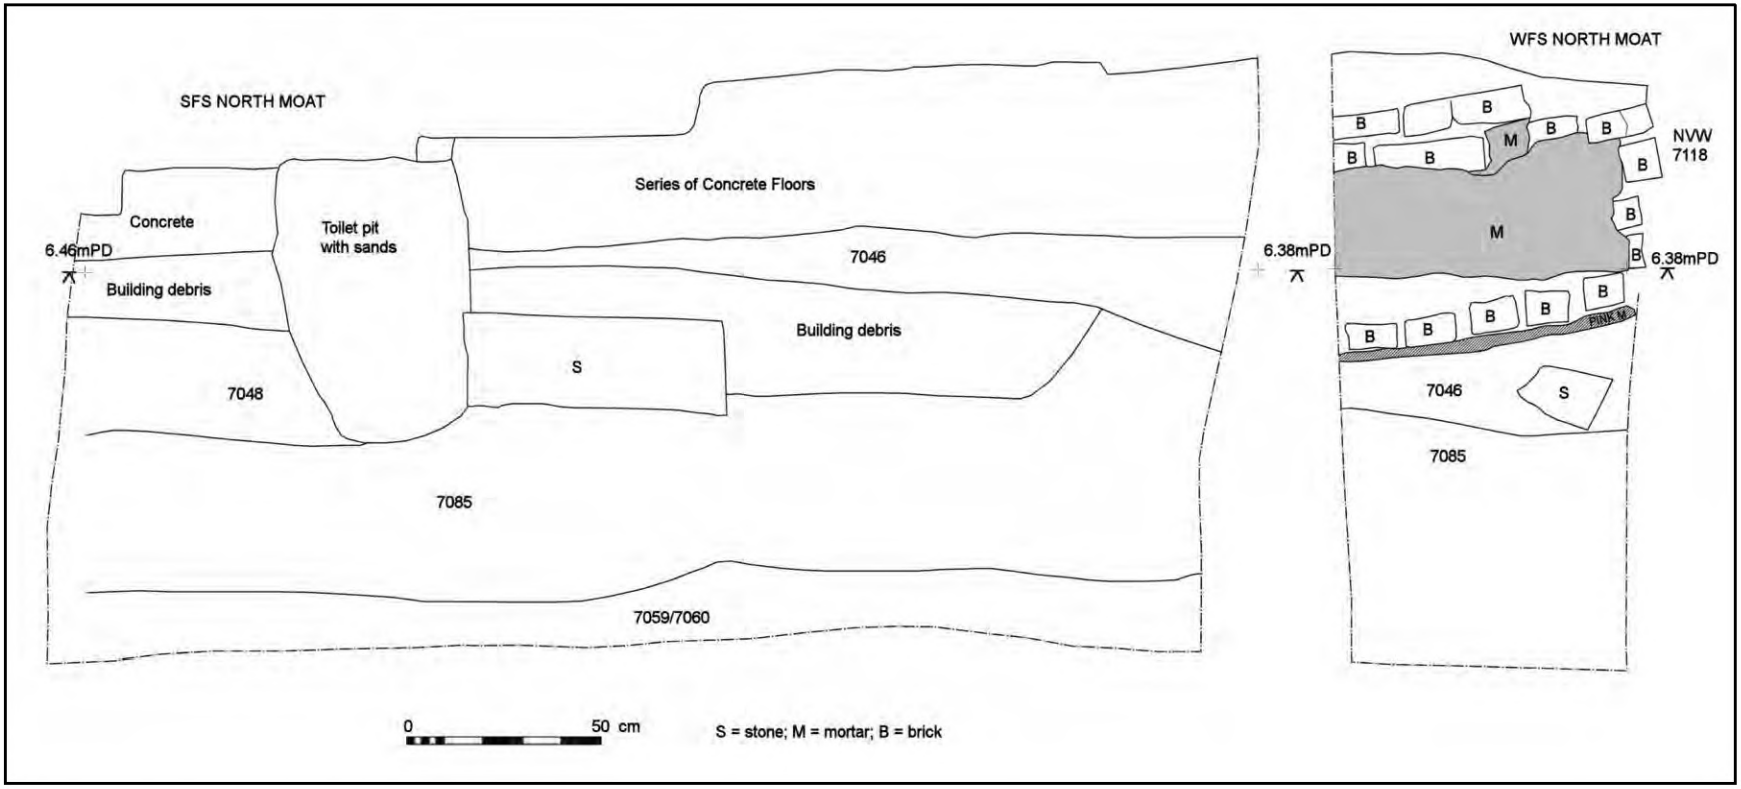
T7.C.28 East facing section of western moat.



T7.C.29 South facing section of northern moat

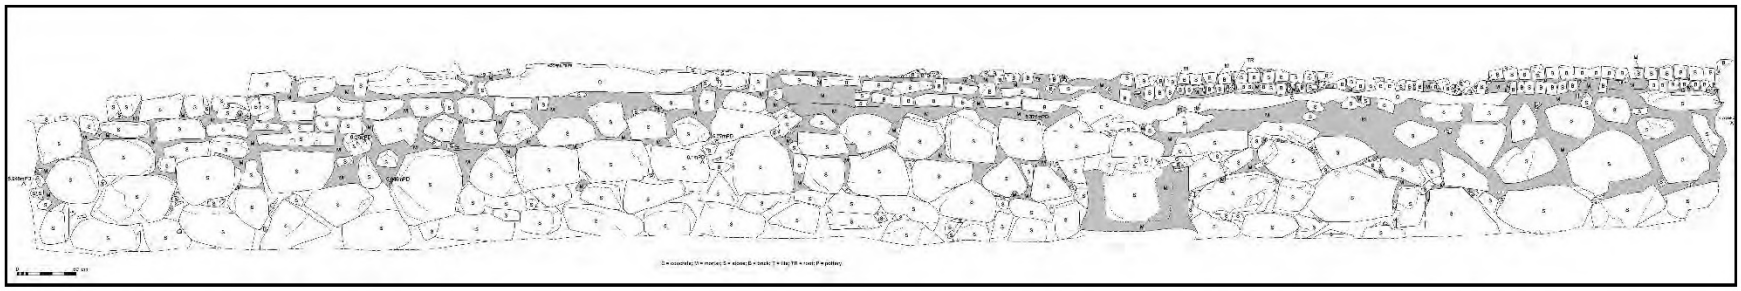


T7.C.30 West facing section of north moat near WTR.

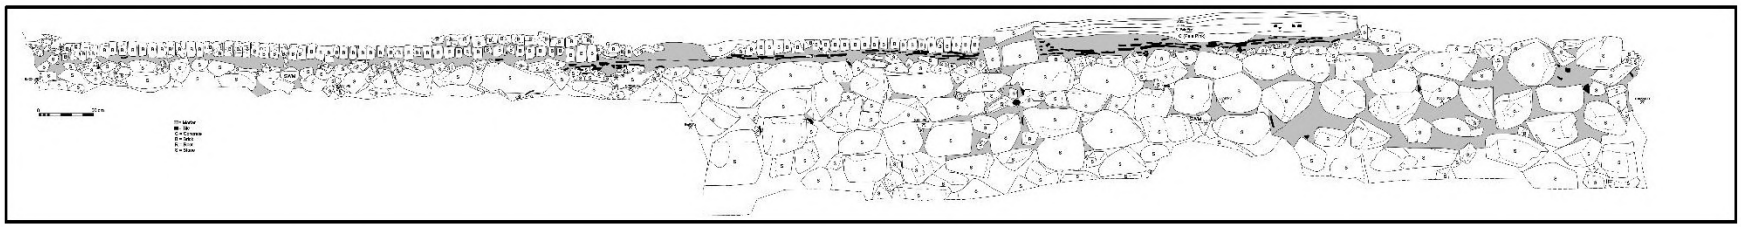


T7.C.31 South facing section and west facing section of North Moat.

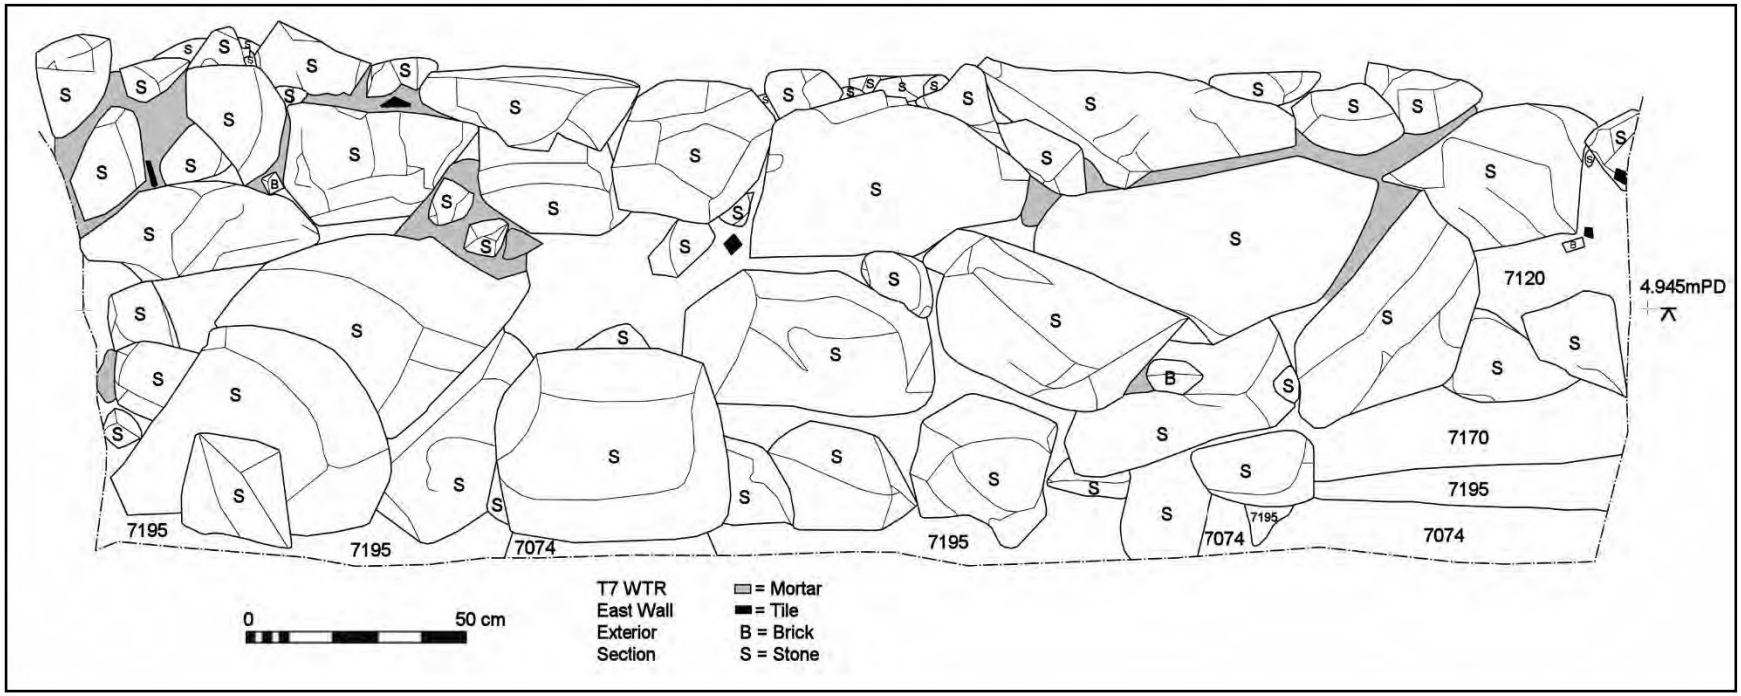
Wall section of village walls



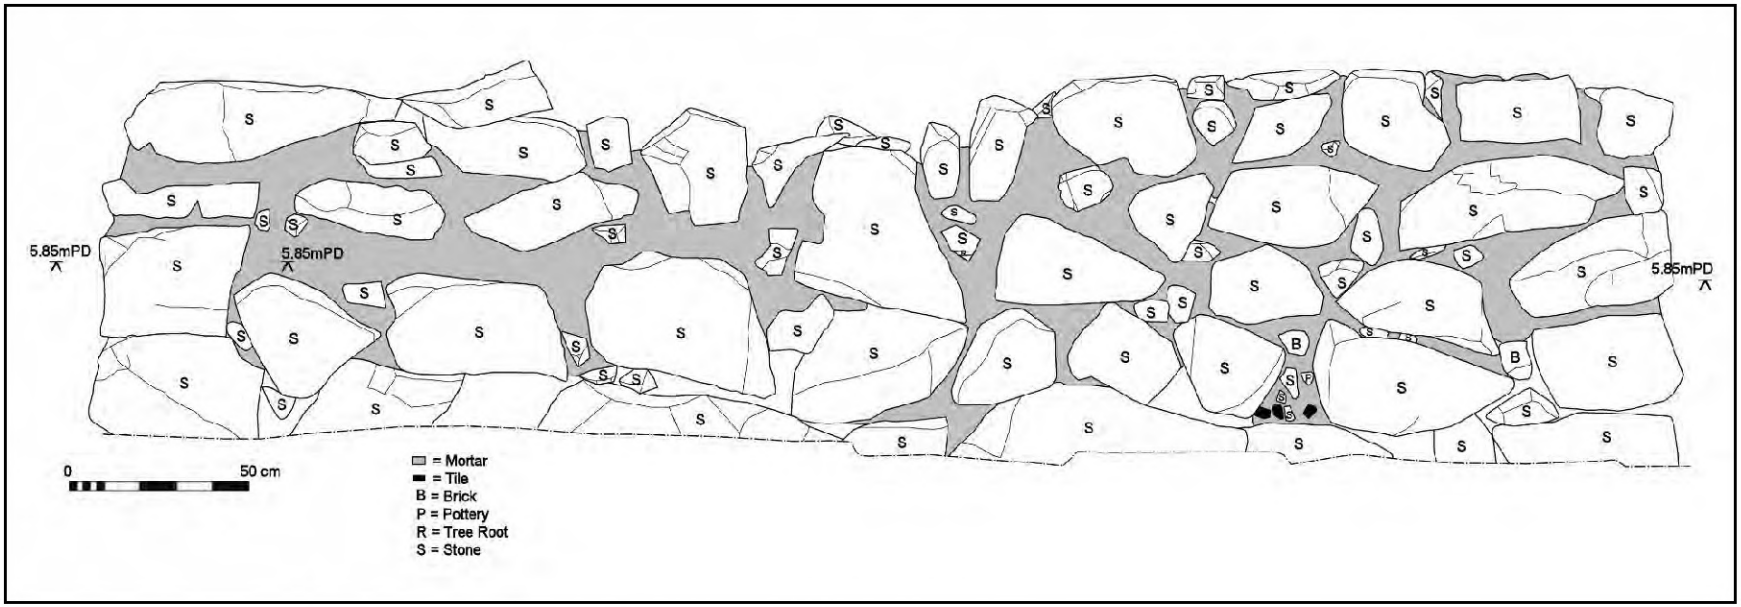
T7.C.32 West facing (exterior) section of western village wall, showing blue bricks [co.7004], cut granite blocks [co.7029] and stone wall boulders [co.7218].



T7.C.33 East facing (interior) section of western village wall, showing blue bricks [**co.7004**] and stone wall boulders [**co.7218**].

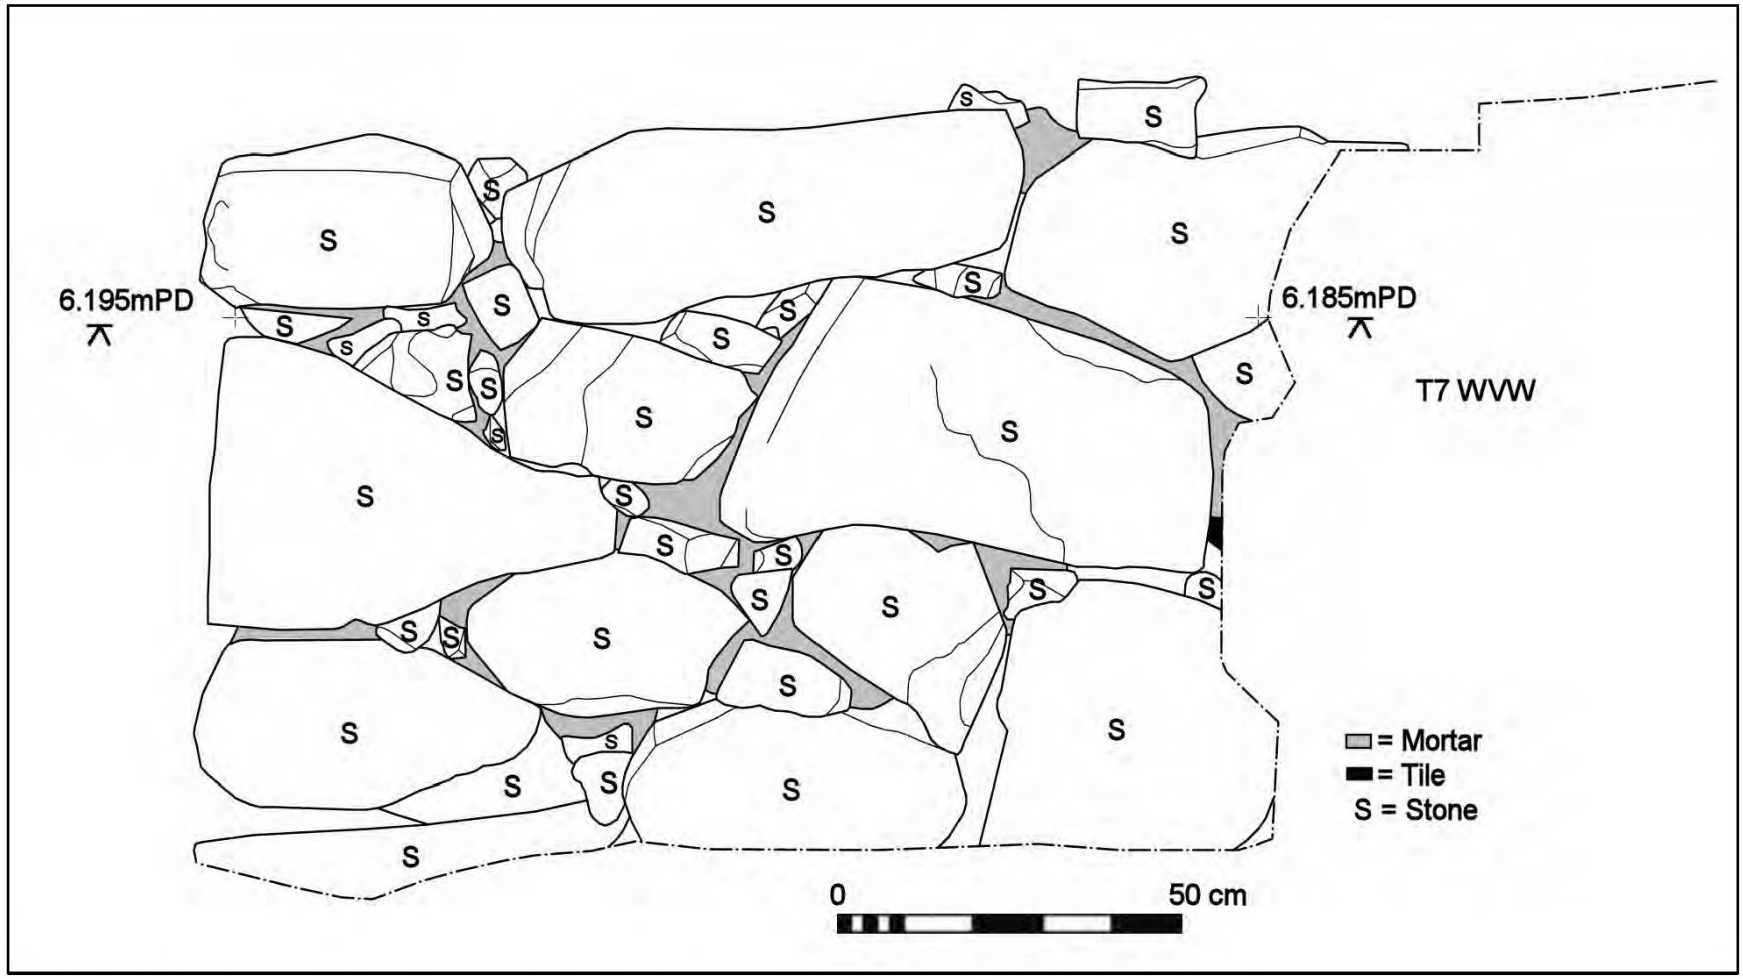


T7.C.34 South facing (interior) elevation of northern village wall [**co.7119/7219**].

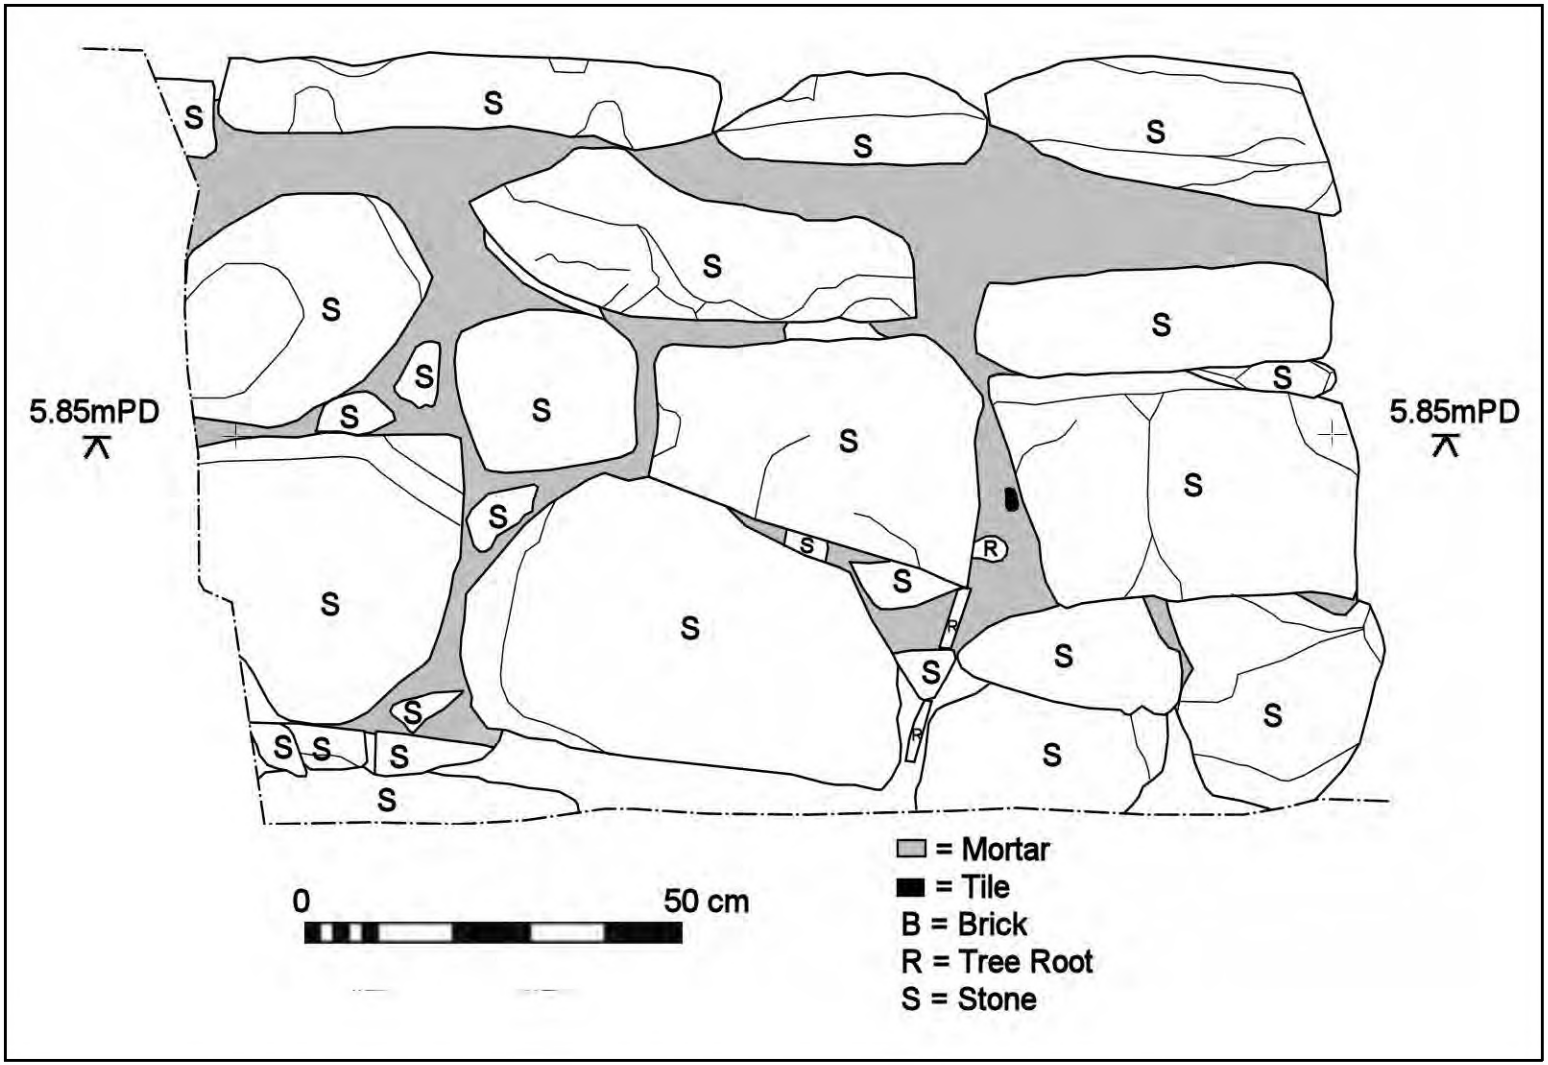


T7.C.35 North facing elevation of northern WTR wall **[co.7273]** exterior.

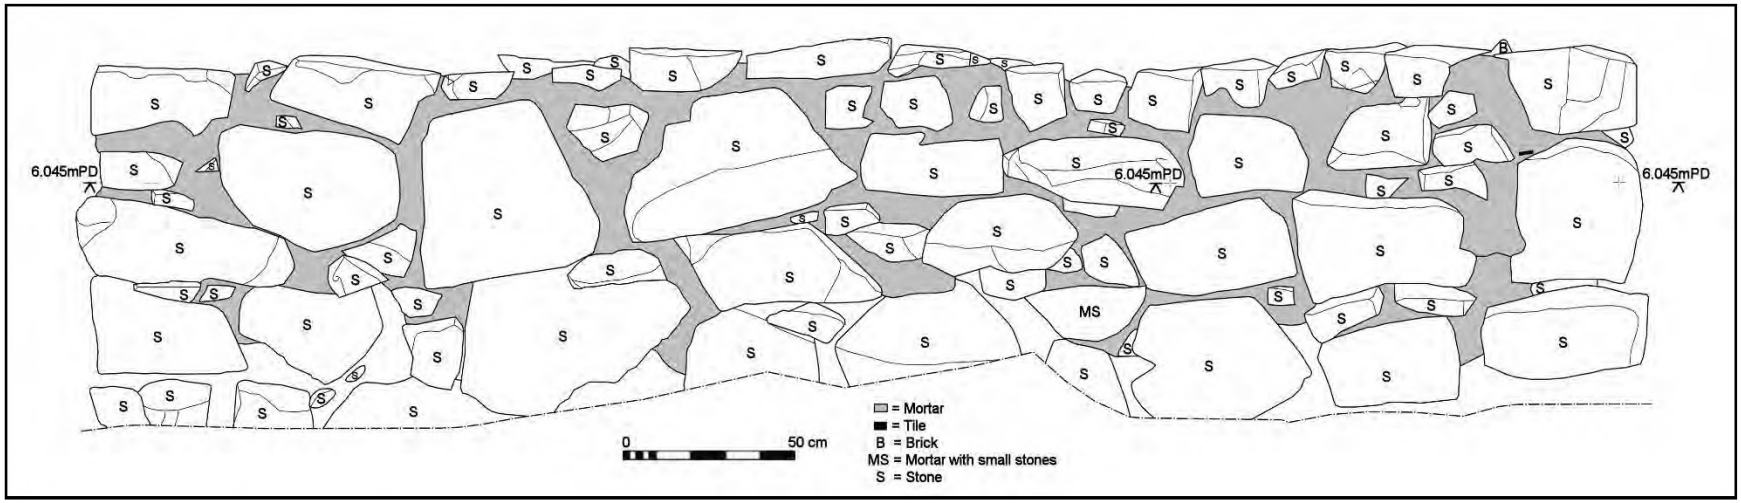
Watch tower room wall sections



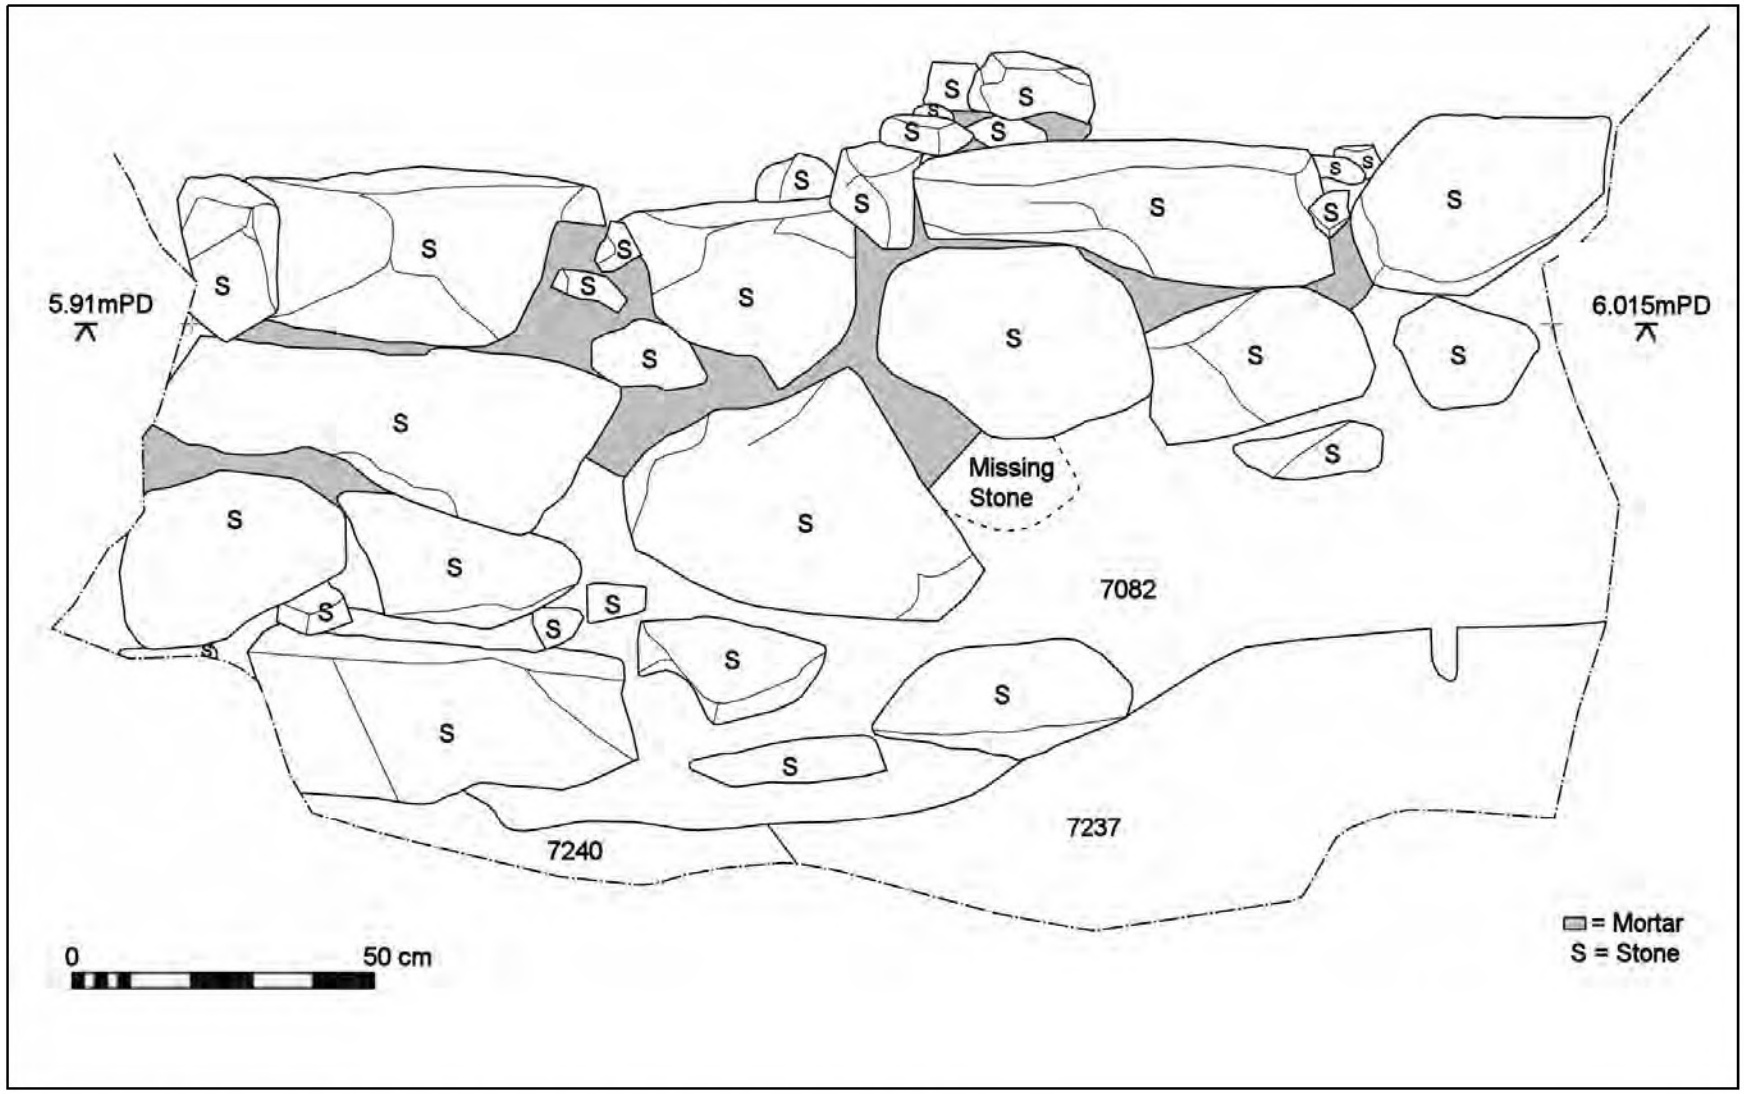
T7.C.36 South facing (exterior) elevation of southern WTR wall [**co.7273**] (western part).



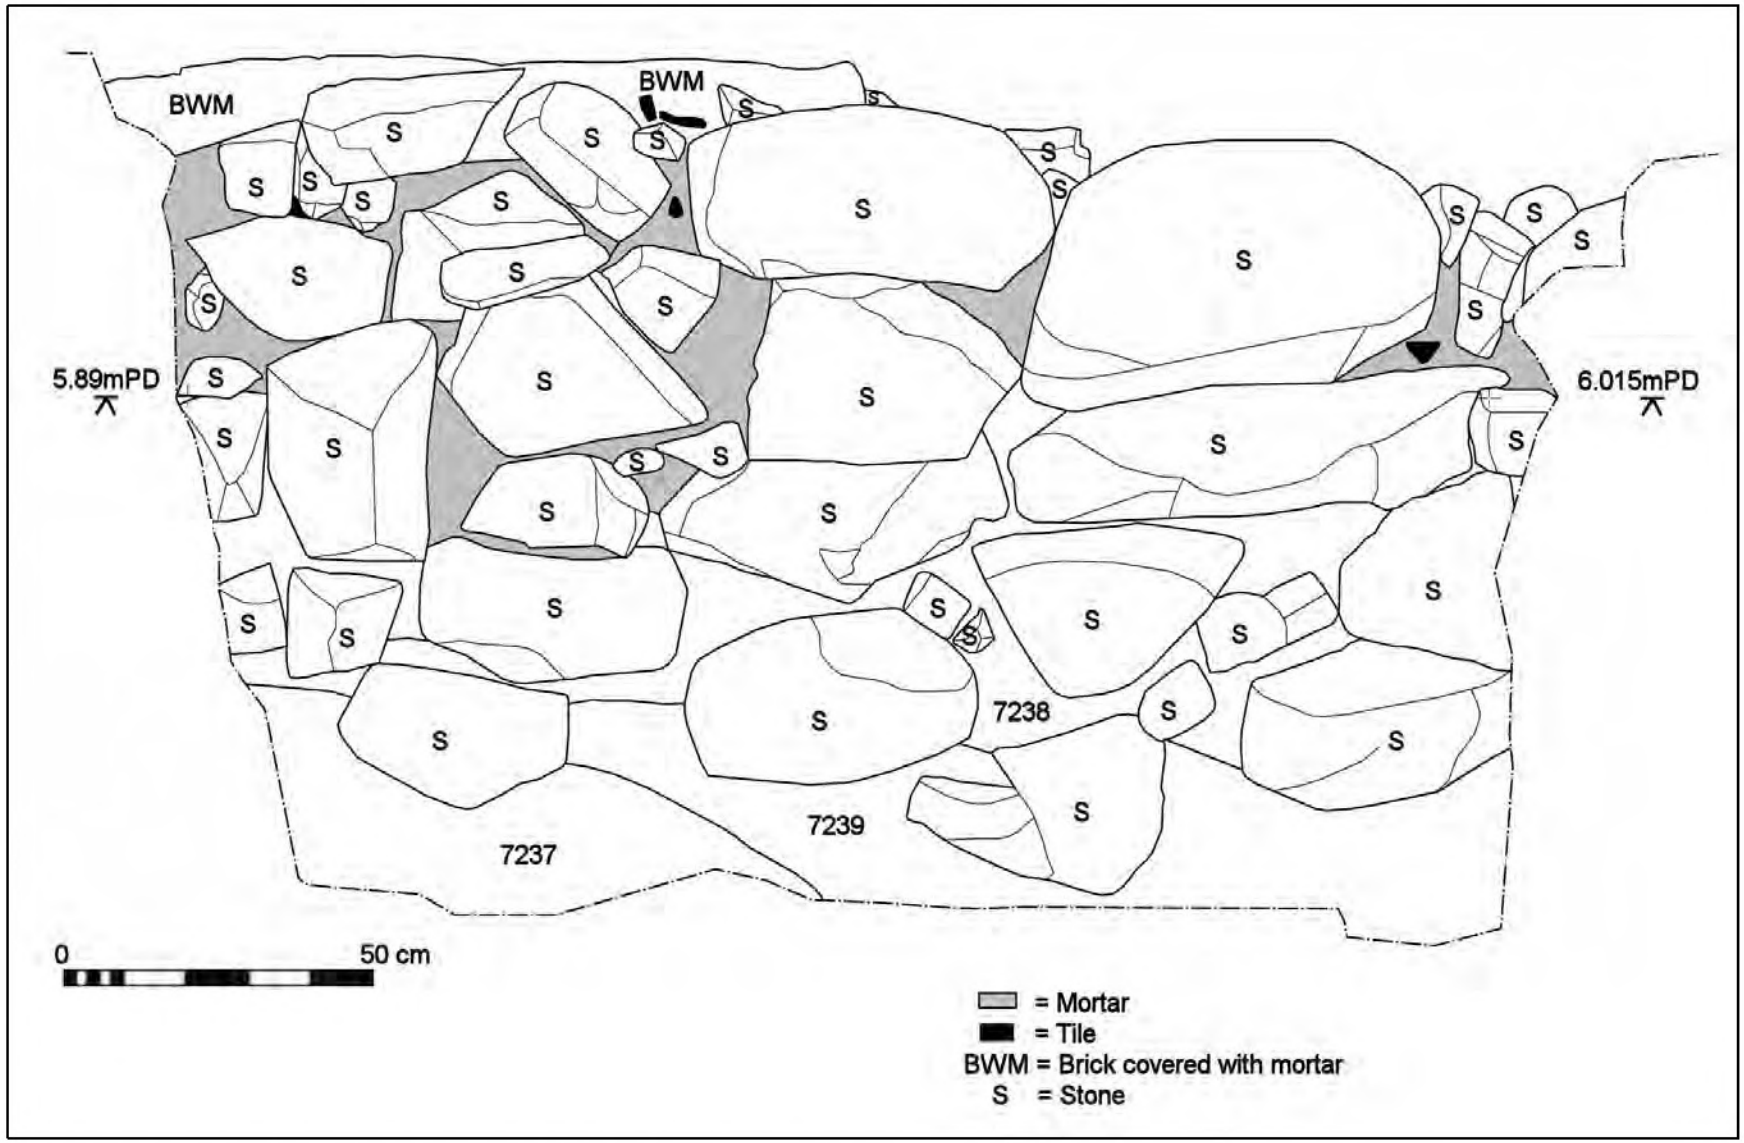
T7.C.37 East facing (exterior) elevation of eastern WTR wall **[co.7273]** (northern part).



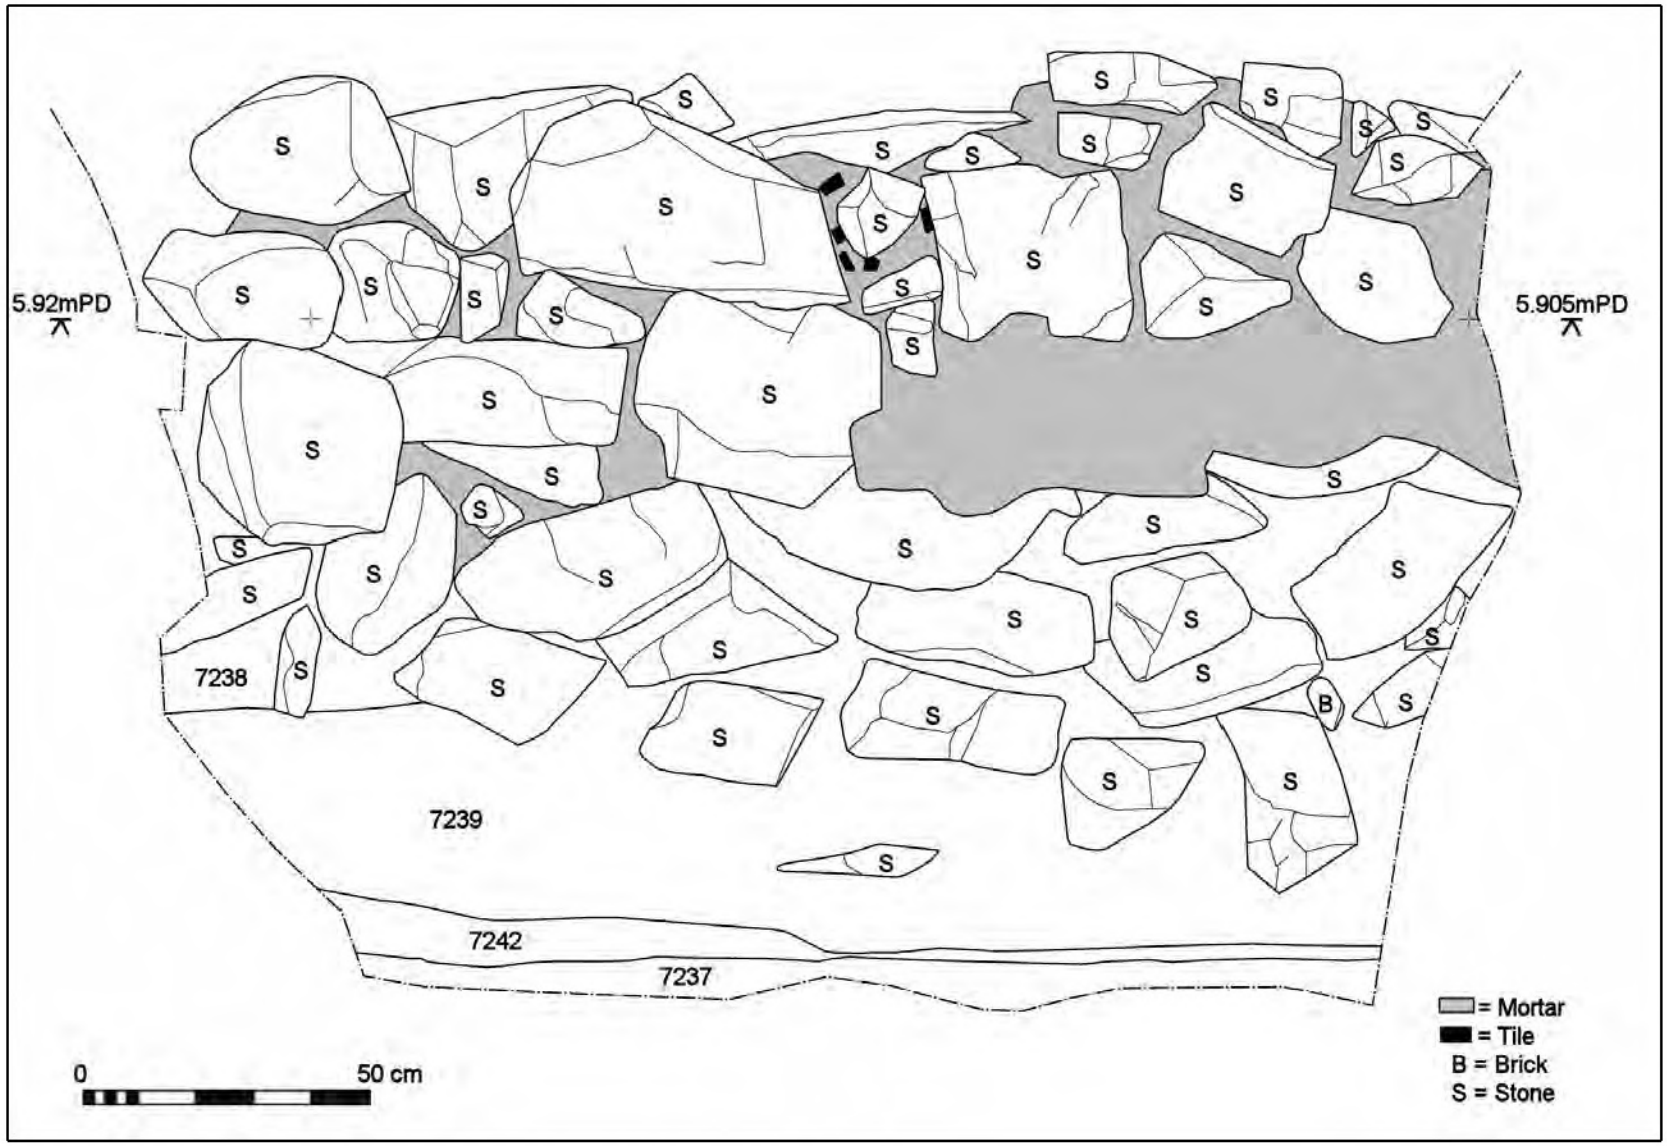
T7.C.38 West facing (exterior) elevation of western WTR wall [**co.7273**].



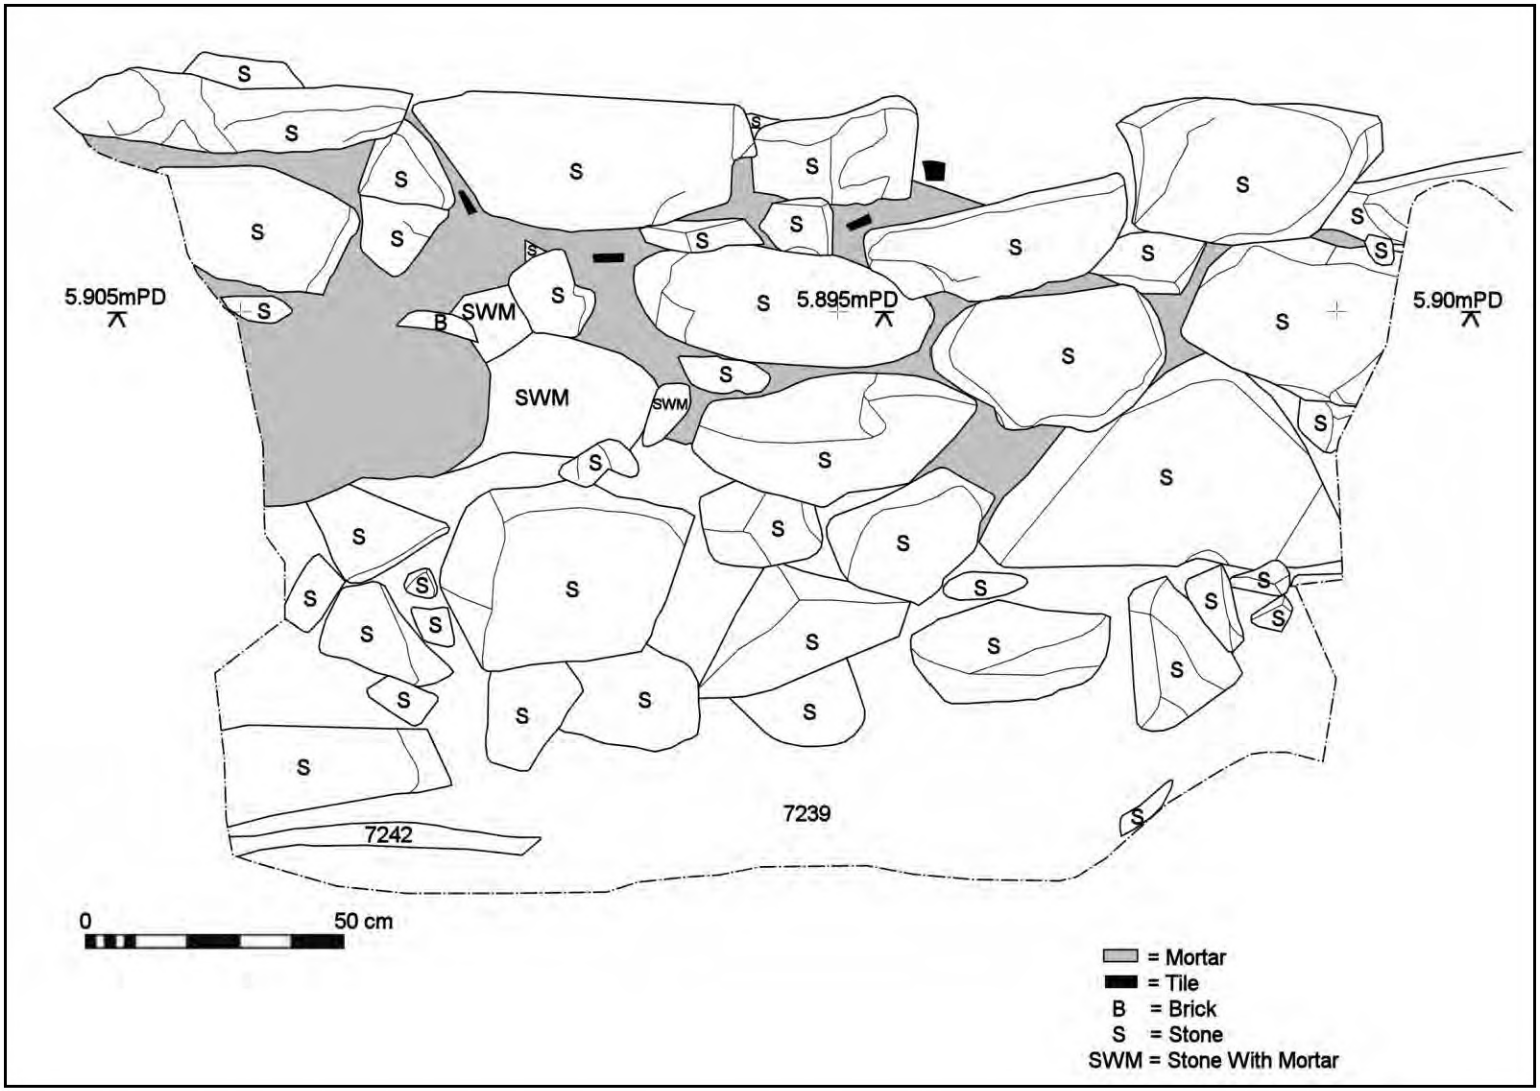
T7.C.39 West facing (interior) elevation of eastern WTR wall [**co.7273**].



T7.C.40 North facing (interior) elevation of southern WTR wall [**co.7273**].

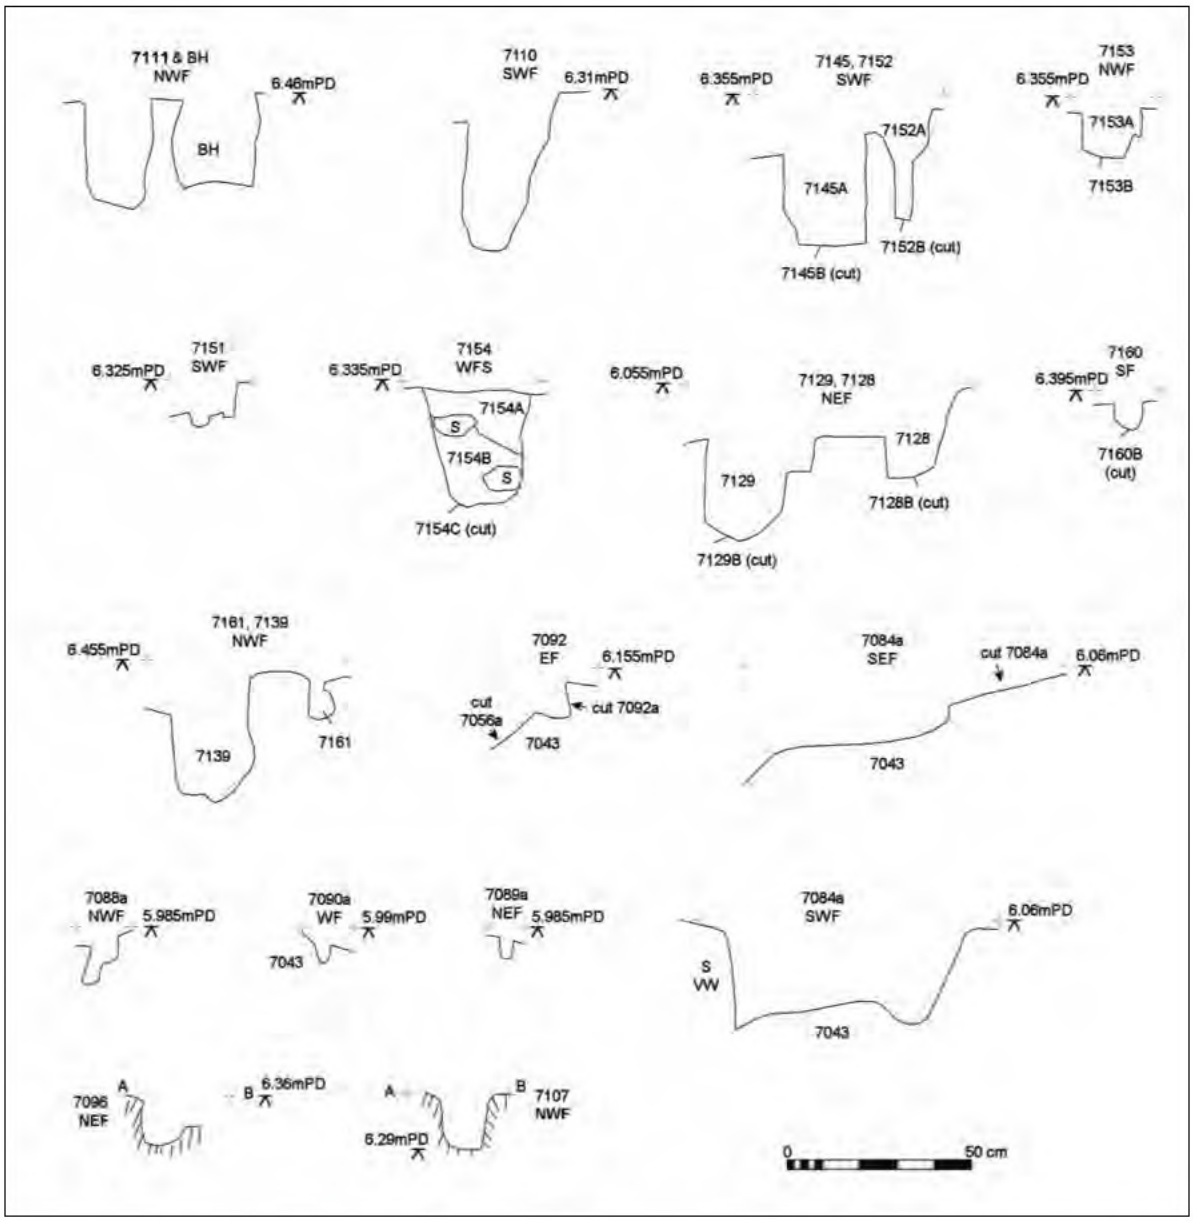


T7.C.41 East facing (interior) elevation of western WTR wall [**co.7273**].

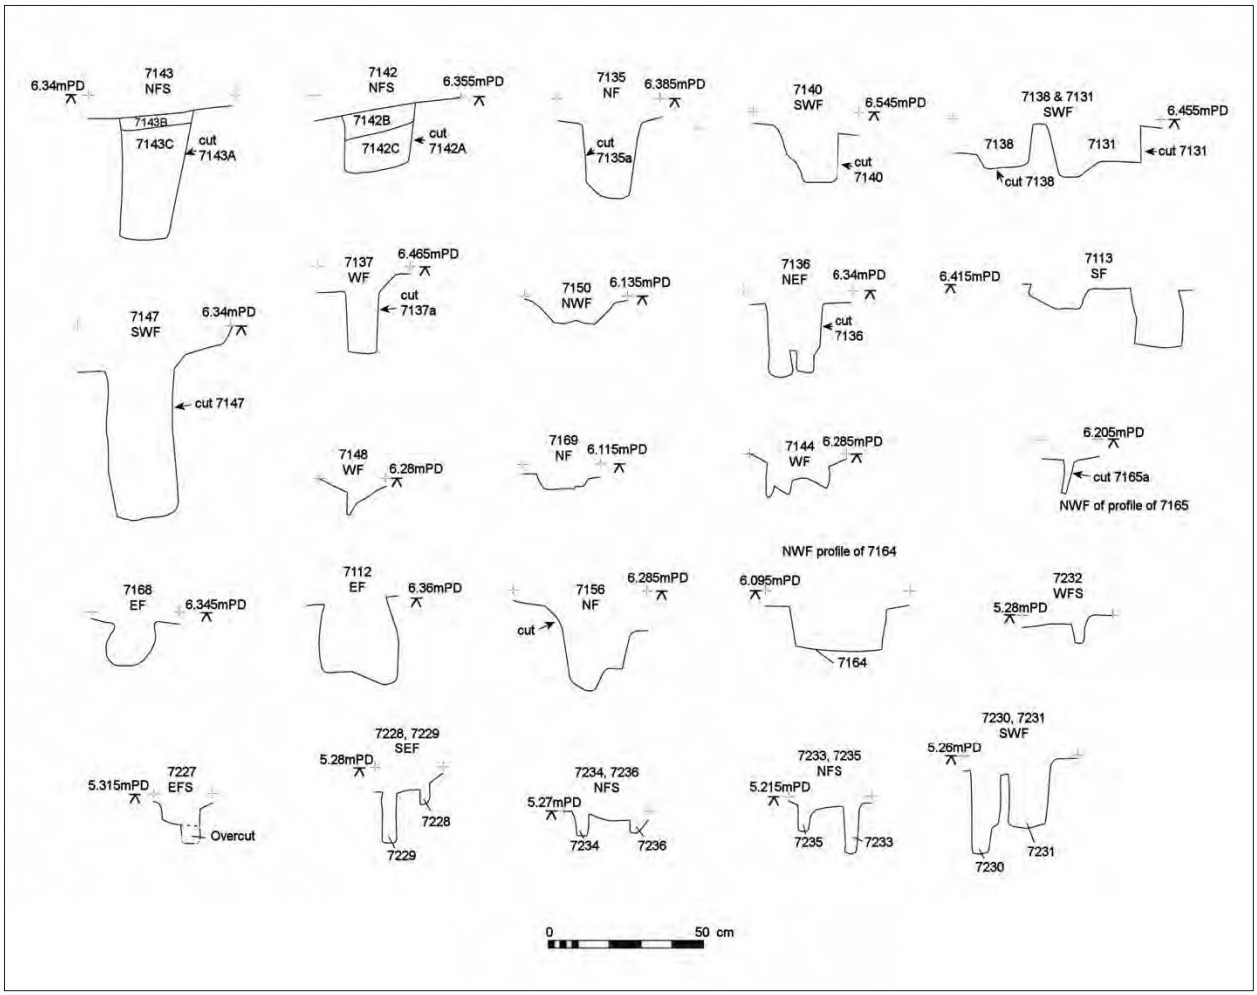


T7.C.42 South facing (interior) elevation of northern WTR wall **[co.7273]**.

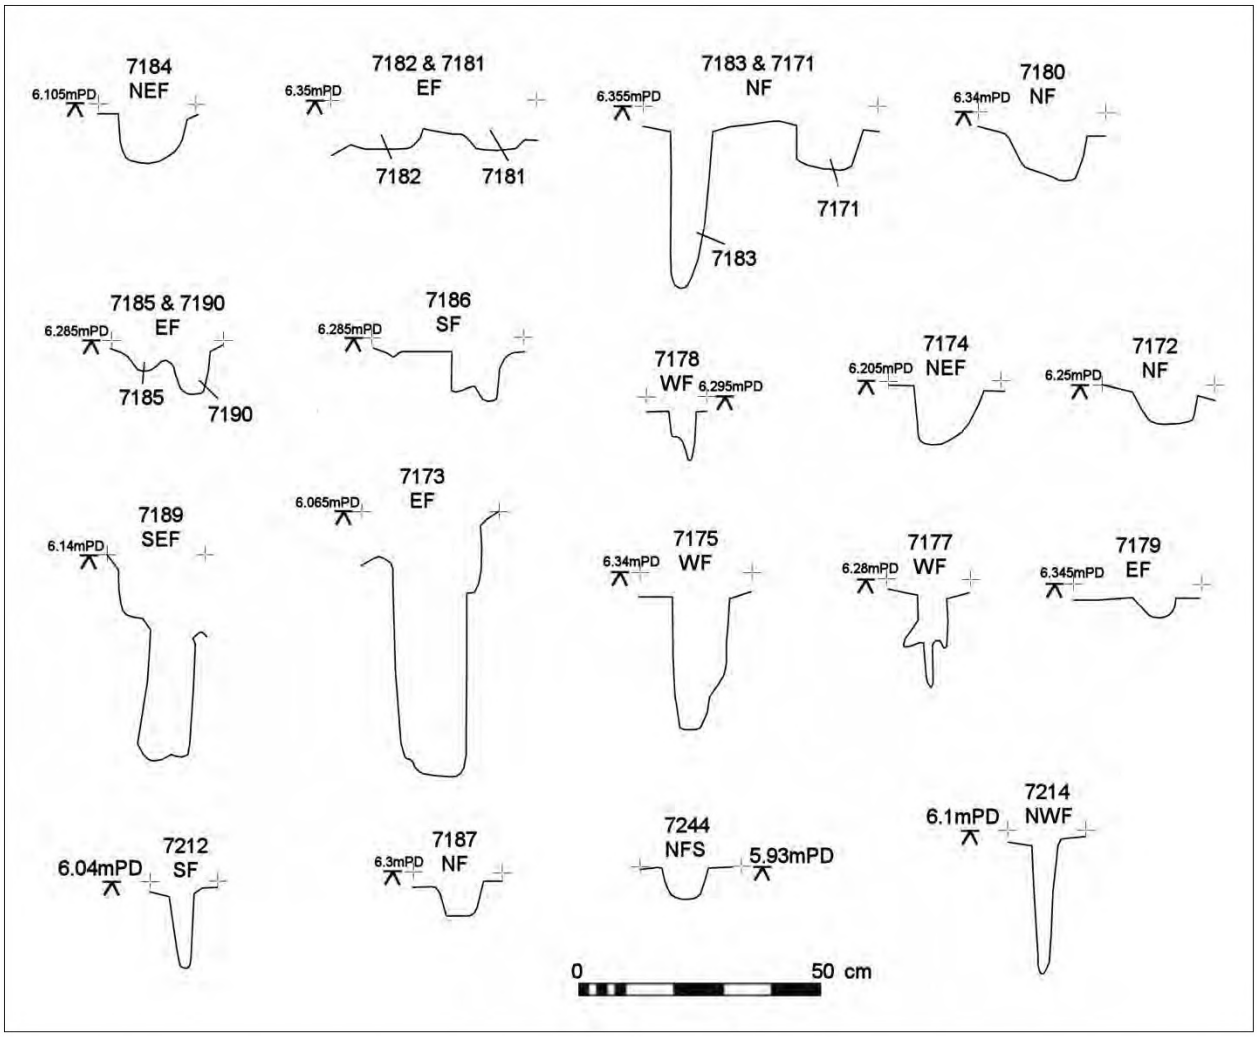
Post and stake hole profiles



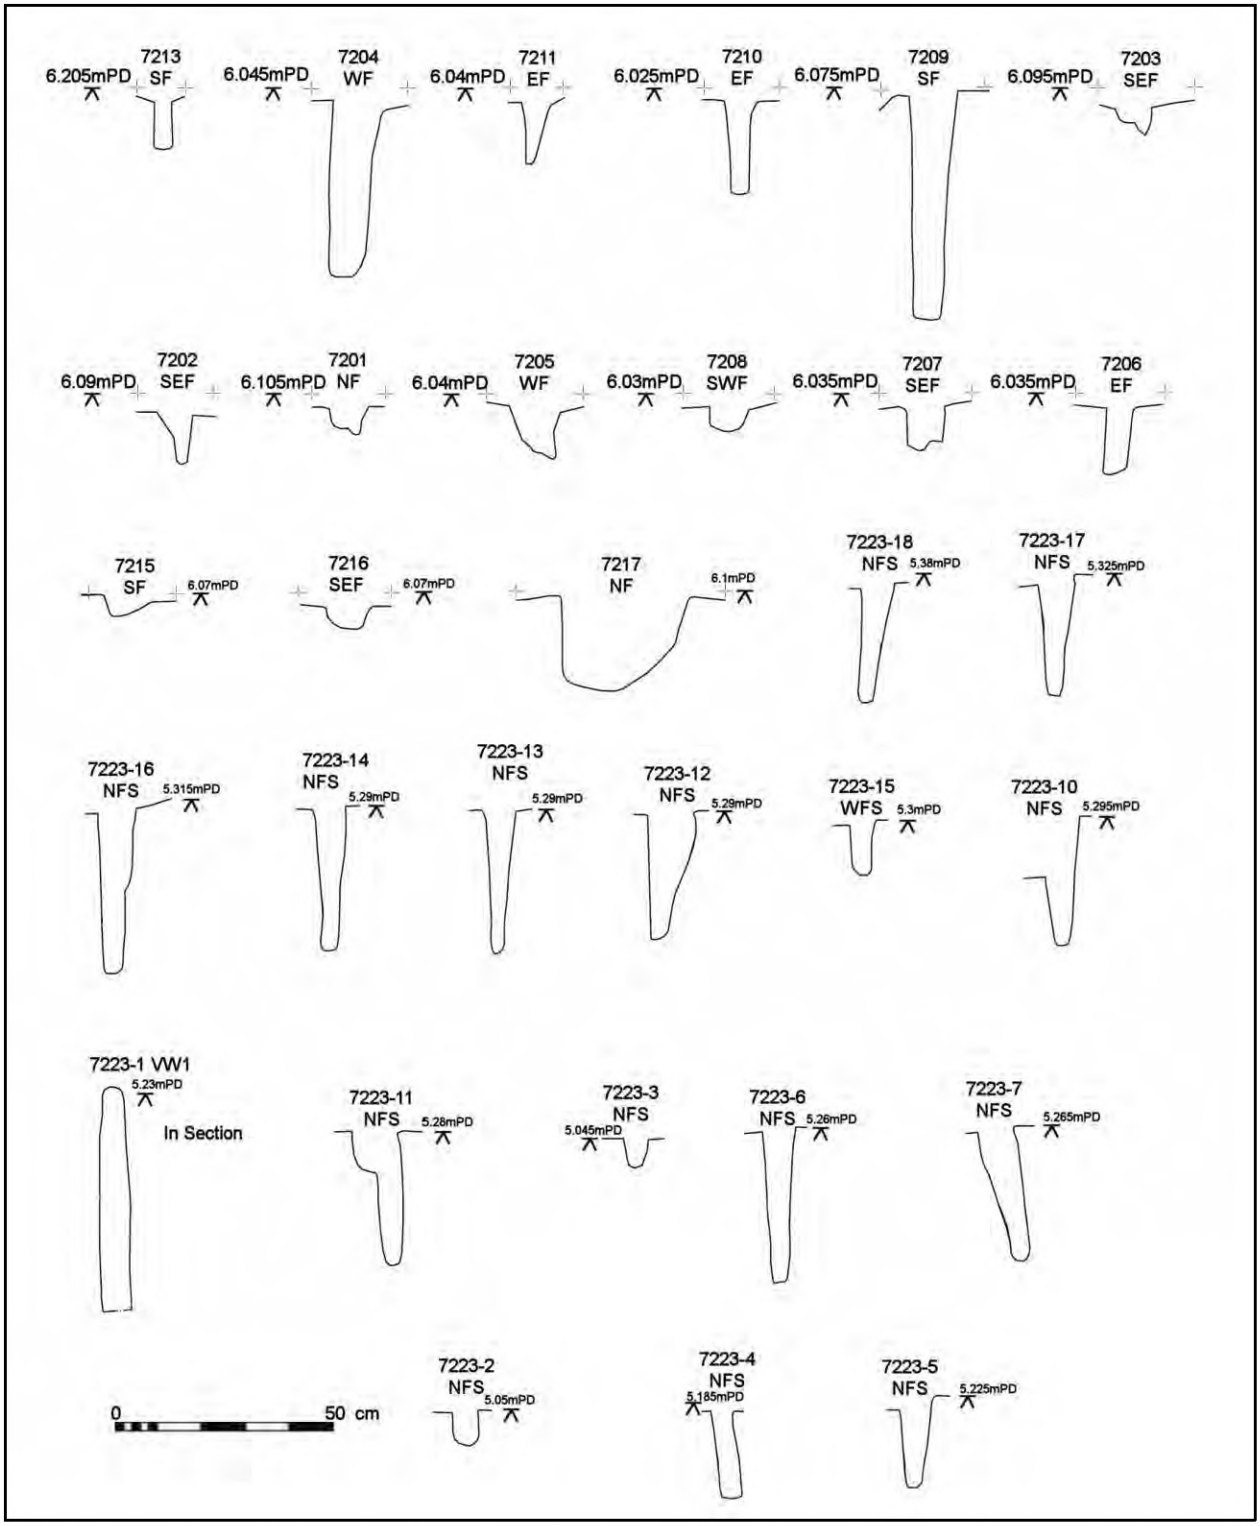
T7.C.43 Profiles for stake holes and postholes [**co. 7111, BH, 7110, 7145, 7152, 7153, 7151, 7154, 7129, 7128, 7160, 7139, 7161, 7092, 7084a, 7088a, 7090a, 7089a, 7096, 7107**].



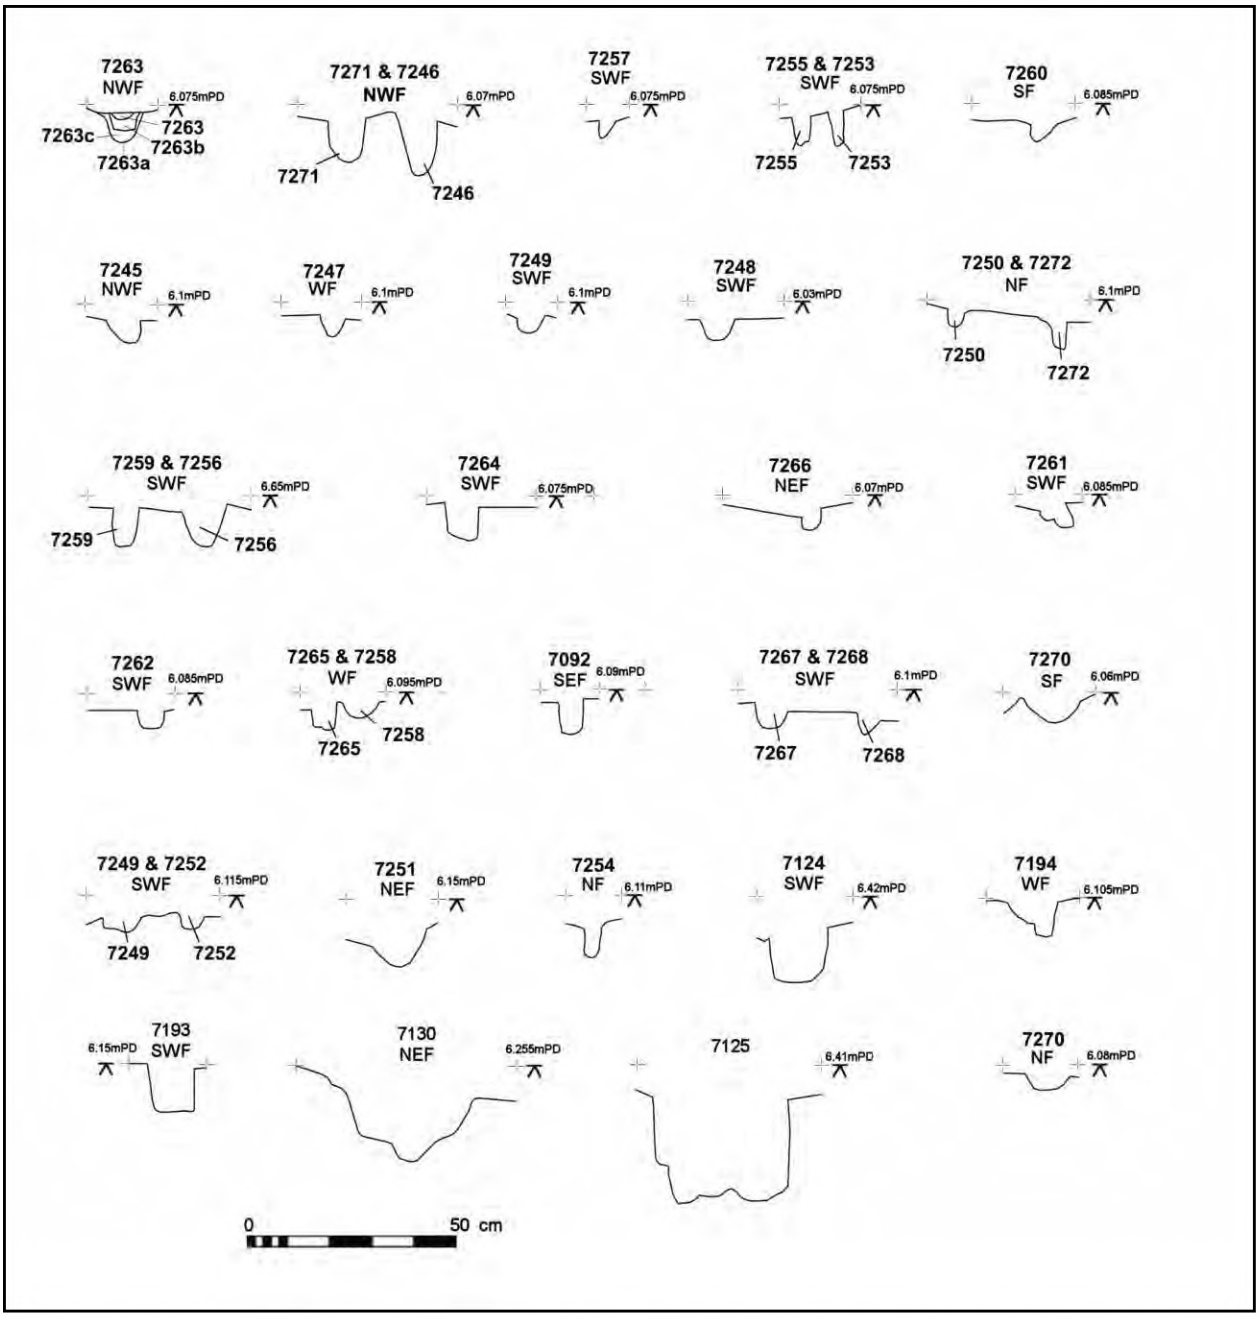
T7.C.44 Profiles for stake holes and postholes [**co.7143, 7142, 7135, 7140, 7136, 7131, 7147, 7137, 7150, 7136, 7113, 7148, 7169, 7144, 7165, 7168, 7112, 7156, 7164, 7232, 7227, 7228, 7229, 7234, 7236, 7233, 7235, 7230, 7231**]



T7.C.45 Profiles for stake holes and postholes [**co.7184, 7182, 7181, 7183, 7171, 7180, 7185, 7190, 7186, 7178, 7174, 7172, 7189, 7173, 7175, 7177, 7179, 7212, 7187, 7244, 7214**]



T7.C.46 Profiles for stake holes and posthole [**co. 7213, 7204, 7211, 7210, 7209, 7203, 7202, 7201, 7205, 7208, 7207, 7206, 7215, 7216, 7217, 7223-18, 7223-17, 7223-16, 7223-14, 7223-13, 7223-12, 7223-15, 7223-10, 7223-1, 7223-11, 7223-3, 7223-6, 7223-7, 7223-2, 7223-4, 7223-5**]



T7.C.47 Profiles for stake holes and postholes [**co.7267, 7244, 7245, 7246, 7247A, 7247B, 7248, 7250, 7249, 7251, 7253, 7252, 7254, 7261, 7263, 7260, 7268, 7270, 7265, 7259, 7257, 7266, 7269, 7262, 7092, 7271, 7272, 7273, 7253, 7256, 7255, 7258, 7124, 7194, 7193, 7130, 7125, 7270, 7264**]

T7.D Trench 7 photos

T7.D.1 General view of partial stone floor [**co.7037**] and upper recent stone wall [**co.7029**] within the WTR area, looking west.

T7.D.2 View of infill [**co.7033/ 7035/ 7036**] and second stone pavement [**co.7038**] and associated fill [**co.7061**] within WTR; most of recent stone wall has been removed. Mortar base for brick wall [**co.7274**] appears in southeast corner; looking east.

T7.D.3 View of layer [**co.7064**] quickly followed by [**co. 7067**] after removal of stones and upper fills within WTR, looking east.

T7.D.4 View of [**co.7158**] which truncates[**co.7067**] in north-east corner within WTR, looking east.

T7.D.5 View of **[co.7067]** within WTR with along the north light grey sands **[co.7081]**, looking east.

T7.D.6 View of unexcavated stake holes **[co.7228 to 7236]** on **[co.7237]** within southeast corner of WTR, looking east.

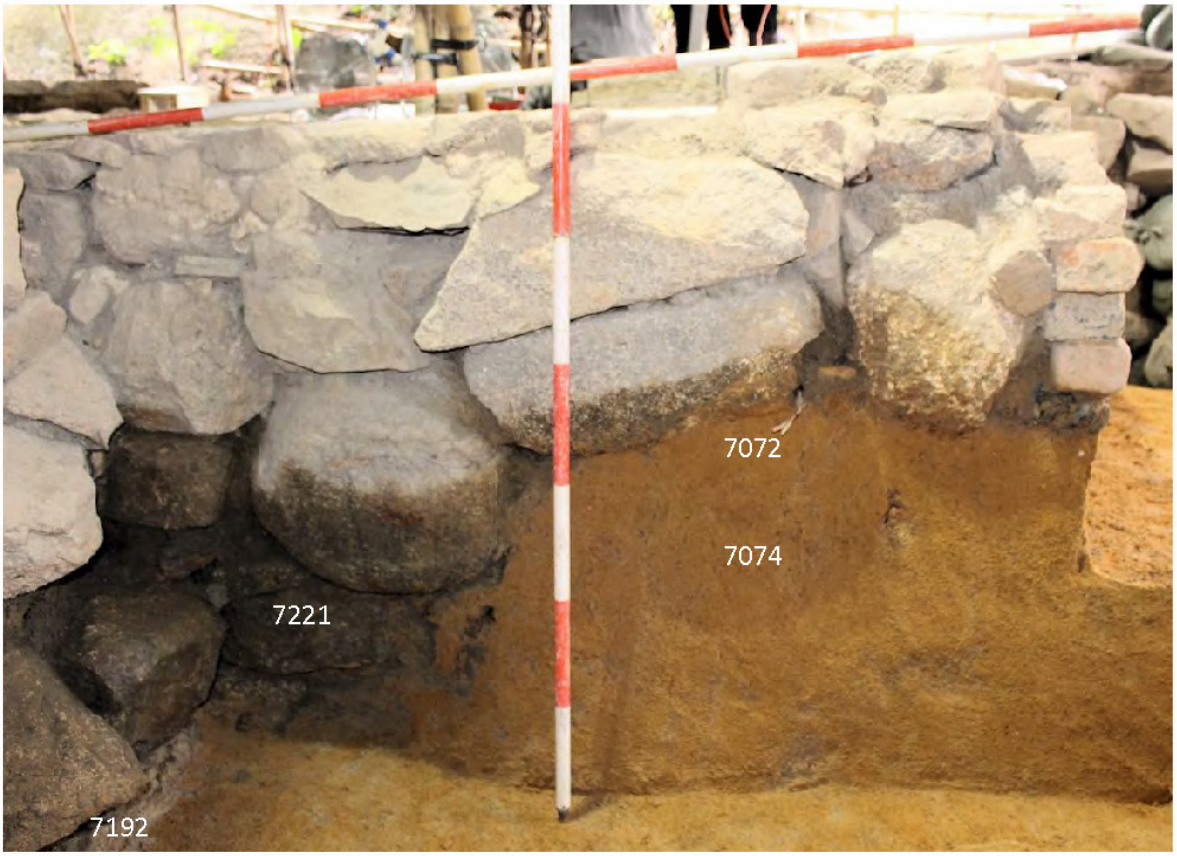
T7.D.7 West facing section of WTR interior wall **[co.7273]**.

T7.D.8 North facing section of WTR interior wall **[co.7273]** with **[co.7191]**.

T7.D.9 South facing section of WTR interior wall [**co.7273**].

T7.D.10 East facing section of WTR interior wall [**co.7273**].

T7.D.11 East facing section of WTR stone exterior wall [**co.7273**], exterior brick lining [**co.7275**] and adjoining northern village wall [**co.7119/7219**]; looking west.



T7.D.12 South facing section of WTR exterior wall (south-east corner) showing stone wall [**co.7273**] and context [**co.7072/7074**], [**co.7221**] and [**co.7192**]; looking north.

T7.D.13 South facing elevation of WTR exterior wall (south-west corner) [**co.7273**], looking north.

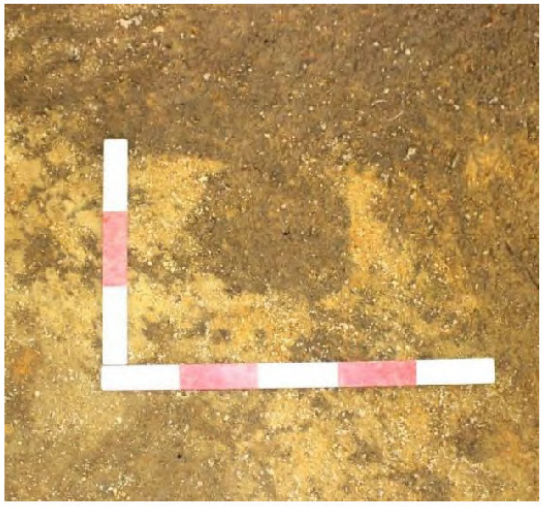
T7.D.14 View of unexcavated elongated features **[co.7042, 7056, 7058]** and postholes **[co.7057, 7051 to 7053]** in VWI; looking north.

T7.D.15 Charcoal identified in the southern end of [**co.7042**] (identified as 'removed wall trench' in 2016 AIA) in VWI, looking west.

T7.D.16 Close up of the cloth-imprinted tile and stones within the elongated feature ('removed wall trench') [**co.7042**], looking west.

T7.D.17 Photo of unexcavated ditch [**co.7044**] along the western village wall [**co.7218**] in VWI, looking south.

T7.D.18 Photo before excavation of postholes **[co.7050, 7051, 7052, 7053]** in VWI, looking south.



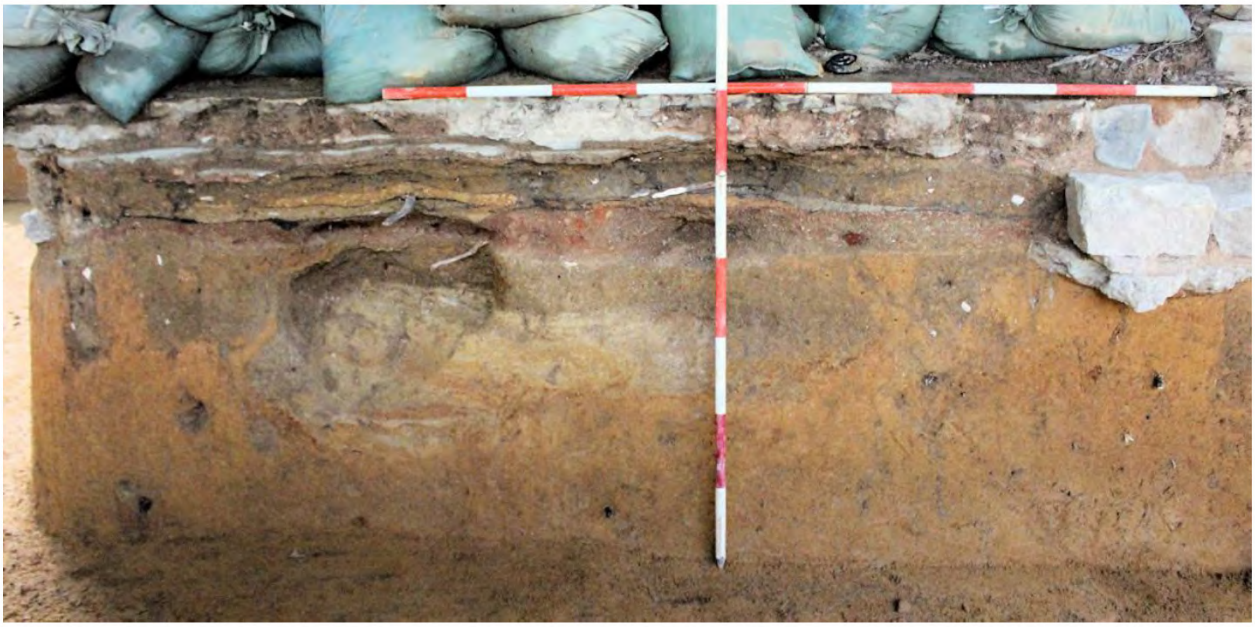
T7.D.19 Pre-ex photo of posthole **[co.7057]** cutting into **[co.7056]** in VWI, looking east.

T7.D.20 Photo of unexcavated elongated feature 'ditch' [**co.7056**] cutting into [**co.7043**] in VWI, looking southwest.

T7.D.21 Stake holes **[co.7244 to 7270]** cutting into **[co.7043/7093]** alongside the ditch **[co.7056]** in VWI, looking northeast.

T7.D.22 North facing section of VWI which was largely excavated in 2016 AIA phase at the end of excavation; looking south.

T7.D.23 West facing section (southern end) of VWI at end of excavation showing filled in cut/trench? With light grey bottom [**co.7222**]; looking east.



T7.D.24 West facing section (northern end) of VWI with section of ditch [**co.7056**] and infills, looking east.

T7.D.25 East facing elevation of western village wall **[co.7218]** adjoining WTR within VWI/WTA with grey sands along the village wall and watch tower room **[co.7221]**.

T7.D.26 Stake hole alignment **[co.7223-1 to 18]** along western village wall **[co.7218]** and associated with **[co.7222]** in VWI, looking north.

T7.D.27 View of trench feature [**co.7079**] with bricks along western village wall within [**co.7072**], looking south.

T7.D.28 Post-ex view of elongated feature [**co.7044/ 7075/ 7097**] along the western village wall [**co.7218**] in WTA and VWI, looking north.

T7.D.29 View of ongoing excavation of hard floor [**co.7109**] in WTA; looking west.

T7.D.30 View of stone floor **[co.7116]** at entrance to watch tower room and along the northern village wall in WTA, looking west.

T7.D.31 View of hard floor [**co.7167**] along the northern village wall [**co.7119**] in WTA, looking west.

T7.D.32 View of trench along northern village wall **[co.7119]** after removal of fills **[co.7077]** and **[co.7078]** in WTA, looking west.

T7.D.33 View of large southwest-northeast trending ditch [**co.7162N, 7162S and 7134**] prior to excavation and various postholes/stake holes [**co. co.7111-7113, 7124, 7125, 7130, 7135-7156, 7160, 7161**] cutting into [**co. 7109**] and [**co.7072**] in WTA; looking southwest.

T7.D.34 Ditch fill [**co.7134**] after removal of ditch fill [**7162**] in WTA, looking south-east.

T7.D.35 Post-ex view of ditch **[co.7162 and 7134]** in WTA, looking north-east.

T7.D.36 Post-ex photo of lowest recorded stake holes [**co.7201 to 7217**] cutting into [**co.7074**] in WTA, looking west.

T7.D.37 North facing section of WTA showing the ditch feature [**co.7162 and 7134**] with fills; looking south.

T7.D.38 West facing section of WTA (southern end) showing the ditch feature **[co.7162 and 7134]** with fills; looking east.

T7.D.39 West facing section of WTA (northern end) showing the infill of the trench along the northern village wall **[co.7077/7078]**; looking east.

T7.D.40 South facing elevation of northern village wall **[co.7119]** in WTA, looking north.

T7.D.41 Plan view of bricks [**co.7004**] on top of stone western village wall (southern end) [**co.7218**], looking north.

T7.D.42 West facing elevation of western village wall [**co.7029/7218**] with brick wall [**co.7004**] on top and an attached drain pot feature [**co.7200**]; looking east.

T7.D.43 View of upper modern contexts within western moat area, [**co. 7002, 7003, 7005, 7006**] and the brick wall [**co.7004**] on top of western village wall; looking north.

T7.D.44 Upper layers inside the WTR and WTR **[co. 7011/7019]**

T7.D.45 Excavation in progress of upper layers in WTA **[co.7022/7023/7024]**; looking northeast.

T7.D.46 Context **[co.7020]** hard floor in VWI with pit **[co.7021]**; in background of photo is recent stone wall **[co.7276]** and front shows part of stone wall **[co.7277]**, looking south.

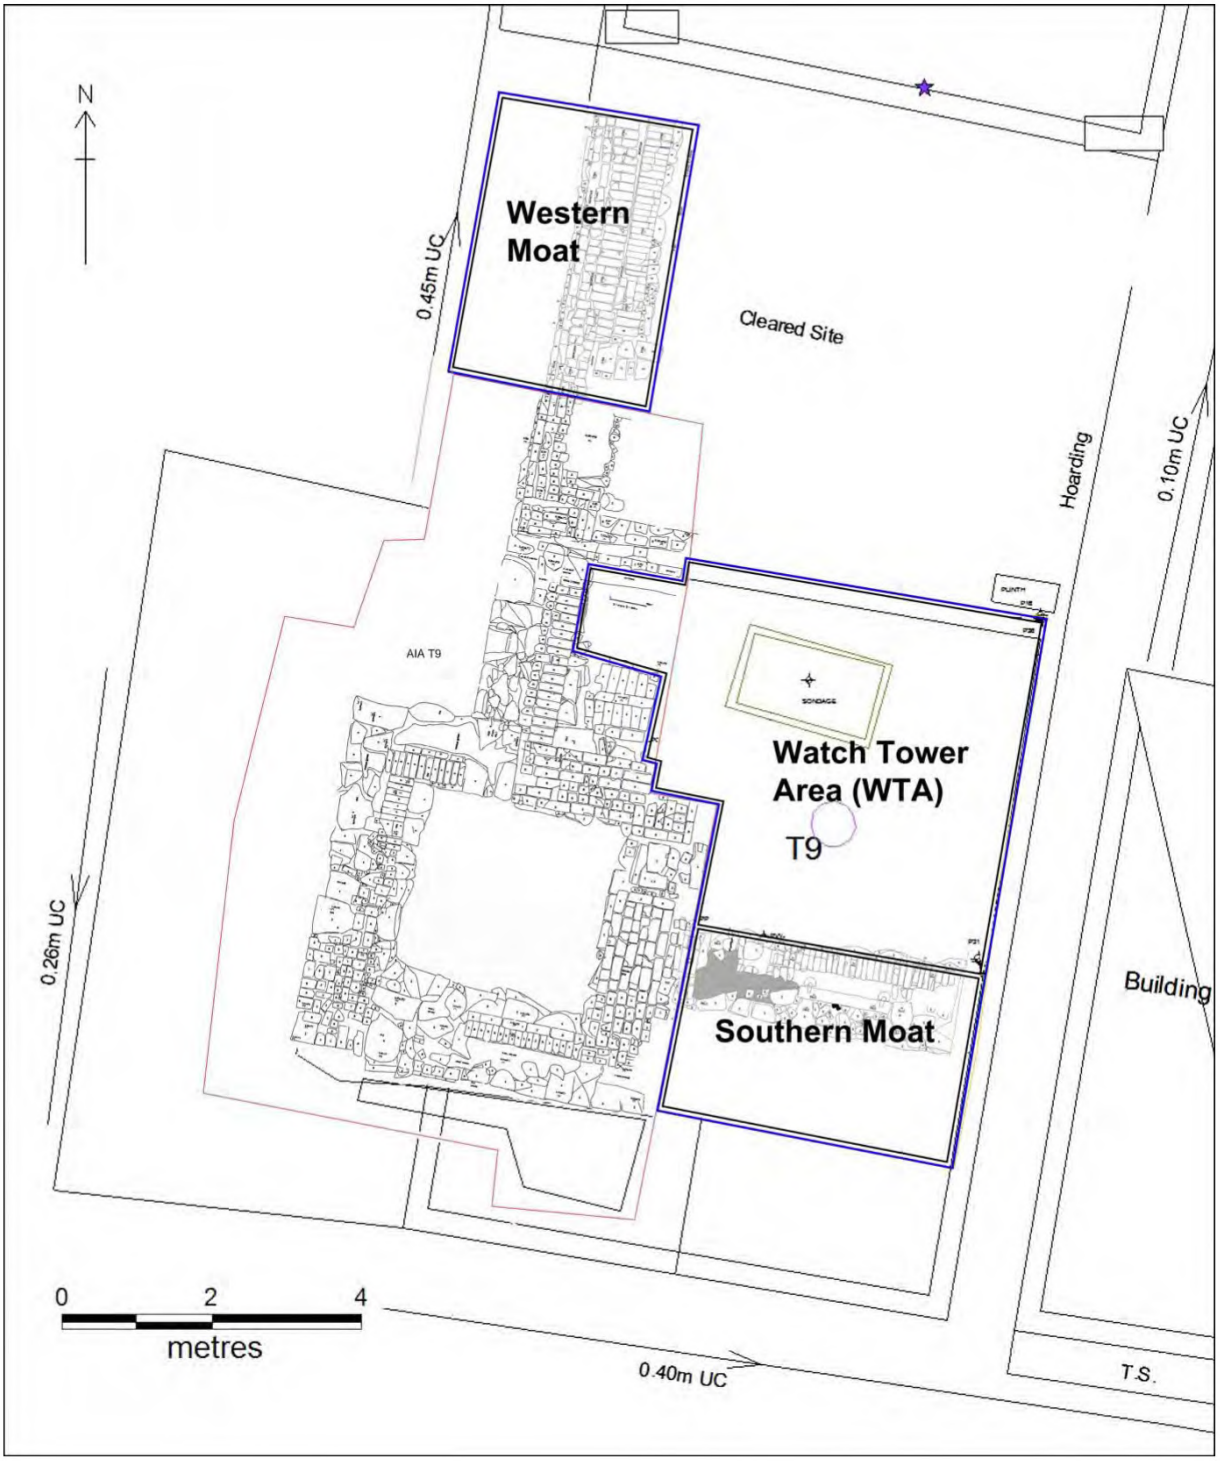
Trench 9 data



T9.A Context descriptions

Watch tower Area

9001: Modern concrete surface.

9002: Modern red-tiled floor inside demolished house.

9003: Granite threshold and attached pivot of a demolished modern residential house.

9004/9013/9043: stone wall foundation of a modern house.

9005: Modern tiled floor.

9006: Leveller for tiled floor [9002]; consisted of friable brownish yellow (10 YR 6/6) slightly clayey, slightly gravelly and sandy silt; equals to [9007].

9007: Leveller for tiled floor [9005]; consisted of friable brownish yellow (10 YR 6/6) very sandy and gravelly silt; equals to [9006].

9008: Leveller below [9006]; comprised very firm strong brown (7.5 YR 5/6) and very greyish brown (10 YR 3/2) slightly gravelly and slightly sandy clay.

9009/9021: Upper brick wall of southern village wall above leveller [9062]; northwest-southeast orientated; c.L85xW30xD10cm; green brick wall; partially exposed immediately after the removal of tiled floor [9002] and concrete surface; consisted of 1 row and 1 course of poorly preserved green bricks; partially truncated by [9003] threshold and [9004].

9010: see [9007].

9013: see [9004].

9016a: Yellowish leveller between brick wall [9185] ([933]) and [9182] ([934]) stone foundation (not excavated).

9017 (955/958/956): Floor below [9018]; equivalent to [955/958/956] recorded during the 2016 AIA excavation; consisted of firm strong brown (7.5 YR 5/8) sandy and slightly gravelly clay, attached with a very dark grey (7.5 YR 3/1) thin floor layer.

9018 (951): Layer above floor [9017]; equivalent to [951] identified during the 2016 AIA excavation; cut by modern wall [9022]; consisted of loose yellowish brown (10 YR 5/4) sandy and gravelly silt.

9019 (957): fill below [9017]; equivalent to ([957]) recorded during the 2016 AIA excavation; comprised a very firm brown (7.5 YR 5/4) slightly sandy and gravelly clay.

9020: possible feature comprised of seven stone/brick arranged in an L-shape, located alongside brick floor [9186] ([970]); or possibly general dump within [9019/957] as no apparent cut was identified.

9021: see [9009]

9022: Stone wall foundation below [9006]; northwest-southeast orientated; with associated cut [9024a] and fill [9027/9024/9074/9078/9025]. Wall about W60xD40, extending beyond west

facing section; 1 course of irregular large granite stones survived; some small stones also filled in the gaps between the large stones.

9023: Floor above [9028], cut by [9030a/9030]; contemporary with floor [9069/9068]; composed of very firm dark brown (7.5 YR 3/2) silty and very slightly sandy clay, appeared thin and patchy.

9024: fill for modern wall [9022] below [9027] and over [9028]; comprising loose and friable yellowish red (5 YR 5/6) clayey, gravelly and slightly sandy silt.

9024a: cut for foundation trench for modern wall [9022]; rectangular-sectioned, about W70xD40 recorded within T9; extending beyond west facing section; cut into various layers including [9026, 9023, 9028, 9029, 9033, 9034, 9058, 9056, 9080], and pit fill [9077] and [9041].

9025: not in use

9026: fill under [9006]; truncated by [9041a]; comprised a firm dark yellowish brown (10 YR 4/4) very silty and slightly sandy clay.

9027: upper fill of [9024a] for wall [9022]; consisted of loose dark yellowish brown (10 YR 4/6) silty, very slightly sandy and slightly gravelly clay; covering fill [9024].

9028: leveller between floor [9023] and [9029]; composed of firm strong brown (7.5 YR 4/6) silty, slightly sandy and very slightly gravelly clay.

9029: floor layer above [9033]; comprised a very firm dark brown (7.5 YR 3/2) silty and very slightly sandy clay. It appeared less patchy and slightly thicker in places than upper floor [9023].

9030: fill for modern pit [9030a]; comprised a firm strong brown (7.5 YR 5/6) clayey and slightly gravelly sand. [9030a]: modern pit feature located adjacent to southern village wall; identified after the removal of [9026]; truncated by modern pit [9089a]; approximately L110xW45xD20cm.

9031/9037: leveller for floor [9036]; comprised a firm dark yellowish brown (10YR 4/6) and yellowish red (5 YR 4/6) silty, slightly sandy and slightly gravelly clay with occasional mortar.

9032: fill for pit [9032]; consisted of loose dark brown (10 YR 3/2) very slightly sandy clay; truncated by pit [9030a]. [9032a]: modern pit feature located adjacent to southern village wall; cut by pit [9030a]; partially covered by southern end brick of [9105]; approximately L110xW20xD10cm.

9033: leveller for floor [9029]; truncated by modern wall [9022]; consisted of firm dark yellowish brown (10YR 4/4) slightly silty and gravelly clay.

9034: mixed clay floor below [9033/9083]; equivalent to [9083/9040/9039/9045/9133/9118]; composed of a mixture of firm strong brown (7.5 YR 5/6) silty and very slightly gravelly sand, friable yellowish red (5 YR 5/6) very slightly sandy silt, firm yellowish red (5 YR 4/6) slightly clayey, sandy and gravelly silt, friable very pale brown (10 YR 7/4) very slightly gravelly and very slightly sandy silt, very firm yellowish red (5 YR 5/6) very silty and slightly sandy gravel, and friable brown (10 YR 4/3) very slightly sandy silt. Occasional patches of decomposed mortar were also noticed.

9035: leveller for floor [9068/9069]; comprised a very firm yellowish red (5 YR 4/6) slightly clayey and slightly sandy silt with occasional mortar; truncated by pit [9076a].

9036: very thin, hard and patchy floor below [9035]; consisted of very firm dark brown (10 YR 3/3) very slightly sandy silt.

9037: see [9031].

9038: layer above [9054]; truncated by pits [9125a] and [9041a]; c.7-13cm thick; consisted of firm dark yellowish brown (10 YR 4/4) slightly gravelly clay with some chunks of mortar; contemporary with [9106/9065] and [9080/9158].

9039: see [9034].

9040: see [9034].

9041: lower fill for pit [9041a]; below [9077]; comprised a firm dark yellowish brown (10 YR 4/4) gravelly, slightly silty and slightly sandy clay. [9041a]: pit cutting into [9036, 9031, 9070, 9071, 9082, 9038 and 9054]; truncated by modern wall [9022], pits [9076a] and [9075a]; slightly slopping wall and rounded base; approximate W120xD50cm.

9042: not in use.

9043: tone foundation equivalent to [9013] and [9004]; 3-course of granite stone, approximately 60cm in height.

9044: concrete span below house foundation [9043]; approximate 20cm thick.

9045: see [9034].

9046: fill below [9124]; equivalent to [9058, 9084, 9119]; consisted of firm strong brown (7.5 YR 4/6) slightly sandy and slightly gravelly silt, friable yellowish brown (10 YR 5/4) slightly gravelly silt, firm dark yellowish brown (10 YR 4/4) slightly sandy clay and firm yellowish brown (10 YR 5/6) very slightly clayey, slightly sandy and slightly gravelly silt.

9047: modern brick wall against west facing section; SE-NW orientated; 3-course red brick.

9048: concrete span below [9047/9004]; equivalent to [9044].

9049/9050/9134: brick alignment under floor [9053] and [9120], located to the north of southern village wall.

9050: see [9049].

9051: fill for [PH9051a], comprised a very loose strong brown (7.5 YR 4/6) slightly clayey, silty and slightly sandy gravel. [9051a]: cut for modern post hole against eastern end of [9022] wall.

9052: concrete covering modern brick wall [9047].

9053: floor below [9046/9084]; comprising an upper floor [9085], leveller [9086] (firm strong brown (7.5 YR 5/6) gravelly and very slightly sandy clay) and lower floor [9087]; floor consisted of loose brown (7.5 YR 5/3) slightly clayey, slightly sandy and very slightly gravelly silt.

9054: layer below [9038] and [9162/9184/9189]; comprised a firm yellowish red (5 YR 5/6) very slightly sandy and very slightly gravelly clay; several postholes were identified on top of 9054;

9055: fill for [9055a]; consisted of firm dark yellowish brown (10 YR 4/4) very slightly gravelly clay. [9055a]: cut for semi-circular posthole identified on top of [9054]; c.15x7xD19cm, with near straight wall and flat base.

9056: layer under [9122] and above [9080], truncated by brick alignment [9049]; comprised a friable yellowish brown (10 YR 5/6) slightly gravelly and very slightly sandy silt.

9057: not in use.

9058: see [9046].

9059: not in use.

9060: 'oven' feature; comprise 11 red radial brick supports.

9061a: mortar wall with a flat base (c.2cm thick, 32cm DIA, D24cm), sitting inside the radial brick supports [9060].

9061: uppermost infill of 'oven' feature; 3-10cm thick firm dark yellowish brown very slightly gravelly clay.

9062: thin leveller between the brick wall [9009/9021] and the stone wall foundation [9015] of southern village wall; consisted of loose brown slightly clayey and gravelly silt.

9062a: spread of mortar covering the western corner of southern village wall.

9063: leveller under bricks [9049/9050]; equivalent to [9100/9088]; consisted of very firm strong brown (7.5 YR 5/6) very slightly sandy and gravelly silt.

9064: equivalent to [9098/ 9101].

9065: leveller under [9050] and above mortar layer [9095]; equivalent to [9106], contemporary with [9080/9158]; comprised a firm dark yellowish brown (10 YR 4/6) slightly sandy and slightly gravelly clay.

9066: not in use.

9067: fill over southern village wall [9009/9021]; equivalent to [9091/9092]; composed of very loose brown (10 YR 5/3) very sandy and gravelly silt.

9068/9069: floor below [9008], truncated by pit [9076a]; equivalent to [9069]; comprised a firm dark brown (10 YR 3/3) slightly gravelly clay.

9069: see [9068].

9070: patchy floor below [9037]; consisted of firm dark brown (10 YR 3/3) slightly gravelly clay.

9071: leveller below floor [9070]; comprised a very firm yellowish brown (10 YR 5/6) slightly gravelly and slightly sandy silt.

9072: fill for posthole [9072a]; composed of firm dark yellowish brown (10 YR 4/6) gravelly (angular to sub-angular) clay; c.W14xD10-11cm. 9072a: cut for posthole in north east part of trench; identified on top of [9054] below [9038].

9073: fill for posthole [9073a]; consisted of firm dark yellowish brown (10 YR 4/6) very slightly sandy clay; c.W13cm, D15cm. 9073a: cut for posthole in north east part of trench; identified on top of [9054] below [9038].

9074: see [9027].

9075: fill for pit; consisted of very firm dark yellowish brown (10 YR 4/4) and yellowish brown (10 YR 5/4) slightly silty, slightly sandy and slightly gravelly clay with occasional stones. [9075a]: cut for modern pit; below [9006]; contemporary with pit [9076a/9076].

9076: fill for pit; consisted of very firm brown (7.5 YR 4/4) and yellowish brown (10 YR 5/4) slightly clayey, silty and very slightly sandy gravel, with moderate amount of stones. [9076a]: cut for pit feature below [9006]; contemporary with pit [9076a/9076].

9077: upper pit fill for pit [9041a], above [9041] lower fill; consisted of firm strong brown (7.5 YR 4/6) slightly sandy, silty and very slightly gravelly clay. [9077a]: cut for pit feature; truncated by pits [9075a] and [9076a].

9078: lower fill for [9024a] of wall [9022]; consisted of loose brown (10 YR 4/3) very slightly sandy clay.

9079: not in use.

9080: layer below [9056]; equivalent to [9158]; comprised a firm yellowish brown (10 YR 5/6) very slightly sandy clay; truncated by modern wall [9022]; contemporary with [9106/9065].

9081: mortar layer covering 'oven' feature [9060]; equivalent to [9113/9095].

9082: leveller for site formation prior to the construction of 'oven' feature [9060]; above [9162]; comprised a firm strong brown (7.5 YR 5/6) very slightly sandy and very slightly gravelly clay.

9083: see [9034].

9084: see [9046].

9085: see [9053].

9086: see [9053].

9087: see [9053].

9088: see [9063].

9089: fill for modern pit below [9006]; equivalent to [9129]; consisted of loose very dark greyish brown (10 YR 3/2) silty clay. [9089a]: cut for modern pit adjacent to SVW, cut into pit [9030a/9030].

9091: see [9067].

9092: see [9067].

9095: see [9081].

9096: isolated burnt patch above [9101] and below [9100], inside [9049/9050] enclosure; composed of friable dark brown (10 YR 3/3) slightly clayey and very slightly gravelly silt.

9097: not in use.

9098: equivalent to [9064/9101].

9099: not in use.

9100: see [9063].

9101: upper fill for trench [9101a]; equivalent to [9208/9064/9098/9209/9210]; above [9213]; comprised a very firm strong brown (7.5 YR 5/6) sandy silty and red (2.5 YR 4/6) slightly sandy clay. [9101a]: cut for wall foundation trench along southern village wall;

9102: trench fill for modern stone wall [9192] along west facing section; possibly contemporary with modern wall [9022]; consisted of loose light red (2.5 YR 6/6) sandy, very slightly gravelly and very slightly clayey silt.

9103: fill of elongated feature [9103a]; along west facing section; comprised a loose brown (7.5 YR 4/2) silty and very slightly gravelly clay.

9103a: elongated feature identified along the eastern edge after the removal of floor [9036]; cut into another elongated feature [9123a] and partially cut into [PH9131]; truncated by modern wall [9022].

9104: fill for stone wall foundation [9192]; only appeared on northwest facing section; consisted of loose reddish yellow (5 YR 6/6) gravelly (angular to sub-angular) very slightly sandy silt.

9104a: cut for stone wall foundation on northwest facing section; associated with [9192, 9102 and 9104].

9105: linear brick alignment covering pit [9032]; above [9058]; partially truncated [9049] bricks; 4 red bricks; overall L145cm; each brick measured c.L35xW20xD13cm; southwest-northeast orientated.

9106: see [9065].

9107: fill for posthole [9107a]; consisted of firm dark yellowish brown (10 YR 4/4) sandy and very slightly silty clay.

9107a: cut for posthole located to the north of [9060], cut into [9106]; truncated by [PH9220].

9108: fill between bricks [9060] for cut [9108a]; consisted of firm yellowish brown (10 YR 5/6) gravelly (angular to sub-angular) clay.

9108a: cut for 'oven' feature [9060]; cut into [9082]; below stone floor [9196].

9109: not in use.

9110: infill of 'oven' feature below [9061] and above [9111]; comprised a firm dark yellowish brown (10 YR 4/4) gravelly (angular to sub-angular) slightly sandy clay.

9111: infill of 'oven' feature below [9110]; comprised 2 bricks infused with a lump of lime/mortar and frequent shell fragments.

9112: not in use.

9113: see [9081].

9114: leveller under the granite stone [915] located outside the entrance; above [9118]; equivalent to [9115, 9116, 9117]; composed of firm dark yellowish brown (10 YR 4/4) slightly gravelly (angular to sub-angular) slightly sandy silt, firm dark brown (10 YR 3/3) slightly sandy silt, yellowish brown (10 YR 5/6) gravelly silt and brown (10 YR 5/3) very slightly clayey, slightly gravelly silt.

9115: see [9114].

9116: see [9114].

9117: see [9114].

9118: see [9034].

9119: see [9046].

9120: floor below [9119] and above [9049]; consisted of firm brown (10 YR 4/3) very slightly clayey and slightly sandy silt.

9121: lowest stratum for cut [9218]; overlain by a dark floor [9120]; contemporary with 9049/9050; comprised a loose yellowish brown (10 YR 5/6) sandy gravel (angular to sub-angular).

9122: mortar layer below [9058] and above [9056]; located next to [9022] and [9015], with occasional small fragments of charcoal; triangular on plan; c.38x38x1cm.

9123: upper fill of elongated feature [9123a] along west facing section; equivalent to [9128]; above [9139/9140]; consisted of firm dark yellowish brown (10 YR 4/4) very slightly gravelly clay.

9124: thin leveller for [9105] bricks; above [9058]; comprised a loose brown (7.5 YR 4/4) slightly clayey and sandy silt.

9125: fill for pit [9125a]; consisted of very firm dark yellowish brown (10 YR 4/6) slightly gravelly and very slightly sandy clay. [9125a]: cut for pit [9125] below [9071]; cut into [9130, 9038. 9072 and 9054].

9126: not in use.

9127: not in use.

9128: see [9123].

9129: see [9089].

9130: fill for wall foundation trench [9130a]; comprised a firm dark yellowish brown (10 YR 4/6) slightly gravelly and slightly sandy clay and dark yellowish brown (10 YR 3/4) very slightly sandy clay.

9130a: cut for foundation trench for wall [9224]; along south facing section; truncated by pit [9125a/9125].

9131: fill for posthole [9131a]; consisted of firm dark yellowish brown (10 YR 4/4) silty, very slightly sandy and very slightly gravelly clay. [9131a]: cut for posthole [9131], identified in NW side of trench; partially truncated by [9103a]; cut into all ditch fill of [9123] and [9054]; possibly contemporary with [9132a/9132].

9132: fill for posthole [9132a]; consisted of firm dark yellowish brown (10 YR 4/4) very slightly sandy, very slightly gravelly and slightly silty clay. [9132a]: cut for posthole [9132], identified in NW side of trench after removal of concrete foundation [9190]; cut into all ditch fill of [9123] and [9054]; possibly contemporary with [9132a/9132].

9133: see [9034].

9134: see [9049].

9135: fill for posthole [9135a]; comprised a firm dark yellowish brown (10 YR 4/4) slightly sandy and very slightly gravelly clay. [9135a]: cut for posthole [9135]; identified after removal of [9125] fill, cut into [9054].

9136: not in use.

9137: not in use.

9139: lower fill of elongated feature [9123a]; below [9123]; equivalent to [9140]; consisted of firm brown (10 YR 4/3) sandy and slightly gravelly clay and yellowish brown (10 YR 5/6) very slightly sandy and very slightly gravelly clay; cut by posthole [9223].

9140: see [9139].

9141: fill for posthole [9141a]; comprised a loose dark yellowish brown (10 YR 4/4) sandy, very slightly clayey, angular to sub-angular gravel. [9141a]: cut for posthole [9141]; identified in north east part of trench after removal of [9123]; cut into [9054].

9147: not in use.

9148: fill for posthole [9148a]; consisted of firm dark yellowish brown (10 YR 3/4) gravelly (angular to sub-angular) and very slightly sandy clay. [9148a]: cut for posthole identified on top of [9054] in north east part of trench after removal of [9130].

9149: fill for posthole [9148a]; consisted of firm brown (10 YR 4/3) gravelly (angular to sub-angular) and very slightly sandy clay. [9149a]: cut for posthole identified on top of [9054] in north east part of trench after removal of [9130].

9153: fill for posthole [9153a]; consisted of loose to very loose dark yellowish brown (10 YR 4/6) very gravelly (angular to sub-angular) sandy clay. [9153a]: cut for posthole identified after removal of [9106], on top of [9054] in north west; south of [PH 9155a/9155].

9154: not in use.

9155: fill for posthole [9155a]; comprised a firm dark brown (10 YR 3/3) slightly gravelly (angular to sub-angular) and slightly sandy clay. [9155a]: cut for posthole; identified after removal of [9106/9065] in north west part; cut into [9156] and [9054].

9156: a band of very firm mix-coloured clay found near the north-eastern corner of the watch tower below [9188]; truncated by [PH 9165]; fill of [9187a].

9157: degraded mortar spread; loose greyish brown (2.5 Y 5/2) very clayey and very slightly gravelly sand with moderate shell fragments; associated with mortar layer [9081]. 9158: see [9080].

9159: fill for [9159a]; consisted of loose greyish brown (2.5 Y 5/2) very slightly sandy clay. [9159a]: cut for posthole; below [9157]; identified after removal of [9157/9082/9162]; cut into [9054].

9160: fill for posthole [9160a]; comprised a firm dark yellowish brown (10 YR 4/6) very slightly sandy and gravelly clay (partially excavated). [9160a]: cut for posthole; identified after removal of [9162]; cut into [9054].

9161: not in use.

9162: layer that 'oven' feature [9060] cut into; equivalent to [9184, 9189]; consisted of firm yellowish brown (10 YR 5/4) gravelly (angular to sub-angular) slightly sandy clay with occasional charcoal.

9163: fill for posthole [9163a]; comprised a firm dark yellowish brown (10 YR 4/4) very slightly gravelly and very slightly sandy clay. [9163a]: cut for semi-circular posthole; identified after removal of [9180/9188]; cut into [9054].

9164: fill for posthole [9164a]; consisted of loose yellowish brown (10 YR 5/6) slightly gravelly (angular to sub-angular) and very slightly sandy clay. [9164a]: cut for posthole; set against eastern corner of brick floor [9186] ([970]); above [9187] ([972]).

9165: fill for posthole [9165a]; comprised a firm dark yellowish brown (10 YR 4/4) very slightly sandy clay. [9165a]: cut for posthole; under [9182] foundation stone, cut into [9156].

9166: fill for posthole [9166a]; consisted of firm strong brown (7.5 YR 4/6) slightly gravelly and very slightly sandy clay, with occasional charcoal. [9166a]: cut for posthole; below [9156], cut into [9184] and [9054].

9167: not in use.

9168: fill for posthole [9168a]; equivalent to [9167B]; consisted of loose dark yellowish brown (10 YR 4/4) slightly sandy and gravelly clay. [9168a]: cut for posthole; identified below floor [9017]; cut into [9195a]; in western corner along western village wall.

9169: fill for posthole [9169a]; comprised a loose yellowish brown (10 YR 5/6) very slightly gravelly clay. [9169a]: cut for posthole; identified after removal of [9180/9188]; cut into [9162] and [9054].

9170: not in use.

9171: fill for posthole [9171a]; consisted of firm dark yellowish brown (10 YR 4/6) very slightly sandy clay. [9171a]: cut for sub-oval shaped posthole; cut into [9054], located near south facing section, possibly contemporary with [PH9172a/9172].

9172: fill for posthole [9172a]; comprised a firm dark yellowish brown (10 YR 4/4) very slightly gravelly and very slightly sandy clay. [9172a]: cut for circular posthole; cut into [9054], possibly contemporary with [PH9171a/9171].

9173: shallow upper fill for posthole [9173a]; consisted of firm strong brown (7.5 YR 5/6) slightly gravelly clay. [9173a]: cut for posthole; cut into [9054], below [9038]. [9173b]: lower fill for posthole [9173a]; consisted of firm dark brown (10 YR 3/3) slightly gravelly clay.

9174: fill for posthole [9174a]; comprised a mostly loose strong brown (7.5 YR 4/6) slightly gravelly clay. [9174a]: cut for posthole; cut into [9054], below [9038].

9175: not in use.

9176: not in use.

9177: not in use.

9178: not in use.

9179: leveller for foundation stone [9182] ([934]), above [9165], cut by postholes [9221/9221a and 9220a/9220]; equivalent to [9187] ([972]); consisted of very firm yellowish brown (10 YR 5/6) gravelly (angular to sub-angular), very slightly silty clay, with occasional charcoal.

9180: layer between [9187] and [9156] under brick floor [970]; equivalent to [9188]; consisted of firm dark yellowish brown (10 YR 4/4) very slightly gravelly and slightly sandy clay with occasional charcoal.

9181: not in use.

9182: stone foundation of watch tower room wall; equivalent to [934] identified during the 2016 AIA excavation.

9183: not in use.

9184: see [9162].

9185 (933): brick wall of northern watch tower room wall; identified as [933] in 2016 AIA excavation.

9186: equivalent to [970] identified during the 2016 AIA excavation; brick floor built against northern watch tower room wall.

9187: see [9179].

9188: see [9180].

9189: see [9162].

9190: Concrete above concrete span [9048], set against brick wall [9047], within [9190a].

9190a: trench cut for concrete span [9048] and brick wall [9047].

9191: not in use.

9192: stone wall foundation identified along west facing section of T9; associated with fill [9102] and [9104].

9193: lowest fill inside 'oven' feature [9060]; consisted of very loose dark yellowish brown (10 YR 4/4) very gravelly and sandy clay, angular to sub-angular, with occasional charcoal and shell fragments.

9194: lower fill for [9195a]; below [9195]; consisted of loose dark yellowish brown (10 YR 3/4) very slightly sandy clay.

9195: upper fill for [9195a], above [9194]; consisted of firm yellowish brown (10 YR 5/6) very slightly sandy clay.

9195a: elongated feature along village wall [944] in T9NN; consisted of upper fill [9195] and lower fill [9194].

9196: partially uncovered stone floor at the base of the 'oven' feature [9060].

9197: not in use.

9198: not in use.

9199: fill for stake hole [9199a]; consisted of firm very dark greyish brow (10 YR 3/2) sandy and very slightly gravelly clay. [9199a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9200: fill for stake hole [9200a]; consisted of firm very dark greyish brow (10 YR 3/2) sandy and very slightly gravelly clay. [9200a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9201: fill for stake hole [9201a]; consisted of firm very dark greyish brown (10 YR 3/2) slightly sandy and very slightly gravelly clay. [9201a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9202: fill for stake hole [9202a]; consisted of firm very dark greyish brow (10 YR 3/2) sandy and very slightly gravelly clay. [9202a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9203: fill for stake hole [9203a]; consisted of firm very dark greyish brow (10 YR 3/2) sandy and very slightly gravelly clay. [9203a]: cut for one of the nine closely packed stake holes ([9199 to [9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9204: fill for stake hole [9204a]; consisted of firm very dark greyish brow (10 YR 3/2) sandy and very slightly gravelly clay. [9204a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9205: fill for stake hole [9205a]; consisted of firm very dark greyish brow (10 YR 3/2) sandy and very slightly gravelly clay. [9205a]: cut for one of the nine closely packed stake holes

([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9206: fill for stake hole [9206a]; consisted of firm very dark greyish brow (10 YR 3/2) slightly sandy and very slightly gravelly clay. [9206a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9207: fill for stake hole [9207a]; consisted of firm very dark greyish brow (10 YR 3/2) slightly sandy and very slightly gravelly clay. [9207a]: cut for one of the nine closely packed stake holes ([9199 to 9207]) identified after the removal of leveller [9100] and isolated burnt patch [9096]; cut into [9101].

9208: see [9101].

9209: see [9101].

9210: see [9101].

9211: see [9213].

9212: see [9213].

9213: lower fill for [9101a]; equivalent to [9211, 9212, 9214, 9215]; consisted of firm yellowish brown (10 YR 5/4) slightly gravelly and sandy clay, brown (10 YR 4/3) very slightly gravelly clay, yellowish brown (10 YR 5/6) slightly gravelly clay, with moderate fragments of mortar.

9214: see [9213].

9215: see [9213].

9216: fill for [9216a]; consisted of loose dark yellowish brown (10 YR 4/4) gravelly CLAY; [9216a]: cut of a foundation trench supporting the entrance to the WTR, with associated mixed fill [9216] and [9216b]; [9216b]: fill for [9216a]; consisted of a pile of loose irregular stones of various sizes.9217: not in use.

9218: cut for entrance on eastern watch tower room wall; cut into [9185] watch tower room brick wall; filled by [9114, 9115, 9116, 9117, 9118, 9120 and 9121].

9219: sterile deposit identified in the auger hole test; underneath [9054]; comprised a firm strong brown (7.5 YR 5/8) mottled and clayey sand/gravel.

9220: fill for posthole [9220a]; consisted of firm yellowish brown (10 YR 5/4 to 10 YR 5/8) slightly gravelly and very slightly sandy clay. [9220a]: cut for posthole; set against north east corner of [9182] stone foundation of watch tower room on north facing section; contemporary with [PH9221]; cut into [9106, 9156, 9187/9179, 9184 and 9054]; set against north east corner of [9182] stone foundation of watch tower room wall; contemporary with [PH9221a/9221].

9221: fill for posthole [9221a]; consisted of firm dark greyish brown (10 YR 4/2) and brown (10 YR 5/3) slightly gravelly and very slightly sandy clay. [9221a]: cut for posthole; identified on north facing section against [9182] stone; cut into [9179/9187, 9156, 9184 and 9054]; contemporary with [PH9220a/9220]; not excavated.

9222: fill for posthole [9222a]; consisted of firm dark yellowish brown (10 YR 4/4) and yellowish brown (10 YR 5/6) very slightly gravelly and slightly sandy clay. [9222a]: cut for posthole identified on south facing section; below [9187]; cut into [9188, 9156, 9189 and 9054]; not excavated.

9223: fill for posthole [9223a]; comprised a firm dark greyish brown (10 YR 4/2) very slightly sandy clay. [9223a]: cut for posthole; identified after the removal of [9123] along eastern edge of T9; cut into [9139/9140 and 9054].

9224: stone wall running along the entire south facing section; partially covered in mortar; irregular stones of various sizes.

Southern Moat

9010: Fill below concrete surface [9001]; comprised loose brownish yellow (10 YR 6/8) sandy and gravelly silt with moderate amount of stones; contemporary with [9007].

9011: Upper moat fill above [9012]; truncated by modern house foundation [9013 and 9044]; consisted of firm yellowish brown (10 YR 5/6) slightly sandy and very slightly gravelly clay.

9012: Lower moat fill, below [9011]; comprised firm olive brown (2.5 Y 4/3) slightly sandy and very slightly gravelly clay.

9013: modern house stone foundation below [9007]; equivalent to [9004] and [9043]; to the west of southern village wall; L-shaped on plan; overall L1.5m x W0.69m; depth 0.36m; overall height 0.6m; comprised of 2 course stones (H 0.48m); sitting on concrete span; cut into southern village wall.

9014: identified as [906] during 2016 AIA excavation; eastern watch tower wall made of green bricks; 3-course green brick; mortar noticed below bricks; above [9016].

9015: stone foundation wall (granite) of southern village wall below [9062] leveller; 5 courses visible on south west facing section within the southern moat excavation;

9016: stone wall foundation of watch tower room (south east corner); below bricks [9014] ([914]); built against southern village wall foundation [9015]; 4 courses of granite stones visible on south east facing section.

9090: fill for [9090a]; consisted of firm strong brown (7.5 YR 4/6) gravelly (angular to sub-angular) slightly sandy clay. [9090a]: cut for modern wall [9090]; consisted of concrete span base [9094], red bricks [9093] and associated fill [9090]; below concrete surface [9001].

9093: red bricks part of modern wall [9090], sitting on concrete span [9094]; L-shaped on plan, extending towards south west under concrete platform; overall 23x36xD16cm; partially covered in mortar (c.1cm thick).

9094: concrete span below [9093] red bricks, part of modern wall [9090].

Western Moat

9001: Modern tile floor level set onto concrete.

9138/9142: western moat upper fill, below concrete and above [9143]; consisted of loose yellowish brown (10 YR 5/6) slightly gravelly clay.

9143: western moat fill; below [9142]; above [9151]; consisted of firm dark brown (10 YR 3/3) very gravelly, silty and very slightly sandy clay.

9144: concrete floor leveller; below concrete; consisted of strong brown (7.5 YR 5/8) sandy, silty and clayey gravel with cobbles.

9145: fill or leveller for house adjacent to western moat; below [9144], above [9146]; loose yellowish brown (10 YR 5/6) gravelly clay.

9146: fill/floor below [9145]; adjacent to western moat; comprised a firm strong brown (7.5 YR 4/6) clayey and slightly sandy gravel.

9150: brick wall, upper part of western village wall; 4-course, green bricks; intact brick measures c.33x10xD8.

9151: dark greyish brown (10YR 4/2) very slightly sandy CLAY fill in western moat fill; below [9143].

9152: stone foundation, lower part of western village wall; 4-course; mostly large irregular granite stones of various sizes; overall excavated length c.3.8m.

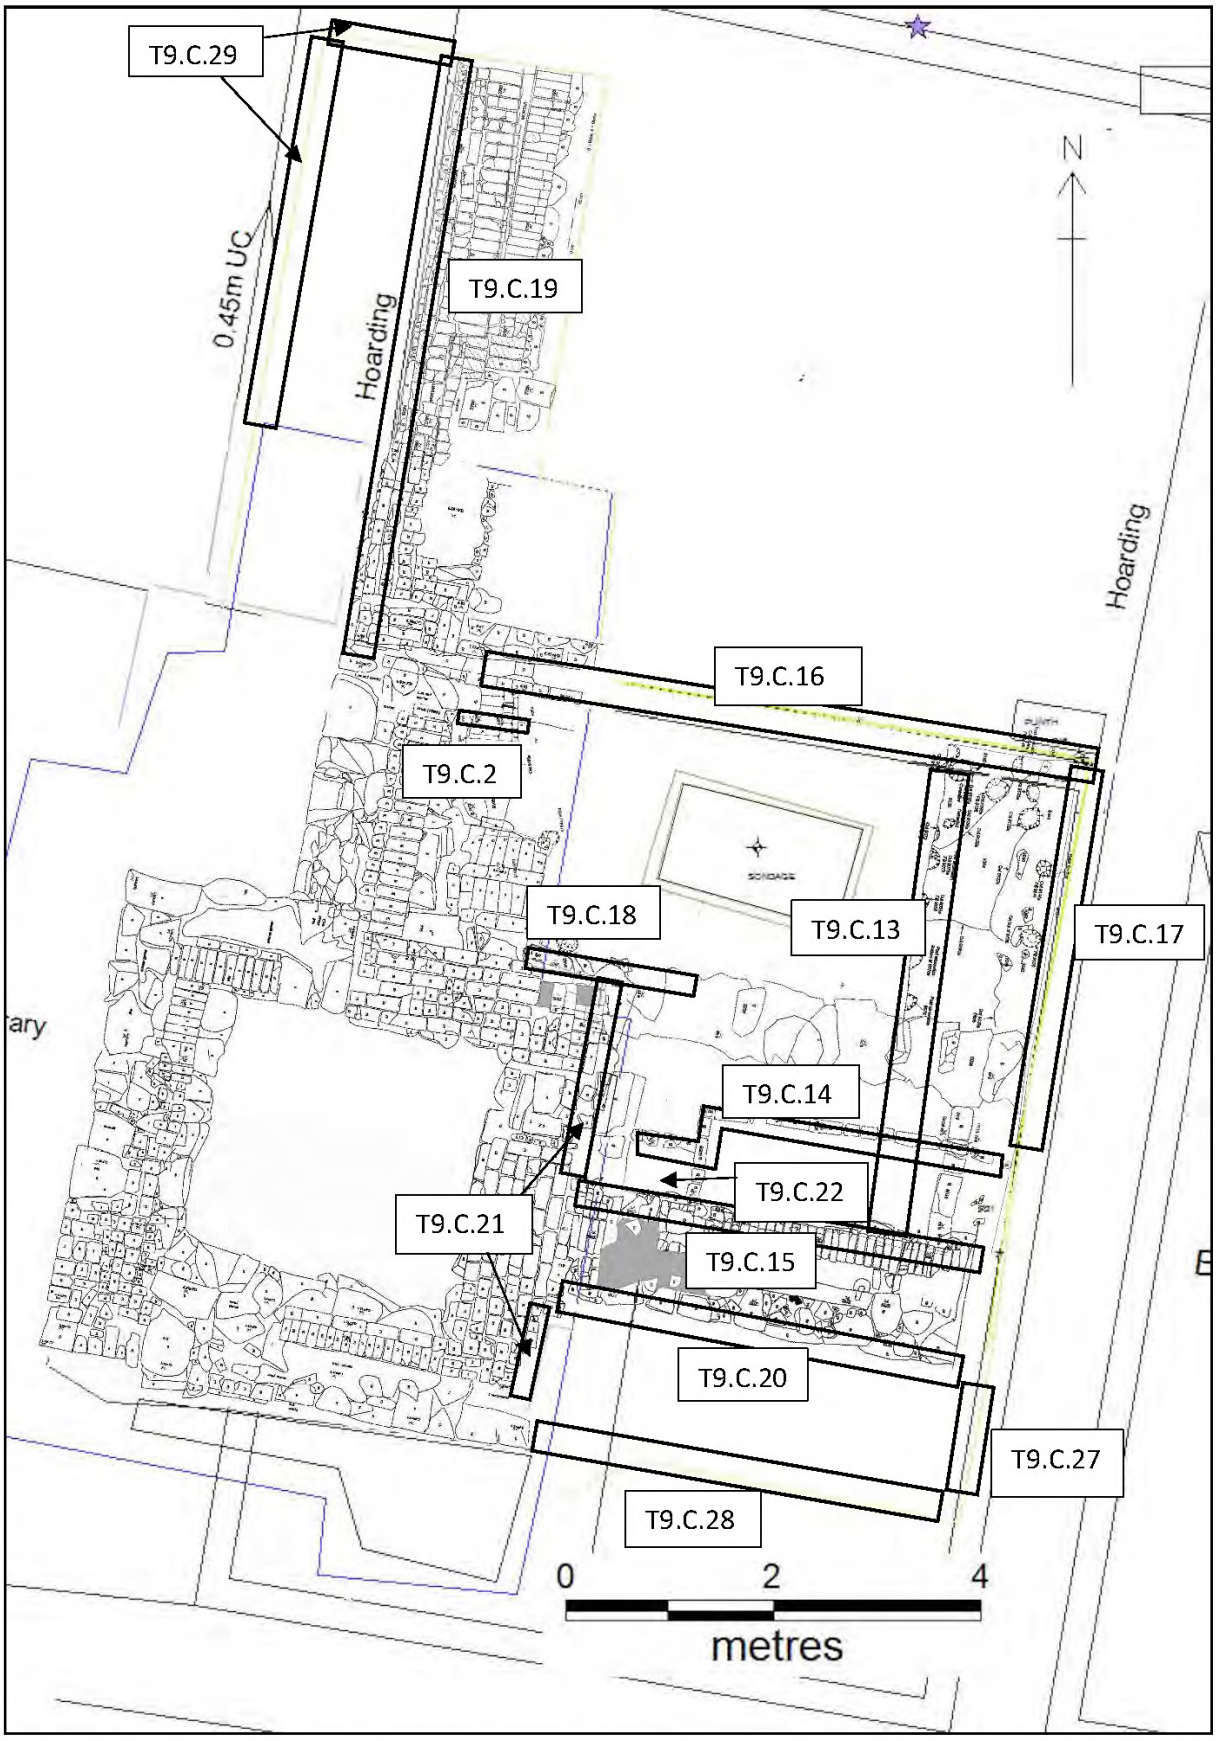
* Finds presented with category/fabric code, for further information please see ***Annex A and B Trench artefact description***

**Proposed dating based on stratigraphy, diagnostic artefacts, TL-dating and historical information.

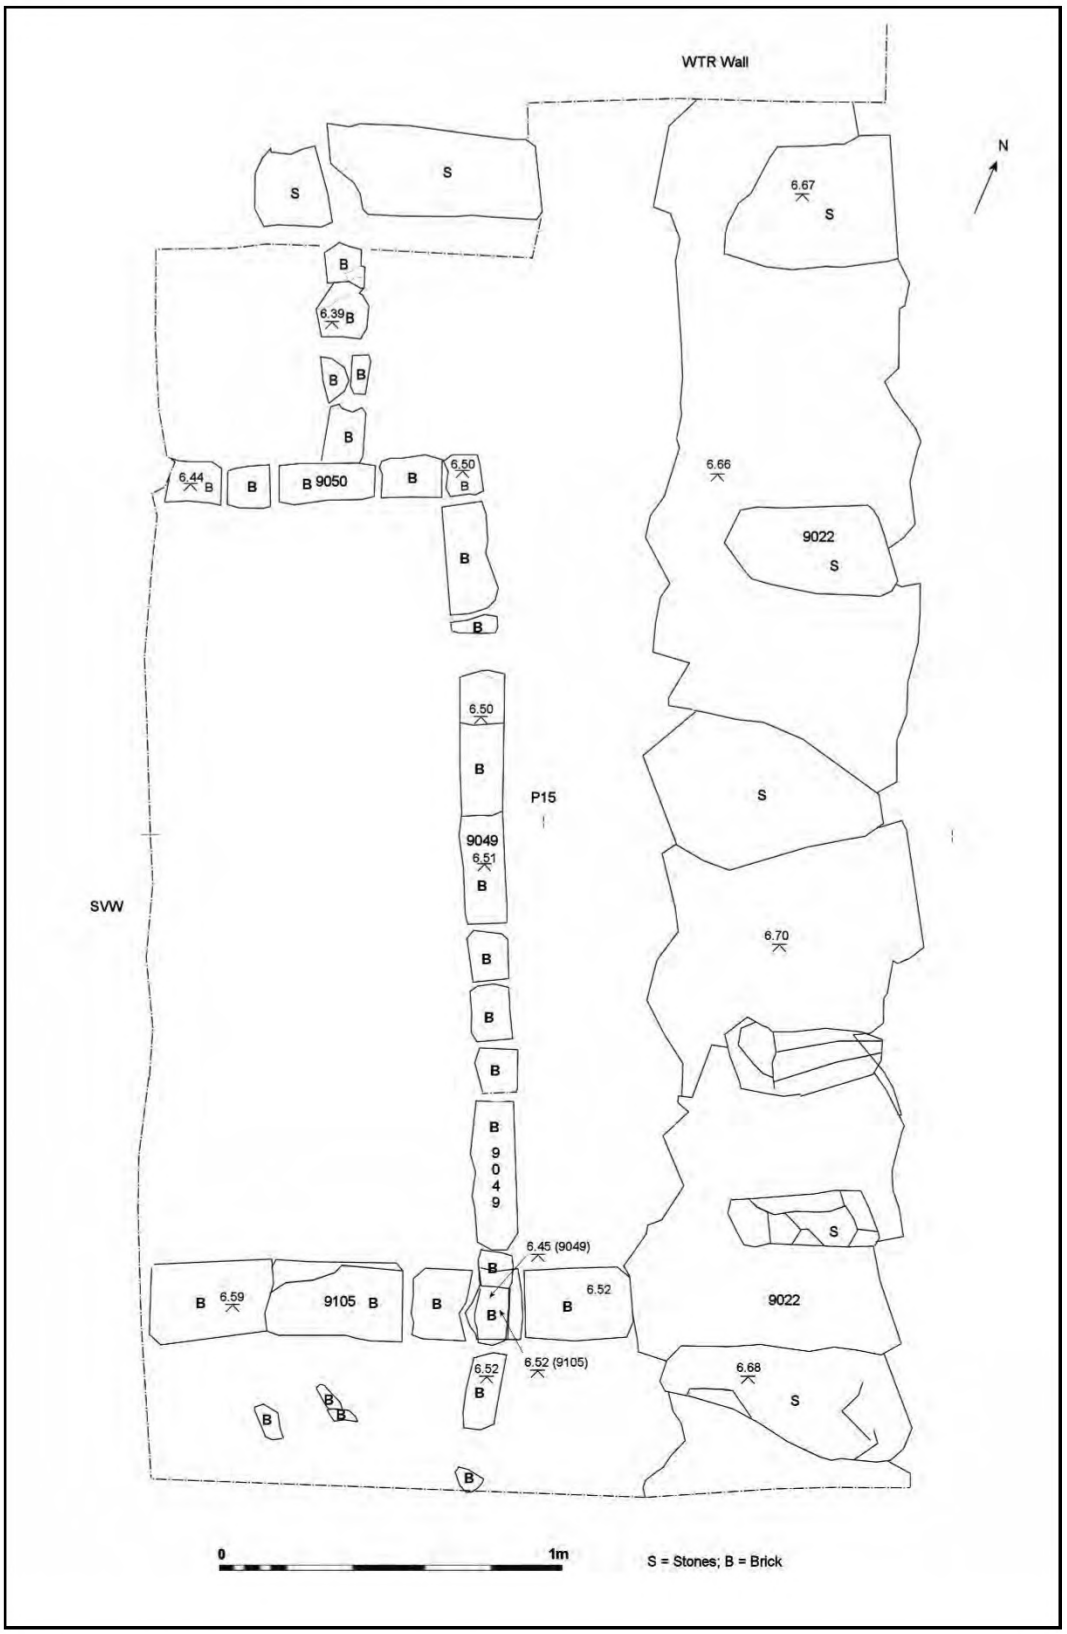
T9.C Trench 9 drawings

Key to ground plans

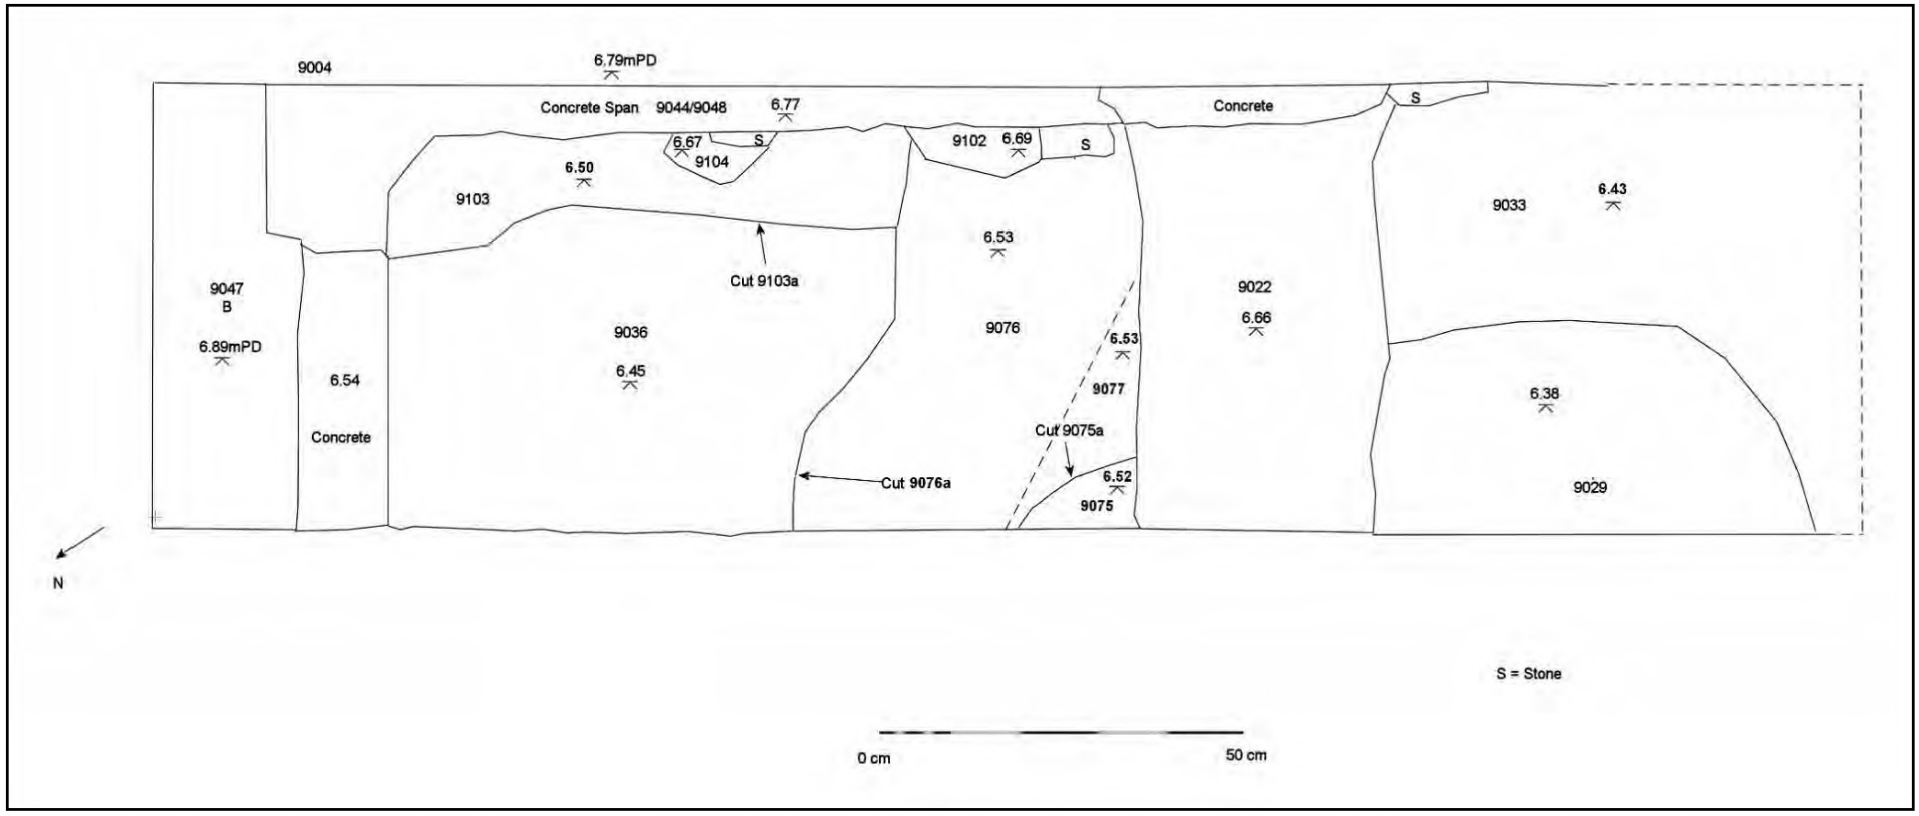
Key to section drawings



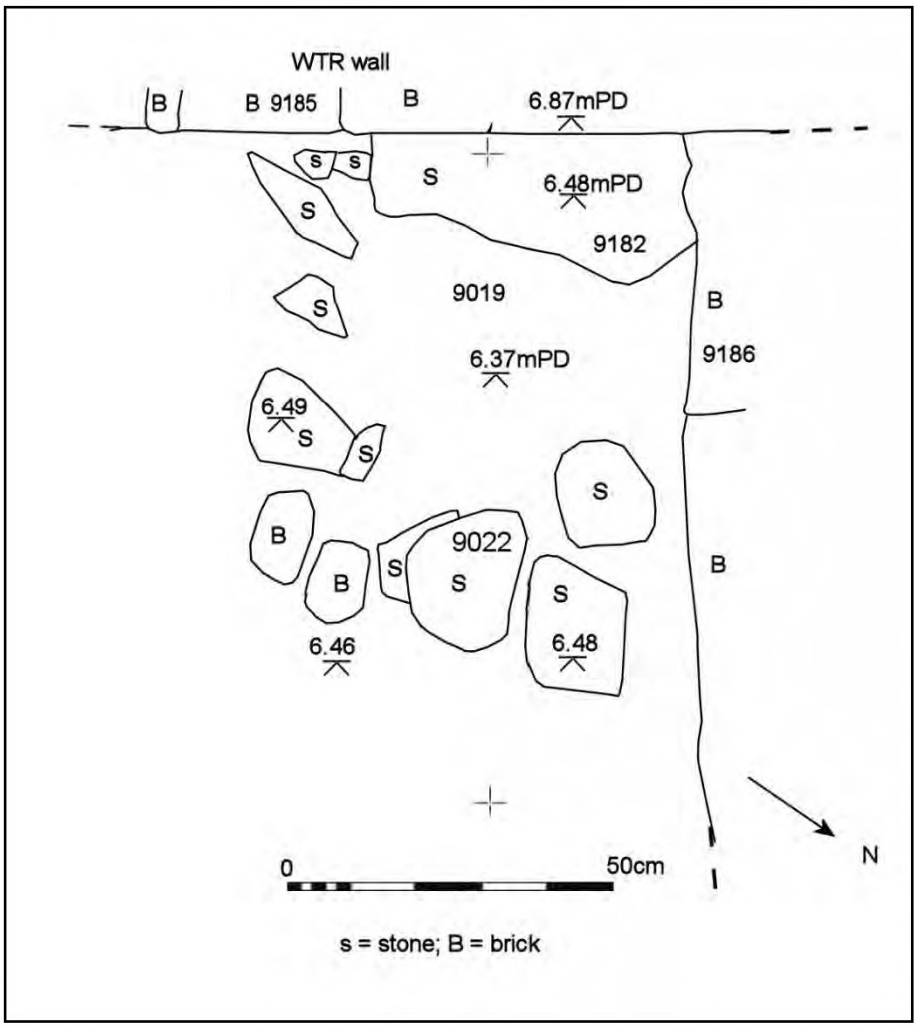
Groundplans and section of structural remains



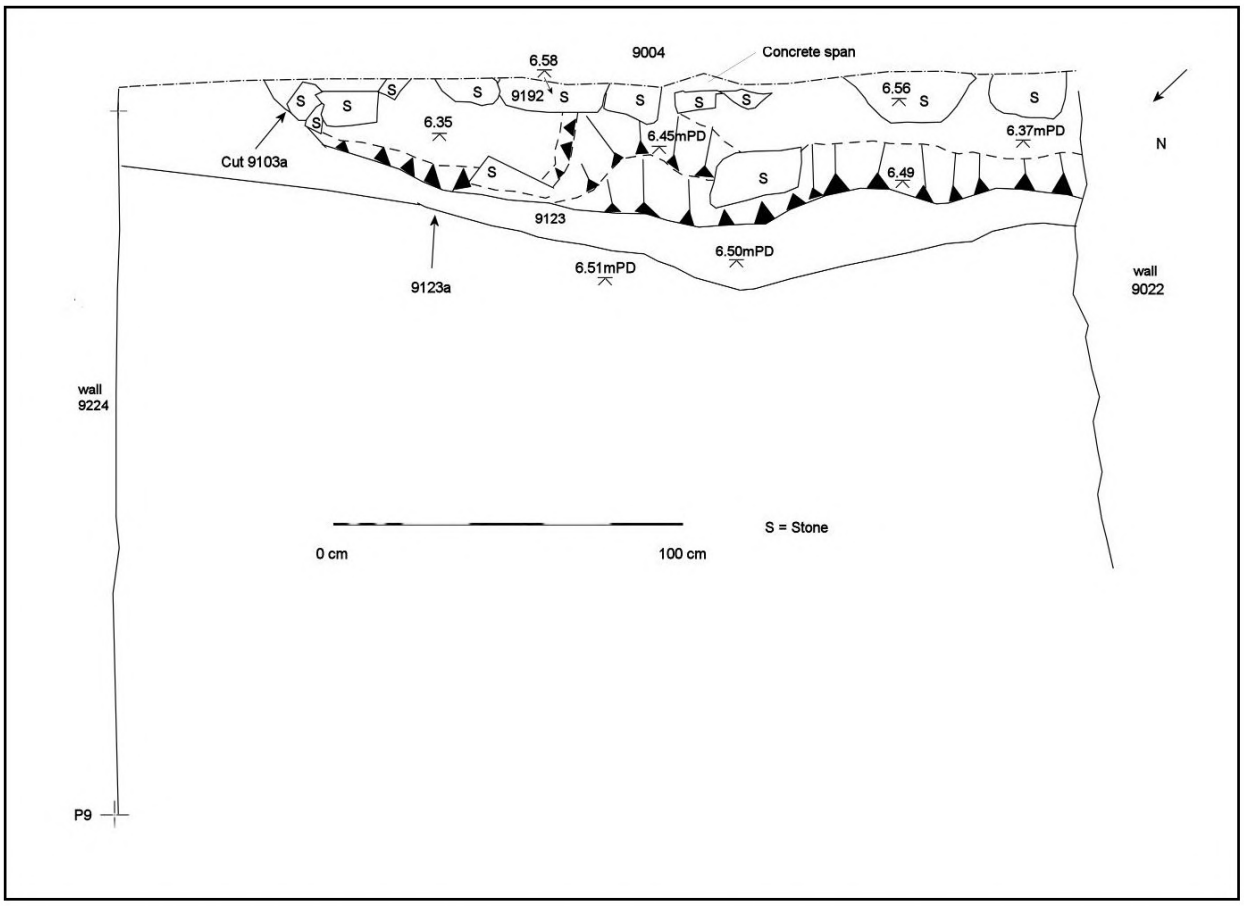
T9.C.1 Multiphase plan showing modern wall [**co.9022**] and brick alignment [**co.9049/9050/9134**] truncated by another brick alignment [**co.9105**] within the watch tower room area.



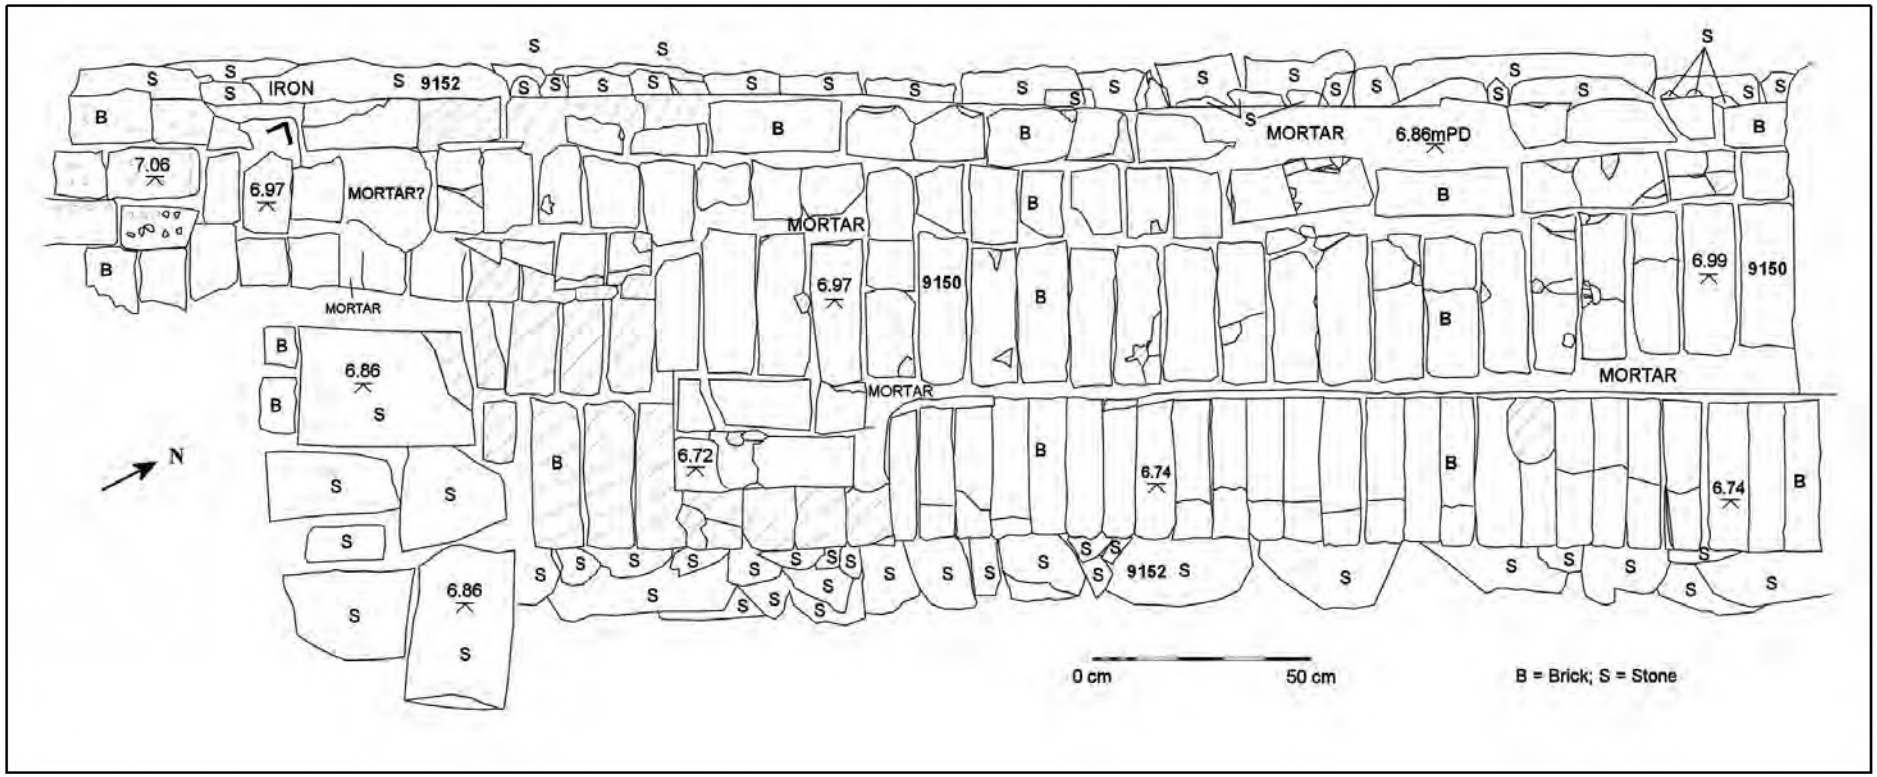
T9.C.2 Multiphase plan showing various features identified along the eastern edge of the trench within the watch tower room area.



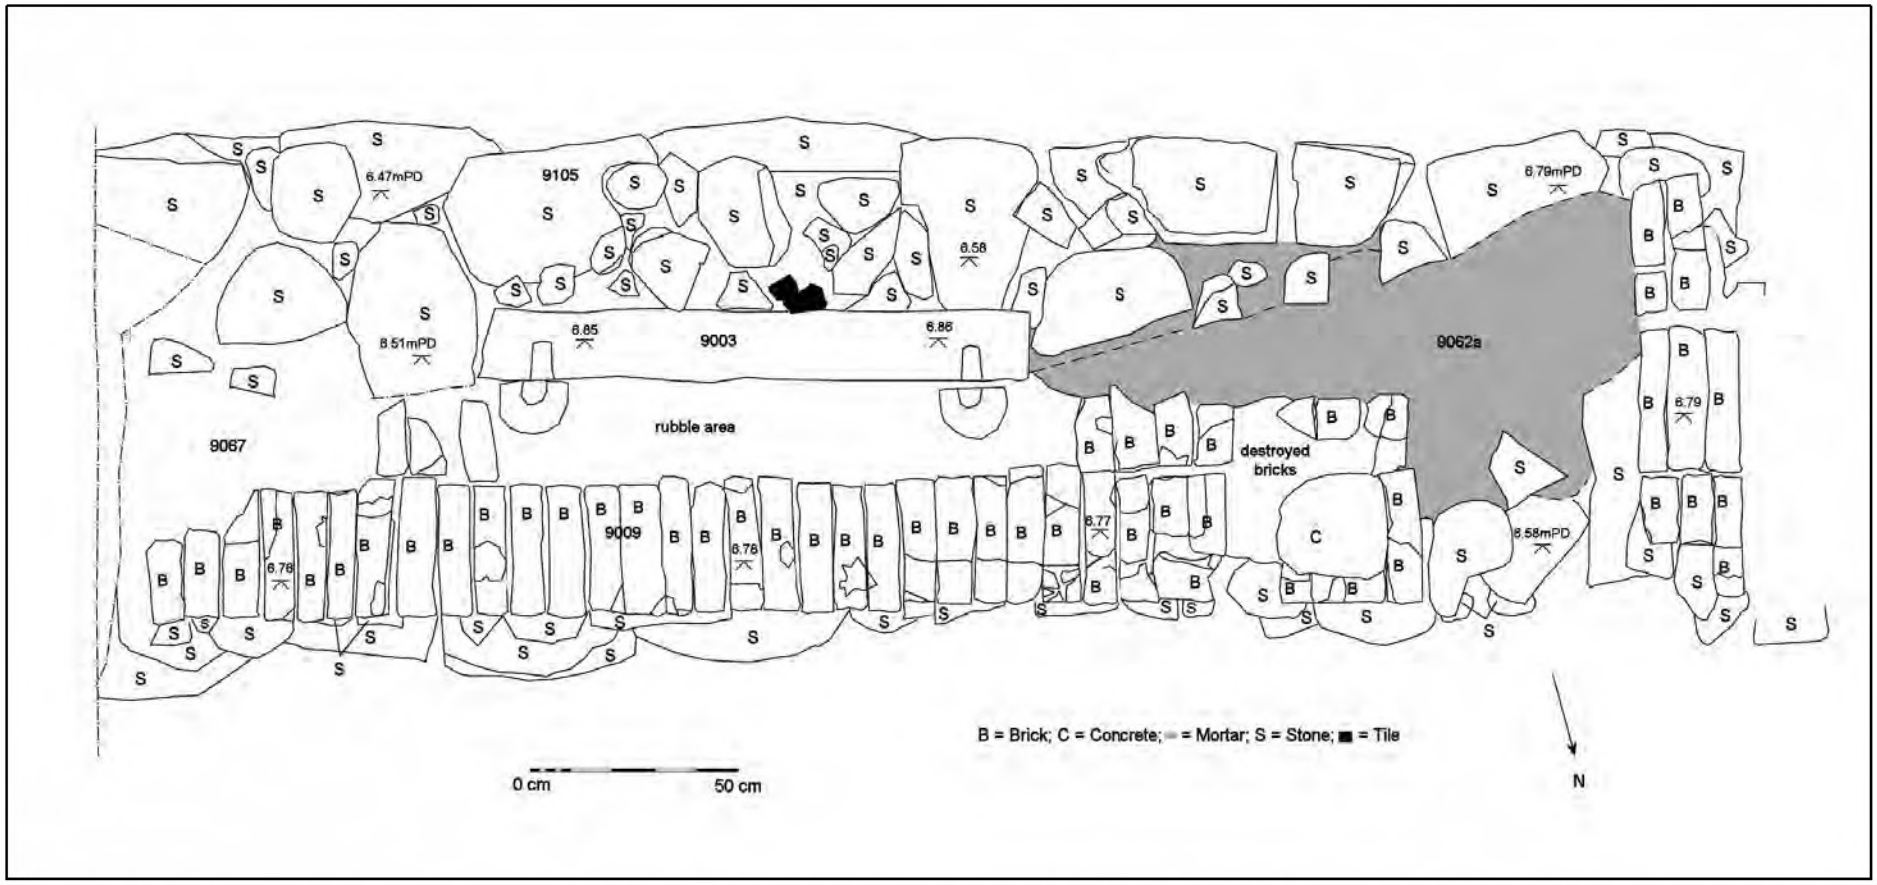
T9.C.3 Plan showing possible L-shaped feature [**co.9022**] identified near northern watch tower room wall.



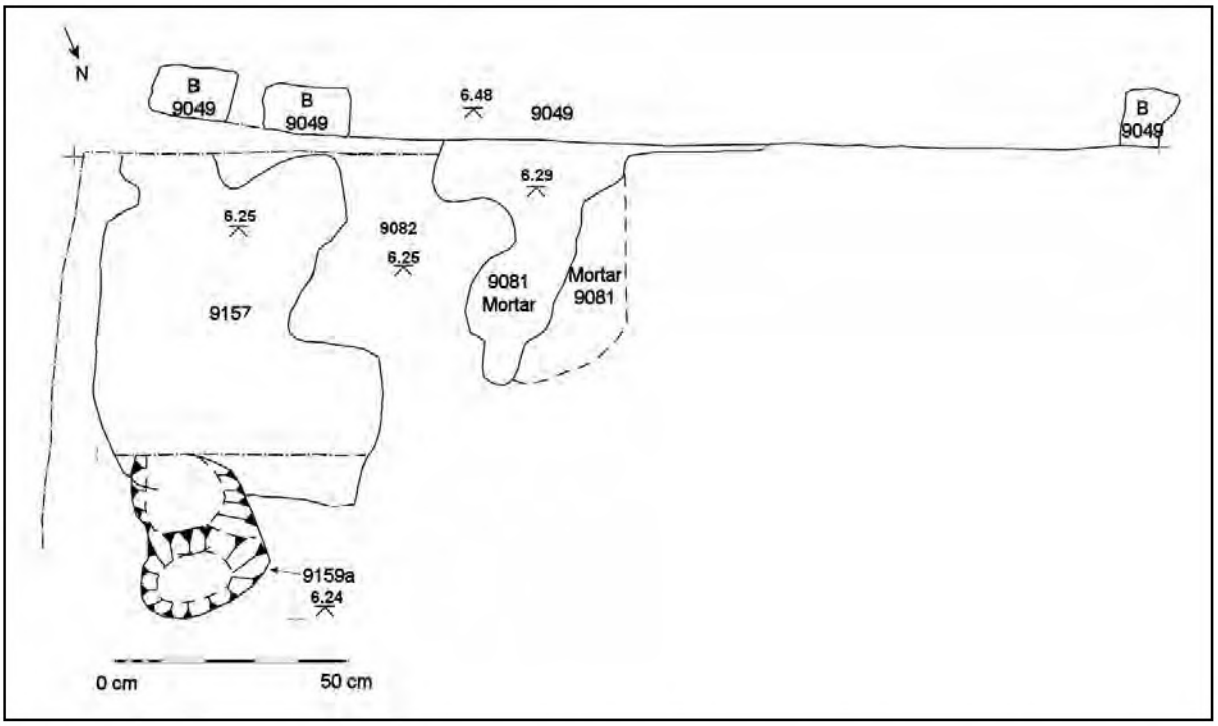
T9.C.4 Plan showing elongated feature [**co.9103a/9103**] identified along the eastern edge of the trench cutting into [**co.9123a/9123**] within the watch tower room area.



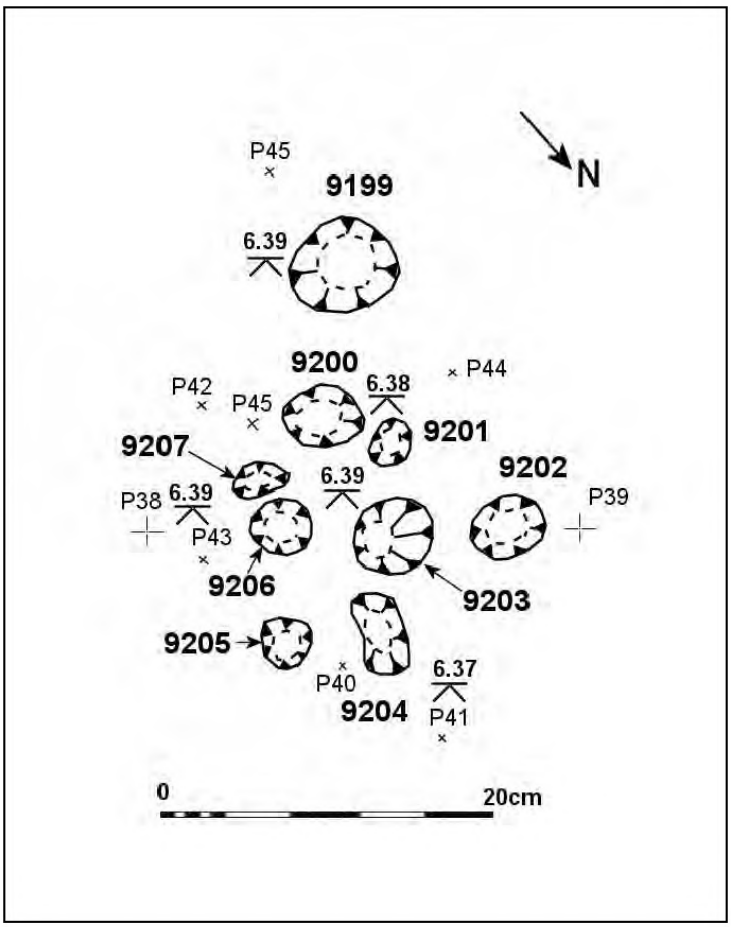
T9.C.5 Plan of western village wall [**co.9150/9152**] in T9.



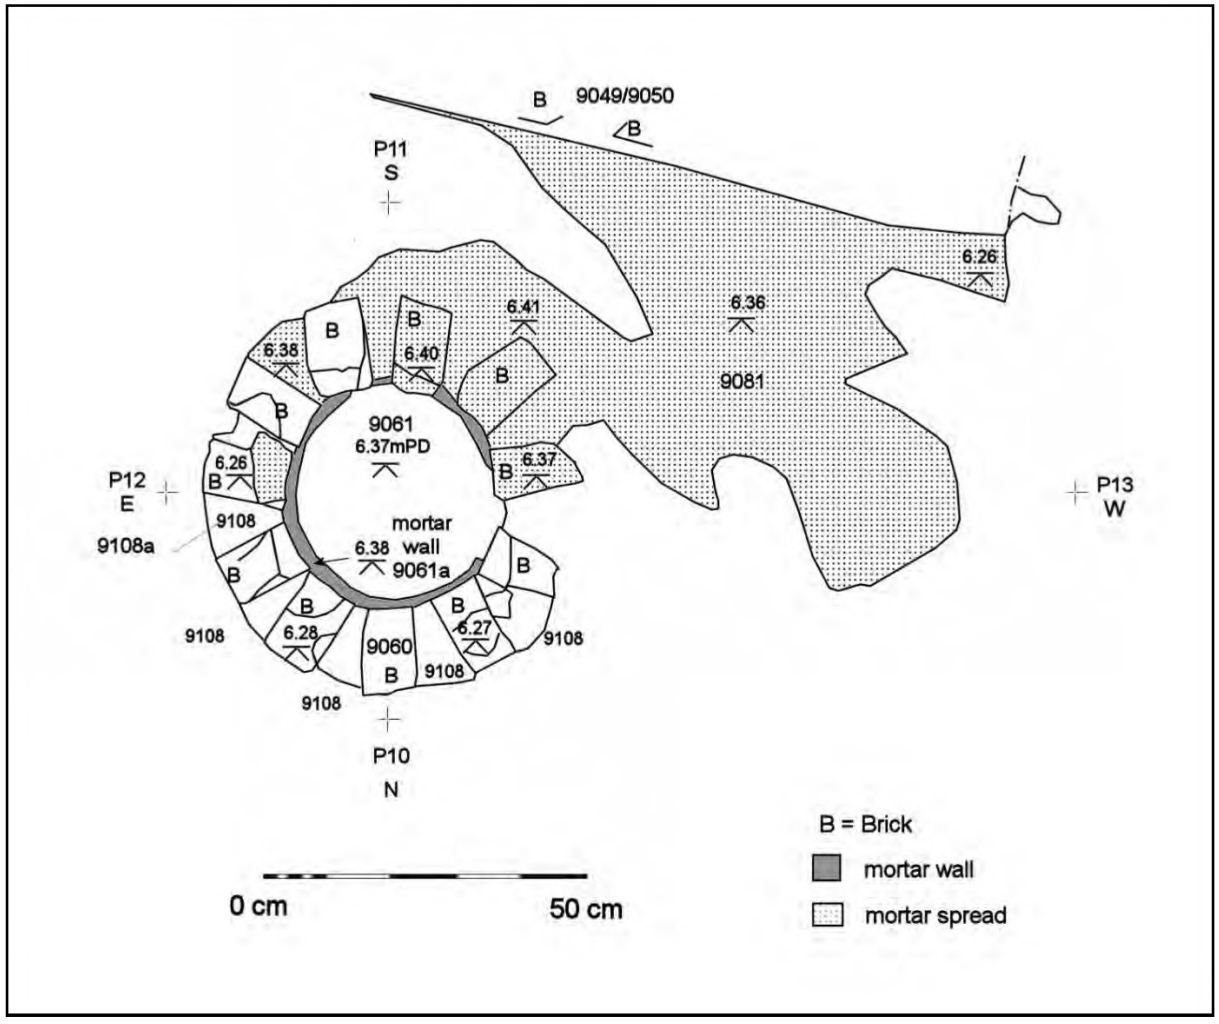
T9.C.6 Plan showing southern village wall [**co.9001/9021/9105**], overlying mortar [**co.9062a**], fill layer [**co.9067**] and threshold [**co.9003**].



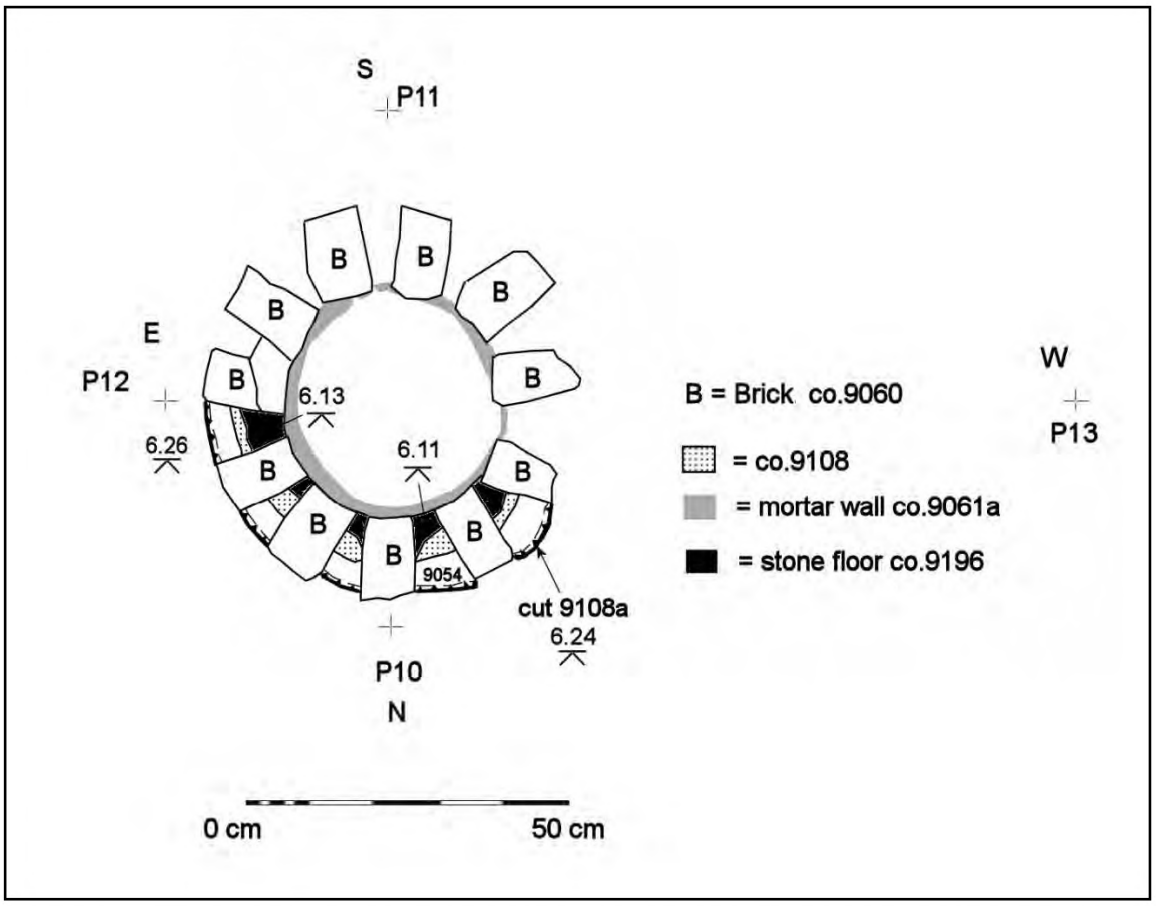
T9.C.7 Multi-phase plan showing possible posthole [**co.9159a/9159**] in relation to brick alignment [**co.9049**], mortar spread [**co.9081**] and possible degraded mortar spread [**co.9157**] within the watch tower room area.



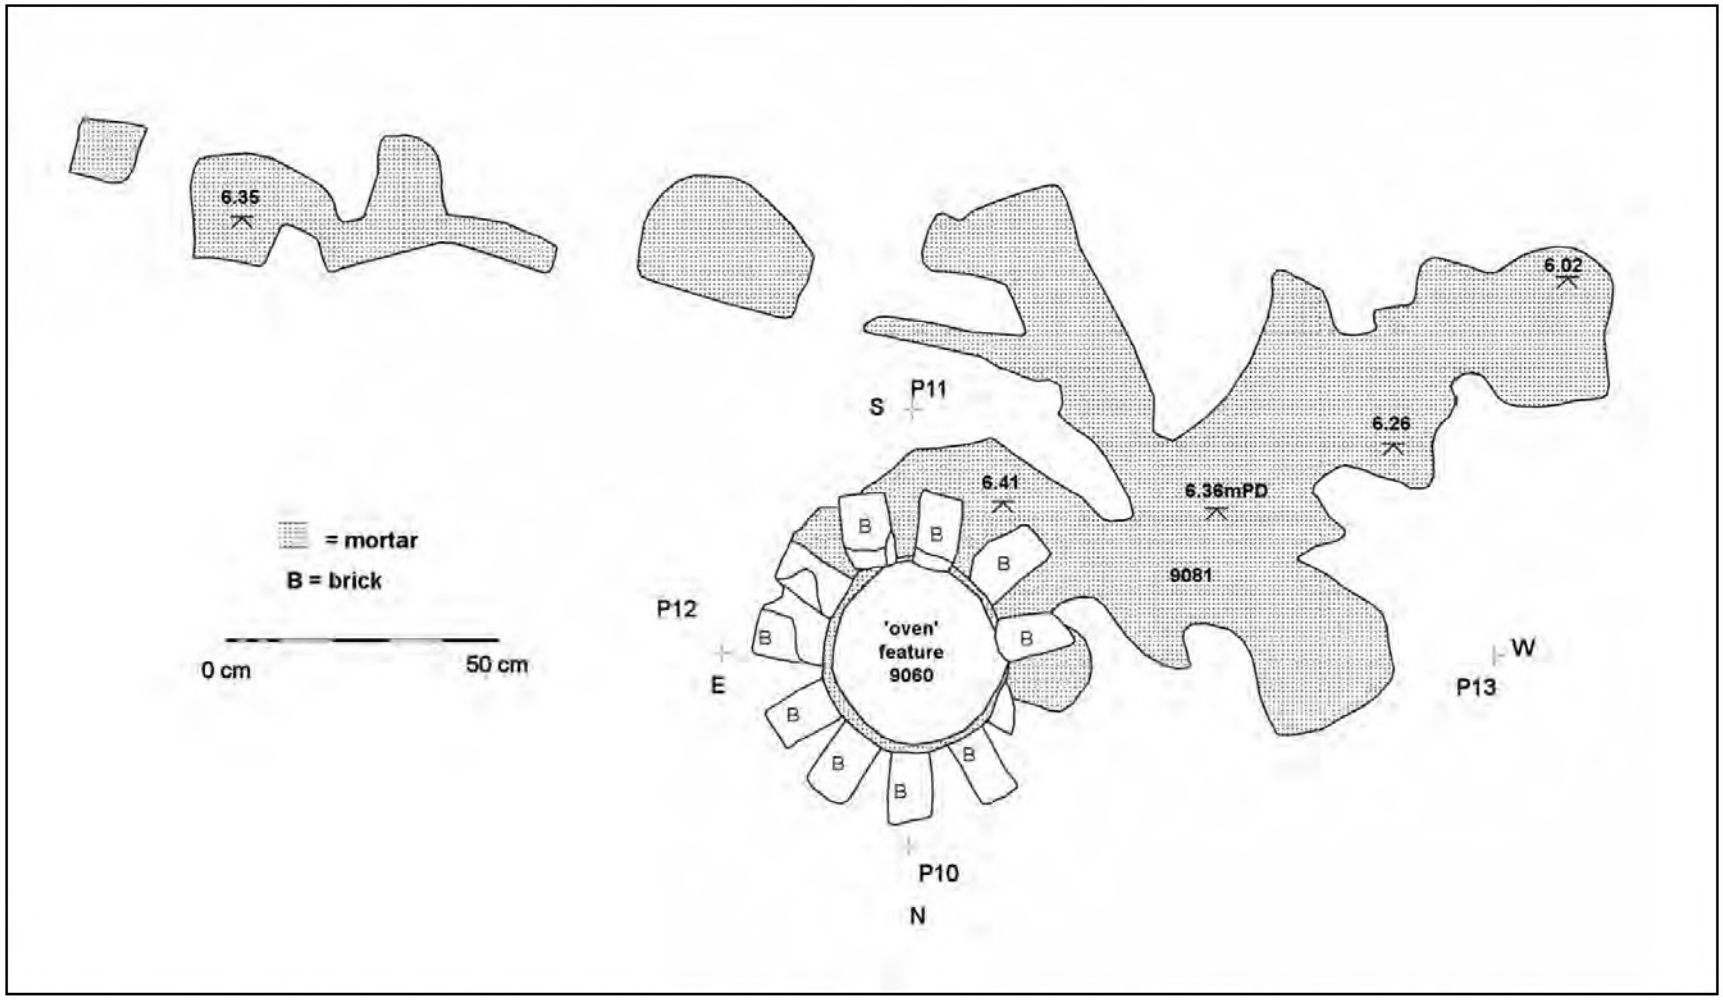
T9.C.8 Post-ex plan of stake holes **[co.9199 to 9207]** cutting into **[co.9101]** within the watch tower room area.



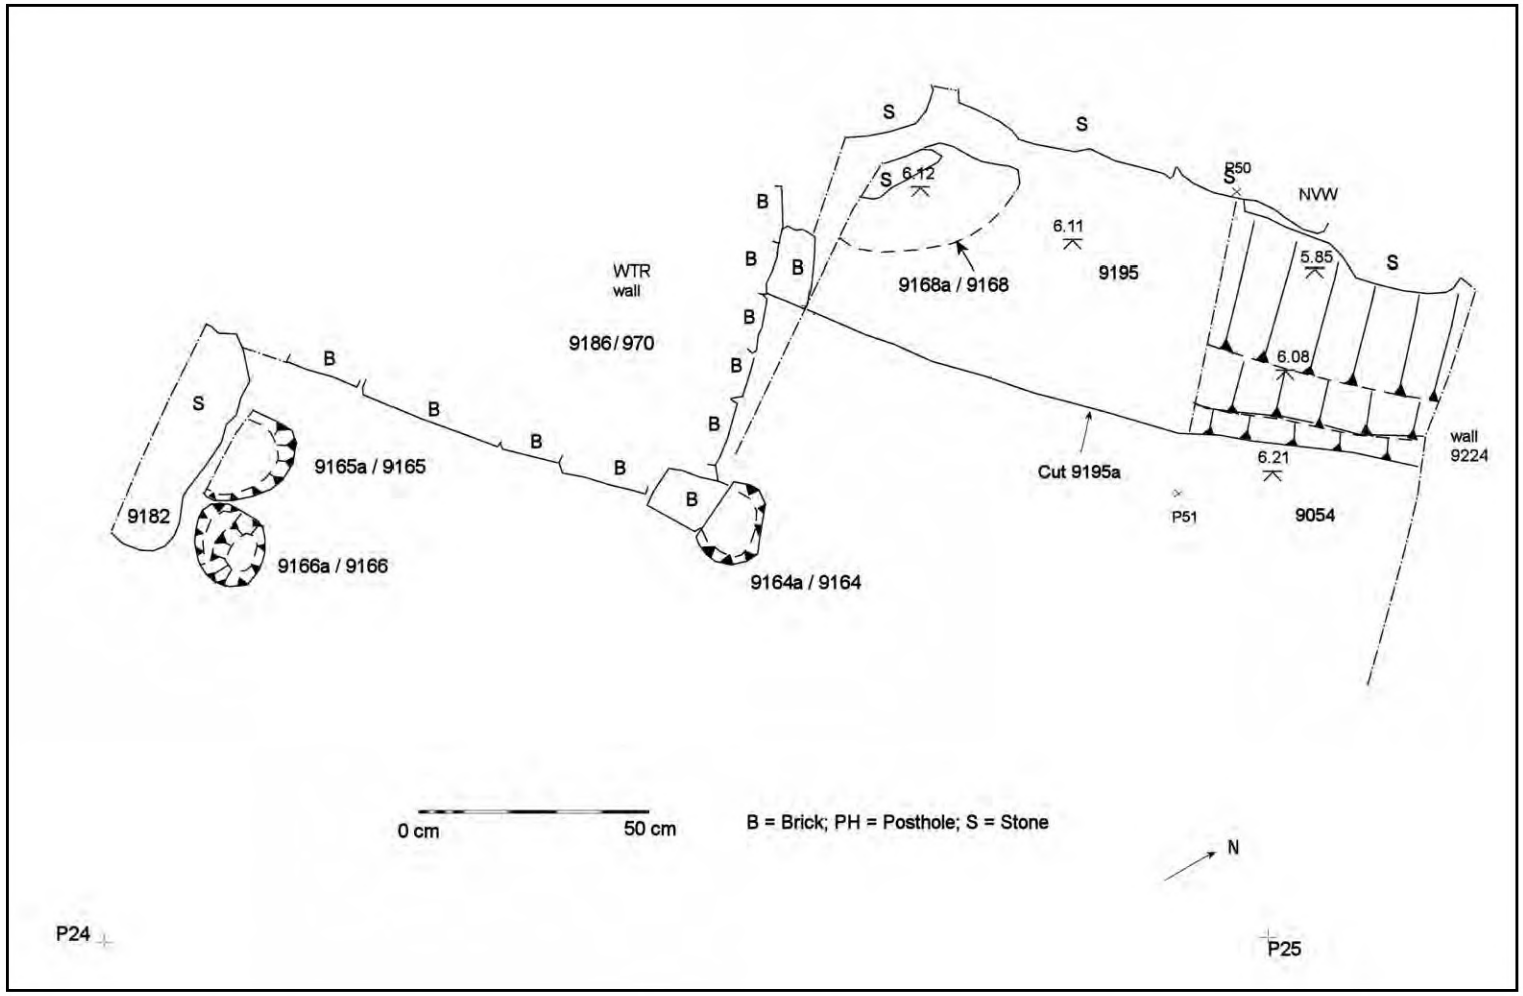
T9.C.9 Plan showing the 'oven' feature [**co.9060**] and associated fill and cut overlain by mortar spread [**co.9081**] within the watch tower room area.



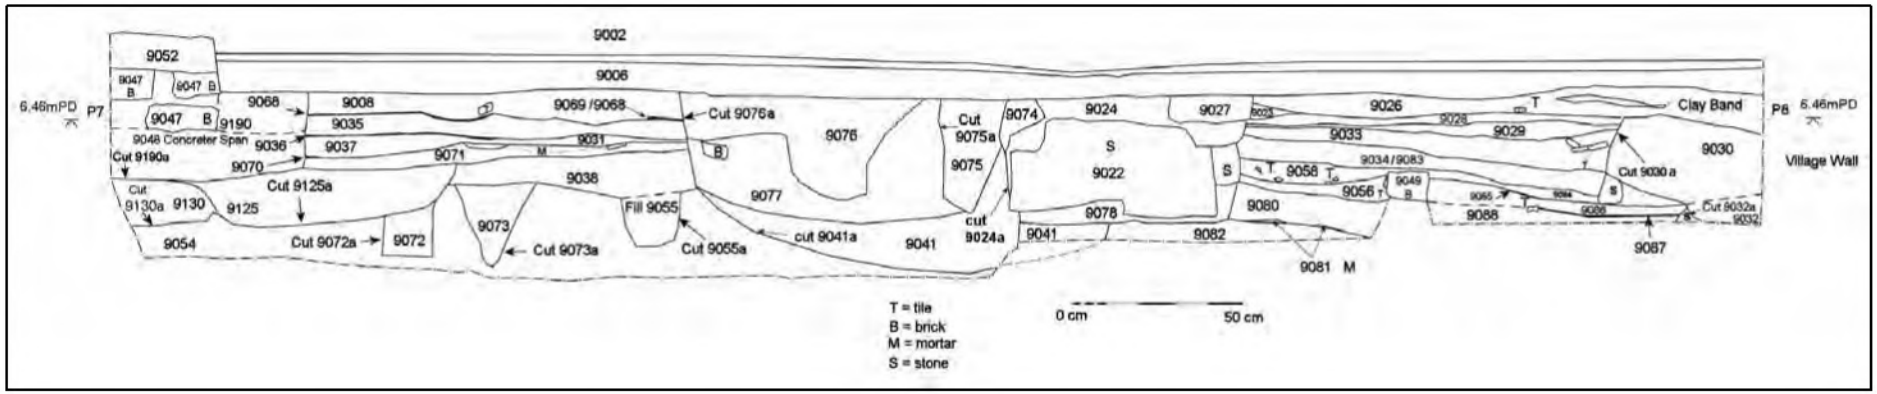
T9.C.10 Plan showing the radial bricks [**co.9060**], stone floor [**co.9196**], associated cut [**co.9108a**], fill [**co.9108**] and mortar wall [**co.9061a**] of the 'oven' feature within the watch tower room area.



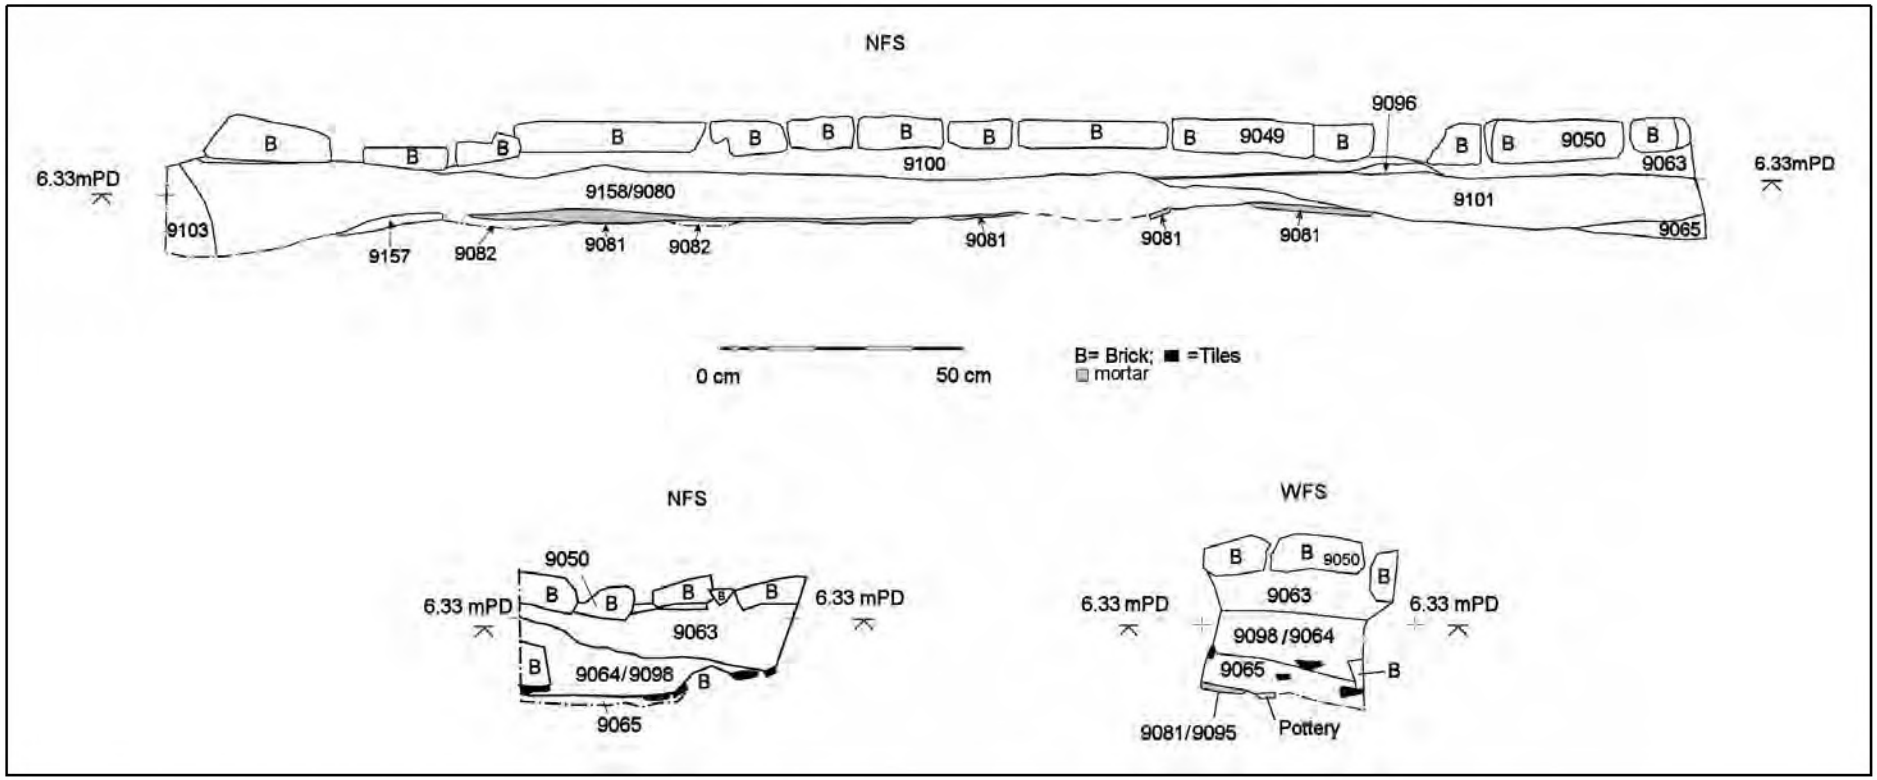
T9.C.11 Plan showing the 'oven' feature [**co.9060**] and overlying mortar spread [**co.9081**] within the watch tower room area.



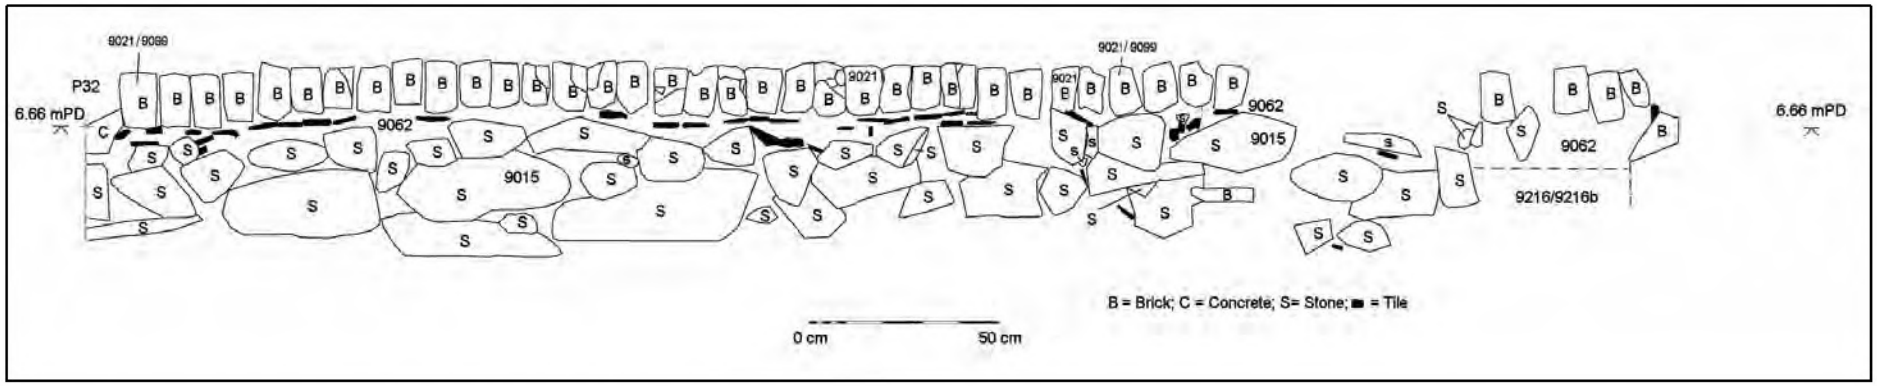
T9.C.12 Multi-phase plan showing elongated feature [**co.9195a**], pit feature [**co.9168a/9168**] and various postholes identified on top of layer [**co.9054**] near the watch tower room.



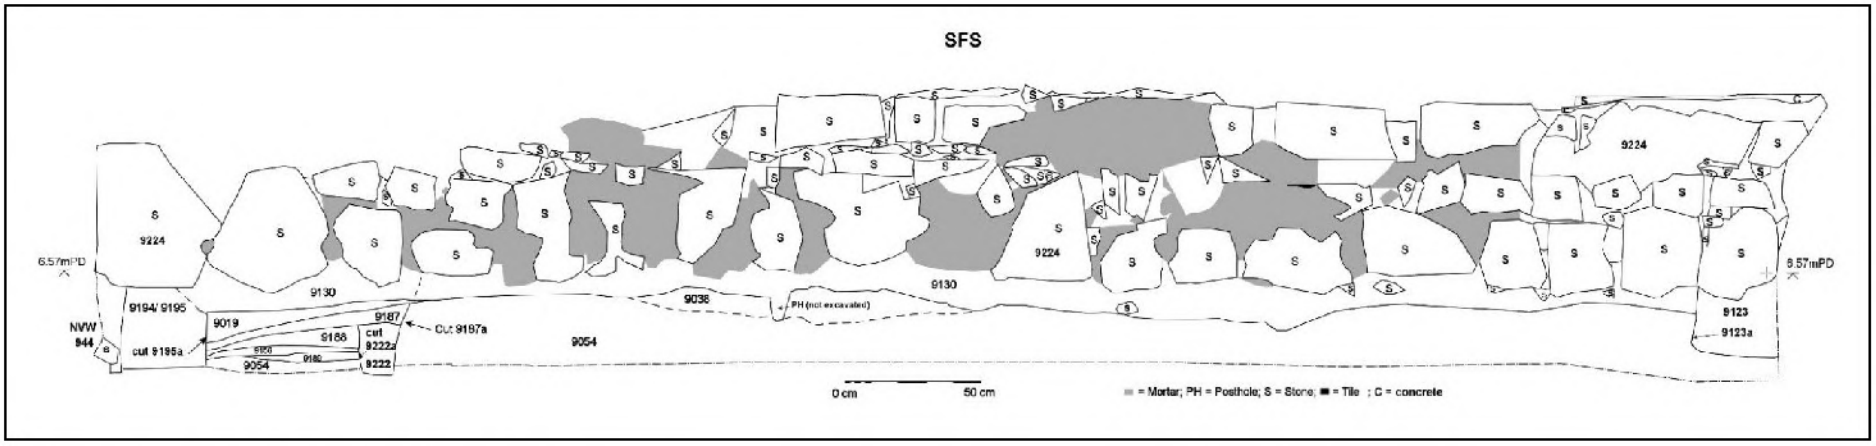
T9.C.13 West facing section of T9, watch tower room area



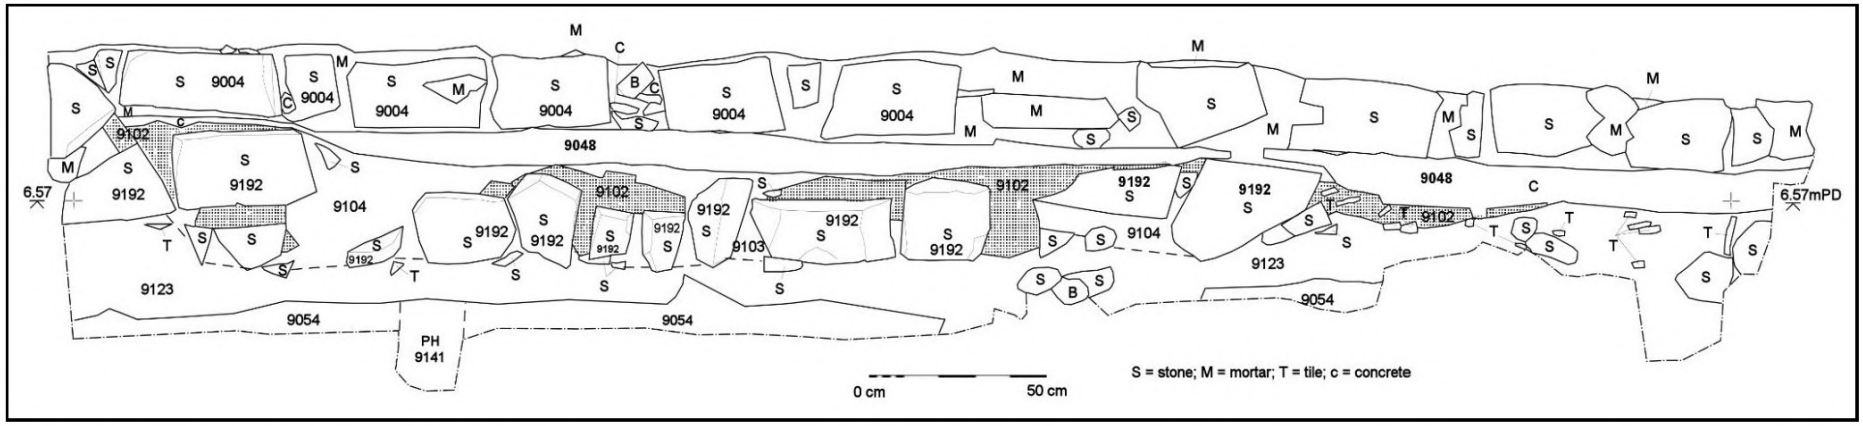
T9.C.14 North facing section and west facing section of brick alignment [**co.9049/9050/9134**] within watch tower room area.



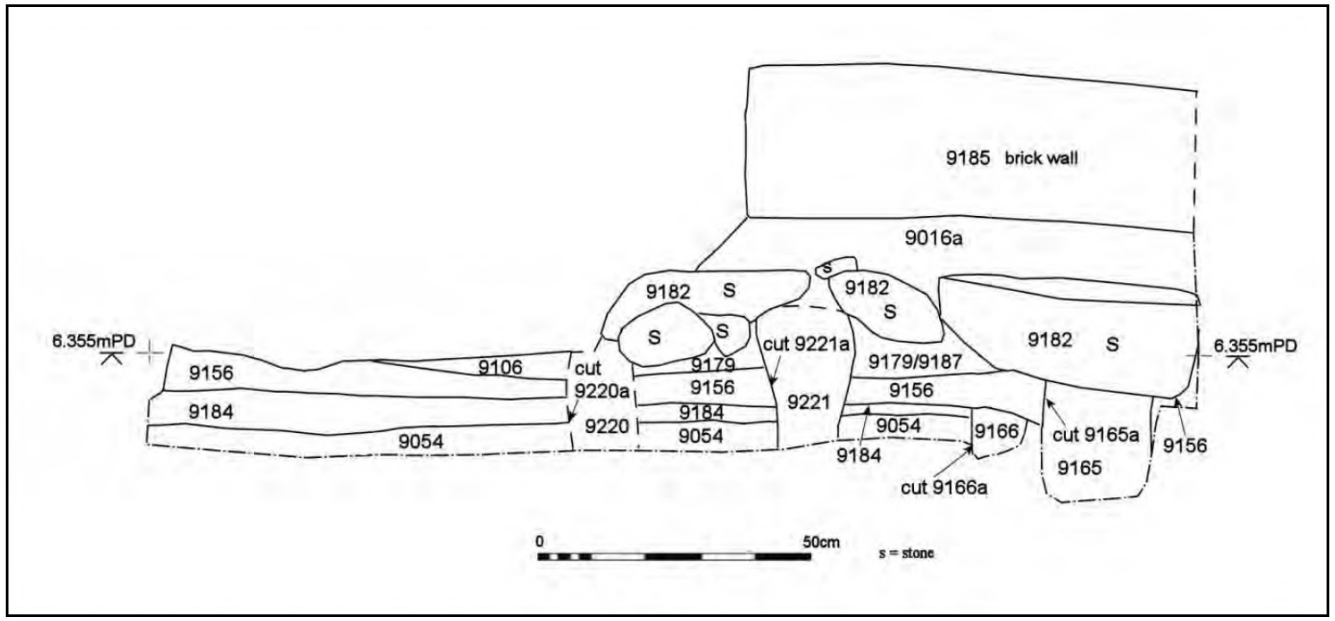
T9.C.15 North facing elevation of southern village wall.



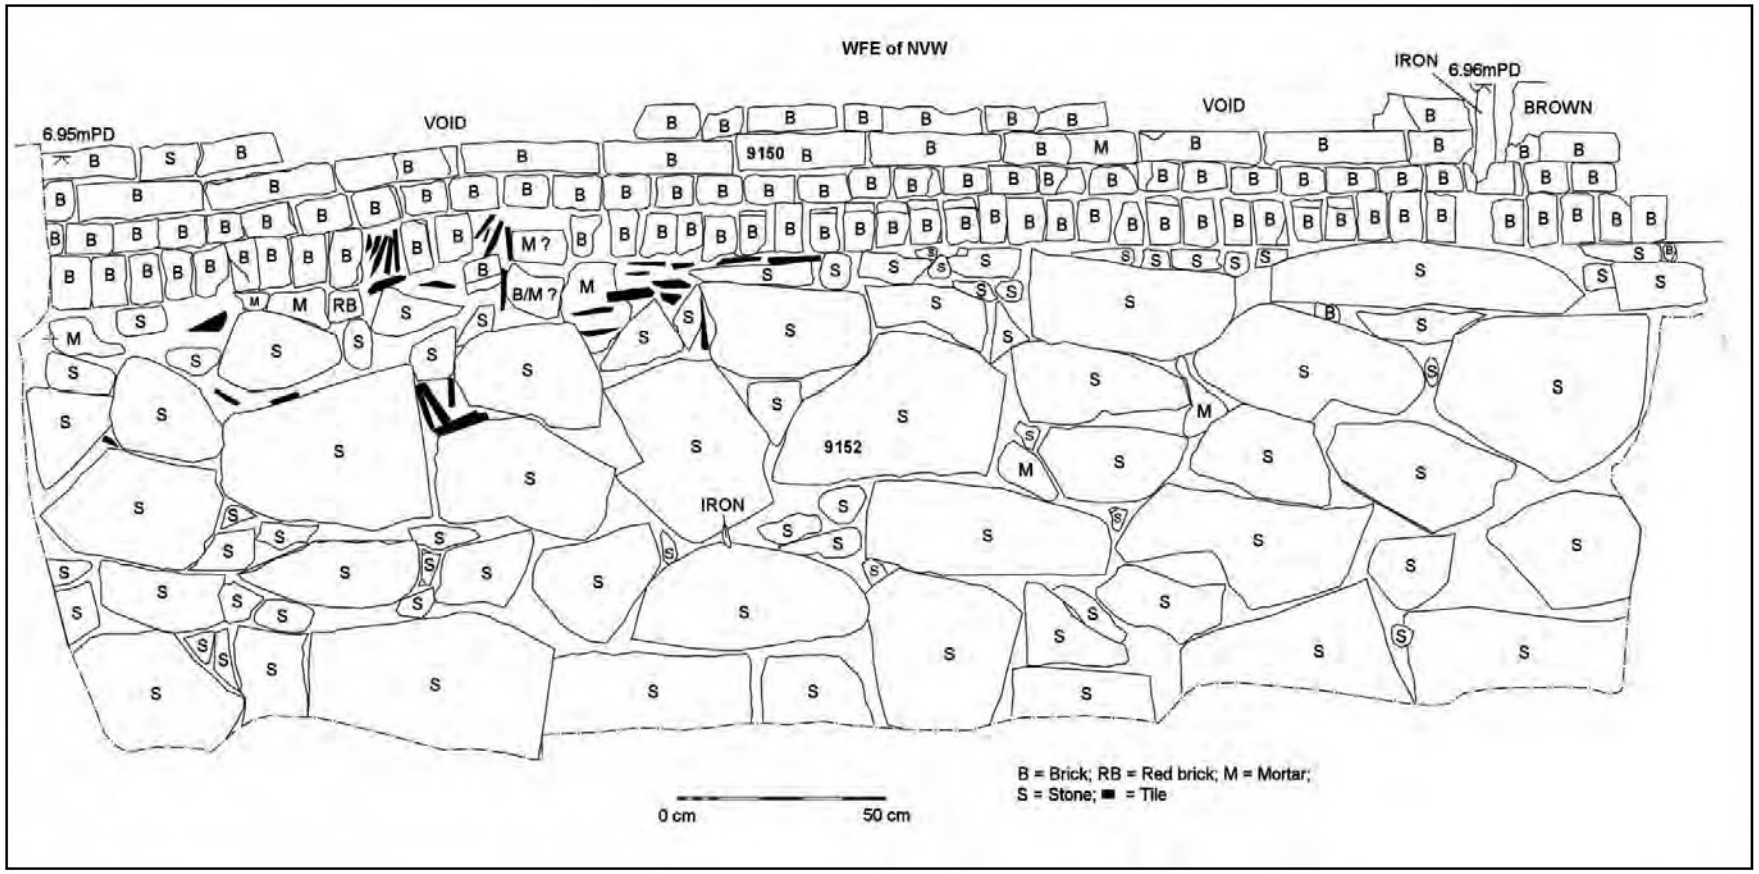
T9.C.16 South facing section of T9.



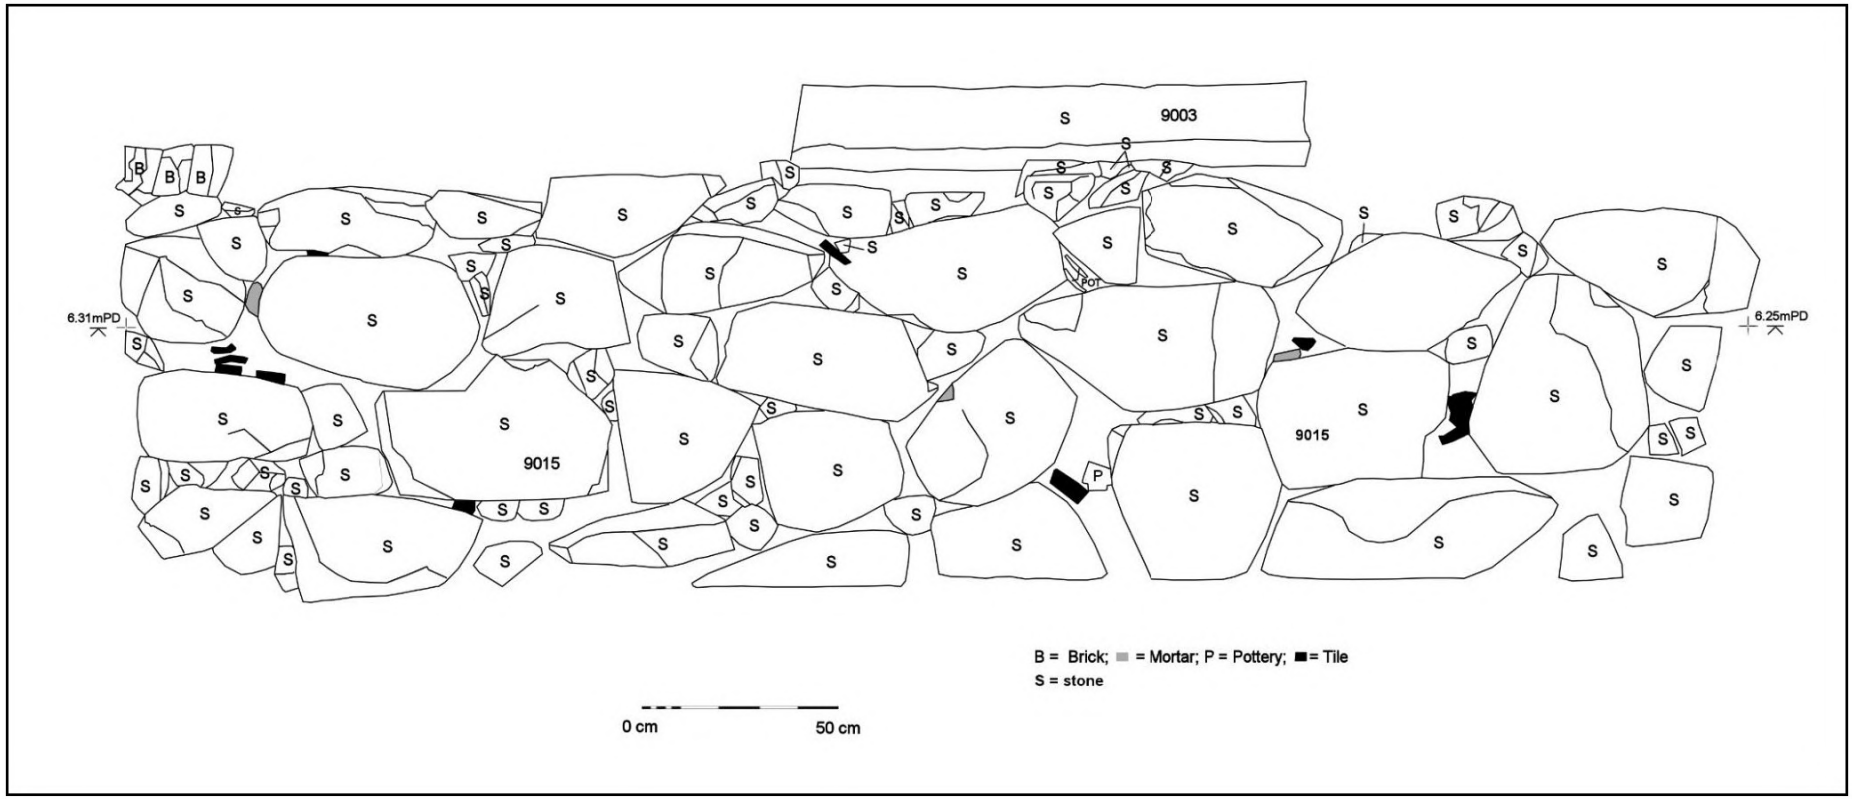
T9.C.17 West facing section of T9.



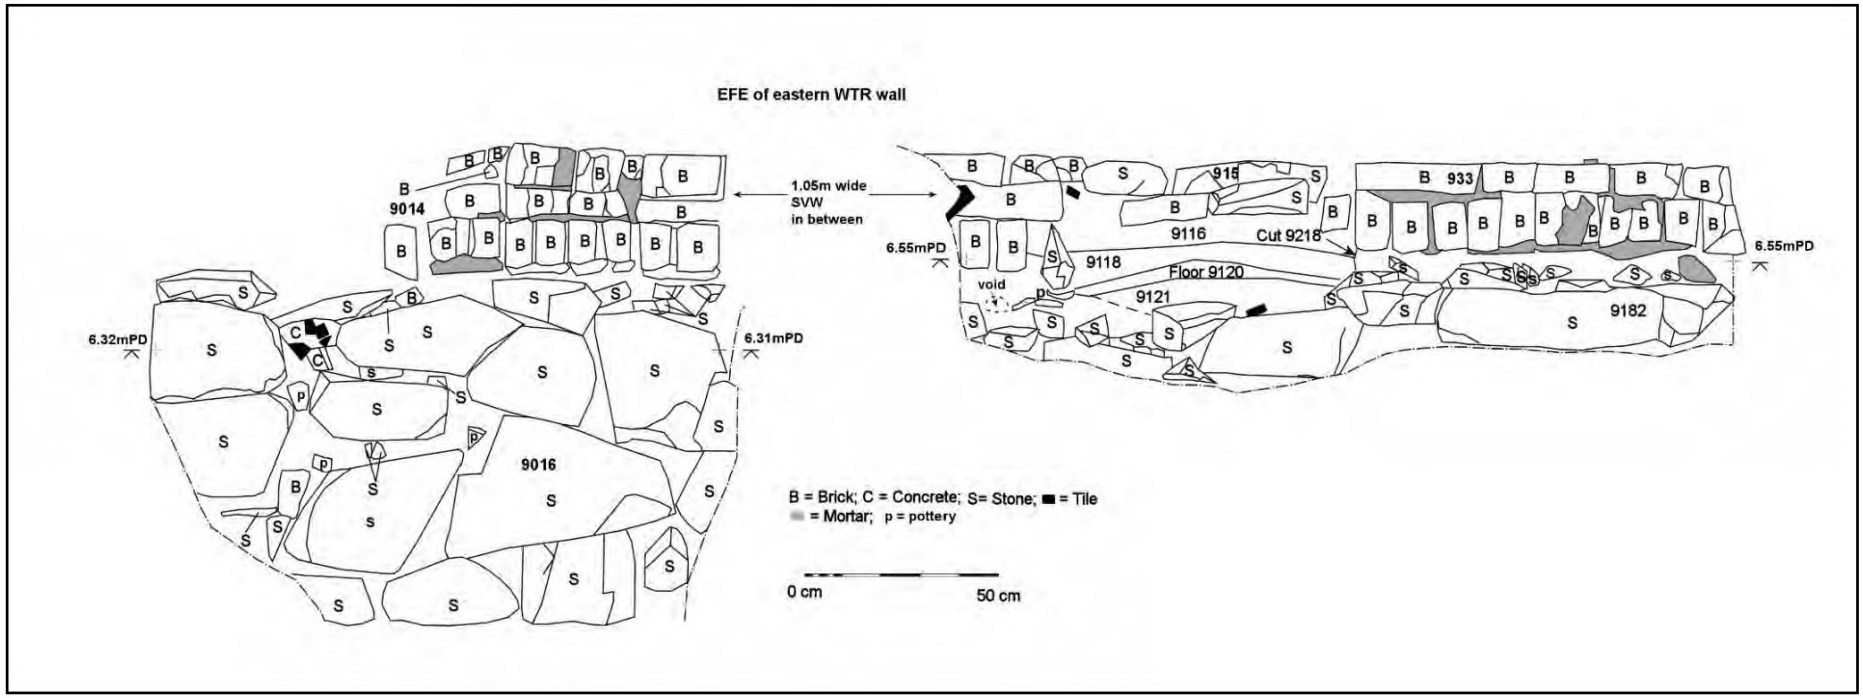
T9.C.18 North facing section below north watch tower room wall.



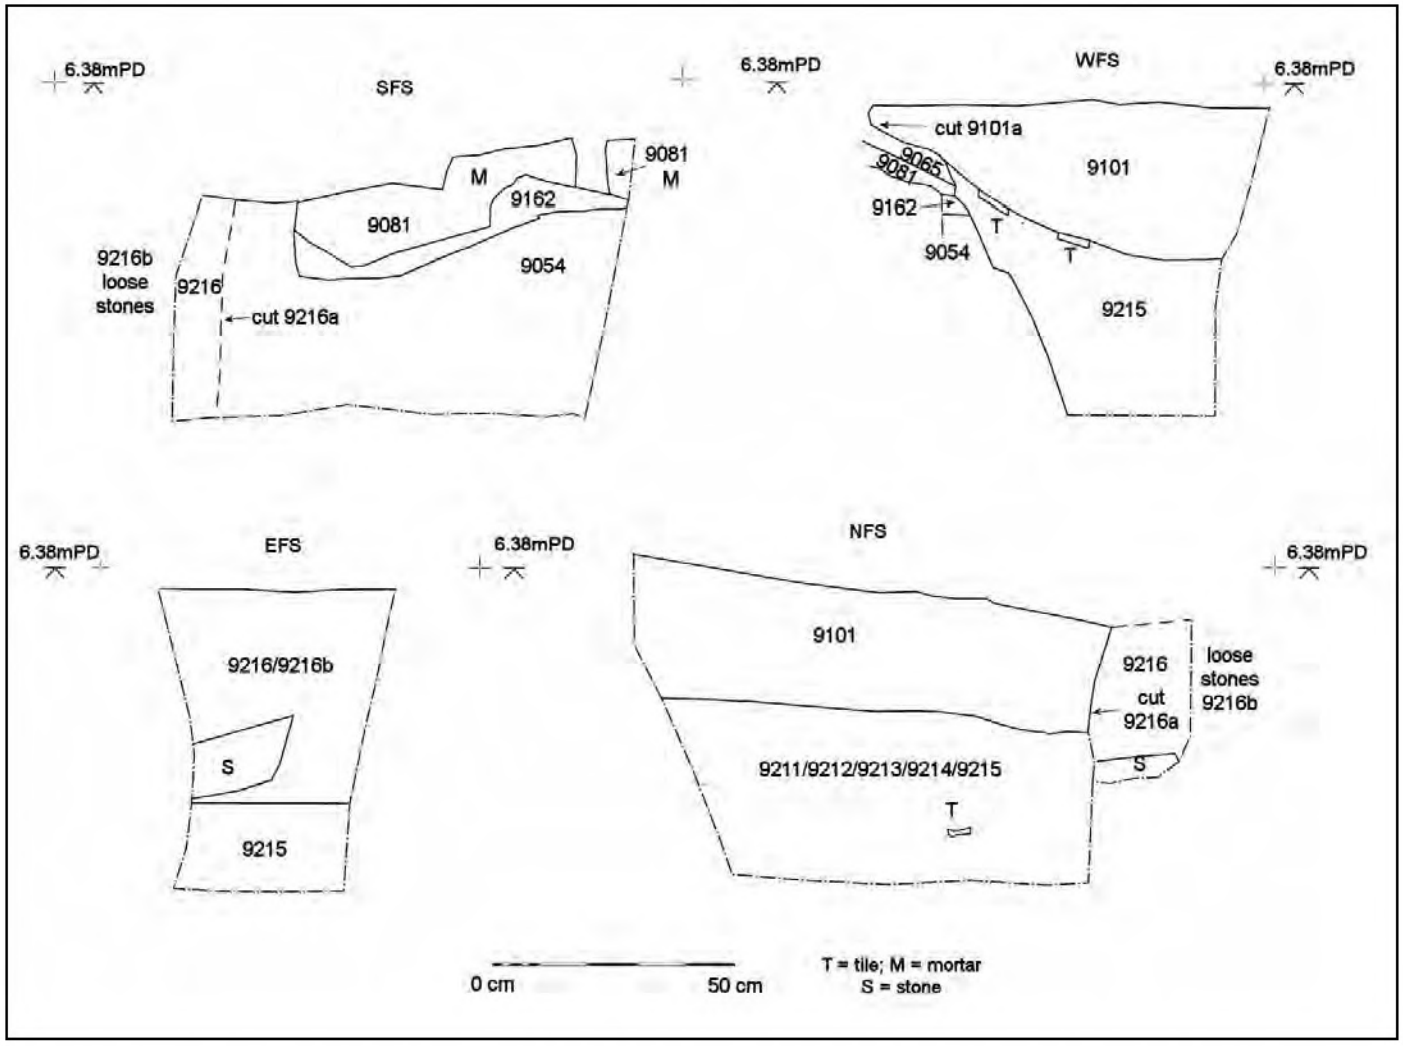
T9.C.19 West facing elevation of western village wall.



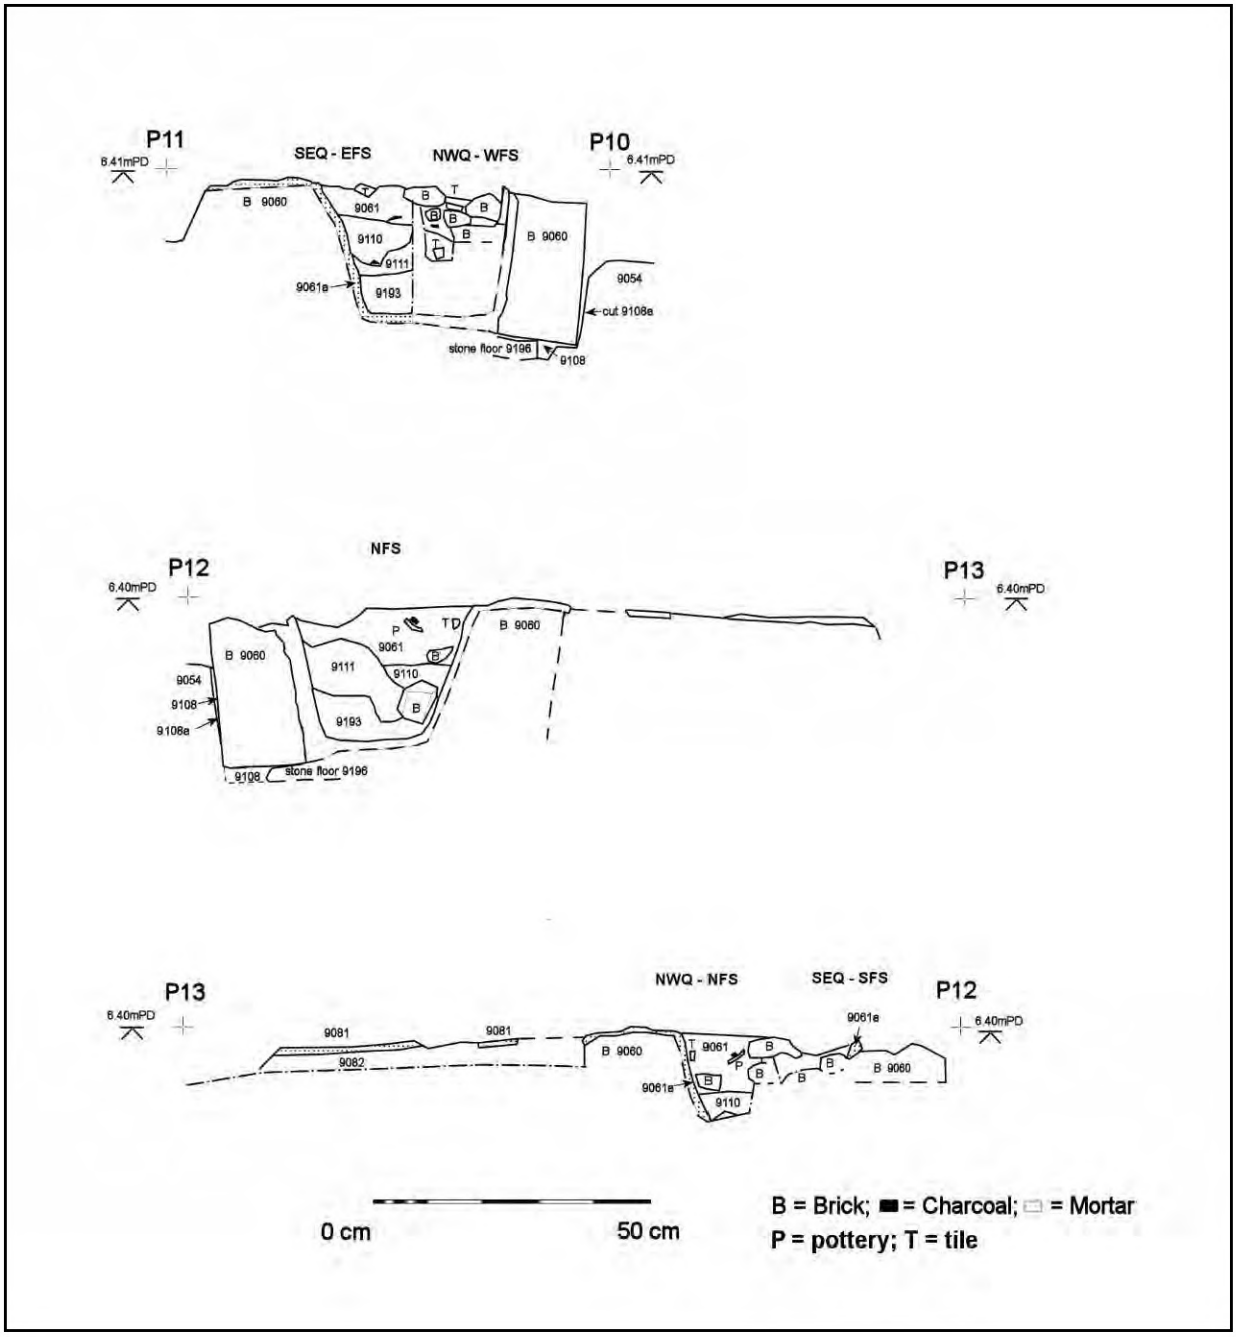
T9.C.20 South facing elevation of southern village wall.



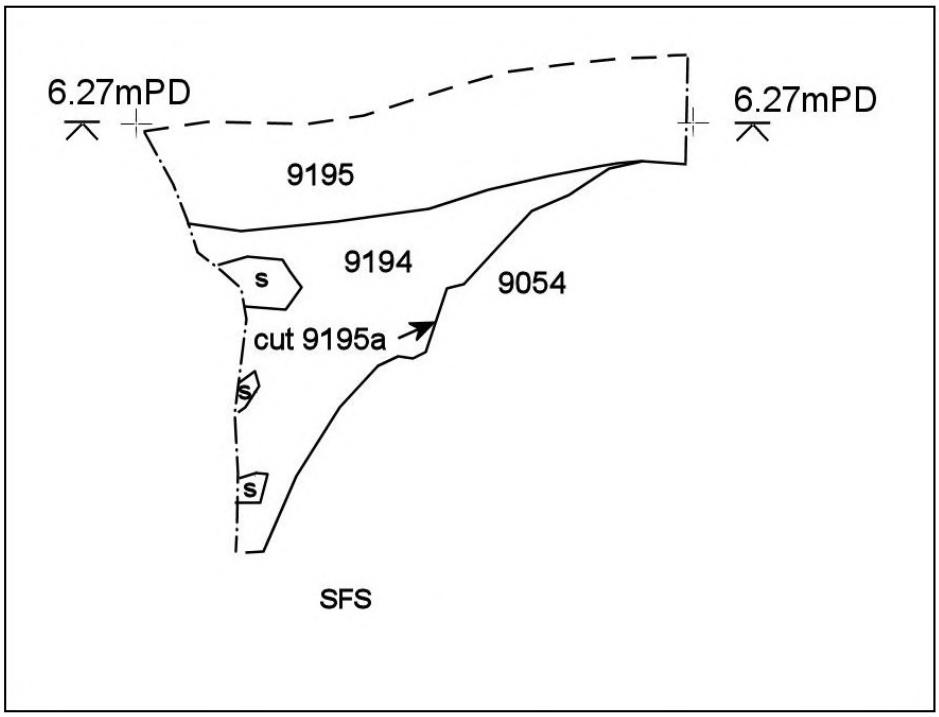
T9.C.21 East facing elevation of eastern watch tower room wall.



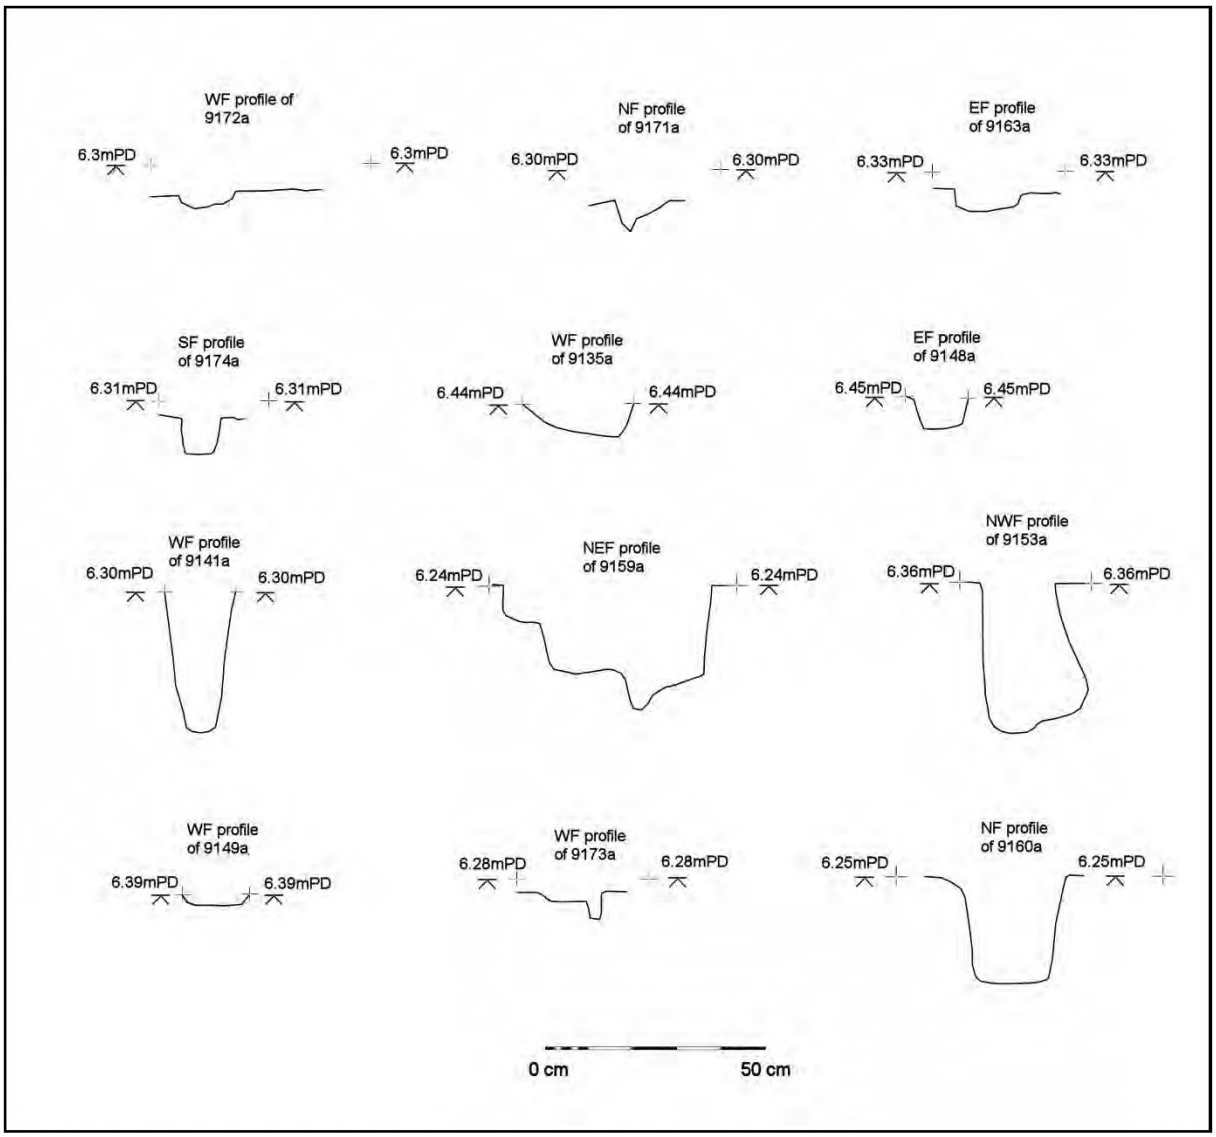
T9.C.22 Section drawings of sondage located in the south-west corner of watch tower room area.



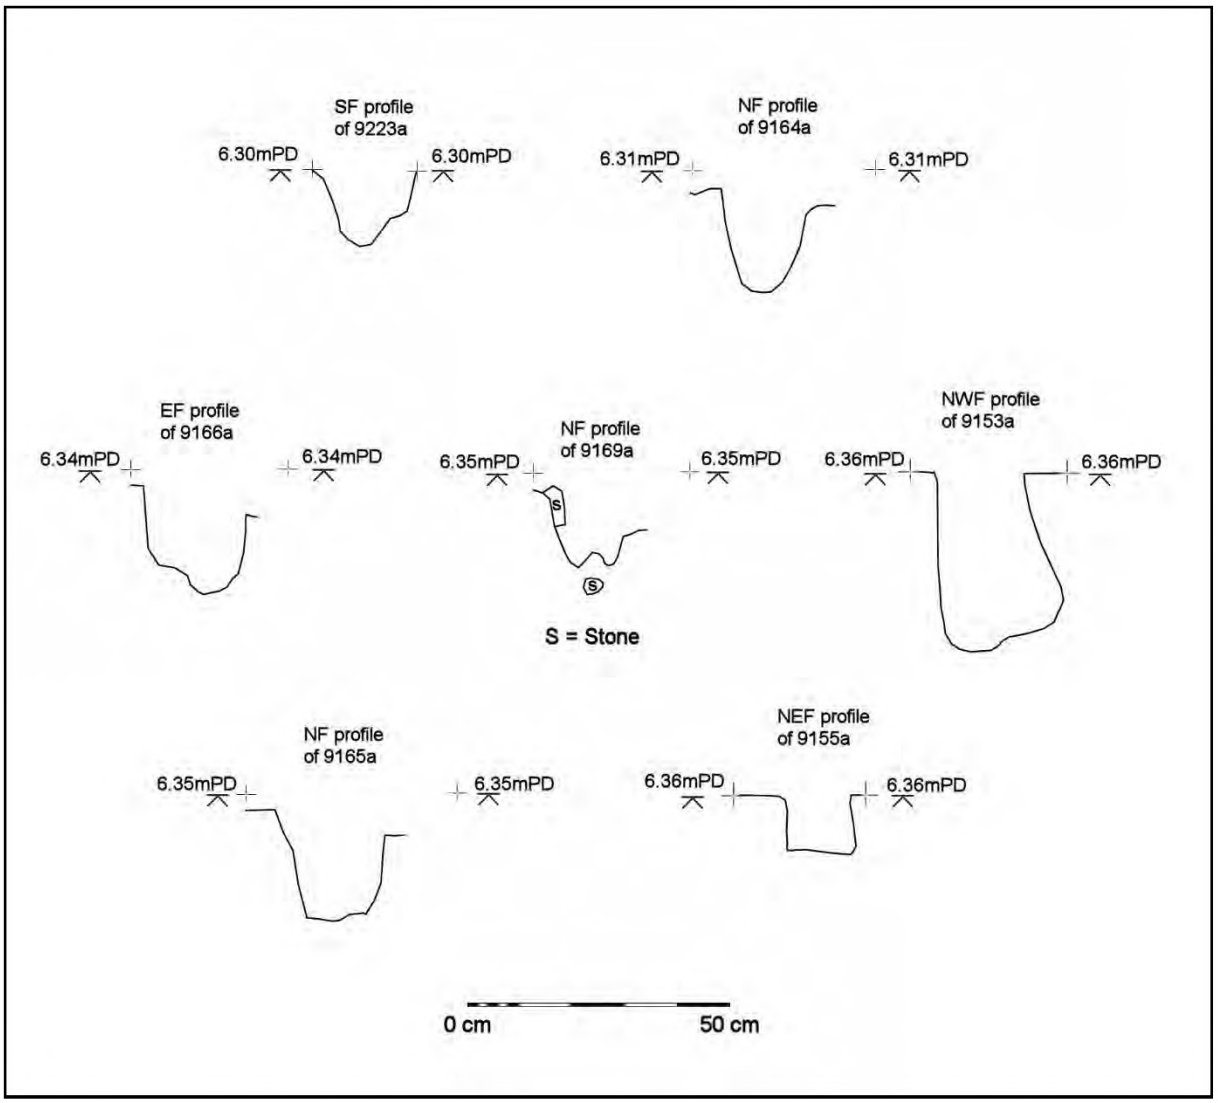
T9.C.23 Section drawings of 'oven' feature [**co.9060**].



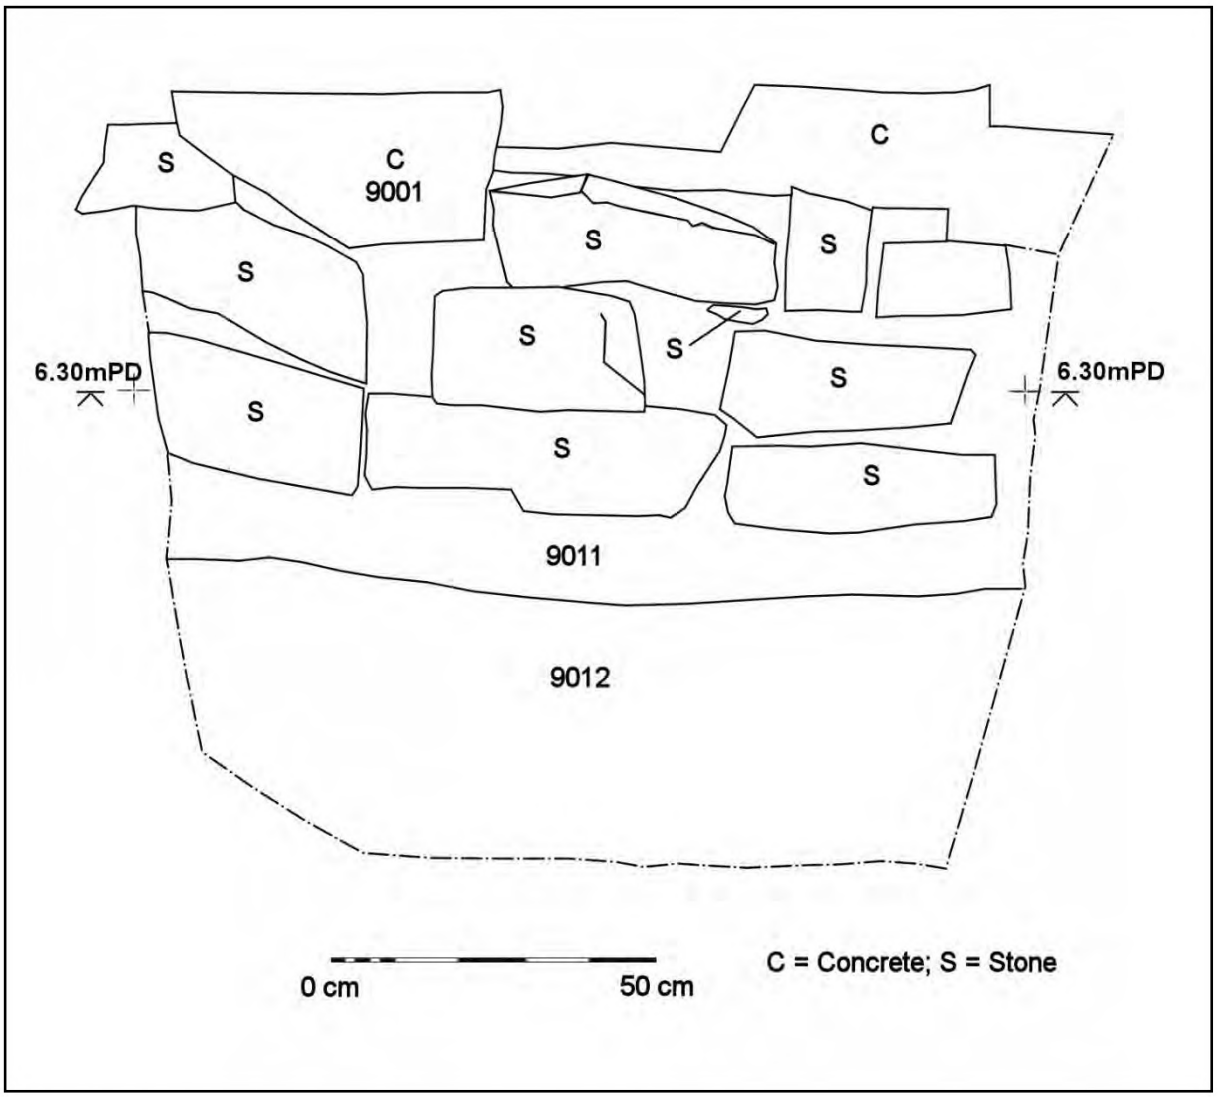
T9.C.24 South facing section of elongated feature [**co.9195a**].



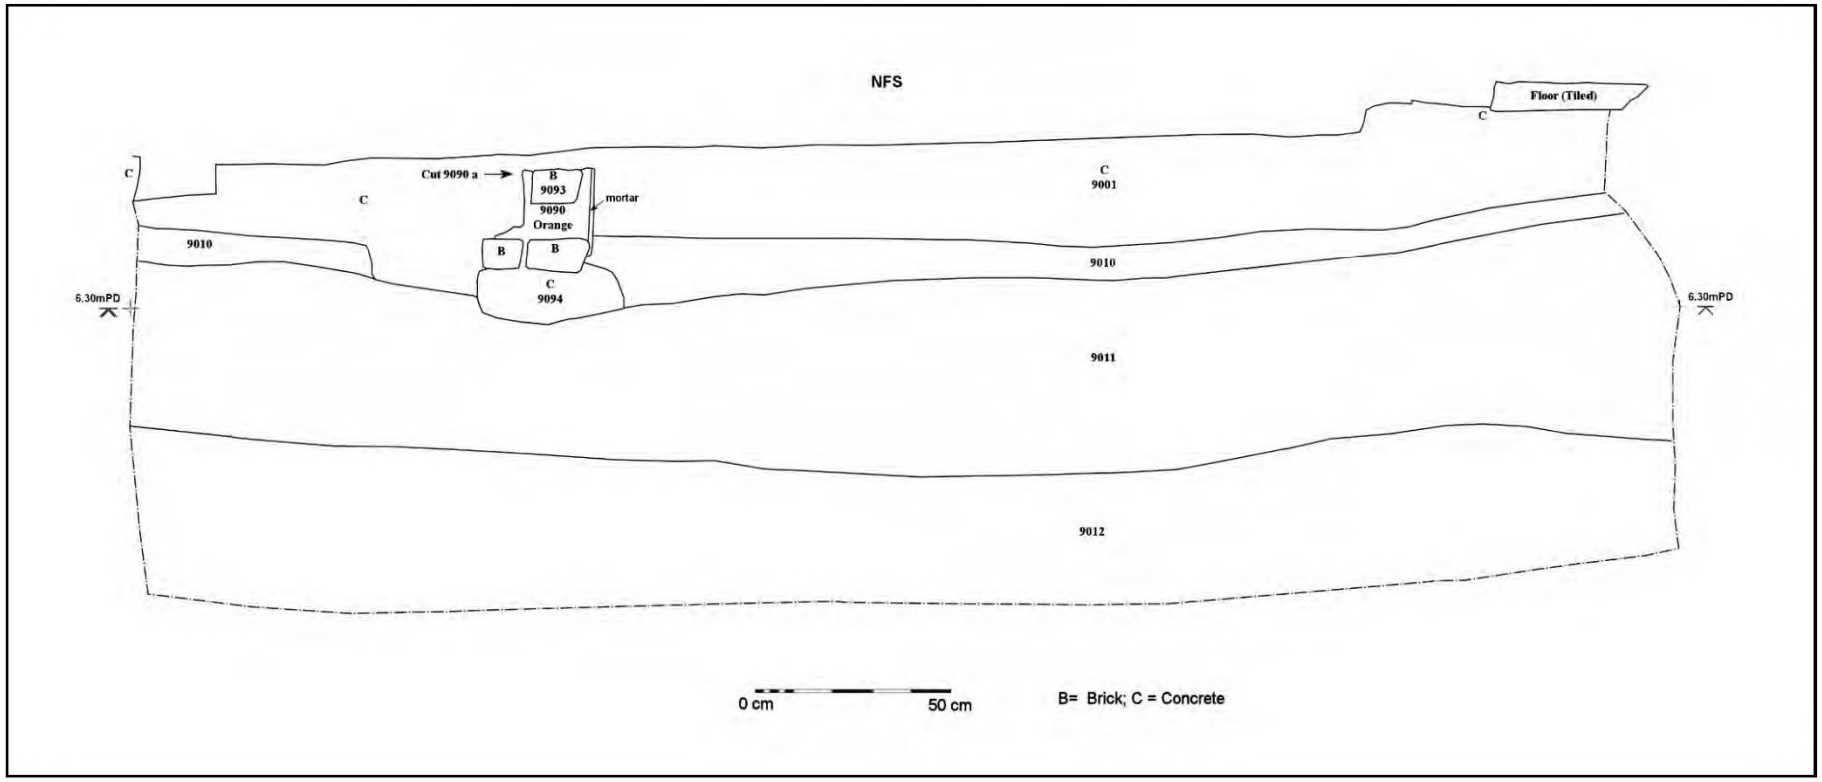
T9.C.25 Profile drawings of postholes cutting into [**co.9054**] within the watch tower room area.



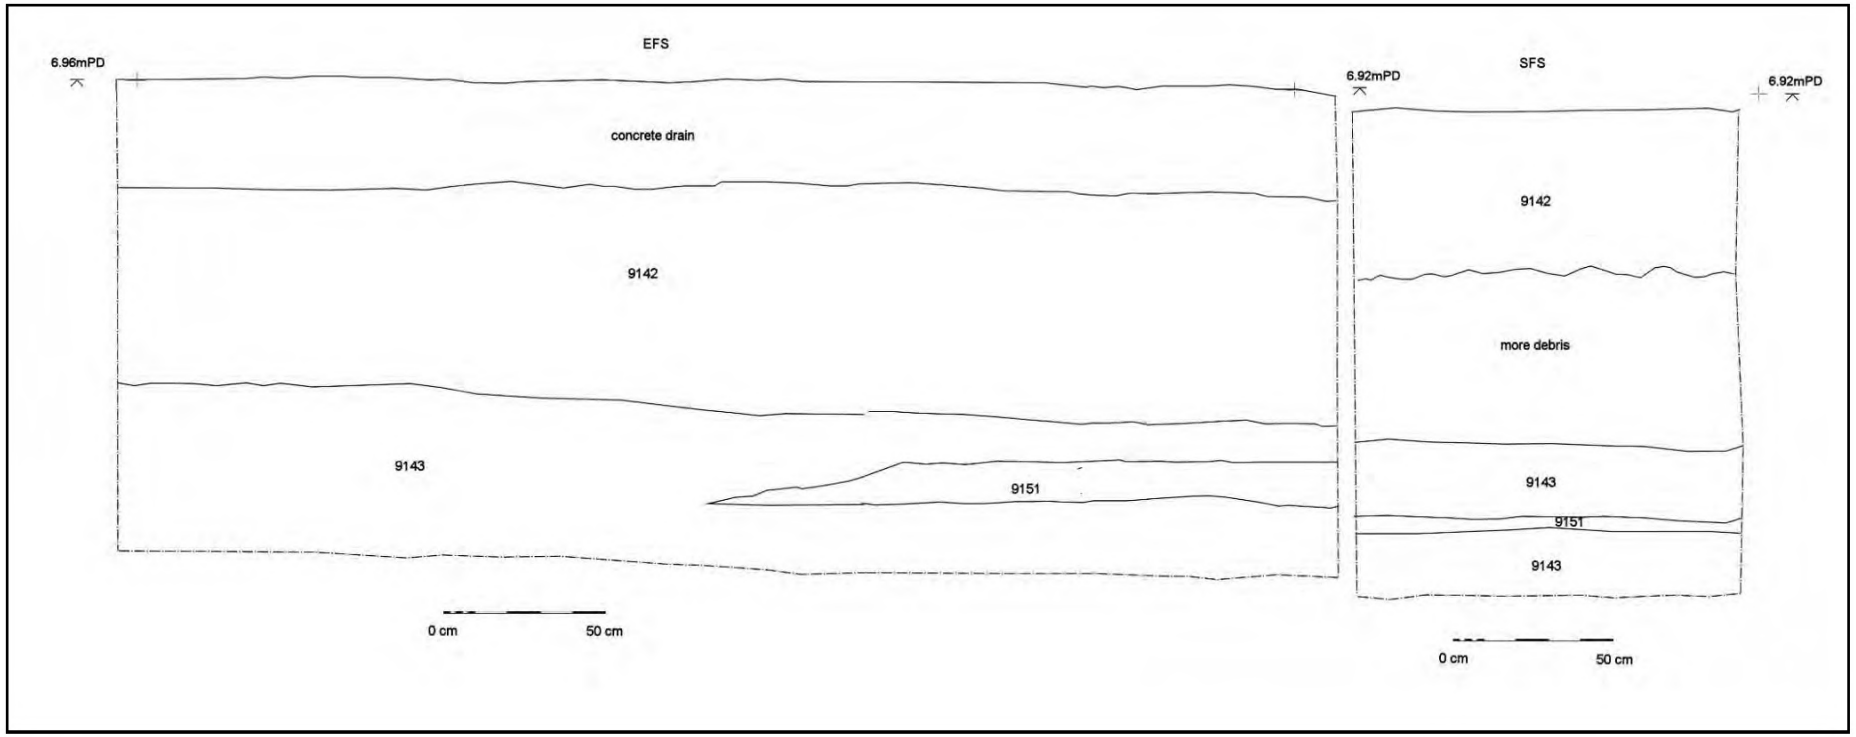
T9.C.26 Profile drawings of postholes cutting into [**co.9139/9140**] (PH **9223a**), [**co.9187**] (PH **9164a**), [**co.9162**] (PH **9166a, 9169a** and **9153a**) and [co.9156] (PH **9165** and **9155**).



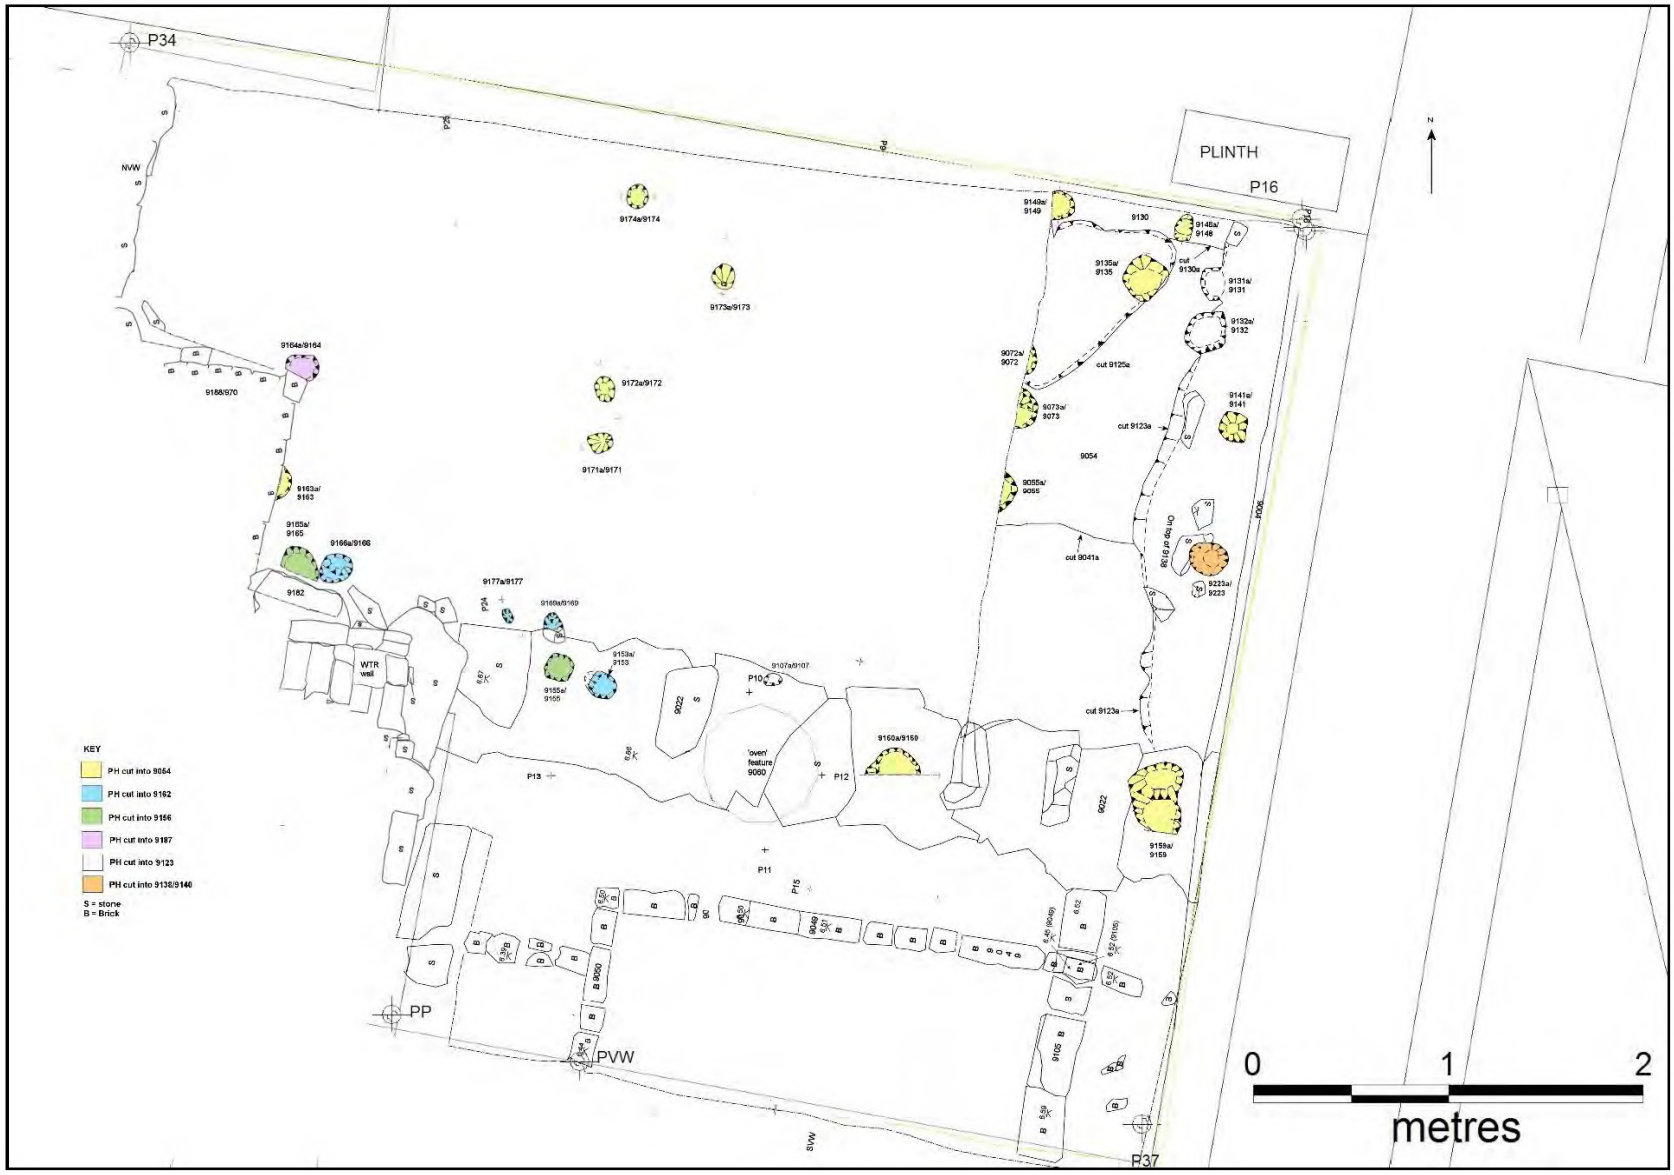
T9.C.27 West facing section of southern moat area.



T9.C.28 North facing section of southern moat area.



T9.C.29 East facing section and south facing section of western moat area.



9.C.30

Multi-phase plan showing possible postholes of different stages within the watch tower room area

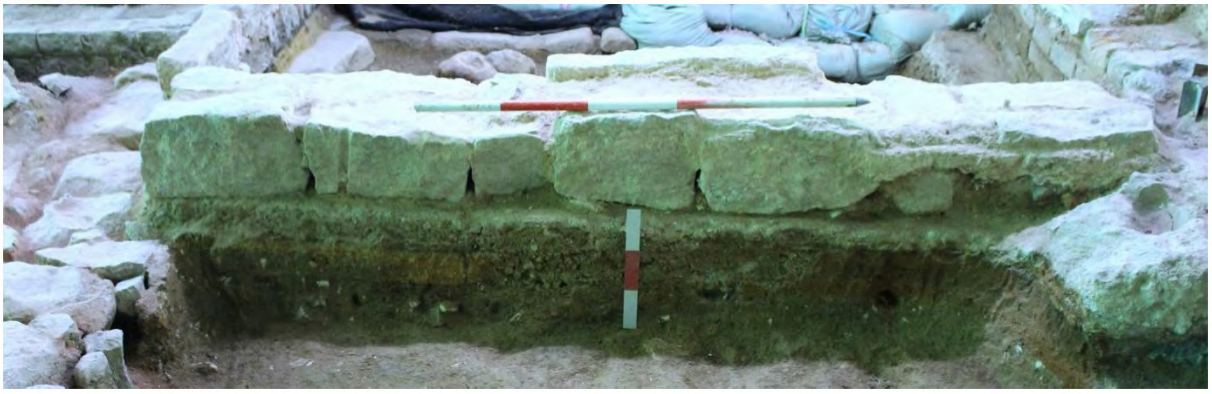
1076

T9.D Trench 9 photos

Watch tower Room Area

T9.D.1 View of the general area T9 prior to excavation showing concrete and tiled surface **[co.9001/9002/9005/9052]**, looking south-east.

T9.D.2 View of T9 showing leveller **[co.9006/9007]** and modern wall foundation **[co.9004]**; looking south.



T9.D.3 View of watch tower room area showing the modern wall foundation [**co.9004**] and underlying concrete span [**co.9044**], looking west.

T9.D.4

View of modern wall foundation [**co.9022**] and associated posthole [**co.9051a/9051**] (south-east corner), looking west.

T9.D.5 View of modern wall [**co.9047**] and underlying concrete span [**co.9048**] setting against wall [**co.9224**] along south facing section, looking north.

T9.D.6

View of modern pit feature [**co.9089a/9089**] (lower right corner) and upper fill [**co.9024/9027/9074**] for modern wall foundation [**9022**], looking north.

▲ T9.D.8 View of postholes [**co.9131a**] (left) and [**co.9132a**] (right) cutting into elongated feature [**co.9123a**], looking east.

▲ T9.D.7 View of pit [**co.9103a**] after the removal of concrete foundation [**co.9190a**], looking south.

T9.D.9 View of mixed clay floor [**co. 9034/9083/9039/9040**], looking west.

T9.D.10 Clay floor [**co. 9034/9083/9039/9040**] overlying brick alignment [**co.9105**], looking west

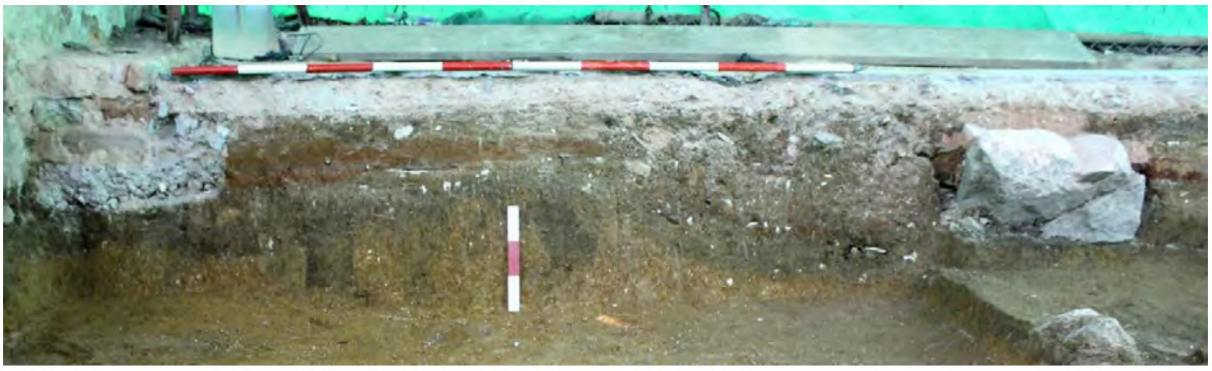
T9.D.11 Brick alignment [**co.9105**] covering modern pit feature [**co.9032**] and cutting into brick feature [**co.9049**], looking west.

T9.D.12 Pre-ex photo of posthole [**co.9223/9223a**] cutting into fill [**co.9139/9140**] within the elongated feature [**co.9123a**], looking north.

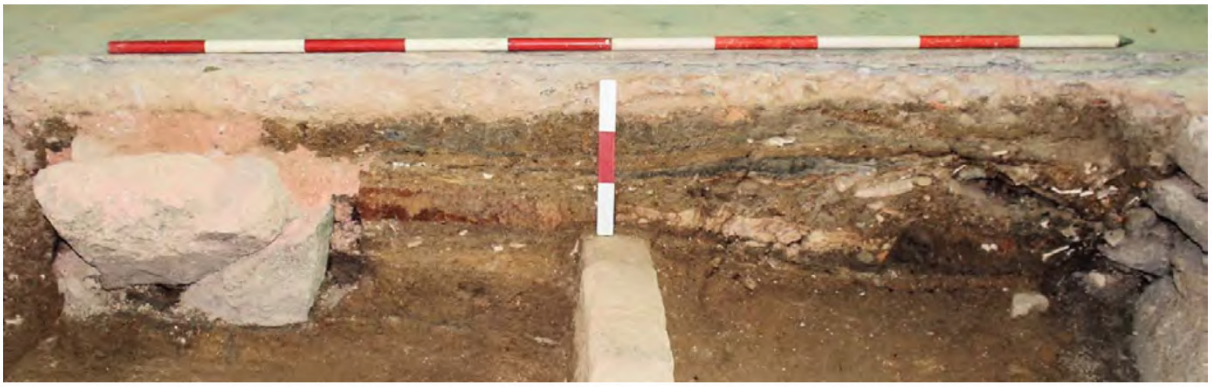
T9.D.13

View of elongated feature [**co.9123a**] along west facing section within the watch tower room area, looking south.

T9.D.14 Pottery and tile fragments found in floor [**co.9053**]; looking south.



T9.D.15 Northern end of west facing section within watch tower room area, looking east.



T9.D.16 Southern end of west facing section within watch tower room area, looking east.

T9.D.17 Brick alignment [**co.9049/9050/9134**] (middle part) sitting on top of mortar spread [**co.9081**], looking south.

T9.D.18 Brick alignment [**co.9049/9050/9134**] (eastern part) overlying mortar [**co.9081**] and possible degraded mortar [**co.9157**], looking south.

T9.D.19 Brick alignment [**co.9049/9050/9134**] (western part), looking north.

T9.D.20 View of isolated mortar [**co.9122**] identified after the removal of layer [**co.9058**], located next to brick alignment [**co.9049**], looking south.

T9.D.21 Post-hole [**co.9135a/9135**] identified after the removal of fill [**co.9125**], looking east.

T9.D.22 Postholes [**co.9149a/9149**] (left) and [**co.9148a/9148**] (right) identified after the removal of feature [**co.9130**] along south facing section, looking north.

T9.D.23 View of half-sectioned elongated feature [**co.9195a**] along the western village wall, looking west.

T9.D.24 A cluster of 9 stake holes [**co.9199a/9199 to 9207a/9207**] identified after the removal of [**co.9100**] and [**co.9096**], cutting into [**co.9101**], looking south.

T9.D.25 North facing section of sondage showing foundation trench [**co.9216a**] cutting into elongated feature [**co.9101a/9101/9213**] along SVW, looking south.

T9.D.26

East facing section of sondage showing stone foundation [**co.9216b**]; looking west.

T9.D.27 View of entrance cut [**co.9218**], fill [**co.9116/9118/9120/9121**] and threshold [**co.915**] on east facing elevation of watch tower room wall; looking west.

T9.D.28

View of elongated feature [**co.9101a**] cutting into mortar spread [**co.9081**], looking east.

T9.D.29

View of watch tower room area next to T9NN, showing possible L-shaped feature [**co.9020**] and layer [**co.9019/9187**], looking south.

T9.D.30 Close up of possible L-shaped stone feature [**co.9020**] set against stone foundation [**co.9182**] of the northern watch tower room wall, looking south.

T9.D.31

Pre-ex photo of posthole [**co.9107a/9107**] cutting into layer [**co.9106**], looking west.

T9.D.32

Pre-ex photo of postholes [**co.9155a/9155**] (bottom) and [**co.9153a/9153**] (top right), looking east.

T9.D.33 View of 'oven' feature [**co.9066**] and partially exposed overlying mortar [**co.9081**] over layers [**co.9082**] and [**co.9162**], looking south.

T9.D.34 Uppermost infill [**co.9061**] and fill between radial bricks [**co.9108**] for the 'oven' feature [**co.9060**], looking south.

T9.D.35 Cluster of bricks in fill [**co.9110**] inside mortar wall [**co.9061a**]; looking north.

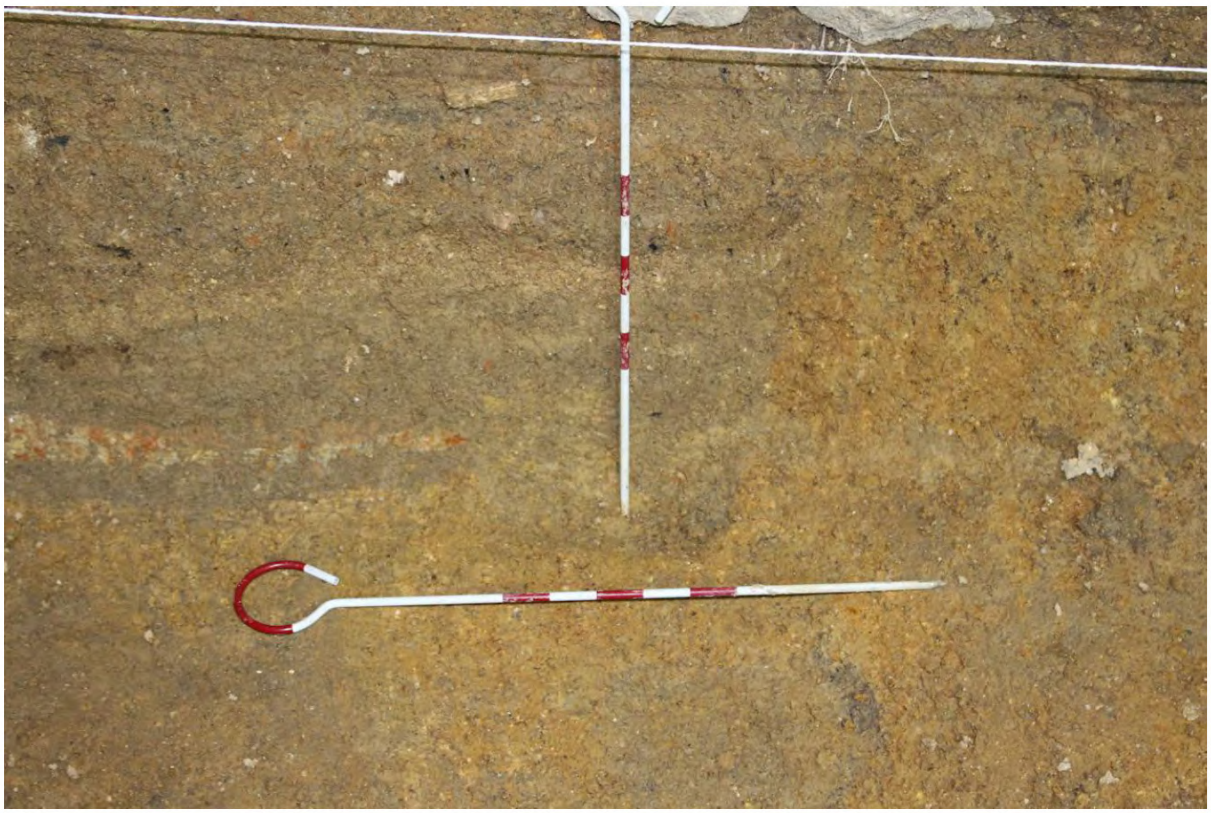
T9.D.36 Infill [**co.9111**] for 'oven' feature [**co.9060**] comprising mortar and bricks, looking west.

T9.D.37 Fill [**co.9111**] and bottom of mortar wall [**co.9061a**] of the 'oven' feature [**co.9060**], looking north.

T9.D.38

View of stone floor [**co.9196**] and cut [**co.9108a**] for 'oven' feature [**co.9060**] after the removal of fill [**co.9108**], looking west.

T9.D.39 Pre-ex photos of postholes [**co.9165a/9165**] (right) and [**co.9166a/9166**] (left) setting against stone foundation of watch tower room wall [**co.9182**], looking south.



T9.D.40 South facing section showing cut [**co.9187a**] and fill [**co.9187/9188/9156/9189**] and posthole [**co.9222a/9222**] cutting into [**co.9054**], looking north.

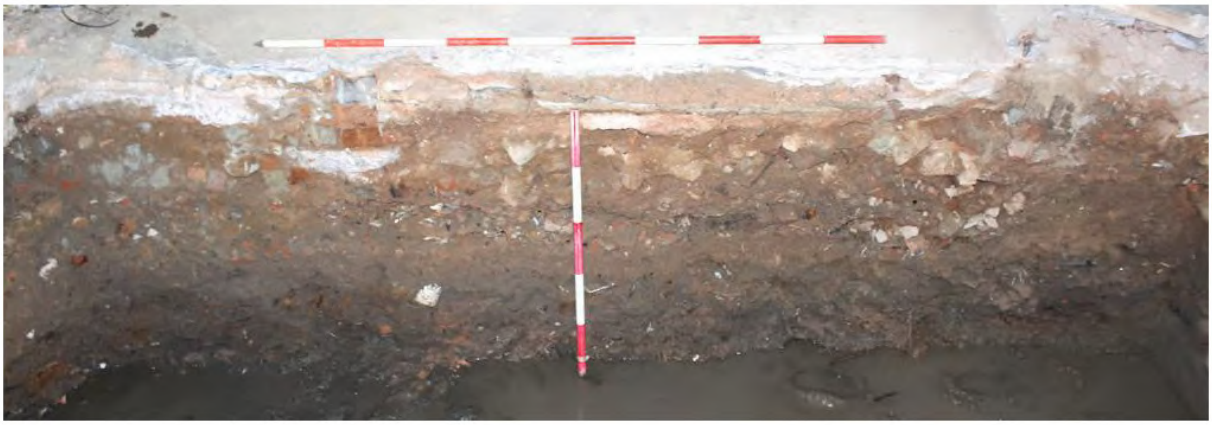
T9.D.41 View of posthole [**co.9164a/9164**] and layers underneath brick floor [**co.970/9186**], looking south.

T9.D.42 South facing section showing stone wall [**co.9224**] and underlying layers, looking north.

T9.D.43 Post-ex photo of features identified on top of layer [**co.9054**] near the watch tower room, looking south.

Southern Moat Area

T9.D.44 House ruin foundation stones [**co.9013/9043**] and associated concrete platform [**co.9044/ 9048**] sitting on upper moat fill [**co.9011**], looking west.



T9.D.45 North-facing section showing moat fill [**co.9011** and **9012**], looking south.

T9.D.46

View of southern village wall, showing the upper brick wall [**co.9009**] and the overlying threshold hold and pivot [**co.9003**], looking east.

T9.D.47 East-facing elevation of eastern watch tower room wall comprising upper brick walls [**co.9014/906**] and stone foundation [**co.9016/919**], looking west.

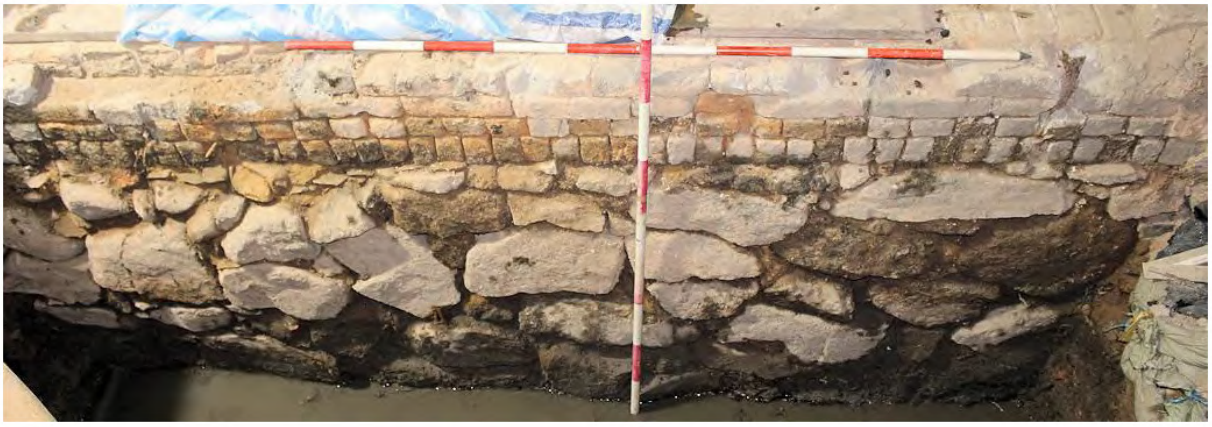
T9.D.48 South-facing elevation of SVW stone foundation [**co.9015**], looking north.

T9.D.49 View of vertical joint between SVW [**co.9015**] and WTR wall [**co.9016**], looking north-west.

T9.D.50 East-facing elevation of eastern WTR wall [**co.9014/9182**], looking west.

Western Moat Area

T9.D.51 View of western village wall, looking north.



T9.D.52 West-facing elevation of western village wall, looking east.

T9.E Trench 9 artefact description

Annex D

ANNEX D: FAUNAL REMAINS

Introduction

Both shell and bone remains were collected during the excavation by hand. The faunal remains were not collected through a formal sampling system but were instead recovered to provide an overall indication of species utilised by the village inhabitants and to observe any major trends or changes over time if possible. The shells were collected from contexts within the village, as excavation within the moat was not included in this stage. The list of identified remains is included at the end of this appendix.

Findings

Only a small number of shells and bones were excavated during the excavations which supports the findings from the previous AIA report, that most of the food waste from animal sources was disposed of outside of the village. Unlike the findings of the AIA, the number of shells collected did not outnumber the quantity of animal bones. This is partially due to the fact that the majority of shells were collected as isolated individual pieces and no large dumps of shells were discovered. The number of large mammal bones outnumbered all others, but this should not be taken as a definite indicator of food preference as the method of collection of faunal material was biased towards larger and more robust material and many of the smaller and more fragile bone elements (such as from fish and bird) are less likely to have been recovered. Due to the small number and fragmentary condition of mammal remains recovered, quantification was not possible. The majority of the remains were post-cranial pig elements (although both maxillary and mandibular elements were identified) indicating either on site slaughter or complete/half carcases that were butchered in the village. Although often in poor condition, gnawing was not prevalent on any of the recovered bones, indicating the remains were disposed of in an area not accessible to scavengers. It is also noted that several bones from Trench 5 that were collected from historical layers possibly contemporaneous to the coastal evacuation period or early Qing were the only faunal material collected that had been burnt. As these bones were the only examples showing evidence of burning, it is possible they date from the destruction of the village during the coastal evacuation period, rather than from cooking. It is also noted that all of the identifiable cow remains were also collected from earlier periods and none of the more recent or modern contexts contained such remains, instead the main species represented in these later layers was pig.

The shell remains were identified to genus and /or species where possible, but many of the remains collected were fragmentary and were not able to be classified. With respect to the contexts, most of the shells were collected from the more recent contexts and no major changes over time were able to be noted in the species represented. The main recurring species of gastropods were similar to those identified during the AIA excavations. These were *Strombus canarium* (Dog conch) which lives along the low water mark or in deeper water and a mud snail found on muddy shores and sometimes in mangroves (*Cerithidea sp.*). Both of these species are edible and would almost certainly have been collected as food. One difference between the AIA and investigation findings was that a higher percentage of (*Conus sp.*) cone shells were identified in the latter. These animals are poisonous and a use for collection of shells has not been able to be established. The most common bivalve species were also similar to those described in the AIA report with the most common being venerid clam species. These consisted of mud/ sand burrowing animals, such as *circe sp.*, *Gafrarium tumidum*,

Anamlocardia sp., and the much larger *Meretrix meretrix*. As well, the above mentioned *Arca granosa* was also one of the more prevalent species. In general, it would appear that species from a sandy/ muddy possibly mangrove environment outnumber those found in rocky boulder shores. However, the small number of elements collected does not allow for any definitive conclusions to be drawn. Kowloon Bay would have presented a suitable environment for the above described species in the past and is likely to have been the area of collection. There is no evidence that species, apart from the rock oysters (*Saccostrea sp.*) were brought in from further afield.

Conclusions

As the total number of faunal remains excavated and individual numbers of animals from the site was small, it is not possible to have a full understanding of species distribution and usage patterns at any given point or over time. As well, preservation factors and the excavation methodology have created a bias towards collection of larger and hardier elements, which predominate the assemblage. Thus, the consumption of fish and bird species is most likely underrepresented. As the collection of shellfish was undertaken for general identification and ratios, the proportion of these animals in the diet cannot be quantified.

The lack of large quantities of faunal material found within the village during the excavations for the investigation would indicate that food remains were disposed of away from the village. The information able to be discerned from the recovered faunal material, shows an expected presence of shellfish which would have been attainable from the nearby Kowloon Bay. The mammal remains indicate that the main meat consumed was pork along with chicken and beef (and it is noted that all of the remains from cow were from earlier periods). The fragile nature of fish and bird remains would indicate that they are most likely underrepresented in the collected assemblage.

Circe sp.	Bivalve	1	Sand mud burrower

Context 7064			
Taxon	**Class**	**Number**	**Comment**
n/a	Gastropod	1	Spire off a large shell

Context 7074			
Taxon	**Class**	**Number**	**Comment**
S. canarium	Gastropod	1	Intertidal shallow subtidal
Conus sp.	Gastropod	1	Sub littoral
Circe sp.	Bivalve	1	Sand mud burrower

Context 7079			
Taxon	**Class**	**Number**	**Comment**
Conus sp.	Gastropod	3	Sublittoral
G. tumidum	Bivalve	6	Mangrove
Circe sp.	Bivalve	2	Sand mud burrower
Saccostrea sp.	Bivalve	1	Rocky boulder (rock oyster)

Context 7121			
Taxon	**Class**	**Number**	**Comment**
S. canarium	Gastropod	1	Intertidal shallow subtidal

Context 7158			
Taxon	**Class**	**Number**	**Comment**
S. canarium	Gastropod	1	Intertidal shallow subtidal

Trench (T9)

Shell

Context 9011			
Taxon	**Class**	**Number**	**Comment**
M. meretrix	Bivalve	1	Sand flats
Natica sp.	Gastropod	5	Sandy shores

Context 9012			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	1	Mud/ mangrove
A. granosa	Bivalve	1	Mud burrower
Circe sp.	Bivalve	1	Sand/mud burrowers

Context 9016			
Taxon	**Class**	**Number**	**Comment**
n/a	Bivalve & coral	n/a	fragments

Context 9033			
Taxon	**Class**	**Number**	**Comment**
S. canarium	Gastropod	2	Intertidal- shallow sublittoral
T. argyrostoma	Gastropod	1	Rocky boulder
Natica sp.	Gastropod	1	Sandy shores
Anomalocardia sp.	Bivalve	1	Sand burrowers
Circe sp.	Bivalve	1	Sand/ mud burrowers
M. meretrix	Bivalve	1	Sand flats

Context 9034			
Taxon	**Class**	**Number**	**Comment**
S. canarium	Gastropod	1	Intertidal- shallow sublittoral
Conus sp.	Gastropod	1	Sublittoral

Context 9038			
Taxon	**Class**	**Number**	**Comment**
Natica sp.	Gastropod	1	Sandy shores
M. meretix	Bivalve	2	Sand flats

Context 9053			
Taxon	**Class**	**Number**	**Comment**
Natica sp.	Gastropod	1	Sandy shores
Circe sp.	Bivalve	2	Sand/ mud burrowers
Anamalocardia sp.	Bivalve	3	Sand burrowers

Context 9056			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	3	Mud/ mangrove
G.tumidum	Bivalve	2	Mud/ mangrove
M. meretrix	Bivalve	1	Sand flats
Circe sp.	Bivalve	1	Sand/ mud burrowers
Anomalocardia sp.	Bivalve	3	Sand burrowers

Context 9058			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	1	Mud/ mangrove
Anomalocardia sp.	Bivalve	3	Sand burrowers

Context 9062			
Taxon	**Class**	**Number**	**Comment**
Circe sp.	Bivalve	1	Sand/ mud burrowers

Context 9063			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	4	Mud/ mangrove
A. granosa	Bivalve	2	Mud burrowers
Anomalocardia sp.	Bivalve	1	Sand burrowers
G. tumidum	Bivalve	1	Mud / mangrove

Context 9063			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	1	Mud/ mangrove

Context 9101			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	1	Mud/ mangrove

Context 9110			
Taxon	**Class**	**Number**	**Comment**
n/a	n/a	n/a	Small coral fragments

Context 9129			
Taxon	**Class**	**Number**	**Comment**
S. canarium	Gastropod	1	Intertidal/ shallow subtidal
Conus sp.	Gastropod	1	Sublittoral
G. tumidum	Bivalve	4	Mud/ mangrove
Barbatia sp.	Bivalve	1	Rocky boulder near low water mark

Context 9138			
Taxon	**Class**	**Number**	**Comment**
M. meretrix	Bivalve	2	Sand flats
Anomalocardia sp.	Bivalve	1	Sand burrower
Circe sp.	Bivalve	1	Sand/ mud burrower

Context 9149			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	1	Mangrove / mud

Context 9150			
Taxon	**Class**	**Number**	**Comment**
M. meretrix	Bivalve	4	Sand flats

Context 9210			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	2	Mangrove / mud

Context 9215			
Taxon	**Class**	**Number**	**Comment**
Cerethidea sp.	Gastropod	2	Mangrove / mud
Circe sp.	Bivalve	1	Sand/ mud burrower
